Table knives, no better knives than we can show you good for any table.

BOYLE & SON.

She Didn't Put It Out.

An old lady of his flock once called upon Dr. Gill with a grievance. The doctor's neckbands were too long for her ideas of ministerial humility, and after a long harangue on the sin of pride she intimated that she had brought a pair of scissors with her and would be pleased if her dear pastor would permit her to cut them down to her notions of propriety.

The doctor not only listened patiently, but handed over the offending white bands to be operated upon. When she had cut them to her satisfaction and returned the bibs it was the doctor's turn.

"Now," said he, "you must do me a good turn also."

"Yes, that I will, doctor. What can it be?"

"Well, you have something about you which is a deal too long and which causes me no end of trouble, and I should like to see it shorter."

"Indeed, dear sir, I will not hesitate. What is it? Here are the scissors; use them as you please."

"Come, then," said the sturdy divine, "good sister, put out your tongue."—London Mail.

Out of the Barrel.

A Boston steamship man was a witness of this incident: A liner was unloading at one of the Charlestown docks. A cook's helper, a small and very black negro, was leaning over the rail. A large hoghead of molasses came creaking up on the end of the chain and swung unsteadily to and fro. Finally, with a smash, it struck the rail and broke into bits, molasses flying everywhere. There was a wild cry, and from the wreckage came the negro, soaked from head to foot and entirely unrecognizable. He danced madly about and shouted like nothing human. A little Irishman, in overalls, regarded the apparition for a moment with mouth open awe, and, a light breaking on him, he shouted: "Molke! Fer the love er hivin! Molke! Will yez see phat came out of the barrel uv molasses!" It took the combined efforts of the superintendent and his assistants to convince Pat that he hadn't discovered a new stowaway method.

The Rush of the Pintail.

The species of wild ducks known as pintails have a peculiar habit during the mating season of descending from a great altitude at an angle of about

THE CHEAPSIDE STORE.

This Store was closed yestervay (Thursday) all day in order to enable us to

re-mark the balance of stock; reopen to-day (Friday) with everything marked at closing-out prices. As these premises have been rented to Messrs. Madole and Wilson, we must vacate in a very short time, and as we have not or will not remove any of the remaining stock to our Rennie Block Store, everything must be cleared out at the old stand, Cheapside. For those who have been waiting for the grand final bargain giving, this is your opportunity to secure the remaining lots at greater reduced prices. As all lines have been broken, odd sizes and only small quantities remain, we give you a partial list of the remaining numbers.

Irving and Thinness.

Sir Henry Irving was the first actor to make slenderness acceptable or tolerable on the English stage. He was very thin in his earlier middle age, and theater goers of that day wondered whether they could endure to see a long figure and legs, both unpadded. Until then fatness had been obligatory. It is difficult to realize now the full convention of chest and shoulders and calves. Comparatively lately a man of stage experience was urgent with a company of English amateurs that all the thin women and all the lean men should be made plump. "Nothing," he said, "is so impossible on the stage as thinness." Irving changed all this because his genius was wedded to unconpromising thinness.

to degrees with the wings sumy outspread and slightly curved downward. The bird is frequently so high that the noise produced by its passage through the air is heard for several seconds before the bird comes into sight. It descends like a meteor till within a few feet of the ground, when a slight change in the position of the wings sends the bird gliding away close to the ground several hundred yards without a stroke of the wings. The sound produced by this swift passage through the air can only be compared to the rushing of the wind through tree tops. At first it is like a murmur; then it rises to a hiss, and as the bird sweeps by it is almost a roar.

Women and Mirrors.

German statisticians with no great burden of serious work on their shoulders have been calculating what part of a woman's life is spent in looking at herself in a mirror. She begins, as a rule, at six years. From six to ten she has a daily average of seven minutes. From ten to fifteen she devotes a quarter of an hour to her glass. At twenty she certainly spends thirty minutes daily admiring herself and when past twenty a whole hour. The statisticians are tactful enough not to say when a woman begins to take less interest in her personal appearance, but women more than sixty years old do not, they say, spend more than ten minutes daily at their mirrors. All this time reckoned up—it is a simple sum in multiplication—makes 7,000 hours, or about ten months, at the mirror. They then proceed to compare the time which a man—a German man—devotes to this occupation and come to the conclusion that his average is seven months.

The Breeding Stone.

There was a curious superstition which prevailed in Essex half a century ago. It was believed that certain stones possessed the power of breeding other stones. I remember being taken by a man of the upper laboring class to see a well known breeding stone which lay on the sward by the side of a lane in the parish of South Weald, near Brentwood. It was seemingly a water worn block of sandstone or possibly, I have since thought, of pudding stone, which would explain a great deal.

It was larger than a man's head, with a cup shaped cavity the size of a small orange, in which lay a pebble about as big as an acorn. I was told that this pebble continually grew larger and that if it were removed the breeding stone would begin to breed another. It was evident that the man firmly believed what he told me, and he got quite angry when I ventured to cast a doubt upon the story.—Notes and Queries.

A Daring Deed.

While the mutinous sepoys were at tacking General Wheeler's intrenchments at Cawnpur a shot from their batteries blew up the contents of a two wheeled cart loaded with cartridges. It also set fire to the wood work of the cart, which was standing in the place where the English ammunition was stored. Both the mutineers and the English saw that if the fire was not extinguished there would soon be a most disastrous explosion. The sepoy batteries therefore poured in a deadly stream of round shot to prevent the English from putting out the flames. A young Lieutenant, Delaforse, unmoved by the concentrated fire of shot threw himself under the blazing cart, tore away the burning wood with his hands and, throwing earth up on the blazing brands, stifled the fire before it could spread to the ammunition. How he escaped the rain of bullets is incomprehensible.

NANEE EXPRESS.

DA-FRIDAY, JANUARY 5th, 1906

\$1 per Year in advance: \$1.50 if not so paid.

LAPUM'S WEST.
Well, election is over, and local Option was defeated by a very small majority. But we are not discouraged, it only means another year's wait. School reopened here Monday, with Miss Asselstine, of Wilton, as teacher. This is the sixth year she has taught and still no complaints.

Mrs. W. Lapum was in Kingston on Saturday, attending the funeral of her brother-in-law, Mr. H. Henzy. She remained over Sunday with her sister but is expected home this week.

Mr. B. Vanaalstine is spending a few days this week visiting at Sperry Rikley's.

Mr. and Mrs. Ed Hogeboom of Greta spent Sunday visiting his aunt, Mrs. T. B. Ham.

Mr. and Mrs. H. Bush, and Mr. and Mrs. F. Brown, spent New Years Day at Mr. Cryus Bush's at Thompson's Mills.

Mr. Edwin Bell, accompanied by Mr. and Mrs. Benjamin Rose, spent Monday, at Mr. J. E. Storms, near Murvale.

Not quite snow enough for good sleighing.

CAMDEN EAST
The annual Xmas tree at Hinch's Hall, Dec. 29th, was a great success all round good recitations were given by Miss Eva Hanna, of Desmond, Adam Hamilton, and Richard Quinn. The chorus, and carols went well. The little girls sang a good chorus, "Music Everywhere" and the boys in "The Newspaper Boy." A good duet was rendered by Miss Ida Jackson and Mr. Earl Bertram. Violin Solos were given by Mr. Chas. Quinn and Mr. Earl Bertram. The Scarf Drill in costume was tastefully put on the stage and the scenic effect was excellent. The singing chorus accompanied by Miss L. Hinch and sung to a popular air took well. The choruses, "Gliding" and "Hearts of Oak" went well. W. J. White, a first-class comedian from Toronto, assisted with the programme. He stands in the first rank of Public Entertainers and the audience was delighted with him. If he comes again

MADOLE & WILSON.

For four years Almonte has owned and operated the electric light system, furnishing business and domestic light as well as street lamps. In round figures the yearly profit of \$1,500 is earned after providing for operating expenses, interest, repairs and a sinking fund which will in time wipe out the whole debt. Citizens have been getting lights at prices lower by 25 per cent than paid a private company.

When Rheumatism is torturing the body the sufferer wants relief quick. He does not want to be told that he is suffering from uric acid poison in his blood when perhaps he knows that Rheumatism has been in his family for generations, that he is predisposed to it, that he got wet through or chilled through the other day and that at once his old enemy began operations. He does not want to take a lot of medicine into his stomach to drive that awful pain out of his leg but he feels as if he wanted something to go right to the spot. This is where Tuck's Bone Oil comes in. It is a powerful, penetrating oil that goes right to the spot, goes quick and safe and sure. It acts on the seat of pain and if used according to directions will cure Rheumatism. It has done it for hundreds of others, it will do it for you. For sale by all medicine dealers at 50c. a bottle or sent prepaid by The Tuck Bone Oil Company, Limited, Smith's Falls, Ontario.

THE BALTIC PROVINCES

The Whole Population is Defying the Russian Authorities.

REBELS ARE WEAKENING.

A despatch from London says:—There are many reports that the rebels in Moscow are weakening, some going so far as to say that they are crushed. It is impossible to verify them. They can only be quoted from their respective sources. A St. Petersburg despatch has reached Berlin saying that Wednesday night passed quietly in Moscow, and that on Thursday the fighting seemed to be all over, order having been restored.

The St. Petersburg correspondent of the London Daily mail, telegraphing on Friday, said that the revolutionists in the Pryessnya area in Moscow had despatched messengers to the Mayor, requesting him to parley for terms on their behalf with the Governor-General. The Mayor assented. The Pryessnya revolutionists are ready to surrender their arms and ammunition provided they are guaranteed immunity from punishment. Five more battalions of troops arrived by train at Moscow on Friday. Among them were detachments of the Guards from St. Petersburg, including the famous Semonovsky Regiment, with machine guns and 250,000 rounds of ammunition. They were attacked the moment they left the train. The revolutionists along the railway and in the Sadovaya, Arbat, and Tverskaya quarters are still fighting, though they are apparently losing heart. The bombardment of these areas continues. Shops and offices are beginning to open in other quarters. A few factories are resuming work.

SERIOUS SITUATION.

A despatch from St. Petersburg says:—Gen. Mistchenko, who commanded the Cossacks in Manchuria, has arrived in Moscow from the Far East. He had a narrow escape from capture. It is reported that he will immediately be employed in an important capacity, probably to repress the rebellion in the Baltic provinces, whither the First Army Corps in Manchuria will be sent when it arrives shortly.

Thus far little has been heard of happenings in those provinces, but it is believed that, so far as Russian domination and unity are concerned, the situation there is far more serious than it is in Moscow, the trouble in the latter place being merely bloody rioting by a minority of enthusiasts and a number of hoodlums, while in the Baltic provinces practically the whole population is defying the authorities, bent upon an absolute and final separation. This is equally true of Finland, with the absence thus far of bloodshed and excesses that have characterized the rioting in the Baltic provinces, while the Caucasus apparently must be entirely reconquered or lost to Russia.

The Slovo declares it has learned that the bloodshed at Moscow has been frightful, that the casualties will reach 15,000, and that about 100 Red Cross workers have been despatched from St. Petersburg to Moscow to assist in caring for the wounded.

THREE "ARMIES" BUSY.

A message from Moscow says that during the night the artillery worked at destroying the barricades. The revolutionists, this message, says, are divided into three "armies." The

A despatch to the London Telegraph from St. Petersburg says the railway service between that city and Moscow underwent several interruptions for the first time on Tuesday, many trains from Moscow not arriving. Telegraphic communication also ceased temporarily. The telephone office was besieged Tuesday by a crowd of citizens, who were desirous of calling up friends in Moscow. The authorities charged three times the usual fees, but the concourse of people awaited their turn all night. Trains taking travelers for Germany, France and England were accompanied by military escorts, because the passengers are mostly wealthy. No trains are arriving from Odessa.

A St. Petersburg despatch says that Gen. Deludin, the Prefect of Police, has received a message by telephone from Moscow, saying that the number of persons killed and wounded in the street fighting is 10,000. The insurgents number 60,000 and have six machine guns of the latest pattern.

MORE SAILORS MUTINY.

A despatch from Berlin says:—It is stated here that the crews of the Russian warships at Libau, who were ordered to proceed to Riga to quell the revolt there, mutinied and refused to work. Consequently the ships have not started.

BABY'S COMFORTER.

Sir Wm. Broadbent Regards It as an Invention of the Devil.

The earliest illusion of extreme youth—the Indian-rubber teat, or baby's "comforter"—was denounced by Sir William Broadbent recently in an address on London's tuberculosis children, delivered at the Council of the Invalid Children's Aid Association, at Denison House, Victoria.

"An invention of the devil," "A fraud on the unhappy child," "A waste of digestive secretions," "were some sort of the picturesque epithets applied by Sir William to the "comforter," to which he attributed much infantile disease. Many evil effects arose from dirty feeding bottles.

It was a remarkable fact, he said, that while consumption had steadily diminished year by year during the last thirty years, the death rate from tuberculous affections among children had distinctly increased. During the years 1901 to 1903, 6,391 children under the age of five years succumbed to different forms of tuberculosis, of whom 2,894 died before they were a year old.

On public grounds, said Sir William Broadbent, these deaths were scarcely to be regretted. If a child contracted tuberculosis at an early age, it was probably very susceptible to disease, and for its own sake death was certainly preferable to a life of suffering, while in the interests of the community at large the elimination of those who might grow up to be a burden and a source of weakness was desirable. Not infrequently the removal of these weakly children allowed the stronger children of the family a better chance of growing up healthy.

A great need exists, in Sir William Broadbent's opinion, for a home where tuberculous children could be received and given the benefit of open

LEADING MARKETS

BREADSTUFFS.

Toronto, Jan. 2.—Wheat—Ontario—79c bid 78c asked for No. 2 white, red or mixed at outside points, goose and spring 74c to 75c.

Wheat—Manitoba—Prices at lake ports are 89c for No. 1 hard, 86c for No. 1 Northern, and 83c for No. 2 Northern. Flour—Ontario—Export agents bid \$3.10 for 90 per cent. patents in buyers' bags at outside points. Domestic sales are at \$3.35 to \$3.45. Manitoba, \$4.50 to \$4.80 for first patents, \$4.30 to \$4.40 for second patents, and \$4.20 to \$4.30 for bakers'.

Milled—Ontario—Bran \$15.50 to \$16 in car lots outside, shorts \$17 to \$18. Manitoba bran \$17 to \$17.50, shorts \$18.50 to \$19.50 at Toronto and equal freight points.

Oats—Quiet at 35c outside. Barley—40c to 47c for No. 2, 44c to 45c for No. 3 extra, and 41c to 42c for No. 3 at outside points.

Peas—Steady at 78c to 79c at outside points.

Rye—Steady at 70c outside.

Buckwheat—Nominal at 51c to 52c outside.

Corn—New Canadian 42c to 44c Chatham freights. American No. 3 yellow 51c to 51½c at Toronto, and 2c to 4c more outside according to freights.

Rolls—Oats—\$5 in barrels and \$4.75 in bags on track here; 25c more for broken lots here and 40c outside.

COUNTRY PRODUCE.

Butter—Quotations are unchanged.

Creamery 24c to 25c

do solids 23c to 24c

Dairy 1b rolls, good to choice. 21c to 22c

do tubs 21c to 22c

do medium 20c to 21c

do inferior 19c to 20c

Cheese—Steady to firm at 13c for large and 13½c for twins.

Eggs—24c to 25c for fresh gathered, 22c to 23c for cold-storage and 20c to 21c for limed. Fresh gathered eggs are coming in much more freely than at this time a year ago.

Poultry—Fat chickens 8c to 9c, thin 7c to 8c; fat hens 6½c to 7½c, thin 5½c to 7c; ducks 11c to 12c, thin 6c to 8c; geese 10c to 11c; turkeys 13c.

Potatoes—Unchanged—Ontario, 65c to 75c per bag on track here; 75c to 85c out of store; eastern, 75c to 80c on track and 90c to 95c out of store.

Dressed Hogs—\$7.75 per cwt to \$8 per cwt for car lots of dressed here.

Baled Hay—\$8 per ton for No. 1 timothy in car lots here and \$6 for No. 2.

Baled Straw—\$6 per ton for car lots on track here.

BUSINESS AT MONTREAL.

Montreal, Dec. 26.—The market for oats is easy in tone, the offerings being more liberal, but business continues quiet, and prices were unchanged this morning. There was some demand for American mixed and No. 3 yellow corn. The flour market rules steady under a good demand, both for export and local trade. There is no change in prices. Bran continues very firm, the offerings being small. Prices are steady at last week's advance. There is no change in the market for hay. Oats—No. 1 white, 39c; No. 3 white, 38c, and No. 4 white, 37c. Barley—Manitoba, No. 3, 48c; No. 4, 46½c. Corn—American mixed, 53c; No. 3 yellow, 53½c, ex. track. Flour—Manitoba spring wheat patents, \$4.90 to \$5; strong bakers, \$4.40 to \$4.60; winter wheat patents, \$4.25 to \$4.50; straight rollers, \$4 to \$4.10; do., in bags, \$1.55 to \$1.65; extra, \$1.65 to \$1.75. Feed—Manitoba bran, in bags, \$17; shorts, \$20 per ton; Ontario bran, in bulk, \$14.50 to \$15; shorts, \$20; milled mouille, \$21 to \$24; straight grain mouille, \$25 to \$27 per ton. Rolled oats, per bag, \$2.35 to \$2.45; cornmeal, \$1.45 to \$1.50 per bag. Hay—No. 1, \$8.50 to \$9; No. 2, \$7.50 to \$8; clover, mixed, \$6 to \$6.50, and pure clover, \$6 per ton, in car lots. Cheese—Ontario, 12½c to 13c; Eastern, 12½c.

HOME.

DOMESTIC RECIPES.

Bread Cake.—On baking day take from your dough a piece large enough to make a loaf. Add to it a coffee cupful of sugar, a cup of raisins and currants mixed; butter the size of an egg; a tablespoonful of caraway seeds, or a teaspoonful of cinnamon extract. Mix all together into a solid loaf, and let it rise. Then mold out and let it rise again. Bake about thirty minutes.

Ice Cream.—One quart of cream, one cupful of sugar, flavoring to taste. Whip the cream until you have taken off a quart of froth; mix the sugar and flavoring with the whipped cream; strain into the freezer. When partly frozen add the whipped cream and freeze again until stiff.

Baked Beans with Tomato Sauce.—Soak one quart of beans over night in warm, not hot, water. In the morning cook them until the skin curls on a bean when you blow upon it. Then put the beans into a deep pudding dish; bury a piece of pork (parboiled) in the centre, and pour over them a large cupful of stewed and strained tomatoes, seasoned with pepper, sugar, onion juice, and a good lump of butter, but not thickened. Cover closely and cook for three hours, if the dish be large.

Chicken Pie.—Cut at every joint a pair of young chickens, necks and feet—scalding and skinning the feet before putting with the rest over the fire, covering deep with cold water, and bringing slowly to the boil. Cook until the flesh is in rags and the liquor reduced by one-half. Strain, season highly with onion juice, salt, and paprika, thicken with browned flour, and let the gravy get cold. Meanwhile, arrange your chicken in a bake dish; lay among the pieces well-seasoned forepart balls no larger than marbles, made of bread crumbs and hard-boiled yolks, bound with a raw egg. Put in a cupful of cold water, cover with a good crust half an inch thick, and bake for an hour and a half. Lay a piece of stout paper over the pie to keep it from browning too fast. When you remove this at the end of an hour draw the pie to the door of the oven, fit a funnel into a slit left in the centre of the crust and pour in all the gravy it will hold. Do this very quickly, shut up the oven, and leave the pie in until done. Remove the paper ten minutes before the time is up, and brown lightly.

Sour Milk Gingerbread.—Put together in a saucepan one-half of a cupful of sugar, one-half of a cupful of molasses, one tablespoonful of butter, one-half of a teaspoonful of cinnamon and one teaspoonful of ginger. Stand at the back of the fire to warm slowly, and as it heats beat until foamy. Take off and beat in one cupful of sour milk, one teaspoonful of soda dissolved in one tablespoonful of boiling water and two cupfuls and a half of flour. Bake in a shallow greased pan in a moderate oven.

Shortbread.—Take one pound of fine dry flour, six ounces of caster sugar, and half a pound of butter. Knead well together. Roll out and cut into shapes. Place on a buttered baking tin and bake slowly.

Rice Buns.—Mix two ounces of ground rice with six ounces of flour and one teaspoonful of baking powder. Rub in two ounces of butter, or lard, and two ounces of caster sugar. Beat up with an egg in a gill of milk, a little grated lemon-rind, or any spice preferred. Have ready some greased patty pans, half fill each with this mixture, put each into a sharp oven, and bake for ten minutes.

Rice and Tomato.—Fry a small quantity of chopped onion in butter until a light brown. Mix into this a teaspoonful of boiled rice, which should be dried as

at destroying the barricades. The revolutionists, this message, says, are divided into three "armies," the first, consisting of 800 men armed with rifles and pikes, is operating between Moscow and Perovo, on the railroad, which it controls. Artillery and cavalry are being employed against this force. The second "army" is armed especially with bombs and revolvers, and is composed of 3,000 persons, in whose ranks are many women, who display not only bravery, but ferocity. This force occupies the region between the Sadovia district and the Jewish market, and has many barricades to prevent the passage of troops, and is operating in small groups and attacking patrols. When pressed, these revolutionists disappear into alleys and houses. Artillery, cavalry and infantry are used against this body. The third and largest "army" is operating in the region between the Brest railway station and the Triumphal Gate. It also has many barricades, and is engaged in guerilla tactics, making it difficult for the troops to enclose it. Some of the barricades were battered down by artillery, but they were re-erected by the survivors.

ARMED RISING ON LARGE SCALE.

According to information received by the revolutionary leaders here an armed rebellion on a large scale has been planned in Poland. The Socialist revolutionaries, encouraged by the success of the insurgents in the Baltic provinces and in the situation at Moscow and in Russia generally, have decided that the moment has come to try to cast off the yoke of autocracy.

The tactics to be followed are the same as those adopted at Moscow.

At Kharkoff on Tuesday the flag of armed revolt was raised, but, according to reports, the troops put down the outbreak mercilessly.

The 22 members of the so-called provisional Government which had been sitting there were captured early in the day, and later, when the red flag was raised, and barricades were erected around the Helfrich Engine Works, which armed revolutionists were holding, cannon were brought up and the revolutionists were given ten minutes in which to surrender. They sent out an emissary who was seized by the military commander. The command was then given to the artillery to open fire on the works, and they were literally battered down over the heads of the revolutionists. The latter held out until three-quarters of their number were killed or wounded, when the remnant, 137 men, surrendered.

CHILD SLEW COSSACKS.

The correspondent of the London Daily Telegraph at St. Petersburg, as an instance of the ferocity of the struggle conducted at Kharkoff, relates as follows what he calls a "typical incident."

A little boy was seen approaching Kenigs Square, where a detachment of Cossacks was stationed. The Cossacks, however brutal, drew the line at children, and the boy was allowed to approach unimpeded. On arriving at the spot he paused, swung his right hand vigorously, and then turned and ran. A violent explosion prevented the Cossacks noting his further movements. The boy had thrown a bomb which plowed up the ground. Fragments of horses were all around, and some of the Cossacks were convulsed in the agonies of death, while streams of blood were flowing along the torn up roadway.

ODESSA PANIC STRICKEN.

The London Times' Odessa correspondent says the terrorists still hold the town in subjection. The Cossacks and troops act as if martial law existed, although it has not been officially promulgated. The present state of tension cannot continue. One ill-advised shot would probably bring about a repetition of the November bloodshed.

where tuberculous children could be received and given the benefit of open air treatment, and in this matter he thought we might take a leaf from the book of the French.

Tuberculosis among children was due, he said, to overcrowded housing, improper feeding, dirt, bad ventilation, and the dirty India-rubber teat.

FIRE AT NIAGARA FALLS.

Hotel Guests Turned Out, Losing Their Effects.

A despatch from Niagara Falls, N. Y., says:—Fire started on Thursday morning in the basement of the Old Porter Hotel, now a part of the Imperial Hotel at Falls and Second streets, in the portion occupied by Faxon, Williams & Faxon, grocers. The occupants of the Porter Hotel were startled by the terrific explosion downstairs, and almost immediately the flames began to shoot up through the building. Fortunately the force of the explosion was sufficient to arouse all occupants, who were able to make their escape, but nearly all lost their clothing and personal effects.

The fire quickly spread through the Porter Hotel, and the store of J. & C. M. Rae, sporting goods, next door. Both Faxon, Williams & Faxon and the Rae stores are complete losses, about \$25,000 each.

The Imperial Hotel caught fire from the Porter. The Temperance House annex, just back of the Imperial on 2nd street, caught fire, and the top story was completely gutted, and the second floor badly damaged. The roof of the Presbyterian Church on First street also caught fire, but the building was saved.

The total loss is estimated at \$110,000.

MUST STUDY MARKET.

Agent at Manchester Gives Advice to Canadian Shippers.

A despatch from Ottawa says: A communication to the Department of Trade and Commerce from Mr. F. E. McNamara, Canadian agent at Manchester, tells of the gratifying increase in Canadian products imported into that port by the vessels of the Manchester Liners, Limited. He says that the advantages presented by the line enable buyers to sell at lower prices than if freight rates had to be paid from Liverpool to the different towns in Lancashire.

Mr. McNamara tells Canadian manufacturers that they should study the requirements of the wholesale markets in England. Too often do they assume that goods intended for Canadians will suit the English buyer. The trade in England requires the cheapest kind of goods in order to compete successfully with the Continental and United States manufacturers in the same lines. As a case in point he cites building hardware, on which the Canadian traveler could get a discount of 7½ per cent, whereas the United States traveler could offer only 5 per cent, because he had cheaper grades to dispose of.

POVERTY IN LONDON.

Number of Legal Poor Greater Than in Many Years.

A despatch from London says: Official figures relating to the legal poor of London show that the number in receipt of pauper relief in nearly every month of the year just ended have been greater than in any of the previous forty years comprised in the returns, with the exception of the period from 1867 to 1871. The ratio of paupers per 1,000 of population has been higher in most of the months of this year than in any previous year since 1874. Not only has there been a remarkable increase in outdoor relief, but the rise in the number entering workhouses has continued. In no year in the history of the poor law has the population in the workhouses been greater for December.

\$8; clover, mixed, \$6 to \$6.50, and pure clover, \$6 per ton, in car lots. Cheese—Ontario, 12½ to 13c; Eastern, 12½c. Butter—Choice, 23½c; good to fine, 22½ to 23c.

BUFFALO MARKETS.

Buffalo, Jan. 2.—Flour—Quiet, unchanged. Wheat—Spring dull; No. 1 Northern, 93½c asked; Winter, No. 2 red, 88½c offered. Corn—Opened firmer, closed easier; No. 2 yellow, 49½c; No. 2 corn, 49½c. Oats—Dull; No. 2 white, 36½c asked; No. 2 mixed, 35c. Barley—Dull; 45 to 56c. Rye—Dull and easy; No. 1, 74c.

NEW YORK MARKET.

New York, Jan. 2.—Wheat—Spot easy; No. 2 red, 91½c in elevator and 93½c f.o.b. afloat; No. 1 Northern Duluth, 94½c f.o.b. afloat; No. 1 hard Manitoba, nominal, f.o.b. afloat.

LIVE STOCK MARKETS.

Toronto, Jan. 2.—The live stock trade was dull at the Western Cattle Market this morning.

Export Cattle—Choice are quoted at \$4.60 to \$4.90, good to medium at \$4 to \$4.50, others at \$3.75 to \$4, bulls at \$3.50 to \$4, and cows at \$2.75 to \$3.50.

Butcher Cattle.—Picked lots \$4 to \$4.50, good to choice \$3.65 to \$3.90, fair to good \$3 to \$3.50, common \$2.50 to \$3, cows \$2 to \$2.75, bulls \$1.75 to \$2.25, and canners \$1.75 to \$2.50.

Stockers and Feeders—Short-keep feeders are quoted at \$3.60 to \$4, good feeders at \$3.40 to \$3.65, medium at \$2.50 to \$3.50, bulls at \$2 to \$2.75, good stockers run at \$2.80 to \$3.50, rough to common at \$2 to \$2.50, and bulls at \$1.75 to \$2.50.

Milk Cows—Are quoted steady at a range of \$30 to \$60 each.

Calves—Quotations are \$2 to \$12 each, and 4½c to 6½c per pound.

Sheep and Lambs—Export ewes are quoted at \$4.15 to \$4.30, bucks at \$3.25 to \$3.50, and culls at \$3 to \$3.50. Lambs are firmer at \$5.50 to \$6.25.

Hogs—10c lower at \$6.10 per cwt. for select and \$5.85 for lights and fats. Sows are quoted at \$4.50 to \$1.75.

CARRIED OUT HER PLAN.

A French-Canadian Woman's Suicide at Montreal.

A despatch from Montreal says: On Wednesday, Madame Alphonse Desève, a handsome French-Canadian woman, forty-one years of age, swallowed four tablespoonfuls of Paris green and died two hours later in terrible agony. It appears that the woman had contemplated the destruction of her life for some time. On Sunday last she told her husband that she would be in another world on Tuesday, but no attention was paid to the warning, as she was not believed to be sincere. Tuesday night she put her threat into execution, when she went to Mrs. Joseph Therien, a neighbor, and on some pretext borrowed the stuff which ended her life.

WEDDED ONLY A MONTH.

Young Married Woman From Toronto Dies Suddenly at Galt.

A despatch from Galt says: Mrs. W. C. Waite, of Toronto, a bride of a month, who was home for Christmas holidays, a guest of her parents, Mr. and Mrs. Robt. Whitely, retired on Wednesday night to her room after a visit to Preston with lady friends. Half an hour later her mother, entering her room, found her a corpse. Doctors attributed her death to heart disease.

Apprehension is being expressed by foreigners at the constantly growing irritation of the Chinese against aliens, which for months has been gradually spreading through the country.

ity of chopped onion in butter until a light brown. Mix into this a teaspoonful of boiled rice, which should be dried as for curry. Season all with white pepper and salt, and add a large tablespoonful of tomato pulp. Stir all together over the fire, and just before serving add two tablespoonfuls of cream. Serve in a deep fancy dish (very hot) with grated cheese.

HINTS FOR THE HOME.

When polishing the stove add a little salt to the blacklead and it will not rub off so easily.

After frying onions pour a little vinegar into the frying-pan, let it get hot, and it will remove all smell from the pan.

When making bread in winter, first warm the pan, let the flour stand in it a little till warmed, then add the yeast.

When making coffee, warm the ground coffee gradually, taking great care that it does not burn. Scatter over it a pinch of salt, and you will be surprised at the rich aroma.

To Clean Gilt Ornaments.—Make a strong solution of cyanide of potassium, apply with a stiff brush, and well wash it off afterwards, using a softer brush. Dry with a cloth or in boxwood sawdust.

Rusty keys and tools should be soaked in paraffin for twenty-four hours and then scoured with emery powder or coal ashes. Use a piece of thick flannel for the purpose, and moisten it with paraffin.

To Clean Discolored Hands.—A little borax or rock ammonia dissolved in the washing water will greatly aid you in getting off the stains from your hands. Obsolete stains can be removed by rubbing with a piece of cut lemon.

Chamois leathers should be washed in tepid water, to which has been added a little ammonia. Rinse and pull out. Place in a shady place to dry.

Stimulating lotion for the hair.—This is a good recipe for stimulating the growth of hair. Put a small handful of box leaves into a covered jar or teapot, pour over them a pint of boiling water. Let it remain till cold, when strain and add two ounces of Jamaica rum to the fluid. Shake, and it is ready for use. Apply to the roots of the hair every night.

To renovate a shiny coat.—Rub well with a little turpentine. Sometimes strong coffee or a solution of ammonia is recommended for the purpose, and is equally good.

A silk hat should be handled very lightly when it is wet. Wipe it as dry as possible with a silk handkerchief, then apply a soft brush. If any portion of the nap be found to stick together, damp it slightly with a sponge moistened with beer or vinegar and brush it before a fire till quite dry.

To make labels adhere to canisters for your store cupboard: Dip the side of the canister into a strong and hot solution of soda-water and rub dry with a clean cloth; then apply onion juice to the metal, when any paper or label will adhere. It is really quite difficult to separate paper and metal thus joined.

For Cleaning Children's Teeth.—A little precipitated chalk may be used, but emporphorated chalk should be avoided. A weak solution of permanganate of potash may with great advantage be used for washing out a child's mouth. This keeps the teeth free from decay and generally renders the mouth healthy.

Buckwheat to Remove Grease Spots.—The following recipe for removing grease spots will never fail and will not injure the most delicate fabric and will remove from a carpet a pint of oil without leaving a trace of it behind. Rub as much dry buckwheat flour upon the oil or grease spot as it will take, surrounding and covering it entirely; let it remain a few days, then brush off. A second application is seldom needed.

To Clean Burned Dishes.—Baking dishes that become burned in the oven, and plates and platters that become blackened with the food scorched upon them, should not go through the tedious process of scraping. Simply put a little water and ashes in the dish, and let it become warm, and the burnt and discolored portions may be easily cleaned without injuring the dish.

In case of a sudden leak, and when it is quite evident that the plumber will not be as impatient to get to you as you are to have him, mix some yellow soap and whitening with enough water to make a thick paste and stop up the leak yourself. This will answer temporarily as well as solder.

Dents in fine polished furniture may be removed in the following manner: Lay a number of layers of moistened brown paper over the dent and put a warm iron over them. The steam will generally cause the wood to swell and fill up the dent. It sometimes takes patience, but slight dents, which are a considerable mark to furniture, may be raised in this way.

Virtues of Turpentine.—When applied to burns it gives immediate relief. For blisters on the hands it is of great value, searing down the skin and preventing soreness. It is a sure preventive against moths also. By sprinkling a few drops in the bottoms of chests, drawers, and cupboards, it will render the garments secure from injury during the summer. Its pungent odor is retained for a long time, and it injures neither furniture nor clothing.

MINES BUREAU REPORT.

The Output for 1904 is Valued at \$11,572,647.

A Toronto despatch says: Parts I. and II. of the fourteenth report of the Bureau of Mines have been published. Part I. contains the statistics of mineral production for 1904 in considerable detail for the various products. The total output for the year is given as \$11,572,647. The occurrence of platinum and palladium in the nickel-copper mines of the Sudbury district is noted; 4,621 ounces of platinum and 8,540 ounces of palladium, having a value of \$90,109 and \$166,530 respectively, having been produced during the years 1902, 1903, and 1904. This volume contains the reports of Inspectors Carter and Corkill on the mines of eastern and western Ontario respectively, an account of recent developments in the petroleum and natural gas fields of the province by E. T. Corkill, and a review of the cement industry of Ontario by P. Gillespie. The geological features and agricultural resources of the Abitibi region are described by J. G. McMillan and Archibald Henderson, and the iron ranges of Michipicoten West, with their geological relationships, form the subject of a paper by J. M. Bell. W. N. Smith describes the iron-bearing district of Loon Lake east of Port Arthur, and Prof. W. G. Miller, Provincial Geologist, has a short paper on the Boston Township iron range. Accompanying the report, which is profusely illustrated, is a geologically colored map of the iron ranges of Michipicoten west of the Magpie River.

Part II of the report consists of an account of the cobalt-nickel arsenides and silver deposits of Lake Temiskaming by Prof. Miller, Provincial Geologist.

INCREASE OF SMALLPOX.

There are Nearly Two Hundred Cases in the Province.

A Toronto despatch says: The returns for November to the Provincial Board of Health are more complete than for the same month last year, twenty more divisions having reported. They give the total deaths from all causes as 2,011, or 108 more than were reported in November, 1904. The death rate per 1,000 is 12.3 as compared with 12.0 a year ago. The most regrettable feature of the infectious disease returns is the increase in smallpox, which gave 108 more cases only two cases being reported in Nov., 1904. There were no deaths from the disease. Owing to the mild type the disease often assumes physicians sometimes diagnose it "chicken pox," and the patients are allowed to mingle

FLASHES FROM THE WIRE

CANADA.

Toronto's assessment shows an increase of \$20,000,000 for the year.

C. P. R. trackmen have been granted an increase of wages by the company.

The value of buildings erected in Edmonton this year totals \$700,000.

Many immigrants from Great Britain to Canada have left behind their families in need.

The output of British Columbia's mines last year is estimated at \$20,000,000.

The new steamship service between New Zealand and Canada will start in three months.

It is possible that the G.T.R. line, in order to escape grades, will change its route west of Nanaimo and run to Bath.

R. C. Matheson, treasurer of the town of Raymond, Alta., and late editor of the Raymond Chronicle, has disappeared.

The C. P. R. and Pennsylvania Railways have decided to establish a train ferry service between Port Burwell, Ont., and Ashtabula, Ohio.

Archbishop Bruchesi, of the Roman Catholic diocese of Montreal, has issued a mandement against intemperance.

It is announced that the section of the G. T. P. between Touchwood Hills and Edmonton will be placed under contract within 60 days.

The late Hon. R. Prefontaine carried \$45,000 life insurance. Of this \$35,000 was placed in the Travellers' Insurance Co. a week ago.

GREAT BRITAIN.

Many London poor are eager to take advantage of Lord Rothschild's offer to get to Canada.

Statements of the London poor and workhouse population show an increase over the past thirty years.

UNITED STATES.

Jacob H. Schiff, the New York banker, gave his cook, Lena, \$5,000 for Christmas present.

The Poles of Boston have pledged their support to the cause of their compatriots in Poland.

The official returns of the recent New York Mayoralty election show McCallan elected by a majority of 3,468 votes.

The Merchants' Trust, American Savings & Mechanics' Savings Banks, of Memphis, Tenn., have closed their doors owing to overloans on discounts.

All records for high priced carnations were broken on Tuesday when Richard Witterstaeter, a Price Hill florist, of Cincinnati, Ohio, sold his carnation seedling "Aristocrat," for over \$30,000.

While standing at the window caressing a new baby doll the other morning, nine-year-old Mary Kennedy, only daughter of James Kennedy, superintendent of the Hazelkirk coal mines, Washington, Pa., dropped dead with a bullet through her forehead. It is believed the shot was fired by a discharged employe in revenge.

Miss Margaret Bryson Fisher, the wealthiest spinster in Ithaca, N. Y., has married Patrick T. Kelly, a red-haired coachman. Miss Fisher owns real estate valued at \$100,000. Kelly met his bride three years ago as her driver. She is 17 years Kelly's senior. The first hint of the marriage was Kelly's declaration, "I've got a better job now."

Miss Alice Roosevelt, fiancée of Representative Longworth, is wearing her engagement ring. It is set with three fine pigeon-blood rubies surrounded by diamonds. For some weeks she has been wearing a ring of much value, both intrinsic and sentimental, to the Longworth family, a single sapphire set in a plain, dull gold band.

New York's ten largest national banks gained in the ten years from 1895 to 1905 146 per cent. in profits and 271 per cent. in deposits. Seven Cleveland national banks gained in the same time

Fashion Notes.

Whatever may be said of the suspender and skeleton waist dress for grown-ups, no one disputes that the fashion is charming for children. It is applicable alike to everyday gowns and dressy toilettes. For example, a charming little gown of red and white foulard was made with a full skirt, tucked in groups of three half-way to the waist. The shoulder straps and the cross piece which made the round yoke effect were tucked crosswise, the little tucks laid close together to form a rather solid surface. The straps were edged with a tiny quilling of silk. Underneath was worn a blouse of embroidered handkerchief linen.

Another little gown of light blue and white checked silk had the skirt trimmed with three ruffles set wide apart, and each headed with a shirred band of silk. The waist worn with the skirt was composed of many little ruffles of Valenciennes, the elbow sleeves being made of the same material. The silk appeared in the form of shaped shoulder capes, which were extended in points to the waist line. A sash of pale blue satin ribbon was worn.

IN WHITE GOODS.

Many people dress small girls entirely in white muslins the year round, and dressy gowns mean no more than a little finer material and more elaborate workmanship. The sheerest of materials has underslips of India silk, sometimes in pale colors, sometimes in white. A luxurious little gown for a girl of ten was composed of flounces of hand-embroidered mull or batiste, the embroidery a combination of English eyelet and French stitches. Two flounces formed the skirt, while a third was arranged as a berth on the low-necked blouse. The blouse itself was plain, save for a group of ten fine, hand-run tucks down the front, and similar groups in the back where the blouse closed. The sleeves were two small puffs finished above the elbow with a short ruffle of the embroidery. A soft sash of palest pink messaline with deeply fringed ends was worn, and an underslip of pale pink gave the gown a warmer appearance than it might otherwise have had.

SMOCKING FOR CHILDREN.

Smocking is always good in children's gowns. At some of the shops where a specialty is made of handsome garments, fancy smocking is done at not exactly prohibitive prices. For tiny girls, the prettiest little gowns imaginable are made in perfectly simple models. The smocking occurs in the yokes and cuffs of the slips, which are straight little garments something like those worn by Kate Greenaway picture-book children. Very simple and inexpensive materials are used for these gowns, ginghams coarse linens, pongees and China silks being best adapted.

Smocked waists are very effective for older girls, and even mature women. The stitches are not difficult to learn, and clever needle women may ornament their own blouses with little effort. A London house famous for its artistic creations has branch houses in at least two American cities, one being, of course, New York. This house makes a specialty of smocked gowns and waists for grown-ups as well as children. In the soft crepes, Shantung, and silk muslins affected by the firm these waists are unique in their simple beauty and refinement.

IMPORTED GOWNS

Speaking of importations, a simple dinner gown from a famous Paris house is worth describing. The material was pale mauve mousseline de soie trimmed with heavy satin of a matching shade. The full skirt had a knee flounce of Point d'Alencon trimmed with five graduated bands of the satin. A band about three inches wide bordered the bottom of the flounce, and the band which headed it was less than an inch in width. The waist was a surprise and had a fichu of the net bordered on

ON THE FARM

CARING FOR THE BROOD SOW.

The serious mistake of breeding from animals of an inferior type has been so frequently discussed, and is so thoroughly established, that it may seem unnecessary to bring it up again, but from personal observation we find that the necessity of being more careful in the selection of their brood sows should be further impressed on many farmers, writes a correspondent. Much of the disappointment and loss complained of by hog raisers may be directly attributed to the using of sows selected because of their individual appearance, without any consideration as to the litters they came from.

A brood sow should never be selected from a litter of less than ten or twelve pigs, and in this litter there should not be more than one runt, or inferior pig, the others should be uniform in size and formation, both at birth and at weaning time, and also at marketing time, if all are raised under similar conditions.

A sow selected from an uneven litter will disappoint in her offspring every time, and I consider there is no better way to bring about a failure in hog raising than by feeding litters of this kind, for while one-half of them are thrifty fellows, that make a gain every day, the other half lag behind and lose for you as much as the good ones make.

If you have been keeping sows of this kind, I strongly advise you to get rid of the whole breed, as soon as possible. Good sows can always be procured, for any one who has one good one will very soon have plenty of them to spare. Who would think of keeping a horse that could only work half time, or a cow that would only give milk half a season, then why keep a sow that produces what is worse than half a litter? A good sow is an asset of great importance on any farm, and if you have one, be very careful that you do not get rid of her breed. Like produces like, and if she is properly mated, you are not likely to become discouraged with the profits from your hogs.

If you are in quest of a young sow, you must first select an old one, or one that has had at least two litters, as a sow's first litter should never be bred from, the constitution of an older sow's pigs is always better. Select from a litter of not less than ten uniform pigs. You want one with medium weight of bone, standing straight up on her legs, because if she shows at all weak in the pasterns while young, she will go sadly back as she gets heavier. She should be broad in the hams, a well arched back, long and deep sides, showing particularly full behind front legs, her shoulders, neck and head should incline to fineness, her nose should be well up off the ground, her underside should be long and straight, making her appear a little leggy. She should show twelve or fourteen well formed teats.

If this type of sow is selected from a good prolific breed, or family, she will with ordinary care, barring accident, go on breeding for several years without becoming an awkward cripple.

WINTRY BLEATS.

Do not change sheep's diet suddenly. Profits are headed off by ticks and lice.

While show sheep are common enough, good sires are not.

The best breeder is not always the best appearing ewe.

Adding a little sulphur to the salt will tend to drive the ticks from the flock.

Go through the flock, pick out the sheep that are not doing well and get them into condition for market before the snow flies if you can fatten sheep so much cheaper during warm than

the disease. Owing to the mild type the disease often assumes physicians sometimes diagnose it "chicken pox," and the patients are allowed to mingle with the public when they should be quarantined, thus causing the disease to spread. The Provincial Board hopes that medical health officers and local boards of health will take active measures and quarantine all suspected persons and vaccinate all those exposed. Smallpox has not been so prevalent in Ontario since January, 1903, when 196 cases and ten deaths were reported. Scarlet fever and diphtheria show a marked decline. Consumption remains practically the same, as far as the number of deaths reported (128) are concerned, while typhoid shows an increase from 171 cases and 43 deaths to 203 cases and 55 deaths. There were 85 cases of whooping cough and 9 deaths, compared to 23 and 1.

WINNIPEG BANK ROBBERED.

Two Daring Thefts From the Merchant's Bank.

A Winnipeg despatch says: About two weeks ago a daring theft was perpetrated in one of the city's banks whereby the thief secured \$7,000 and vanished without leaving the faintest clue. News of the robbery has just now become public, but an effort has been made in the meantime to locate the criminal. When the robbery occurred the bank inspector was making his usual official visit, and with the teller was engaged in checking over the cash in that official's cage. Having to leave the cage for a moment to go into a vault close by, both inspector and teller were dumfounded on returning to find a parcel containing seven thousand dollars had vanished as if touched by a wizard's wand. Investigation began immediately, but no clue was obtained, and it is believed now that some clever, skilful and daring daylight robbers committed one of the most daring robberies recorded in Canadian crime.

Another equally daring robbery was discovered on Thursday evening, through which the Merchant's Bank was again victimized to the extent of \$1,000. Some deep mystery surrounds the crime, and in this case, as in the other, it was a package of bills which was taken. The money had been done up for transmission to the Eastern Townships Bank through the clearing house, but upon the arrival of the package at its destination it was found the money had been abstracted and a dummy substituted in its place, though by whom or where in transit the officials are at a loss to know. All details of the robbery, however, strongly indicate that the same deft fingers perpetrated both crimes.

DIMES FOR MISS ALICE.

A National Subscription Wedding Present for Roosevelt's Daughter.

A Baker City, Oregon, despatch says: A move to create by popular subscription a wedding present for Miss Alice Roosevelt, who is to be married to Congressman Nicholas Longworth in February, has been started by citizens of the eastern part of Oregon. It is the plan of the originators to have subscription lists in each State of the union, the money subscribed to be transmitted to the various State Treasurers, who will, in turn, forward it to the Secretary of the Treasury at Washington. The subscriptions will close on February 8, so as to enable the present, which, it is believed, will be about \$800,000, to be turned over to Miss Roosevelt on the day of the wedding. Individual subscriptions will be limited to ten cents.

POOR FAMILIES FOR CANADA.

Baron Rothschild to Pay Expenses of 200 of Them.

A despatch from London says: Baron Rothschild has undertaken to pay the costs of the emigration of 200 poor families from Tottenham, which is practically a London suburb, to Canada.

gained in the ten years from 1895 to 1905 146 per cent. in profits and 271 per cent. in deposits. Seven Cleveland national banks gained in the same time 157 per cent. in profits and 358 per cent. in deposits. Fully 50 per cent. of the smaller banks have been absorbed by the larger institutions, which now rank favorably with the strongest banks of the world.

GENERAL.

Preparations are in progress at Rome to celebrate in 1908 the jubilee of the Pope's ordination as a priest.

Chinese officials at Shanghai have issued warrants for the arrest of the promoters of the recent riot.

Viscount Aoki has been appointed first Ambassador from Japan to the United States, after a distinguished career in the diplomatic service.

BLUE LIGHT NUMBS PAIN.

Dental Surgeon's Experiments — May Cure Sleeplessness.

Interesting experiments with blue light as an agent for producing analgesia, or insensibility to pain—the discovery of Professor Redard—have been carried out by Dr. Harvey Hilliard, anaesthetist to the Royal Dental Hospital of London.

Similar experiments carried out by a well-known Geneva dentist have been already referred to.

In an article in the "Medical Times and Hospital Gazette" Dr. Hilliard states that he found that blue light had on himself "a most distinctly calming influence; a desire to close the eye and sleep is experienced; and after some minutes sensibility to pain is lessened. For instance, the difference between light pressure, made with the tip of the little finger and a needle, could not easily be detected, and surgical needles could be pushed into the face, lips, gums and arms, and blood drawn thereby, without actual pain being felt, unless a still deeper pressure were exerted."

"I believe the presence of a blue lamp suitably placed might give satisfactory results in the treatment of insomnia owing to its calming influence, and I have tried it with some benefit in one case. Similarly in the restlessness of infants suffering from mild illness, and in asylums in cases of mania, it is conceivable that blue light rays may be of value. This view is supported by the fact that red light has been found to have a beneficial effect upon small-pox, as it is inimical to the vitality of the germs of that disease."

Dr. Hilliard gives instances of the utility of the blue rays in the case of the extraction of teeth. One man said that under its influence he felt no pain when a molar was extracted, and returned to have two others removed by the same agency.

STEALING STAMPS.

Mr. Emmerson Proposes to Stop the Practice on the Intercolonial.

A Moncton, N. B., despatch says: As a result of the discovery of wholesale stealing of stamps from the I.C.R. general offices, Hon. Mr. Emmerson, Minister of Railways and Canals, has insisted upon reform. He has decided that a mail clerk shall be appointed from the personal staff, and a common postoffice established for the whole of the departments. This clerk will be charged with all the stamps he receives, and he will have to charge himself with all letters sent out and the postage thereon. It is further probable that all stamps issued for the I.C.R. will be perforated with the letters I.C.R. This is permitted by the Postoffice Department.

MOHAMMEDAN RISING.

Its Probability Being Discussed in Turkish Political Circles.

A despatch from Constantinople says: In political circles the probability is being discussed of a general rising of the Mohammedan population in the Caucasus and in West and Central Asia.

three inches wide bordered the bottom of the flounce, and the band which headed it was less than an inch in width. The waist was a surplice and had a fichu of the net bordered on either edge with satin bands. The fichu was crossed in the front, and was carried around to the back, where it was tied and fell in long ends. Little shaped caps of the satin were seen on the shoulders. The sleeves were full puffs which extended half way to the elbows and were finished with lace ruffles. The pointed girdle was of silver gauze, and a graceful bow knot of the gauze trimmed the low bodice. One imagined how well a large corsage bouquet of pale violets might lend accent to the gown.

A TELEGRAPH C PATENT.

Clever Invention of a Manitoba C. P. R. Operator.

A Winnipeg despatch says: Patents both in Canada and the United States for a machine which is almost superhuman have been obtained by T. W. McKenzie, C. P. R. station agent at Kenilworth, Man. It is in connection with the telegraphic apparatus, very simple in construction, but it will do the work of an operator so far as the calling of another office is concerned. He has it so constructed that it will call any office he may desire, sign his own call, and do it as perfectly as any operator can; and as soon as the office called, or any other office, breaks in, his machine instantly stops, closes his key automatically, and allows the other operator to answer the call, or call whomsoever he desires. The machine, he claims, is a positive revolution in telegraphy, and will greatly hurry the work, and at the same time very much lessen the work of the operator, and especially in an office where the agent has to do the operating as well as other duties. Mr. McKenzie is making arrangements to have the machines manufactured and put on the market as soon as possible.

ESTIMATED TIMBER CUT.

Eight Hundred Million Feet Board Measure—Railway Ties Wanted.

A Toronto despatch says: From the reports of the Provincial Crown lands agents it is estimated that the aggregate timber cut this season will be 800,000,000 feet board measure; that 125,000 cords of pulpwood will be taken out and 2,500,000 railway ties. Last season 1,986,000 railway ties were actually cut. The great amount of railway construction now in progress has made the demand for ties very brisk. The estimate of the timber cut is larger than at the corresponding period of last season, the actual cut of which is not yet obtainable.

NEW ZEALAND TO CANADA.

Contract for New Steamship Line to be Signed.

A despatch from Ottawa says: Mr. Halley, representative of Bucknell and Co., of London, England, is here to sign on behalf of his firm the contract for the new steamship line that is to be inaugurated between New Zealand and the British Columbia ports. Two vessels are to go on this route, with sailings every two months. Mr. Halley says that if the contract is closed at once the first sailing will take place from New Zealand in two months' time. The contractors already operate lines to Australia, South America and to the Persian Gulf.

TEA TABLETS FOR ARMY.

Novel Experiment for Supplying Tea in Compressed Form.

A Washington despatch says: The latest novel experiment to be made by the United States Department of Agriculture is that of compressing tea into tablets, one of which will make a delicious cup of tea. As a result, what would ordinarily make a big package of tea can by this new and unique method be placed in a space about the size of a safety match box.

sheep that are not doing well and get them into condition for market before the snow flies if you can fatten sheep so much cheaper during warm than cold weather.

How are you wintering your flock; on straw, with a few corn-stalks for a change? Young sheep having good teeth could probably be brought through in that way; but don't try it. Be to a little expense in clover hay or grain, and thus having them in fine condition. Nearly enough more would be added to the manure pile to pay the cost, since only when animals are well fed is rich manure made.

Are there any small, weakly lambs in your flock? Don't neglect them at the time of the annual toe-cutting, tagging and separating for breeding. Feed them a little extra the coming winter; they will respond to good treatment—so much so that a year from this fall they are likely to look as fine as any of the flock.

FARM NOTES.

Go over the stables carefully, and see that every change or repair that needs making is made at once. Neglect to do this often results in serious loss.

Feed stock well, but do not give them so much that a deal of it will be wasted. A little observation will enable one to proportion the daily supply to the needs of the animal.

A pump in the barn, or a supply of water from a tank connected with a wind-mill, will be found a vast improvement over the old fashioned way of turning stock out to water once or twice a day in cold weather. Now is the time to make improvements of this kind.

See that the stable is well protected against cold. A cold stable creates a demand for extra food. If the walls are of wood, batten cracks. Line with paper if necessary. In putting on paper let its edges overlap at least an inch, and run a strip of wood—a lath is just the thing—along this lap, nailing it well. This will make it hug the boards snugly and prevent it from tearing loose when it absorbs moisture, as it is pretty sure to do when nothing but nails are used to hold it in place.

EARTHQUAKE IN TURKEY.

Many Homes Destroyed and Families Rendered Destitute.

A despatch from Boston says: The American Board of Commissioners for Foreign Missions on Tuesday received a cablegram from Constantinople, which announces a severe earthquake in the Harpoot Vilayet, in its eastern Turkey mission, which has destroyed many houses and made many persons homeless and destitute. The despatch adds that relief is needed. The region is said to be densely populated, largely by Armenians. It is one of the sections of Asiatic Turkey devastated at the time of the Armenian massacres in 1895. Harpoot is the centre of one of the largest mission stations of the American Board in Turkey. It is the seat of Euphrates College, with nearly 1,000 pupils, of a theological seminary, of a medical institution, and the headquarters of a large evangelistic work covering that entire district.

ATE HIS OIL COAT.

Harrowing Experience of a St. John's Shipwrecked Sailor.

A despatch from Tampa, Florida, says: The three-masted schooner "Sakata of Parsboro", N. S., has been wrecked, and its entire crew of at least seven men drowned, except Mate J. F. Williams of St. John, N. B. The wreck was reported by Captain Lermond of the schooner Helen Thomas, which arrived at Port Tampa on Tuesday from Galveston. Capt. Lermond first sighted the capsized schooner on Dec. 23. He sent a boat containing his second officer and five men to the wreck. The mate found Mate Williams clinging to the vessel, and he had been without food or drink for four days. Hunger had forced him to eat a portion of his oil coat. Williams has practically recovered from his experience.

MOST WONDERFUL FIGHT

WILL BE RUSSIA'S STRUGGLE FOR FREEDOM.

Maxim Gorky, the Russian Author, Says the Struggle Cannot Last Long.

Dr. C. Hagberg Wright, of Paris, France, makes public the following letter, which he has translated, just received from the well-known Russian author, Maxim Gorky, on the Caucasian uprising:

"My Dear Friend: You ask me what I think of the events of the Caucasus. Well, I feel full of shame and sadness in reading and hearing of all that is going on there. I am so passionately fond of that beautiful country, the embodiment of grand beauty and strength; its mountains covered with snow, its valleys and its ravines full of the happy noise of the swift and singing rivers, and its beautiful, proud children. When I was in the Caucasus I saw the Georgian everywhere working peacefully and contentedly side by side with the Tartar and the Armenian. How happily and simply, like children, they played and sang and laughed, and how different now to believe that these simple, delightful people are busy killing each other in a senseless, stupid way, obedient to dark and devil influences.

PEOPLE DON'T UNDERSTAND.

"What oppresses me is not so much the cruelty as the stupidity of the people, who do not understand that a foul external power is playing with their evil passions. It does not seem to me that the bloody tragedies enacted in Baku differ in any respect as regards their motives from those tragedies in Warsaw, Kichineff, and other places. In Riga, Kursk, etc., the same hideous work of a group of people who have lost their senses is visible. This group is trying to extinguish with blood the fire of conscience, which is gleaming in the Russian people, at last awakened to the knowledge of its right to choose its own form of existence. These men are accustomed to power. Life is pleasant to them while they can dispose of the fate and riches of our country, the strength and blood of our people, and that without giving an account to anyone of their acts. They have been accustomed to look on Russia as their estate; they have forcibly kept the nation without rights and in ignorance and squalor in order to weaken its spirit, and to prevent the growth of its energies; they have kept the people like blind and dumb slaves, obedient to their will. With the cynicism of persons corrupted with impunity, with the frank ruthlessness of animals who are conscious of their power, they have done everything to kill the creative spirit in them. But these contemptible creatures, who reckon themselves the guardians of the whole life of the country, are ignorant and stupid; they do not understand that to turn a nation into a blind, mechanical machine is just as impossible as to change the granite mountains of the Caucasus into a lump of clay.

"The senseless and inhuman oppression has not been able to extinguish the fire of blood and free thought in our country. It is breaking forth everywhere with greater strength. Even the blind now see its angry flame. This flame is spreading unexpectedly in all directions, and is struggling to burst into one strong, glorious blaze. Into a stormy whirlwind of protest from thoughtful and honest men against the violence which is used by an incalculable group of parasites who have been nourished on the best sap of the country.

EGGING ON THE BRUTES.

"The parasites feel that the hour of their agony is approaching and that death is near; but they wish to live; and so they struggle as far as they are able against the will of the people, cowardly, dishonestly, and basely. They are raising from the depths of life all that is dark and evil; everything that is selfish, venal and low, and they

GIRL BUYS WILL IN OLD BOOK.

The Purchase Makes Her Heiress to a Fortune.

Mlle. Bertha Chavanne, a penniless young girl, who lives in St. Etienne, France, discovered the other day under curiously romantic circumstances, that she was heiress to a fortune of \$80,000.

She lived for some years with her great-aunt, Mme. Berthon, a wealthy old woman, who died intestate at the age of 85 a few weeks ago. Mme. Berthon had no direct heirs, and her property was to be divided up among a number of distant cousins. Accordingly, a sale of all her personal effects was arranged for at the public sales-rooms.

Mlle. Chavanne, who had been devoted to Mme. Berthon, attended the sale in order to buy something to keep as a memento of the old woman. But Mlle. Chavanne is very poor, and although she bid for various articles of furniture and treasured curios of her great-aunt, someone always went a little higher, and put the article beyond her reach.

At last an old book was put up. It was a devotional volume, from which Mlle. Chavanne had constantly read to Mme. Berthon just before her death. The girl determined to have it at any price. Nobody else showed any desire to possess the volume, so it was knocked down to her for a few shillings.

The auctioneer handed down the volume, and it was passed along the crowd to Mlle. Chavanne. As she took it in her hands a folded sheet of paper dropped out. She opened it, and found it to be a legal-looking stamped document. She was puzzled by the quaint phraseology of the document, and showed it to her relatives.

They took it to an attorney, who pronounced it to be the last will and testament of Mme. Berthon, duly signed and attested, and bequeathing her entire property to her beloved niece Mlle. Chavanne.

CRIME IN LONDON.

Awful State of Affairs Revealed by Statistics.

London, England, is paying the penalty paid by all large cities. Crime is inside her gates. In round numbers she has to pay nearly \$8,000,000 a year to keep criminals in check; for that is the sum paid out to her police courts, prisons, and prosecuting officers. It fails to include stolen property, losses due to the idleness of criminals, losses to injured parties, etc. Serious crimes, such as burglary, housebreaking, counterfeiting, etc., are increasing.

Arrests are more frequent than formerly, and each arrest adds to the expense and loss account of the city. Estimates put the bill of the city's expenses as high as \$10,000,000. In other words, each taxpayer or head of a household of five persons pays \$6.51 a year for London's crime. Nor do these millions make up the total loss. There are the hundreds of thousands taken, consumed by the criminals, hidden away, lost or destroyed. Add, then, to these the amounts paid by private parties to prevent burglary, etc., watchmen caretakers, burglar alarms, door and window fastenings, safes, revolvers, life protectors, dogs, etc., and one begins to get a fairly good idea of what are the losses due to crime in a large city.

A table prepared in London puts the police and courts down for \$9,149,000, the prisons for \$583,980, lost property for \$1,116,625, loss by injuries, assaults, etc., \$973,300; loss in labor of criminals, etc., \$1,167,960, or a total of \$13,000,865. These appalling figures cover only the well-known items. How many hundreds, thousands, or even millions escape the vigilant eye of the experts. No millions like thirteen or fourteen are able to measure the real losses.

FACTS ABOUT THE SULTAN.

The Life of the Man Who Braved the

SOME NEW INVENTIONS

A GUN WHICH WILL THROW A SHOT THIRTY MILES.

The Inventor Says That He Could Make a Gun That Would Throw a Shot 30 Miles.

The most powerful gun ever constructed was recently completed by the Scott Iron Company, Reading, Penn. It is known as a 6-inch Brown wire-gun, and its inventor, Mr. John Hamilton Brown, asserts that the projectile will issue from its mouth at the remarkable speed of 3,500 feet per second, and will pierce a 6-inch steel plate at a distance of thirty miles. In its course the shot, which weighs 100 pounds, will rise to a height of ten miles.

The strength and range of this unique piece of ordnance lie in the employment of steel sheets forming the central tube of the gun, round which many miles of square wire one-seventh of an inch thick is wound.

The sheets of the central tube are 208 inches long, 26 inches wide, and one-seventh of an inch thick. Upon the wire binding a jacket of steel has been shrunk in such a way that it is impossible for the gun to burst. The completed gun is 318 inches in length, and weighs just over ten tons.

This wire-gun is the first of twenty-five ordered by the American Government for home defence.

A LONG SHOT.

The inventor declares that he could construct a 16-inch gun of a similar kind which would be capable of hurling a monster projectile the record distance of ninety miles. Such a weapon in the possession of the French would allow them to shell London without leaving their own territory.

The torpedo, of whatever kind, has proved itself the most formidable weapon that can be sent against an ironclad, but the "marine torch," if all that is said of it be true, is likely to render the torpedo useless.

The torch consists of a plain, hollow cylinder of aluminium from four to eight inches in diameter and three to five feet in length, and contains a basket filled with calcium carbide. At the top of the cylinder are a number of burners, of the ordinary gas kind, in close proximity to which is a small chamber containing calcium phosphide.

This chemical, on contact with water, gives off phosphuretted hydrogen, which ignites spontaneously in the presence of air. The cylinder is pierced with several holes, which allow the sea-water to reach both the calcium carbide and calcium phosphide. The result is a brilliant light, which will last until the carbide is exhausted, about ten hours.

THE "MARINE TORCH"

is fired out to sea from a gun, and can be sent almost any distance. The moment it enters the water it ignites, and all attempts to extinguish it are in vain.

During night-time a warship could prevent a surprise attack by the enemy by firing one or two torches out to sea. The waters would thus be brilliantly lit up, while the ship that fired the torches would be shrouded in darkness. A torpedo boat could not approach without detection, or secretly hurl a projectile at the ship.

Another feature of war in the future will be the firing of mines and guns by Hertzian waves, which require no other contact. Indeed, the waves are really a kind of invisible light.

Dr. Barton's dirigible balloon was one of the most wonderful airships ever planned, but it did not come up to expectations. It was built especially for the British War Office, and it was hoped that it would be

FINANCES OF GERMANY

THE STATE TREASURY IS IN A VERY BAD WAY.

But Industries are Prosperous — Succession Duties are Too Low.

The economic situation in Germany continues decidedly mixed. While it is true that the Government itself is in a bad way and has been obliged to resort almost to extremities to raise money for necessary expenses, it is also true that industrial Germany has been making giant strides. The situation briefly stated is about this: The Government itself is practically bankrupt, but industrially along certain lines the Germans are making as much, or more, progress than any other nation in the world.

It is difficult to analyze a situation like this. About all that can be done is to give specific instances and allow students to draw their own deductions. For instance, the English Board of the Buenos Ayres Great Southern Railway Company, who have recently placed orders for 100 locomotives, are having 20 of the number built in Germany. The secretary of the company states that the price quoted by the German firm is 25 per cent. lower than that of any English firm, and that quicker delivery can be obtained. The firm is one of high standing, and there have been previous satisfactory dealings with his company.

CONDEMN THE BUDGET.

It is noteworthy that while the announcement of the proposed great increase in the expenditure on the navy was received with very little adverse criticism, except as was to have been expected from the Social Democrats, the new budget of imperial taxation was in many quarters condemned before it has been explained to the Reichstag by its author, Baron von Stengel, Secretary of State for the imperial Treasury. Clerical and Radical journals unite in complaining that 220 to 230 million marks—\$55,000,000 to \$57,500,000—of fresh taxation are demanded from the Empire without any adequate consideration of the natural and probable increase in the Imperial revenues from existing sources, and, above all, from the working of the new tariff. It is true that the increased revenue from Customs under the new commercial treaties will not become appreciable in the estimates till at least a year hence, since there will have been unusually large imports under the present tariff, with a view to avoiding the increased duties. But it is, nevertheless, believed in various quarters that the Government is taking advantage of the present uncertainty with regard to this factor of the revenue in order to impose fresh taxation to an extent which could not be justified by the actual necessities of the Empire.

BEER AND TOBACCO DUTIES.

A good deal of violent criticism is directed against the proposed increase in the duties on beer and tobacco, and these articles of consumption are being discussed as if they were practically necessities of life for the German working classes. The proposed duties are also criticized from the point of view of the brewing industry, which, contrary to semi-official statements, is shown to have been seriously handicapped by recent taxation in the Palatinate, a district which was taken by the semi-official writers as a typical example of the ability of the brewing industry to bear heavier burdens. It is anticipated by the critics of the Government scheme that if the price of beer be raised in North Germany the beer-drinker will become a spirit-drinker. At the same time it is natural that those who from one point of view or another are interested in the popular consumption of beer

are raising from the depths of life all that is dark and evil: everything that is selfish, venal and low, and they have incited this dumb mass of brutalized beings against the best people of the land in order to crush them, and to keep the power in their own incapable hands, if only for another year. They openly hound on, like dogs, Russians on Jews, Poles and Finns; Tartars on Armenians and Georgians; the sluggish peasant, dulled by hunger, on students and even on children; and, perhaps even if to-morrow the Tartars demanded the acknowledgment of their rights, they would send them against the Girghiz and the Moldavians, in order to oppress them. Everywhere one and the same thing. These evil parasites have drawn round them for the protection of their position in the country the wildest and most ignorant of the people, to use them against those who sincerely and unselfishly desire good and freedom. In the whole of human history and in no country has the struggle of the ruling class for the preservation of its power over the people been fought so basely, so infamously, and so cynically as it is being fought in our country in these bloodthirsty days. What a vile and mean immorality is seen in those creatures, who are drunk with the blood which is spilt, and who feel their end approaching.

MOST WOEFUL IN HISTORY.

"What contempt must our country excite in Europe when they see those who rule us calling to life all that is savage, barbarous, and uncivilized, and attempting to kill everything that is really honest, human, and creative. The days through which we are living are the days of the dawning of spiritual regeneration, but the struggle which is raging in Russia will be written in history as one of the most woeful events in the history of mankind.

"This struggle cannot last long, for the governing power is sinking into putrefaction. But those who to-day may steal and kill with impunity will not lightly let go their power. The hand which yesterday broke the skull of the Armenian or the Jew, because they have become conscious of their right to freedom sooner than the Russian or the Tartar—who can tell on whose head the hand will fall to-morrow? It is easy to stop its blind and reckless stroke. Let all honest and good men of the Caucasus, Finland, Poland and Russia join together in one family of friends, and unite in a band of fearless men, asking of one another, 'Who is our enemy?'

ALL HAVE ONE ENEMY.

"The answer is simple. One and all, Tartar, Russian, Armenian and Jew, desire one thing, to live better than they have done hitherto. Not one of them has liberty, not one of them has the right to live according to his racial and religious convictions, which things, above all, are necessary for the growth of his spirit and that of his race.

"Does the Armenian indeed deprive the Tartar of his freedom? Does the Georgian? Are not the Russian and Jew and Pole bound hand and foot by the same power which presses equally heavily on the shoulders of the Tartar? We have but one enemy. All men whose reason is clear, and whose will is not enslaved, must unite in the struggle against this evil and senseless power which presses on all of us. All have but one enemy. Let equality and brotherhood be sure. Let the light of reason shine on us all and weld us together in one great invincible will, and then, 'Hail, Freedom!'

KNOW WHAT HE WAS DOING.

Dinguss—It's good of you, old man, to lend money to me so cheerfully. Shadbolt—Is it, Dinguss? Well, I always bear in mind that there's a blessing pronounced upon the cheerful giver.

WOULD SUIT BETTER.

It would suit most of us better if the reward of virtue were payable in advance.

FACTS ABOUT THE SULTAN.

The Life of the Man Who Braved the Allied Fleets.

Rises at 4 a. m. Works hard. Falls ill. Is practically his own Foreign Minister. Is afraid of the dark. Pays \$300 a night to have his bedroom guarded by eight generals. Smokes cigarettes incessantly. Takes his meals wherever he happens to be.

They are brought to him in silver dishes with covers sealed. The seals are broken only in his presence. The kelardjihi, or official taster, is responsible for every dish.

The Sultan's food is mostly eggs and entrees. It does not cost over \$5,000 a year.

To feed and keep his household, however, costs \$60,000 a week.

Passionately fond of revolver shooting.

A trusty mulla, Hassan Pasha, throws glass balls into the air for the Sultan to shoot at.

Abdul Hamid is very fond of animals. He has over 200 horses in his stables. Spends much time in an aviary among his birds.

Frequently has a number of pet deer brought to his apartments. Very fond of music.

Likes to play the piano, but is a poor performer.

Selections from "Il Trovatore" are his favorites.

Puts bans on all classical music in the palace.

Sits in the auditorium and sips raki bitters.

Reads a great deal, mostly sensational fiction.

Has often re-read the French tales of Gaboriau.

LAUNDRY WORK AT SEA.

New Invention Allows Clothes to be Washed on the Liners.

The washerwoman, or man, has hitherto been a person for whom there has been no place on ship-board.

The reason for this does not lie in the fact that sailors, either in the naval or merchant service, have no clothes that need washing, but is due to the fact that it has been practically impossible to wash linen satisfactorily in sea water.

Many inventors have endeavored to solve the problem, and many patents—one dating as far back as 1771—have been taken out, but still the difficulty remained.

At last, however, a new soap has been introduced, for which it is claimed that linen washed with its aid even in sea water may be starched and "got up" in the best style.

"Ocean-going ships," said a manager of the firm responsible for the new soap, "carry from 50,000 to 100,000 pieces of bed and table linen simply because they have to take enough to last during the entire voyage. Passengers, too, have also to take with them linen sufficient for the voyage.

But with this new soap the washerwoman will be kept busy on liners, and expense, time, and space will be saved.

"The invention has already been investigated by two representatives of the Admiralty, for the use of such soap on warships would be of very great value. At present all used linen has to be sent ashore for washing."

NOT MASTER OF THAT.

"I understand," he said to the professor of languages, "that you are master of at least a dozen tongues."

"Languages," corrected the professor. "Don't say 'tongues.' That might include my wife's."

ever planned, but it did not come up to expectations. It was built especially for the British War Office, and it was hoped that it would be regarded as a recognised adjunct to Britain's military weapons. This balloon, as balloon it really was, had six propellers, which were driven by three fifty-horse power motors at a normal speed of 200 revolutions per minute. The balloon itself was 178 feet long and 43 feet in diameter, with a cubic capacity of 235,000 feet. It was raised and lowered by thirty aeroplanes arranged in three rows of ten.

A BIRD THAT DROPS BOMBS.

An American inventor hopes to construct a successful flying machine on the principle of the flying bird. Louvres will be fitted in the wings corresponding to the action of the bird's feathers. There can be no doubt that the aerial machine of the future will be of this pattern. Loaded with bombs and ammunition such an airship could destroy a whole city within half an hour.

Mr. Rosenberg, a London electrician, has invented a new system of wireless telegraphy. His invention will allow a man carrying an electrical apparatus in his pocket to receive messages from people who do not know where he is. Incredible as this may sound, it is nevertheless the fact. This genius has also discovered a way of watching a scene at a distance of many miles. Electricity allows of this being achieved.

The turbine propeller for steamship purposes is making rapid headway, and before long it is expected that the passenger ships will be fitted with the invention, and allow them to cross the Atlantic at a pace exceeding forty miles an hour. When H.M.S. Viper was fitted with steam turbines she created a sensation by travelling at the extraordinary speed of forty-three miles an hour. The liners of the future will not only have propelling motors but will be driven by liquid air.

BUBBLE CURE.

Machinery is now assisting science. Dr. Cordier has invented an appliance for the cure of neuralgia and rheumatism. It takes the shape of a gigantic hypodermic syringe, and injects air beneath the skin of the sufferer. A bubble of air is formed under the skin, and when kneaded along the painful part gives immediate relief.

Dr. Laborde, of the French Academy of Medicine, restores persons unconscious from drowning or suffocation by the aid of an electric machine of his own construction. Padded forceps are attached to the patient's tongue, and the electric motor pulls this member out at regular intervals. The electrical tongue-tractor, as Dr. Laborde's invention is called, has already saved several lives.

Another doctor does good work in hospitals with an electro-magnet which is pointed at one end. It is used for drawing metal splinters from the eye, and as it has a lifting power of 150 pounds it will extract a deeply-bedded splinter without any injury to the optic.—Pearson's Weekly.

MOUNTAIN STAIRCASE.

For the ascent of Mount Omi, on the borderland between Western China and the Tibetan plateau, there is an artificial staircase consisting of 20,000 steps, cut in slippery limestone. What made these steps is largely a matter of surmise, but they were probably formed by religious enthusiasts to provide a means of access from the hot plains, out of which the mountain mass rises abruptly to the heights, 5,000 feet to 11,000 feet above, amongst which the Buddhist abbey of Omi embodies some of the holiest traditions of the religion professed by its inmates. Anyhow the staircase is there, and by it many pilgrims attain the shrine.

drinker. At the same time it is natural that those who from one point of view or another are interested in the popular consumption of beer should reproach the Government with perpetuating during a period of financial stress those bounties which in the interest of the landed classes are annually paid to the amount of some 50 or 60 million marks (\$12,500,000 or \$15,000,000) to the distillers.

COMPARED WITH ENGLAND.

The Socialists also complain that the proposed Imperial death duties are not heavily enough assessed, and they argue that if in England, with a population of 40,000,000 these duties yield 350,000,000 marks (\$87,000,000) they ought in Germany, with a population of 60,000,000, to yield at least 25 million marks (\$62,500,000) and not a paltry 72,000,000 marks (\$18,000,000).

THE EAR OF THE BABY.

London Physician Gives Pointers to Fond Parents.

Dr. Francis Warner, physician to the London Hospital, in an address at a meeting of the National Association for the Feeble-minded, has given some extremely interesting points to be studied in children with a view to gaining some knowledge of their mental condition.

The absence of the pleat ridge from the outside ear, said Dr. Warner, is a sign of a defective child. Among 100,000 children whom he had examined he had noticed that defective ears were five times more numerous in boys than girls.

The small mouth, so often praised by novelists, is also, said Dr. Warner, a sign of a defective child.

The movements of the fingers and toes of a week-old child are spontaneous and cannot be arrested by a sound or anything held up before its eyes. If, however, at the age of five or six months, the sound of a voice or some object, such as a red doll, failed to arrest the movements for a few seconds, then there was reason for anxiety.

The face, and after that the hand, affords the best index to the state of the brain. Horizontal furrows on the brows of a group of loafing boys can often be seen, formed by the working of the frontal muscles. "Go into the monkey house at the Zoo," said Dr. Warner, "and you will see the frontal muscles of the monkeys working in the same way, and the same thing can be seen in an asylum for idiots."

A well-balanced hand, level from the wrist to the finger tips, indicates a well-balanced mind; if the hand drops at the wrist or if the thumb drops, it shows some degree of mental weakness.

DANGEROUS GUARDS.

The Turkish Janizaries (yeni askari, new soldier) were originally Christian captives, who in the middle of the fourteenth century were trained to be the body-guard of Sultan Amurath I. Originally they numbered 1,000, but after three hundred years they had increased a hundred fold, and under Solymán the Magnificent they formed a force highly disciplined, and noted for the wild impetuosity of their attack. The history of these Janizaries abounds in conspiracies of every kind, so that at last they became more dangerous to the Sultan than his foreign enemies. The lowest officers of this force were the cooks, who were held in greatest esteem. They wore wooden spoons in their turbans, and on great occasions mustered round their kettles, which they turned upside down as a token of revolt. To lose one of these kettles in battle was as much of a disgrace as the loss of a regiment's colors has been in later times.

SUNLIGHT SOAP

is better than other Soaps but is best when used in the Sunlight way. Follow directions.

SUNLIGHT WAY OF WASHING

FIRST.—Dip the article to be washed in a tub of lukewarm water, draw it out on a washboard and rub the soap lightly over it. Be particular not to miss soaping all over. **THEN** roll it in a tight roll, lay in the tub under the water, and go on the same way until all the pieces have the soap rubbed on, and are rolled up.

Then go away for thirty minutes to one hour and let the "Sunlight" soap do its work.

NEXT.—After soaking the full time rub the clothes lightly out on a wash board, and the dirt will drop out; turn the garment inside out to get at the seams, but don't use any more soap; don't scald or boil a single piece, and don't wash through two sudas. If the water gets too dirty, pour a little out and add fresh. If a streak is hard to wash, rub some more soap on it, and throw the piece back into the suds for a few minutes.

LASTLY COMES THE RINSING, which is to be done in lukewarm water, taking special care to get all the dirty suds away, then wring out and hang up to dry.

For Woollens and Flannels proceed as follows:—Shake the articles free from dust. Cut a tablet of **SUNLIGHT SOAP** into shavings, pour into a gallon of boiling water and whisk into a lather. When just lukewarm, work articles in the lather without rubbing. Squeeze out dirty water without twisting and rinse thoroughly in two relays of lukewarm water. Squeeze out water without twisting and hang in the open air.

Colors may be safely washed in the "Sunlight" way.

\$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Your Money Refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

LEVER BROTHERS LIMITED, TORONTO

BABY'S COMFORTER.

Sir Wm. Broadbent Regards It as an Invention of the Devil.

The earliest illusion of extreme youth—the Indian-rubber teat, or baby's "comforter"—was denounced by Sir William Broadbent recently in an address on London's tuberculosis children, delivered at the Council of the Invalid Children's Aid Association, at Denison House, Victoria.

"An invention of the devil," "A fraud on the unhappy child," "A waste of digestive secretions," "were some sort of the picturesque epithets applied by Sir William to the 'comforter' which he attacked with such

STRANGE COINCIDENCES

SOME RECENT ROMANCES OF THE "LONG ARM."

The Case of Henry Johnson—Three Brothers of the Name of Hunter.

Whatever else may fail, one can always rely on the constancy of the crop of coincidences—a fact which must be apparent to anyone who studies his daily paper. Thus, only a few weeks ago, the writer observed that on the same day of August one Henry Johnson qualified as a father, another as a husband, while the third joined the great majority; and in the same paper it was recorded that three brothers of the name of Hunter had married, without the knowledge of each other, on the very same day—one in Canada, the second in Johannesburg, and the third in Scotland; while, to crown the remarkable coincidence, each bride was a "Mary."

About the same time a correspondent sent to "Notes and Queries" the following singular statement of family coincidences: "His mother's name was Watts; his wife's maiden name also was Watts, the second Christian name of both being Emma. The mother's eldest brother is Thomas Watts; the wife's eldest brother is Thomas Watts. The mother's second brother is James Watts; the wife's second brother is James Watts. The mother's eldest sister was Annie Watts; the wife's elder sister is Annie Watts."

THE YOUNGEST DAUGHTER.

In the mother's family was Elizabeth Watts; the wife, the youngest daughter in her family, was also Elizabeth Watts. Up to the time of the marriage the two families were absolute strangers, and so far as is known, in no way related."

A few months ago—in May last—the House of Representatives at Washington adjourned out of respect for the memory of four of its members who had died on four successive days. "A coincidence widely commented on," says a correspondent of a London paper, "is the fact that Mr. Cummings had been appointed to attend the funeral of General Rosecrans, the first to die; Mr. Oley had been deputed to attend Mr. Cummings' funeral; and Mr. Salmon, the last of the quartet to go, to attend the funeral of Mr. Oley."

Not long ago the "Shrewsbury Chronicle" recorded a very singular coincidence of two lives—those of two farmhouse domestics who both left their situations one Christmas; shortly after,

BOTH FOUND HUSBANDS

and settled in the same village, each became the mother of four children, and died in giving birth to the fourth; the two mothers were laid in the grave within a few days of each other, and shortly after the two babes were laid by their side. Each of the wives was called Mary, and each husband was William.

One Sunday recently it was noted that the pulpit in a London dissenting church was occupied in the morning by a Mr. Vine and in the evening by a Mr. Grape. At a recent inquest at Windsor the subject of the inquiry, the coroner, the foreman of the jury, and the undertaker all answered to the cognomen of Martin; at another inquest a witness called Beer was followed by a Mr. Soda; and in Dublin John Lamb was convicted of stealing two sheep from a Mrs. Fields, the chief witness against the peccant Lamb being a Mr. Wolf.

It is not long since there died at Arcadia, Hamilton County, N. Y., two brothers named March, whose lives ran in strangely parallel lines. They were twins, and married on the same day two sisters, also twins. To each couple were born seven sons and five daughters, every one of the two dozen being born on the 7th of a month, which was also the day of the month on which their parents became one.

A RECENT SEA MYSTERY

furnished a very curious coincidence. Two American schooners, the Charles E. Wilbur and the Quineburg, left Savannah and Darien respectively for New

PERSONAL POINTERS.

Gossip About Some Prominent Actors On the World's Stage.

One of Lord Rosebery's hobbies is the collecting of books. He is something of a poet when in the mood, and will, on occasion, turn out impromptu verses for the amusement of his friends.

Count Benckendorff, the Russian Ambassador in London, might have made a very comfortable living with the brush. Years ago he studied painting in Italy and achieved considerable success.

Mme. Sarah Bernhardt is pestered with letters from people in all parts of the world offering tame animals for pets. The great actress has been asked to buy everything, from a gorilla to a python.

Sir Frederick Treves, the King's surgeon, is the orator of his profession. He is a man of inexhaustible knowledge, with a fine delivery, and a command of language which, were he in Parliament, would place him in the forefront of our greatest speakers.

The King of Italy is not only one of the most enthusiastic of Royal motorists, but perhaps the only one who has qualified by passing a severe practical examination in automobile driving. He is a clever mechanic, and can repair his motor-car as well as he can drive it.

Lord Elgin claims to be the direct descendant of the male line of King Robert the Bruce, whose sword and helmet are

HUNGARY IS IN DANGER.

Money Spent for Drink and Taxes are Ignored.

Baron Fejervary, the Hungarian Premier, said in an interview recently that the present Governmental anarchy in that country might end in absolutism.

"There are people to be found," he stated, "who say that absolutism for a while is better than chaos forever."

"The programme of the Coalition—to pay no taxes and to furnish no recruits—appeals to the masses, especially to the more worthless members of the community. Nevertheless, it is a shortsighted policy, which brings its own punishment. The arrears will have to be paid some day, and the Coalition will be the first to exact them if ever it comes into office."

"But the money is gone—chiefly in drink. Since the passive resistance began, the yearly deficit in regular taxation is at the rate of thirty millions, and the annual increase under the head of spirits is over twenty millions. That means that the peasants, instead of contributing to the needs of the Coalition, and the money which ought to go into the treasury, finds its way into the spirit shops."

"The present state of affairs is one that cannot continue without politically, commercially and morally ruining Hungary. All sense of discipline and of public duty is being corrupted."

the Invalid Children's Aid Association, at Denison House, Victoria.

"An invention of the devil," "A fraud on the unhappy child," "A waste of digestive secretions," "were some sort of the picturesque epithets applied by Sir William to the "comforter," to which he attributed much infantile disease. Many evil effects arose from dirty feeding bottles.

It was a remarkable fact, he said, that while consumption had steadily diminished year by year during the last thirty years, the death rate from tuberculous affections among children had distinctly increased. During the years 1901 to 1903, 6,391 children under the age of five years succumbed to different forms of tuberculosis, of whom 2,894 died before they were a year old.

On public grounds, said Sir William Broadbent, these deaths were scarcely to be regretted. If a child contracted tuberculosis at an early age, it was probably very susceptible to disease, and for its own sake death was certainly preferable to a life of suffering, while in the interests of the community at large the elimination of those who might grow up to be a burden and a source of weakness was desirable. Not infrequently the removal of these weakly children allowed the stronger children of the family a better chance of growing up healthy.

A great need exists, in Sir William Broadbent's opinion, for a home where tuberculous children could be received and given the benefit of open air treatment, and in this matter he thought we might take a leaf from the book of the French.

Tuberculosis among children was due, he said, to overcrowded housing, improper feeding, dirt, bad ventilation, and the dirty India-rubber teat.

BLUE LIGHT NUMBS PAIN.

Dental Surgeon's Experiments — May Cure Sleeplessness.

Interesting experiments with blue light as an agent for producing analgesia, or insensibility to pain—the discovery of Professor Redard—have been carried out by Dr. Harvey Hilliard, anaesthetist to the Royal Dental Hospital of London.

Similar experiments carried out by a well-known Geneva dentist have been already referred to.

In an article in the "Medical Times and Hospital Gazette" Dr. Hilliard states that he found that blue light had on himself "a most distinctly calming influence; a desire to close the eye and sleep is experienced; and after some minutes sensibility to pain is lessened. For instance, the difference between light pressure, made with the tip of the little finger and a needle, could not easily be detected, and surgical needles could be pushed into the face, lips, gums and arms, and blood drawn thereby, without actual pain being felt, unless a still deeper pressure were exerted.

"I believe the presence of a blue lamp suitably placed might give satisfactory results in the treatment of insomnia owing to its calming influence, and I have tried it with some benefit in one case. Similarly in the restlessness of infants suffering from mild illness, and in asylums in cases of mania, it is conceivable that blue light rays may be of value. This view is supported by the fact that red light has been found to have a beneficial effect upon small-pox, as it is inimical to the vitality of the germs of that disease."

Dr. Hilliard gives instances of the utility of the blue rays in the case of the extraction of teeth. One man said that under its influence he felt no pain when a molar was extracted, and returned to have two others removed by the same agency.

AND THE CEMETERIES.

If every man wrote his own epitaph the tombstones would have to be enlarged.

also the day of the month on which their parents became one.

A RECENT SEA MYSTERY

furnished a very curious coincidence. Two American schooners, the Charles E. Wilbur and the Quineburg, left Savannah and Darien respectively for New York; and practically from the day of sailing nothing has been since seen of either vessel. Both boats were built at the same time, by the same firm, at Providence; they were of identical size and build, each carried the same cargo to the same port on her maiden voyage, and each vanished at the same time equally mysteriously.

But as a sample of coincidences it would be difficult to match the following experience told by a Birmingham lady. A year ago she was crossing the Menai Straits when she lost her watch, but was compensated by picking up a valuable gold bracelet which somebody else had lost. Some time later, at Cheltenham, a lady saw the bracelet, and remarked that it was exactly like one she had lost, and produced a watch which she had found at the same time. An exchange was made, and thus two ladies became possessed again of their own property.—London Tit-Bits.

THE WEDDING RING.

The use of a ring as a pledge is of very ancient date. "See, I have set thee over all the land of Egypt," said Pharaoh, as he placed his signet ring upon Joseph's hand. Clemens tells us that its use in the marriage service began in that country, and then, as now, signified a transfer of property: "With all my worldly goods I thee endow." Among the Anglo-Saxons the bridegroom gave a pledge, or "wed" at the betrothal ceremony. Part of this pledge was a ring, which was placed on the maiden's right hand, and transferred to the left hand at marriage, when the bridegroom put it in turns on the thumb, and the first and second fingers, naming the Trinity, and, finally, on the third finger, in token that next to her duty to God was her duty to her husband. The wedding-ring, by its form, is a symbol of eternity, and in this sense a pledge of the enduring obligation of marriage vows.

THE PURCHASER.

"James, my lad," said the groceryman to his new clerk, "who bought that mouldy cheese to-day?"

"Mrs. Brown, sir," was the youth's reply.

"And the stale loaf we could not sell last night?"

"Mrs. Brown, sir."

"Where's that lump of rancid butter that the baker refused?"

"Mrs. Brown bought it cheap, sir," was the answer.

"And the six eggs we could not sell a week since?"

"Mrs. Brown. Are you ill sir?" asked James as the groceryman turned green and groaned.

"No, no; only I am going to supper at the Browns' to-night," replied the unhappy man, as he wiped the perspiration from his face and sank into a chair.

TIME TO QUIT.

A janitor of a school threw up his job the other day. When asked the trouble, he said:

"I'm honest, and I won't stand being sturred. If I find a pencil or a handkerchief about the school when I'm sweeping I hang or put it up. Every little while the teacher or some one that is too cowardly to face me will give me a slur. A little while ago I see wrote on the board:

"Find the least common multiple."

"Well, I looked for cellar to garret for that thing, and I wouldn't know the thing if I would meet it on the street. Last night, in big writin' on the black-board, it said:

"Find the greatest common divisor."

"Well, I says to myself, 'both of them things are lost now, and I'll be accused of takin' 'em, so I'll quit!'"

THE PITY OF IT.

"All the good jokes have been written."

"Too bad as much can't be said for the poor jokes."

who perhaps the only one who has qualified by passing a severe practical examination in automobile driving. He is a clever mechanic, and can repair his motor-car as well as he can drive it.

Lord Elgin claims to be the direct descendant of the male line of King Robert the Bruce, whose sword and helmet are kept at Broomhall. He is a godson of Queen Victoria, from whom he received many tokens of affection, among them a beautifully carved bust of herself.

The chef at the Court of the Czar of Russia is by tradition and position a gentleman, and has the right of wearing a sword. The present holder of the office is an Alsatian named Krantz, who fought with the French army in the Franco-German War, and won distinction. His pay and perquisites amount to about \$35,000 a year.

The Shah of Persia has just sent to an American lady residing in London a decoration which is the oldest in the world—that of the Grand Order of the Lion and the Sun. The recipient is the Comtesse Anna de Bremond, who was introduced to the Shah during his visit to Ostend last summer. His Majesty was so charmed with her singing and her recitation of some of Omar Khayyam's poetry in Persian that he forwarded the decoration immediately on his return to Teheran.

Mr. Archibald Sturrock, formerly locomotive engineer to the Great Northern Railway of England, has just entered his ninetieth year. Mr. Sturrock joined the Great Northern Railway in 1850, and practically revolutionized the locomotive narrow-gauge system. Mr. Sturrock is now the oldest locomotive engineer in the world. He is also the oldest Volunteer field officer in Great Britain, having joined the force in 1850. He served upwards of twenty-one years as captain, three as major, and possesses the long service decoration.

The only English lady privileged to act as a nurse in the Russo-Japanese War, and the first to enter Port Arthur after the historic siege, has recently returned to London after fifteen months' experience of the horrors of warfare. The lady is Mrs. Teresa Richardson, the widow of Mr. John Richardson, of Glau-brydan Park, Carmarthenshire, who was specially selected by Viscount Hayashi, the Japanese Ambassador, to assist in nursing his wounded countrymen. Tall and of commanding appearance, with a kindly, sympathetic face and eyes from which pity shines, Mrs. Richardson was known by the Japanese heroes she nursed as "Our English Mother."

A pretty story is told of the introduction of the King of Portugal to his charming and clever wife. One day when the Crown Prince, as he then was, was calling on the French Ambassador, his attention was arrested by the photograph of a sweet-faced, fair-haired girl on the mantelpiece. Taking up the photograph to examine it more closely, he said to the Ambassador, "What a charming young lady!" "Yes," was the answer; "and she is as charming as she looks. She is the Princess Amelie of Orleans." On the following day the Prince was on his way to Paris and a fortnight later his engagement to the beautiful Princess was formally announced to the world.

Captain Hamilton, Chief of London's Fire Brigade has a strong sense of humor. When in command of a small vessel, he hurried up one day from his lunch-table on account of threatened bad weather, and almost immediately afterwards sent down a midshipman to look at his barometer. Walking aft, he happened to look down the sky-light, and, to his amazement, saw the midshipman fortifying himself with a glass of his best brown sherry. When the youngster came on deck, Captain Hamilton asked him how the glass stood. "Steadily rising, sir," was the reply. "Ah!" said the Captain, "and how is the sherry?" Like a shot came the answer, "Steadily falling, sir." Hamilton so much appreciated the joke that he allowed the incident to pass without further notice.

Lady Visitor—"That new girl of yours seems very nice and quiet." Mistress of the House—"Yes, she's very quiet. She doesn't even disturb the dust when she's cleaning the room."

into the treasury, innas its way into the spirit shops.

"The present state of affairs is one that cannot continue without politically, commercially and morally ruining Hungary. All sense of discipline and of public duty is being corrupted."

TIPS FOR HOME SHAVERS.

Practical Hints on How to Obtain an Easy Shave.

Only experience can teach the art of shaving. Unfortunately this comes to many so late in life that by the time they have learnt to shave much unnecessary agony has been endured. To obtain an easy shave, the first necessity is to wash the face in soap and cold water, and dry the skin thoroughly immediately before applying the lather. Then, the more the face is lathered, and the thicker the lather is, the easier will be the shave. The razor is the thing, however, that requires the most attention. Remember, it is not a smooth blade, as the unscientific imagine, but a fine saw, as anyone who troubles to place it under a strong enough magnifying-glass can ascertain for himself. Such being the case, it is insufficient to rake it over the face. It should be moved in a sawing manner, either from toe to heel, or heel to toe, as the special board operated on may demand. Those in doubt should try both ways, and a second's experience of each will show which is preferable. The blade should be held nearly flat to the face, because it is more efficacious in this position, and is less likely to damage the skin. If the skin is drawn as tightly as possible with the left hand, the hairs will be forced out and razed at a lower level than otherwise.

THE GREAT BED OF WARE.

In Shakespeare's Twelfth Night Sir Toby Belch urges Sir Andrew Aguecheek to pen a challenge, and to put in it "as many lies as will lie in the sheet of paper, although the sheet were big enough for the bed of Ware." This enormous bed, which was a wonder in Shakespeare's time, and still exists in Ware, is seven feet six inches high and ten feet nine inches square, so that twelve people can lie comfortably in it. Beautifully carved it is a splendid specimen of antique furniture, dating from the days of Queen Elizabeth. This wonderful bed is naturally an object of curiosity to many visitors, and it has been their custom to drink from a can of beer a toast appropriate to it. In the same room there hung a pair of horns, upon which all strangers formerly were sworn.

THE MAGIC MIRROR.

The "magic mirror" of Japan is a disc of bronze, usually from 6 inches to 8 inches in diameter. It is silvered on the front, which is a little convex, and there is a raised pattern on the back which is rather concave. The polished pattern is generally a landscape, flowers, animals, or Chinese characters. This is not visible in the front of the mirror, but when strong sunlight is reflected from the front of the mirror to a wall or screen the pattern of the back is visible on the screen in bright lines on a black ground. The true scientific explanation of this magical effect seems to be that the design on the back alters the convexity of the front, making it flat along the lines of the pattern, so that the light reflected from the front is not dispersed at these points of the design, and they appear bright on the screen.

FINE NATURAL FORTRESS.

In the northern part of Madagascar is the most remarkable natural fortress in the world. It is occupied by a wild tribe who call themselves the People of the Rocks. The fortress is a lofty and precipitous rock of enormous size, 1,000 feet high and eight square miles in area. Its sides are so steep that it can not be climbed without artificial means. Within it is hollow, and the only entrance is by subterranean passage.

Ayer's

Losing your hair? Coming out by the comb? And doing nothing? No sense in that! Why don't you use Ayer's Hair Vigor and

Hair Vigor

promptly stop the falling? Your hair will begin to grow, too, and all dandruff will disappear. Could you reasonably expect anything better?

"Ayer's Hair Vigor is a great success with me. My hair was falling out very badly, but the Hair Vigor stopped it and now my hair is all right."—W. C. Lonsdale, Lindsay, Cal.

The recount of votes gives the Scott party seventeen seats in the assembly to Haultain's eight. It is to be hoped the opposition will not dwarf any more.

On Thursday last some of the Hon. Geo. Ross' admirers gathered at his home in Elmsley place and made him the recipient of a check of generous proportions. This is quite as it should be. Mr. Ross is entitled to the recognition of his party for his long public services, and the gift itself is an indication that the best opinion of the community is in favor of a man whose

their efforts resulted in largely increased attendance and enthusiastic discussion. Reports from all along the line indicate that the series of meetings just closed, have been more successful than at any time during the past few years, some of the oldest men in work stating that "they were the best meetings I ever attended."

A special appeal was made to the officers, and they have responded like men. It is to be hoped that they will continue the good work in the series of meetings to be held in January and February.

The work to be undertaken at the meetings this winter will consist, as in past years, of addresses and discussions on what are called by some, "Thread-bare Subjects." We are thoroughly convinced, however, that there is nothing of more vital importance to the average farmer, than the general cultivation of the soil, the selection of seed grain, the prevention of the introduction and eradication of weeds, the necessity for having a definite object in the breeding of the various classes of live stock, the feeding of stock at the lowest possible cost in keeping with the production of a high class of animal products, etc., etc. All these and many other subjects will receive due prominence at the meetings this winter; and the greatest good will result only when those in attendance go prepared to take an active part in the discussions.

Each deputation will be furnished with mounted specimens of 30 noxious weeds. These will be exhibited at the places of meeting both before and after the addresses are delivered and will be of interest not only to farmers, but to their wives and children. Small pamphlets, setting forth methods of eradication will be distributed to those who show an interest in the subject of weeds.

It is to be hoped that the farmers will not neglect to adopt some means by which their sons will become interested in the work of the Institute. Take the boys to the meetings with you and induce them to study the literature sent out by the Department.

It was unanimously decided at the Convention held in September last it would be well to form one or more Farmers' clubs in each riding. These should be only at those places where a keen interest is manifested. These clubs will be officered and conducted solely by local men. Inquiries were made regarding the formation of these clubs at the fall meetings, and several localities have already intimated their intention to hold meetings throughout the winter. Full information as to the best method of conducting these clubs will be given to each deputation. If a sufficient number of centres decide to organize for local work, the Department will undertake to give directions and assistance by circular and pamphlet from time to time.

Deafness Cannot be Cured.

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out, and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

HAPPINESS.

The Ambition of the Seeker and Where It Led Him.

THIS PRETTY CANADIENNE

Saved From Terrible Kidney Disease By "Fruit-a-tives."

MASSON, P.Q., Nov. 16th., 1904.

"I have much pleasure in reporting to you the great benefit I have received from taking 'Fruit-a-tives'—and I feel that I cannot say too much in favor of a medicine which has done me so much good. I was a martyr to that distressing complaint, chronic constipation accompanied with severe headaches, backache, sick stomach and all the symptoms of dyspepsia. I had also a dreadful complexion, sallow in the extreme and black under the eyes. I had every symptom of kidney irritation and I had been told by physicians that my kidneys were affected. I consulted a number of physicians and took various remedies but received very little benefit. Last May I was advised to try 'Fruit-a-tives' and when I began to take them I had little faith of getting anything to give me permanent relief, but after I had taken half a box of 'Fruit-a-tives' I began to feel better and before I had finished one box the constipation was relieved, the headaches left me, the pain in my back was better and I could sleep as soundly as when I was child. Also, my complexion began to clear up again, all the sallowness disappeared and the black circles under my eyes went away. The pain in the back gradually left me and all signs of kidney disease disappeared by the first of August after I had taken three boxes. Since then I have continued to improve and now I have none of my old symptoms and my appetite is good, digestion splendid and my complexion as clear as when I was a young girl. Also the constipation from which I had suffered so long has been entirely cured and it is not necessary for me to take the 'Fruit-a-tives' now as I am quite well in every way. I took no medicine but 'Fruit-a-tives' but I followed faithfully the directions as to diet etc., given in the pamphlet which accompanies each box of 'Fruit-a-tives.'"

(Sgd.) FLORENCE JAMISON.

Every part of the body is constantly decaying and being renewed. The dead cells, or tissue waste, should be removed by the skin, kidneys and bowels. When these organs do not act regularly, this poisonous matter stays in the system—is taken up by the blood—carried to heart, liver, stomach, brain and nerves all over the body—and poisons everything it touches.

"Fruit-a-tives" keep each organ clean and healthy. "Fruit-a-tives" act on the skin, stimulating the millions of minute glands and opening the pores so the waste can escape. They act on the liver sending more bile into the bowels and making the bowels move regularly and naturally every day. They act on the kidneys, strengthening and invigorating these organs and curing all kidney disorders.

At all druggists or sent postpaid on receipt of price—
50c. a box or 6 boxes for \$2.50.

HAPPINESS.

The Ambition of the Seeker and Where It Led Him.

In the sunrise of life a youth said: "I will attain greatness. I will mount to the high places, above the groveling throng, and wealth, power and happiness shall be added unto me."

In the flush of the morning he strove for all those things. At high noon he had acquired wealth, and in the afternoon power and fame came to him. It was as he had said, save that he, with all the generations of men, found not happiness. There had been friendships and smiles and hand clasps and embraces, but none of these things secured for him the thing he sought.

In the evening he sat by an open grave and pondered. Wayfarers saw him there and wondered much. "He is one of the mighty of earth," they said. "He has lands and tenements and goods. He has friends and servitors and fawning sycophants about him. Though we seek in vain, he must have found happiness."

They could not know that his palaces sheltered blasted hopes, that tares grew in his gardens, that the acclaim of the mob jangled harshly in his ears. They did not see his yearning, the dead dreams within him, the ashes in his heart.

His search had ended at an open grave. He drew his mantle about him and descended into it, while the passing throng swirled by.

At last, and without his knowledge, he had found that happiness which he long had sought.

A POPGUN PLANT.

Witch Hazel Shoots Its Seeds Away Ten or Fifteen Feet.

Do you know that the witch hazel shoots its seeds ten or fifteen feet? If you want a brand new sensation, bring home some branches of witch hazel having both flowers and unopened seed pods on them and put them in vases of water. The pods burst at the most unexpected times, waking you in the night and peppering you with their hard, shiny, black seeds. Branches that are to be used for a party must be selected with care to be sure of having perfectly fresh flowers and seed pods that have not opened. If it is possible to do so, cut them the same day they are needed. If they must be cut the day before they are needed, put them in a cold place in water and wrap a damp cloth around the branches in order to prevent the flowers from withering and to keep the seeds from being expelled too soon.

There will be great excitement when the seed pods open with a snap and the seeds come pattering down. It is well to rehearse this performance, for natural objects often refuse to "show off" when you want them to.

The Fly.

The fly's capacity for crime is extended by its strength, which is relatively nearly seven times that of a horse, for it can lift twenty times its own weight. It can absorb enormous quantities of oxygen and is, in fact, a confirmed oxygen toper.

The reprehensible habit of walking upside down on the ceiling, to which the fly is addicted, is due to its habit of exuding gum from each of the 1,200 hollow hairs in its feet.

The fly, too, has an evil eye, which is divisible into several other eyes. It has also 1,700 or 1,800 parts all connected

teeting unsound meat, such as is given to no other living creature.—Lecture of H. Hill in London.

Novel Desert Bath.

One of the wonders of the California desert is the hot sand bath, famous from the times of the first Spanish pioneers. The surface water is only a few inches deep. Beneath is black sand, constantly in gentle motion. The bath does not touch bottom. His body sinks to the shoulders and with the aid of a crossbar of timber is then sustained in a position of perpendicular flotation. The temperature is just as warm as can be comfortably borne, and the sensation, like that of soft massaging, is delightful.

John Brown's Cottonwood.

One day in 1857 John Brown rode up to the Benton place near Ellingham, Athol county, Kan., and dismounted. He carried in his hand a switch which he had cut from a cottonwood tree. This he tossed aside, and later Mrs. Benton stuck it in the ground at the back door of her little house. It took root and grew. It is now a huge tree and is known in the neighborhood as "the John Brown cottonwood."

Ought to Be Happy.

Towne—I hear Marryat and his bride are no longer living at that boarding house of yours. Browne—No; they've gone to housekeeping. Towne—Ah, their home life now will bring them much closer together, and— Browne—You bet it will! They've taken a flat.

Evil Enough.

There is evil enough in man, God knows. But it is not the mission of every young man and woman to detail and report it all. Keep the atmosphere as pure as possible and fragrant with—
—thoughts and deeds—

Consumption Cured

Never lose heart if you have consumption. Others who have been left to die by the doctors, have been saved by **PSYCHINE**, and it will save you, too.

Consumption is a powerful disease, but **PSYCHINE** is a more powerful remedy. It practically puts new life into the system, increases nutrition, purifies blood, tones up the nerves, kills germs and repairs exhausted tissues. Don't waste time and don't lose hope until you have tried

Take Care of Your Teeth.

All decay of the teeth begins from without. Consequently if the teeth's surfaces be kept scrupulously clean they cannot decay. Let the child early acquire the habit of using a small toothbrush dipped into chalk flavored with some aromatic drug, and let it understand that the places most needing the brush are those between the teeth. That is the place where decay almost invariably appears. Mucous secretions and secretions of food are always found between the teeth after a meal. They may be removed with a toothpick. It is almost an art to use a toothpick. One must beware of injuring the fleshy parts and leaving splinters, which in some cases may cause the loss of a tooth. Metal toothpicks should be altogether avoided. Those of dull and hard wood are best.—London Lancet.

Joke of the Deep Sea.

"The sea's pressure is almost incredible," said the clubman. "If you descended deep enough it would crush you, bones and all, to a mass of reddish mud. Off Sicily we ran out of ice, and some one suggested that to cool the champagne for dinner we lower it a half mile or so into the sea's depths."

"This was done, and at dinner time the three bottles came up delightfully cold. But when we opened them we found that they contained nothing but salt water. The sea's pressure had forced the water in through the pores in the corks, displacing the lighter liquid."

Take a Felon In Time.

If you have the appearance of a felon coming put some hardwood ashes in an old tin cup, pour over them warm water, immerse the end of the sore finger in the ashes, set the dish on some live coals or on top of the stove, keeping the finger in as long as you can, and soak it several times a day. If taken in time it generally cures a felon from coming if the finger is wet with it often.

After a Taste.

"Well," demanded Miss Starvem at the back door, "what do you want?" "Why," replied the tramp, "I seen you advertise 'table board' in this mornin's paper?"

"Well?" "Well, I t'ought mebbe yer wuz givin' out some samples."

THE CINNAMON TREE.

How the Bark is Gathered and Prepared For Use.

The cinnamon tree grows to a height of from twenty to thirty feet and is sometimes eighteen inches in thickness. The leaves are from four to six inches in length, oval shaped and marked with three principal nerves. They taste very much like cloves. Cinnamon flowers are of a beautiful silky gray on the outside and a light yellow on the inside. The fruit is a small acorn shaped drupe, and when ripe it is quite brown.

It is, however, the bark of the cinnamon tree that makes it valuable. The finest comes from the island of Ceylon, where they have two seasons of cinnamon harvest. The first season begins in April and the last in November. The branches of three to five years' growth are cut down, and the epidermis is carefully scraped away. Then the bark is ripped up lengthwise with a knife and gradually loosened until it may be easily removed.

The slices of bark are then placed in the sun to dry, and as they dry they curl up into quills. The next thing is to examine and arrange the cinnamon according to its quality. The persons whose work it is to examine the cinnamon are obliged for this purpose to taste and chew it, although in a short time it produces a very painful effect on their mouths and tongues.

As the cinnamon quills are examined the smaller ones are inserted into the larger, and the whole is then tied up in bundles weighing about eighty-eight pounds each.

In Ceylon the oil of cinnamon is usually prepared by grinding the coarsest pieces of bark, soaking this powder in sea water for two or three days and then distilling. Two oils pass over, one lighter the other heavier than water.

THE ANTELOPE.

His Two White Patches That Act as a Signal Code.

Visitors to the circus and menagerie have noticed the two white patches on antelopes. Those spots are a signal which can be read by the animals which have noses to smell. Even animals whose sense of smell has been lost can read the message which the antelope gives to warn his friends of danger.

The hairs on these patches are long, white and ordinarily point downward. Among the roots of the hair is a gland which secretes a strong musk. Underneath the skin at this point is a broad sheet of muscles which have the power to raise these hairs so that they stand out at all angles like the petals of a huge white chrysanthemum. When an antelope sees danger this muscle acts and the patch flashes out like snow. In the middle of each is a dark brown spot, the musk gland, which frees a great quantity of the musk which can be detected down the wind for a long distance by another antelope. Even man can distinguish this danger signal for some yards.

The antelope has five different sets of glands, each giving forth a different kind of musk for use in its daily life as a means of getting or giving intelligence. The two in the middle of each rump patch has been explained, but the purposes of the others have not yet been fully accounted for.

Evolution of a Name.

An amusing account is given of the evolution of a name. A man named Halfpenny lived in Dublin at the end of the eighteenth century. Having been very successful in business, his chil-

painting was his love for the sport of fishing. He was not only enjoying his summer gathering—French Canadian landscapes; he was reveling in his favorite sport as well.

After an hour of successful fishing in the quiet spot which he had selected he spied a splendid trout tucked cozily under a stone. But it was written in the book of fate that this fish and the frying pan should not lightly be brought together. Fly after fly was thrown in vain. Down through the crystal clear water he could see the sleek sides and the round, unspectacular eye of his intended victim, and he resolved to try the method of tickling.

So he undid his sleeve links, bared his arm and knelt upon the lichens, clinging with one hand to an overhanging birch. He was dipping cautiously toward the water when there in the pool before him, close to the reflection of his own, flashed another face.

It was a girl's face, and in its unusual loveliness it lay for a second like some magic picture. The next second Blake observed with a thrill that the vision was being changed by the current and that his own blond curls were made to trespass gently over the girl's dark ones. Then while he gazed at the reflection with Narcissus-like intentness the other face vanished as suddenly as it had come.

Springing to his feet, Blake perceived the bent trunk of an alder which projected across the stream from the top of the bank above, and he knew that the girl must have been leaning over the trunk from that higher bank, unconscious of his presence, until, like a startled deer, she fled.

"She was like one of Murillo's gypsy eyed Madonnas!" he exclaimed. And, though he went on for awhile longer with his trout fishing, the sport seemed to have lost a bit of flavor.

The next day Paul Blake drew up his horse before the kitchen door of a whitewashed farmhouse, and Antoine Martin rose to greet him.

"Bienvenue, m'sieu," said he, with old French hospitality. "And will m'sieu dismount?"

Blake did dismount, and as he stood in the wide doorway he tried to account for his presence. He was a painter, forsooth, and doing this section of Canada. He had already collected a good many views, but among them all there was not one more wonderful than that which could be obtained from the level plateau on which Antoine's farm stood. It was as if the hills had here withdrawn to leave an arena for some great spectacle, some ancient savage pageant. Might he, therefore, be permitted to fetch his easel and palette and to put upon canvas the harmony and beauty of it all?

Blake saw the lithe figure of a girl sitting opposite to him, her arms upon the table, her dimpled face with the Murillo eyes framed in both hands, her scarlet lips parted in breathless listening, hanging upon his words. Ah, luck was with him, to be sure. If he had lost the trout yesterday he had found the girl today.

"Come here, cherie," said old Antoine to the girl, and to the stranger, "My niece, Marie."

"But, you little water sprite, you little Undine, however did you get your face so mixed up with mine that day in the pool?" Blake asked one morning as Marie stood watching him at work on his canvas.

"Eh, bien, m'sieu, I had gone out for a pique-nique on the barrens, and—ramasse les granages—what you call pick berries," she answered in her quaint

S. Bond & Co's.

Odessa.

Full Line of Groceries, Dry Goods, Patent Medicines, Boots and Shoes, Rubbers, always on hand.

GIVE US A CALL.

S. BOND & CO, - Odessa.

and set her trembling.

"Ma petite blonde!" Blake used the soft provincial word for sweetheart that Marie had used in her song. His tone was one of gentle entreaty; his attitude was that of reverence.

"Ma petite blonde," he repeated, taking her hand and lifting it softly to his lips, "I want you for my little wife. Will you let me take care of you always?"

She looked at him with wide, surprised eyes and slightly parted lips.

"You, m'sieu?" she said breathlessly. "You to take care of me?" It seemed

incredible.

For answer he drew her to him as a knight of old would have drawn a lady and looked into her lovely face. His blue eyes and her Murillo eyes met and pledged each other in deep drafts of gazing; then with a superb motion of surrender Marie reached up and put her arms about his head.

Thus in reality did his blond curls trespass gently over the girl's dark ones, even as once they had seemed to do in that reflection in the pool. And thus was brought about the winning of Antoine's Marie.

THROUGH THE HEART!

WHEN THE NERVES BECOME A WRECK AND VITALITY RUNS LOW BECAUSE THE HEART FAILS TO DO ITS WORK—THROUGH THE SELFSAME HEART—IF CURE COMES—MUST IT COME

Dr. Agnew's Cure for the Heart

Cures the nerves through the heart. Experience of the highest medical authorities has conclusively proven that the quickest way to cure diseases of the nerves is to fortify the heart with "food" that is natural to it, and that, enriches the blood; and it has been proven also, beyond the shadow of a doubt, by this same high medical authority, that Dr. Agnew's Cure for the Heart is the most potent nerve nourisher and heart strengthener that has been "gathered in" from nature's lap to assuage sufferings, stop pain and heal the heart sick; and when you know that with the heart, the main spring, the balance wheel of life, out of order, the future looks out on nothing but darkness and suffering, why postpone applying the remedy? Why delay taking hold of the healing hand that will lift you back to health? Dr. Agnew's Cure for the Heart will relieve any and every form of heart disease in 30 minutes.

Margaret Smith, of Brussels, Ontario, says: "Many a time my suffering was so great that I would have hailed death with a welcome, but four bottles of Dr. Agnew's Cure for the heart wrought a wonderful cure in me."

SOLD BY ALL DRUGGISTS AND MEDICINE DEALERS.

DR. AGNEW'S LITTLE LIVER PILLS cure Sick Headache, Biliousness, Indigestion and Constipation—they never gripe—40 for 10c.

DR. AGNEW'S CATARRHAL POWDER relieves in 10 minutes.

Gray's Syrup

Cures Coughs

GRAY'S SYRUP does that one thing, and does it well. It's no "cure-all," but

the eighteen century. Having been very successful in business, his children persuaded him to change his name to a more dignified one, which he did by dropping the last letter. In the course of time the orthography was also changed, and when the man died he was buried as Mr. Halpen. The fortunes of the family increased still further, and the son soon dropped the "H." The next transition was an equally easy one, and he who had run the streets as little Kenny Halpenny came out as Kenneth MacAlpin, the descendant of a hundred kings.—London Queen.

A Story of Thackeray.

There is a story of Thackeray shortly after the publication of "Vanity Fair" dining with a friend and receiving an introduction to his next neighbor, "Captain Crawley of the Life guards." Thackeray looked greatly annoyed, scarcely opened his lips to this gentleman and afterward told his host in an aggrieved tone that "he liked a joke as well as any man, but there was a time and a place for all things." No joking allusion to a character of his novel had, however, been designed or perpetrated. The fellow guest actually was a Captain Crawley and held a commission in the Life guards.

Where Gannets Swarm.

One of the most remarkable sights in the world is Bird Island, in South Africa, for the reason that during some months of the year it is literally covered with gannets. Not a foot of ground is to be seen anywhere. Day after day thousands of gannets strut around, and they are so close to each other that the whole island seems actually alive. Those who have seen this sight say that it is one which can never be forgotten.

doimes on Poetry.

When I feel inclined to read poetry, I take down my dictionary. The poetry of words is quite as beautiful as that of sentences. The author may arrange the gems effectively, but their shape and luster have been given by the attrition of ages. Bring me the finest simile from the whole range of imaginative writing, and I will show you a single word which conveys a more profound, a more accurate and a more eloquent analogy.—"Autocrat of the Breakfast Table."

His Place In Natural History.

"Were you a bull or a bear?" asked an acquaintance of a speculator. "Neither," he replied. "I was an ass."

Sheik Saadi, the Persian philosopher and poet, said, "Ten dervishes can dwell in peace on one rug, but two princes cannot live in one empire."

Antoine's Marie

By Virginia Leila Wentz

Copyright, 1905, by K. M. Whitehead

One August morning, with his high leather leggings, his easy costume, his fishing basket and tackle, Paul Blake strode along through the dew wet Canadian grass. He knew of a certain deep hollow in the brook which on such a gray moist day as this would be the haunt of juicy trout, and for the sheer joy of expectation he whistled. For equal to Blake's love for the art of

masse les granges—what you can pick berries," she answered in her quaint English speech, eked out with bits of patois here and there. Then she explained how she'd leaned over the trunk of the tree from the bank above to wash her stained fingers; how, just as she was in the act of dipping down, she had seen his reflection in the water and was startled.

Between the strokes of his brush Blake took surreptitious glances at the willowy figure, half holding back the apple boughs as she talked, half swinging on them. Rebel locks had broken out of confinement and were curling damply about her warm, white neck and that crumpled rose leaf of an ear. Ah, she was exquisitely delightful! That same day he said to Antoine:

"If you would permit Mlle. Marie to sit to me, and if Mlle. Marie will consent"—he questioned the Murillo eyes, which silently gave him his answer, then fell beneath his own—"I could do a painting that was worth while."

So the August days passed till the brief Canadian summer was over. Already they had started to burn the wood that Antoine had cut for winter use.

While the piled up logs sent red lights flickering about the plastered walls and shining floor, they would often show that Blake had joined the Martin home group and was reading to old Antoine, who listened soberly between long whiffs at his pipe. Marie would sit on the high backed bench near the clock, knitting, stealing a glance now and then at the volume which lay open on the table.

Antoine, good, sturdy old Antoine, had just been offered the position of foreman of a gang in the pneries at the headwaters of the Lievres. He had worked in the lumber camps for years, but never as foreman, forsooth. Nevertheless he hesitated about accepting it. There was poor little Marie, he pointed out to Blake. What would become of her?

"Poor little Marie!" For the next few days Blake did a good deal of thinking. Marie had never read Henry James or Meredith, it was true; she had never seen a poster lady, never heard "Camille," and yet in her setting she was perfect. Moreover, she was the sort to adapt herself readily to new environments. "And why not?" he argued finally to himself. "She is pure, beautiful and capable of the deepest, tenderest feelings. What she has not is the superficial gloss of society. That I do not want."

One evening, pushing his book aside, Blake glanced across at Marie, whose eyes, as usual, were bent on her knitting. She was humming softly to herself an old Canadian boat song:

"Descendez l'ombre,
Ma jolie blonde."

Blake had often heard it above the blow of the oars in the rowlocks, but never had the words seemed so fitting as tonight. He rose suddenly and laid a hand on Antoine's shoulder.

"Let me take Mamselle Marie for a little stroll in the starlight," he said pleadingly. "It's warm in here. I will take good care of her."

"Eh, m'sieu!" The old man dropped his pipe and gauged him silently for a second with those black beaded eyes of his. What he read in the younger man's face must have satisfied him, for he said finally, with a little movement of his hand: "It must not be far. See you, m'sieu? And it cannot be for long."

Outside through the dusk there was a silvery glimmer. The woodland stir seemed like a sigh. Blake looked down closely into the little face beside him. In the mind of the girl something indefinable had arisen, something which had stolen away all her gay caprices

Syrup of Red Spruce Gum

GRAY'S SYRUP does that one thing, and does it well. It's no "cure-all," but a CURE for all throat and lung troubles. GRAY'S SYRUP OF RED SPRUCE GUM stops the irritating tickle—takes away the soreness—soothes and heals the throat—and CURES COUGHS to stay cured.

None the less effective because it is pleasant to take.

25 cts. bottle.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRs,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

BOYLE & SON, Agents.

Say "S"

To This Offer, and See th.

d You Will Get.

Write us if you are ready to try Liquezone. Let us buy the first bottle for you. Let the product itself prove the good it can do.

You who are waiting don't know what you miss. There are plenty to tell you if you would ask; for millions have already used it. Some use it to get well; some to keep well. Some to cure germ diseases; some as a tonic. You will use it as they do, when you learn what the product does. And you will then regret that you delayed so long.

What Liquezone Is.

The virtues of Liquezone are derived solely from gases. The formula is sent to each user. The process of making requires large apparatus, and from 8 to 14 days' time. It is directed by chemists of the highest class. The object is to so fix and combine the gases as to carry into the system a powerful tonic-germicide.

Contact with Liquezone kills any form of disease germ, because germs are of vegetable origin. Yet to the body Liquezone is not only harmless, but helpful in the extreme. That is its main distinction. Common germicides are poison when taken internally. That is why medicine has been so helpless in a germ disease. Liquezone is exhilarating, vitalizing, purifying; yet no disease germ can exist in it.

We purchased the American rights to Liquezone after thousands of tests had

been made with it. Its power had been proved, again and again, in the most difficult germ diseases. Then we offered to supply the first bottle free in every disease that required it. And over one million dollars have been spent to announce and fulfill this offer.

The result is that 11,000,000 bottles have been used, mostly in the past two years. Today there are countless cured ones, scattered everywhere, to tell what Liquezone has done.

But so many others need it that this offer is published still. In late years, science has traced scores of diseases to germ attacks. Old remedies do not apply to them. We wish to show those sick ones—at our cost—what Liquezone can do.

Where It Applies.

These are the diseases in which Liquezone has been most employed. In these it has earned its widest reputation. In all of these troubles we supply the first bottle free. And in all—no matter how difficult—we offer each user a two months' further test without the risk of a penny.

Asthma
Abscess—Anemia
Bronchitis
Blood Poison
Bowel Troubles
Coughs—Colds
Consumption
Contagious Diseases
Cancer—Catarrh
Dysentery—Diarrhea
Dyspepsia—Dandruff
Eczema—Erysipelas
Fever—Gall Stones
Goitre—Gout
Gonorrhea—Gleet
Hay Fever—Indigestion
La Grippe
Leucorrhea
Malaria—Neuralgia
Piles—Quinsy
Rheumatism
Scrofula—Syphilis
Skin Diseases
Tuberculosis
Tumors—Ulcers
Throat Troubles

Also most forms of the following:
Kidney Troubles
Stomach Troubles
Liver Troubles
Women's Diseases
Fever, indigestion or catarrh—impure or poisoned blood—usually indicate a germ attack.
In nervous debility Liquezone acts as a vitalizer, accomplishing remarkable results.

50c. Bottle Free.

If you need Liquezone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and will pay the druggist ourselves for it. This is our free gift, made to convince you; to let the product itself show you what it can do. In justice to yourself, please accept it today, for it places you under no obligations whatever.

Liquezone costs 50c. and \$1.

CUT OUT THIS COUPON

Fill it out and mail it to The Liquezone Company, 436-464 Wabash Ave., Chicago.

My disease is.....
I have never tried Liquezone, but if you will supply me a 50c bottle free I will take it.

A B D.....
1 2 3..... Give full address—write plainly.

Note that this offer applies to new users only. Any physician or hospital not yet using Liquezone will be gladly supplied for a test.

The barbarous custom of converting the skulls of enemies into drinking cups was a common one in ancient times among the fierce tribes of northern Europe and was not unknown to the people of the more civilized regions farther south. The Italian poet, Marino, causes an assemblage of friends to quaff their wine from the skull of Minerva, and in his "Wonder of a Kingdom" Torrent makes Dakker say: "Would I had ten thousand soldiers' heads, Their skulls set all in silver, to drink healths To his confusion who first invented war."

Thomas Middleton, a dramatic writer of the early part of the seventeenth century, is believed to be the originator of the phrase, "A soldier's drinking cup," as applied to a human skull. In "The Witch," one of his most celebrated plays, the duke takes a bowl, which he is told is a human skull,

whereupon he exclaims:

Call it a soldier's cup.
Our duchess, I know, will pledge us, though the cup
Was once her father's head, which as a trophy
We'll keep till death.

One of the delights of the immortals, as represented in the old Scandinavian sagas, is that of drinking to drunkenness from the skulls of vanquished foes.

Let Us Do Our Duty.

Let us do our duty in our shop or our kitchen, the market, the street, the office, the school, the home, just as faithfully as if we stood in the front rank of some great battle and we knew that victory for mankind depended on our bravery, strength and skill. When we do that the humblest of us will be serving in that great army which achieves the welfare of the world.

Progressing.

"How is your daughter getting along in physical culture?" inquired the visitor of Mrs. Goldrox.

"Fine," replied Mrs. Goldrox. "She's got so she can read an' write it now, and the professor says he's going to give her Latin an' chiropody next month. I think them foreign languages are fine, don't you?"

A Long Evening.

"It's hard on the people of Greenland to have night six months long."

"Yes. Just think of the feelings of the poor man whose mother-in-law drops in to spend an evening!"

A Case of Must.

The Clergyman—My little man, do you go to church every Sunday? Bobbie—Yes, sir. I'm not old enough yet to stay away.

THE BIT OF RED

By HONORE WILLISIE

Copyright, 1905, by E. C. Parcells

Bruce sat alone at the head of the herd trying to remember and to forget, trying to remember her voice, her face, her vivid beauty; trying to forget the words that cut short his course as a newspaper man and sent him out on the ranch. Was it, after all, only a year since she refused him? Could he never again close his eyes without seeing the red of her gown? It seemed half a lifetime that he had been guarding these beasts, rounding up stragglers, keeping watch lest the herd stampede for the river. Day after day of burning sun and night after night of stars the loneliness of the plain oppressed him; the cattle irritated him with their stupid docility. The hot noon sun blistered down on their brown backs. The black flies buzzed above them and their—

The broncho raised his head suddenly. It was so unusual for Dick to show signs of life during the noon hour that the man was startled from his reverie. A subtle disturbing wave seemed to sweep through the herd. Here and there a head was tossed, and dilated nostrils sniffed the summer air. The man, vaguely disturbed, looked toward the rear of the herd. Far out on the plain was a buckboard with a bit of red fluttering in it. "Good Lord," he said aloud, "one of the foot beasts has caught sight of that! It's hold tight now or the devil to pay!"

His year on the plain had taught him that the cattle herd is more sensitive to signs than even the human throng.

was instantly trampled to death, made spur or whip or word unneeded for the broncho. Trembling, with head thrust far forward and nostrils distended, he sped on with all the speed the beasts crowded about him would permit.

Could they turn at the river? If not, Bruce knew that death for him was a matter of a few moments. And suddenly life seemed very sweet to him. Even life without her seemed suddenly bearable. The scent of the linden buds, the red of the gown she wore, how vivid and how lovely even the memory was! And was this all that life was to hold for him—a few years of hope deferred and early destroyed, then a few memories, and then death? And what a death—trampled, mangled, made into a thing unspeakable by those trampling hoofs. Ah, the pity of it, he thought, to have no taste of happiness!

He clinched the reins tighter. No, he would not die. Somehow he meant to live. For a moment he, too, was panic stricken. "Dick, Dick!" he groaned. "Can't you go faster? Pull away from them, old boy! There is no one to care much what happens to us, but we want to live anyhow!"

Again he looked back. Slowly the herd was gaining on the leaders. The forward ranks were more and more massed. Worse than the roar and screech of a hundred locomotives was the din about him. He could see the break in the level stretch of prairie that marked the river banks. Nearer and nearer it came, and closer about the quivering broncho pressed the snorting cattle. Now Bruce could see the rocks on the opposite bank, now he caught a glimpse of the brown water and then—a sudden stumble, a mad roar, and horse and rider went down together.

For years and years he seemed to have been falling. Sometimes he caught sight of her, and always her lips moved, but he caught no word or sound. Sometimes he ventured to ask her what she said, but his questions when they came were absolutely irrelevant, and he cursed himself for a fool, and gradually the search was becoming painful. Strange aches and miseries racked his body. The glimpses of her face became less and less frequent. Suddenly he opened his eyes to rest them. The wall of his little ranch bedroom seemed familiar enough, but what were these agonies that wrung and wrenched him? Then memory came. Ah, yes—the stampede and the fall. He closed his eyes again and feebly pondered over his rescue. Then a soft rustle and a little murmur near the foot of the bed made him open his eyes once more. I was she! The red gown, the vivid face the soft parted hair were all the same. If this were delirium, he thought, why let delirium go on to the end of the chapter, and just for luck he would speak to her once more, just to see if she would faint away, as usual.

"It's a nice day, Alice," he remarked in a strangely small voice.

"Oh, Allen, Allen, do you really know me?" And with a rush of skirt she was on her knees beside the bed.

Know her? Could he recognize his own consciousness?

"You were in the buckboard," he said.

"How did you know?" she asked. "I didn't know. Did the cattle get me?"

The girl shuddered and moved closer. "No; the pony fell close to the river's edge, his body shielded yours from the herd, and the cattle used him for a diving point and went up and down the river. They had to shoot the poor broncho, but we got you into the buckboard and back to the ranch some how."

Bruce turned a bewildered face to ward her, and in response the girl

Vapo-Resolene

Established 1879.

Whooping Cough, Croup, Bronchitis
Cough, Grip, Asthma, Diphtheria

Creosolene is a boon to Asthmatics

Creosolene is a long established and standard remedy for the diseases indicated. It cures because the air rendered strongly antiseptic is carried over the diseased surfaces of the bronchial tubes with every breath, giving prolonged and constant treatment. Those of a consumptive tendency, or suffering from chronic bronchitis, find immediate relief from coughs or inflamed conditions of the throat.

Vapo-Resolene is sold by druggists or sent post paid on receipt of price. A Vapo-Resolene bottle at 10¢ each. A bottle of Creosolene \$1.00. Price for one Vapo-Resolene bottle, Creosolene \$1.00. Price for one Vapo-Resolene bottle, Creosolene \$1.00. Price for one Vapo-Resolene bottle, Creosolene \$1.00.

HALL'S VEGETABLE SINGHAN Hair Renewer

A high-class preparation for the hair. Keeps the hair soft and glossy and prevents splitting at the ends. Cures dandruff and always restores color to gray hair.

If you cannot come early you can mail order.

DR. HENNEQUIN'S INFANT TABLETS

REGISTERED

Mrs. R. J. Ego, Ardree, Ont., Says:

"When baby was seven months old she got very ill with indigestion and constipation, and kept getting worse, until doctors had no hopes for her recovery; all medicines failed to have any effect. We received a sample package of Hennequin's Infant Tablets. I had not much faith in them, as I had tried so much, but concluded to try them. We gave her one-half one Tablet, and that day we noticed a change for the better. I at once sent for a box; we used them, and the results are most astonishing. We used five boxes, and baby has been a well child for some months, and is fat, healthy and cheerful. I do not feel safe without them. I cannot speak too highly of what I know has saved my baby's life, and I wish all mothers whose babies suffer as mine was, to try them. Enclosed please find \$1 and for which please mail to my address 5 packages."

DR. HENNEQUIN'S INFANT TABLETS.

Destroy worms, assimilate the food, regulate the bowels, sweeten the stomach, procure healthy and natural sleep, relieve teething trouble, allay feverishness, cure indigestion, diarrhoea, constipation, colic, etc., stop walking in the sleep and frightened awakening from sleep, cure fits, etc. Beyond price for children affected with weak health. Dr. Hennequin's Infant Tablets do not contain morphine, opium, or other narcotic properties. 25c per package—postpaid to any address. Send us \$1 for 5 boxes and if, after using part or all of one box, you wish your dollar back, you can have it by mailing us the remaining four boxes. We cannot be responsible for money unless sent by P. O. Order, Money Order, or Registered Letter.

Daily. All other trains run daily Sundays excepted.

WALTER PATEHUN, President.

H. B. SHERWOOD, Superintendent.

D. A. VALLEAU, Asst. Superintendent.

His year on the plain had taught him that the cattle herd is more sensitive to panic than even the human throng. A sudden movement, a strange flutter of sound or color, and far down in the grazing herd comes a sudden closing of ranks, a slow moving forward of a constantly augmented mass that, with quick increase of speed, sweeps on, until a thousand panic stricken steers stampede across the plain.

Bruce sat rigid upon his broncho at the head of the herd. Alone, he knew it was hopeless to attempt to make the herd "circle," the one sure remedy for a stampede. Even the slightest movement on his part might precipitate matters, while absolute quiet might prevent the breaking of the storm which was slowly brewing.

A half mile out on the plain the buckboard and the fluttering bit of red drew nearer. More heads were tossed in the air. On the outskirts of the herd nearest the coming buckboard here and there a steer ceased grazing and moved hesitatingly toward the center. Inquiring heads were lifted to see what the movement meant. Those that spied the fluttering red followed quickly to the center. Those that failed to see the cause felt the vague wave of terror and with short snorts of fear sought to move close to their fellows.

In rapid succession the animals were struck by the panic wave. With brain clear and tense, as full realization of his danger came upon him Bruce held in his restless pony and thought rapidly. Facing him was the herd. Behind him, three miles out across the plain, was the river. If the stampede came, heaven alone knew whether the maddened cattle would plunge headlong over the banks, those in front forced on by the unseeing ones in the rear, or whether the leaders could turn all at right angles and follow the river bank.

For one moment Bruce thought of trying to turn the stampede and by whip and shout endeavor to send the frightened brutes back, away from the river, but danger to the nearing buckboard, now so close that he could see it contained the figures of a man and a woman, precluded that plan. Then all power of controlling affairs was taken from him, for Dick, suddenly attacked by the fear contagion, gave a pitiful whinny of terror and, with the bit between his teeth, bolted toward the river. The sudden sound and movement were all that was needed, and in the next instant Dick's hoof beats were drowned in the roar of hoofs in mad flight about him.

Bruce, with knees that gripped the saddle like iron, gave one glance behind him. He was riding among the leaders, but the heavy hurtling ranks behind them threatened at any moment to ride them down. If he could make an opening Dick had three miles in which to pull away from them, and the roar of the maddened beasts, their wild snorts, and the occasional shriek of one of their number, who fell and

FIT'S CURED

If you, your friends or relatives suffer with Fits, Epilepsy, St. Vitus' Dance, or Falling Sickness, write for a trial bottle and valuable treatise on such diseases to THE LEIBIG CO., 179 King Street, W., Toronto, Canada. All druggists sell or can obtain for you

LEIBIG'S FIT CURE

Bruce turned a bewildered face toward her, and in response the girl went on:

"Uncle John and I are touring the west, and I wanted to say hello to you. Cousin Frank told me you were here. Then came the stampede."

Her voice trailed into silence. Bruce put up a feeble hand and pressed her soft cheek close to his own. This, then, had been the reason for it all—the lonely vigils, the long hours, the constant desire and the endless misery of loneliness.

"Alice," he said gently, "is it to be yes now?"

The girl caught her breath. Her only answer was to leave her cheek close to his.

And Bruce, nestling closer, closed his eyes and fell asleep.

Love and Laundering.

The Korean mother, anxious to assure her daughter's successful marriage, makes certain that the young woman becomes a good laundress, for ability in this direction counts for more than beauty with the Korean swain. He does not even demand that his wife shall be more than a fairly good cook, but she must be able to keep fresh and spotless the linen garments which every one, from prince to peasant, wears. In spite of the fact that every article of wearing apparel is of white linen, not even the humble flatiron has made its appearance in Korea, and the attempts to introduce such occidental fads as washing machines and wringers have met with marked disfavor. The laundry work is done in the same manner as it was centuries ago, and the first recommendation to a young man's favor is ability as a laundress.

Living Barometers.

Among the best of the living barometers are snails, which do not drink in the ordinary sense of the term, but absorb moisture during the wet weather directly through the skin and exude it afterward. As they are anxious not to have the moisture evaporate too quickly, thus creating a premature thirst, which cannot be conveniently satisfied, they keep during dry weather in strict seclusion, moving abroad only during or just before rain. Immediately before downfall they may be seen climbing the trunks of trees and busily getting in among the leaves. Gnats assemble in clouds under trees, and horses grow restless. Swans, where they are plentiful, may be seen flying against the wind. Spiders crowd on the walls, toads come out of their holes, and pigeons may be seen going to the dovecots earlier than usual.

A Cigar That Saved a Life.

M. Guizot, the great French historian, once owed his life to his cigar. Walking in one of the Paris gardens, he noticed that he was being followed by a shabbily dressed man. M. Guizot calmly sat down on a bench, upon which his unwelcome follower also seated himself, watching him all the time with an uncomfortably threatening air. The historian, however, was not troubled, but took a cigar from his pocket and quietly lighted it. As he did this the stranger rose and, muttering that he had been mistaken, added, "That scoundrel I seek does not smoke." Some days later the man was arrested for a murderous assault upon a public official against whom he had a grudge and for whom he had mistaken M. Guizot, whose cigar was thus a veritable life preserver.

WARD OFF DISEASE

By fortifying your system with a reliable blood medicine. An alcoholic stimulant would do more harm than good.

With stomach and blood in good order you can fight the battle of life successfully against all odds. **GOLDEN SEAL ROOT (Hydrastis)**, is a famous remedy for dyspepsia, and **QUEEN'S ROOT (Stillingia)**, has a direct action in promoting the renewal of the

blood. Both of these are used in Dr. Pierce's Golden Medical Discovery in such a way, by skillful extraction, combination and solution without alcohol, that their best effects are secured.

Many years of actual practice convinced Dr. Pierce of the value of many native roots as medicinal agents and he went to great expense, both in time and in money, to perfect his own peculiar processes for rendering them both efficient and safe for continuous use as tonic and rebuilding agents.

The enormous popularity of "Golden Medical Discovery" is due both to its scientific compounding and to the actual medicinal value of the ingredients. The publication of the names of the ingredients on the wrapper of every bottle hereafter to be sold, gives full assurance of its non-alcoholic character and removes all objection to the use of an "unknown remedy."

The Original LITTLE LIVER PILL'S, first put up by old Dr. R. V. Pierce over 40 years ago. Much imitated, but never equaled. Little pill, little dose, but gives great results in a curative way in all derangements of Stomach, Liver and Bowels.

"Common Sense Medical Adviser" will be sent free, paper-bound, for 31 one-cent stamps, to pay the cost of mailing only, or cloth-bound for 50 stamps. Address Dr. R. V. Pierce, 663 Main Street, Buffalo, N. Y.

Christians believe in the immortality of the soul, as do the Hindoos, but the contrast here is striking. Christians believe that God created man and that there was a time when we were not. Hindoos believe that the soul is uncreated and that it has already existed forever as it will continue to live forever. Christians suppose that at death the soul enters "an eternal state" where it will continue forever, but Hindoos think of death merely as an incident in the long chain of endless changes which go on without beginning or end, unless indeed in rare instances some one attain salvation. Salvation to the Christian means heaven, but to the educated Hindoo it means absorption in the Deity and the loss of our individual existence. Save as it finds this salvation, then, the soul goes on and on forever and exists in a vast variety of forms—on earth, in heaven, in hell, as god, devil, insect, animal, man, having all experiences and undergoing every possible form of happiness and woe, though on the whole suffering predominates.—Chautauquan.

A King's Incognito.

Probably the most complete incognito on record was that adopted by King Charles of Roumania on his way to take possession of the Wallachian throne.

At the time the relations between Austria and Prussia were exceedingly strained—it was just before the outbreak of war between these two nations—and the Vienna government was known to be strongly opposed to a prince of the house of Hohenzollern ascending the throne of Roumania.

It was feared, therefore, that obstacles might be placed to the passage

WHAT OTHER PAPERS SAY.

Kingston Whig.

Sets on the New York Stock Exchange cost \$100,000 each, and they are paid for by the poor fools who are in a hurry to get rich.

Kincardine Reporter.

Hon. Nelson Monteith may have been a little premature in giving out that there would be a change in the present system of electing County Councils. Since then a discussion has arisen, and it is just possible that when the matter comes before Parliament Premier Whitney and his colleagues will leave well enough alone. However, if they do make the proposed change it will certainly be a retrograde step.

Toronto Star.

A Cambridge professor on Christmas night saw a comet with two tails. This is what happens to even professors who celebrate not wisely but too well.

Toronto Globe.

Andrew Carnegie says a man cannot be rich and happy. It may be true that a man, unless of the pachydermal order of humanity, cannot do the things necessary to the getting of riches and be happy; but as to the abstract of being rich and happy few are afraid to take the risk.

London Free Press.

BEFORE the Tariff Commission at Valleyfield the other day, the farmers' chief grievance concerned the price of coal oil. The witness, Wm. Craig of Chateaugay, said sometimes farmers would club together, and send over the line to purchase a barrel of oil at the lower price which prevailed there. "Why," he asked, "should we help to pay Rockefeller's dividends?" That is a fair question, on the theory that coal oil is now a monopoly. In the United States this commodity is duty free, which many partly account for the the price being lower than in Canada.

Fancy Dishes Given Away.

If you buy your groceries from us, We give coupons on dishes free. Call and see them at GREY LION GROCERY.

COLEBROOK.

The Christmas tree entertainment held in the church, on Christmas night was a decided success. The church was more than full, many who came last could not get in, and had to return to their homes. The entertainment was pronounced by all to be first class; the proceeds amounted to \$54.

The annual school meeting passed off quietly. William Jackson was elected trustee. Miss Eva B. Griffith was engaged as teacher for the ensuing year.

Ira Salisbury has moved into his new house.

Andrew Galbraith is now convalescent after several days' illness.

Nelson Walker has returned from the North-West, looking hale and hearty.

Miss Florence Warner spent a few days in Kingston.

Georgie Wartman entertained a few friends from Harrowsmith and Kingston.

Miss Edna Goudy is home from Montreal to spend the holidays, and entertained the choir Saturday evening.

Mrs. Wellington Brown spent Christmas at her former home in Roblin.

Mrs. Hicks Ball has returned after attending the funeral of her mother at Croyden.

James Goudy has his house repaired

Mr. Otto A. Fleissner's KIDNEYS WERE SOAKED WITH CATARRH. Pe-ru-na Promptly Cured Him.

MR. OTTO A. FLEISSNER
Rainier Grand Hotel,
Seattle, Washington.

Mr. Otto A. Fleissner, American Epicurean, late Chef to Col. W. J. Coady, (Buffalo Bill), now chef at the Rainier Grand Hotel, Seattle, Wash., writes:

"I suffered with kidney and bladder trouble until life did not seem worth living. I had tried many medicines, but did not get any relief until I took Peruna. It was really wonderful how much better I was after I had used this medicine only a week. I did not expect that it would help me permanently, but as long as it was doing me good I continued to use it. At the end of six months I found to my relief that it had rid my system of all poisons, and that I was cured to stay cured. You certainly have a splendid medicine and I gladly endorse it."—Otto A. Fleissner.

Catarrh of the Kidneys a Common Disease—Kidney Trouble Often Fails to Be Regarded as Catarrh by Physicians.

Catarrh of the kidneys is very common indeed. It is a pity that this fact is not better known to the physicians as well as to the people.

People have kidney disease. They take some diuretic, hoping to get better. They never once think of catarrh. Kidney disease and catarrh are seldom associated in the minds of the people, and, alas, they are not very often associated

PE-RU-NA CURES CATARRH OF THE KIDNEYS.

In the minds of the physicians. Too few physicians recognize catarrh of the kidneys. They doctor for something else. They try this remedy and that remedy. The trouble may be catarrh all the time. A few bottles of Peruna would cure them.

Pe-ru-na Removes the Cause of the Kidney Trouble.

Peruna strikes at the very centre of the difficulty by eradicating the catarrh from the kidneys. Catarrh is the cause of kidney difficulty. Remove the cause and you remove the effect. With unerring accuracy Peruna goes right to the spot. The kidneys are soon doing their work with perfect regularity.

Thousands of Testimonials.

Thousands of testimonials from people who have had kidney disease which had gone beyond the control of the physician are received by Dr. Hartman every year, giving Peruna the whole praise for marvelous cures.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

All correspondence held strictly confidential.

ORDER OF THE GARTER.

Its Alleged Ballroom Origin Only Legendary Romance.

The origin of the Order of the Golden Fleece is, like that of the Garter, shrouded in mystery. Very few modern archaeologists attach any credence to the vulgar tradition, wholly unsupported by any authority, that at a court ball given by Edward III, a lady, supposed to be the Countess of Salisbury, dropped her garter, and the king, taking it up and observing some of his courtiers to smile as though they thought he had not obtained this favor merely by accident, exclaimed in a loud voice, "Honi soit qui mal y pense."

There is another opinion which traces the origin of this order, which, according to the learned Seldon, "exceeds in majesty, honor and fame all the div-

work and suspended from the apex is a long, heavy balk of timber two feet thick or more. This hangs from one end, and to the other end are bolted at each of the four sides four more heavy timbers, and if the pagoda be very lofty still more timbers are added on to these. The whole forms an enormous pendulum which reaches to within six inches of the ground. When the shock of an earthquake rocks the pagoda the pendulum swings in unison and keeps the center of gravity always at the base of the framework. Consequently the equilibrium of the pagoda is never disturbed, and this is the explanation of the great age of many of them, when from their height one would suppose them to be peculiarly susceptible to the effect of an earthquake.

prime of the house of Roumania. ascending the throne of Roumania. It was feared, therefore, that obstacles might be placed to the passage over Austrian territory of the newly elected sovereign of the Wallachs. Accordingly King Charles traveled down the Danube on board the Austrian steamboats disguised as a servant and in the second or third class cabin.

The two or three members of his suit, who of course were in the first class cabin, affected to treat him with the utmost severity and contempt and assailed him with loud reproaches for alleged negligence in his menial duties.

It was only on setting foot on Roumanian territory that the roles were reversed and that those who had remained on board the steamer were able to witness the ceremonious welcome accorded by the Wallachian authorities to the erstwhile valet and footman.

River Funerals in Germany.

The river Spree, which runs through Berlin, has a habit of almost continuously overflowing its banks. As a result the lowlands beyond the city, called Spreewald, are almost always under water in summer and covered with ice in winter. Much of the summer traffic is done on skates and with sledges. The postman delivers his mail either in a boat or on skates, the children skate to school, and the ladies go to market on the water wagon or on the ice.

Even the dead are carried along the river to their last resting place in a coffin resting on a bier in a boat covered with flowers. The hearse is paddled by two of the undertaker's assistants. In the first boat following are the clergymen and the family, and the usual long line of coaches is supplanted by a long line of boats. These are paddled sometimes by men, sometimes by women, but always by some of the friends of the deceased. These water funerals are very picturesque as they wind their way through the temporary channels caused by the overflowing Spree.

Mrs. Hicks Ball has returned after attending the funeral of her mother at Croyden.

James Goudy has his house repaired and finished up in a very attractive style.

Mrs. Stanley Bern's health is very much improved and the trained nurse has gone home.

Fletcher Huffman has been engaged to teach Pe'worth school.

George Tencas and Charles Gordon. Odessa, at H. P. Lucas's; S. Edgar, at C. N. Garrison's; Donald Fee, Kingston, at C. Ward's.

Everything Limited.

The old farmer went to one end of the swaying coach to wash his hands. He could find only a few remnants of soap. "Boy," he drawled, "there don't seem to be much soap here?"

"No, sah," chuckled the porter. "You know dis is de limited. Ebbything aboid am limited."

Then the old man tried to fill a glass from the water cooler. He could force out only a few drops.

"Where's the water, boy?" "Not much water, sah. Dat am limited too."

Presently the porter brushed the old farmer down, and the latter handed him nine coppers.

"Why, boss," protested the porter, "yo' gib de porter on de udder train a quarter."

"I know that," chuckled the old farmer, "but you know this is the limited, and everything should be limited."—Chicago News.

Had Him Held.

Pa Twaddles—I can't see why that young idiot who is calling on Molly hasn't sense enough to go. It's midnight. Tommy Twaddles—"Tain't his fault. He can't go—sister's settin' on him."

There is no policy like politeness, since a good manner often succeeds where the best tongue has failed.—Macon.

There is another opinion which traces the origin of this order, which, according to the learned Seldon, "exceeds in majesty, honor and fame all the chivalrous orders in the world," to Richard Coeur de Lion having upon the occasion of some warlike expedition during his wars in Palestine chosen a leathern thonged garter as the distinctive mark of his partisans. Yet another theory ascribes the foundation of the order to the fact that Edward at the battle of Crecy issued his garter as a signal for battle, which, proving successful, determined him to institute the order in memory of the event.

Both these opinions are to a certain extent feasible, and the first is materially fortified by the well known fact that when the crusaders captured St. Jean d'Acre in a nocturnal assault the knights of the Christian army were ordered to wear straps of white leather bound round the leg under the left knee in order to distinguish them from the infidels.

THE WATER SPIRIT LEGAL PHRASEOLOGY.

What Some of the Terms Common to Court Practice Mean.

To most persons the phrase "This indenture witnesseth" is as much Greek as the other common phrase "Witness my hand and seal." Yet both are relics of a time when these legal forms carried with them a significance not obtaining at present.

Legal documents were once engrossed upon parchment because paper cost so much more than dressed skin. The parchment was seldom trimmed exactly and the top was scalloped with the knife; hence the term "This indenture." Even where the lawyers have departed from the custom, still obtaining in England, of using parchment for their legal forms the phrase has been retained.

In the same way the signature of "hand and seal" is a relic of those olden times when only clerks and the clergy could wield the pen. It was the custom for the contracting parties to lay their hands upon the document in token of good faith, and there remained a smudge. As these original thumb marks were not easily identified, the gentry added their seals for the purpose of further establishing the validity of the document. It may not be generally known that a seal is still required in law, though the need for it passed with the spread of education, and the bit of red paper affixed by the lawyer is as necessary as the signature to certain documents.

A court of law is a reminiscence of the time when justice sat in the open courtyard, and the "dock" is from a German word meaning a receptacle, while the "bar" is a Welsh word meaning a branch of a tree used to separate the lords of justice from their vassals.

The entire phraseology of the bench is reminiscent of the earlier days, but, having been proved proper, has been retained.

JAPANESE PAGODAS.

Earthquake Proof and Able to Stand the Severest Shock.

The absence of buildings of any size and antiquity in Japan is ascribed to the destruction of them by the frequent earthquakes which occur. The only structures which seem to be earthquake proof are the pagodas which are erected before the temples. There are many pagodas which are 700 or 800 years old and as solid as when first built. There is a reason for this, and it lies in their construction. A pagoda is practically a framework of heavy timbers which starts from a wide base and is in itself a substantial structure, but it is rendered still more stable by a peculiar device. Inside the frame-

work is another opinion which traces the origin of this order, which, according to the learned Seldon, "exceeds in majesty, honor and fame all the chivalrous orders in the world," to Richard Coeur de Lion having upon the occasion of some warlike expedition during his wars in Palestine chosen a leathern thonged garter as the distinctive mark of his partisans. Yet another theory ascribes the foundation of the order to the fact that Edward at the battle of Crecy issued his garter as a signal for battle, which, proving successful, determined him to institute the order in memory of the event.

Baffled.

The word baffled now has a meaning entirely different from that applied to it 300 years ago. It is now understood to mean thwarted, foiled or disappointed, but then it was applied to the process of degradation by which a knight was disgraced. A baffled knight was one who had been pronounced guilty of conduct unbecoming one of his order and had accordingly been shorn of his plumes, his sword was broken before his eyes, his knightly robe torn away, his spurs cut off with a cleaver, and after being publicly chastised he was declared to be baffled. The word is used in this sense by Shakespeare and other writers of that time.

About Breathing.

In the ordinary respiration of man sixteen or seventeen cubic inches of atmospheric air pass into the lungs twenty times a minute, or a cubic foot every five and one-quarter minutes, 274 cubic feet in twenty-four hours. The lungs hold 2.80 cubic feet. At each respiration 1.375 of oxygen is converted into carbonic acid gas. The nitrogen inspired and expired is exactly equal. During the act of inspiration the lungs have been found to be the coldest parts of the body.

CRISIS OF GIRLHOOD

A TIME OF PAIN AND PERIL

Miss Emma Cole Says that Lydia E. Pinkham's Vegetable Compound has Saved Her Life and Made Her Well

How many lives of beautiful young girls have been sacrificed just as they were ripening into womanhood! How many irregularities or displacements have been developed at this important period, resulting in years of suffering!

Girls' modesty and oversensitiveness often puzzle their mothers and baffle physicians, because they withhold their confidence at this critical period.

A mother should come to her child's aid and remember that Lydia E. Pinkham's Vegetable Compound will at this time prepare the system for the coming change and start the menstrual period in a young girl's life without pain or irregularities.

Miss Emma Cole of Tullahoma, Tenn., writes:

Dear Mrs. Pinkham:— "I want to tell you that I am enjoying better health than I have for years, and I owe it all to Lydia E. Pinkham's Vegetable Compound."

"When fourteen years of age I suffered almost constant pain, and for two or three years I had soreness and pain in my side, headaches and was dizzy and nervous, and doctors all failed to help me."

"Lydia E. Pinkham's Vegetable Compound was recommended, and after taking it my health began to improve rapidly, and I think it saved my life. I sincerely hope my experience will be a help to other girls who are passing from girlhood to womanhood, for I know your Compound will do as much for them."

If you know of any young girl who is sick and needs motherly advice ask her to write Mrs. Pinkham, Lynn, Mass., and she will receive free advice which will put her on the right road to strong, healthy and happy womanhood.

"Let the GOLD DUST and TWINS do your work"

The Dog and The Shadow

You remember the fable of the dog who dropped a real bone for its shadow which he saw in the water. "Bear in mind that all is not Gold Dust that glitters under the name of washing powder. Don't accept a shadowy substitute; get the real

CHINA'S TERRIBLE VICEROY.

Perhaps the Most Remarkable Man in the World.

A remarkable man is Isen Ch'un Hsuen, and though to us China may seem still the same sleepy, helpless monster that she was a hundred years ago, yet this is not so. The very existence of such a man is proof to the contrary. Intensely loyal, absolutely fearless, full of resistless energy, he can work wonders by the force of his personality. He rises at four in the morning, winter and summer, and at once institutes secret inquiries about all his subordinates, censuring any neglect of duty, or even the slightest breach of etiquette. Like all great men, he is acquainted with every detail of his administration, and there is not one of his servants, however humble, whom he has not tested in one way or another. Those who have to meet him do well to be in time, for the viceroy will not wait a second; and it is no uncommon thing to see him hurrying off to his work vainly pursued by some miserable official who has come a little too late, and so lost his opportunity. Though he is the nightmare of all the rogues and scoundrels who live by extorting money from the people, no one is more quick to acknowledge merit, and to reward it handsomely. Wherever he goes he is followed about by his executioner, whose office can hardly be regarded as a sinecure. In appearance he is a stout, dark man, of medium height, with one of the strongest faces it is possible to imagine—stern, domineering, and punctilious. Oddly enough, a rumor once got about that he was travelling through the province disguised as an old man, and riding on a donkey. The result was that, for the first time in history, the gates of all the cities were closed punctually at sunset, as the law said they should, and it was simply impossible for any one riding on a donkey to obtain admission, no matter how large a bribe he might offer the porters.

THE STORY OF A SUCCESSFUL MAN

HE FOUND HIS LOST HEALTH IN
DODD'S KIDNEY PILLS.

Leading Business Man of Welland Gives
His Experience with the Great Canadian Kidney Remedy.

Welland, Ont., Dec. 25.—(Special).—There is no better known or more highly respected man in Welland than Mr. J. J. Yokom. Born and brought up in the neighboring township of Crowland, by his own industry and sterling honesty, he has grown to be one of Welland's leading merchants. Consequently when Mr. Yokom comes out with a statement that he was cured of a serious illness by Dodd's Kidney Pills, everybody knows it must be so.

"For a year or more I had Kidney Trouble in all its worst symptoms," says Mr. Yokom. "My head was bad, I had no appetite, and I lost

TO PARIS BY TRAIN FERRY

NEW PLAN FOR CROSSING THE ENGLISH CHANNEL.

Scheme For Through Trains From London to the French Capital.

A scheme for a Dover-Calais train ferry has been formulated and presented to Parliament, and the evidence compiled for that purpose has now appeared in the form of a book, "The Channel Ferry," edited by Mr. Rodakowski.

The advantages of stopping in the same carriage throughout the whole journey from London to Paris will appeal to any traveler who has experienced the discomforts of Dover Quay in winter. Night passengers, especially, would be enabled to drop off quietly to sleep soon after leaving Paris, without any unpleasant recollections of a sea passage.

LOWERED TO FERRYBOAT.

This is the scheme: At Dover the train will run out upon a huge lift, 350 feet in length and capable of receiving the whole train at once. In less than three minutes the huge bulk can be lowered to the level of the deck and shunted upon the ferryboat. All the time wasted in transferring baggage would thus be saved, and the length of the journey shortened by quite an hour. The interior of the ferryboat will be fitted like an exceptionally luxurious station, and passengers can alight upon the platforms for a promenade, and enter the refreshment and waiting-rooms as at any other station. In fact, the ferryboat will be a sort of Crewe of the Channel.

But passengers who shrink from the appearance of a railway station in motion in mid-Channel can stay quietly in their sleeping berths, where the motion will not be so noticeable as the ordinary movement of an express.

On arrival at Calais, the train will run out again upon the lift platform, and start off to Paris almost before the traveller is aware of his arrival.

"The Channel Ferry" also deals with the treatment of goods traffic, which, by means of statistics and comparison with existing train-ferries, it proves could be more economically treated than at present. Fruits and flowers could be brought from the south of France in as good a condition as they can be obtained in Paris.

COST OF THE SCHEME.

The estimated cost of the Channel ferry amounts to about £1,000,000, of which the three train-ferry steamers account for nearly £400,000. After paying interest on debentures it is expected to clear a profit of £146,553 16s. each year.

It is interesting to notice that over 780,000 passengers pass across the Channel to and from France every year, the majority of whom might be expected to adopt the speediest route.

On account of the alterations to Dover Harbor the proposed site was made impossible, and a new bill must be promoted for next session.

EARLY PROPOSAL.

Train ferries as connecting links between England and France first began to attract attention about 1862, when Sir John Fowler, a warm partisan of

THE HEIR OF SANTLEIGH

OR
THE STEWARD'S SON

CHAPTER XXVII.—(Continued).

He was going straight to his room, when he saw that the door was half open of a small room which the earl used as his own, and noticing that there was a light burning, he thought that the servants had forgotten to put out the lamp.

Even with this trivial matter he connected Norah in his thoughts.

"If the house would only catch fire, and I might be lucky enough to save her!" he thought. "Perhaps that might help me; I'd burn down all London if by so doing I could secure her."

He pushed open the door, and was surprised to see the earl sitting at the table.

"I beg your pardon," he said. "I did not know you were here, and was coming to put out the lamp—"

Then he stopped, and hurried to the earl's side, for he saw that his face was white and drawn and that he was ill. "What is the matter?" he asked. "Are you ill?"

The earl put out his hand warningly, and looked toward the door.

"Yes, I—I am not well, Guildford. Don't—don't be alarmed."

"But I am alarmed. What is it?"

The earl tried to rise, but fell back; and even as he did so he took out his pocket handkerchief and tried to wave it in his usual stately fashion.

"It is—er—nothing very much," he replied. "A—A sudden faintness. I believe the medical men term it—er—pressure on the heart. Probably I have been—er—reading too long."

"I'll get you something," said Guildford Berton, and he went up to his room and brought some sal-volatile, thinking swiftly all the time: Would it be better for him that the earl should die or live?

"Thank you, thank you," said the old man, with a stately bow of his shaking head.

"Have you had an attack like this before?" asked Guildford Berton.

"Yes," replied the earl, "this is the third. But I beg you will not alarm yourself; it is a—er—mere nothing. I—I am not a young man"—he waited a moment, as if he hoped that Guildford would be bold enough to contradict him—"and these—er attacks try me."

There was silence for a moment, then he said:

"There is a flask of perfume in that drawer; will you give it me, please? Thanks. Did you—er—spend a pleasant evening?"

"Yes," said Guildford.

"You are later than usual."

"I looked in at the club after I had sent Lady Norah home," said Guildford, still watching the white, drawn face closely.

"Ah, yes, she has come home?" murmured the earl, passing his hand over his forehead with a confused air. "She did not come in to wish me good-night as usual," he added, after a pause, and with a kind of repressed anxiety. "That was—er—unlike her, Guildford."

Inwardly surprised, Guildford Berton said:

"I expect she thought you were writing or reading, and did not like to disturb you, sir."

"Ah, perhaps so," he assented. "Er—you may have noticed, Guildford, that Norah has an affectionate na-

"I said, sir, that I love Lady Norah. I have loved her, sir, since—"

"You have been—drinking, sir?" Guildford Berton started as if the old man had struck him.

"Excuse me," said the earl. "I—I—er—have not been well this evening, as you are aware, and am not in a fit condition to enjoy this tip-sy jest. Will you—er—leave me, please?" and he waved a shaky hand toward the door.

"You—you dare to insult me!" he said, hoarsely. "You treat it as if I were a dog! By God, you shall find it no jest, my lord! I've told you that I love her—I say it again. Do you hear? I love her, love her! An'I say more, I will marry her! I'll marry her for all your scorn, you old fool!"

"In my desire to find some extenuation for your conduct, Mr. Berton," he said, slowly and icily, "I accused you of being intoxicated. I fear I cannot grant you even that excuse. You are simply impertinent. Be good enough to leave the room; to-morrow you will leave the house."

He paused a moment to gain his breath, Guildford Berton watching him, glaring at him.

"You called me, I think, a fool. With humility, I admit that you have the right to do so. I have been a fool to place confidence in, to bestow my friendship upon, a person who, if he entered my house at all, should have occupied his proper place in it as that of a servant."

Guildford Berton's face went livid. "And as a last word permit me, while thanking you for the many services you have rendered me, to say that, we—persons of our rank, do not give their daughter in marriage to their footman, their butler, or to a—Mr. Guildford Berton."

Guildford Berton uttered a cry, the cry of a wild animal driven beyond endurance, and sprang forward, but before he could strike the earl, if such had been his intention, the tall thin figure staggered and fell back into the chair.

"Will you—er—ring the bell, my dear Guildford," he stammered and stuttered, brokenly, as a strange and curious twitching convulsed his aristocratic face. "I—er—think it is time to dress for dinner."

Then his head fell forward, and he uttered a crowing kind of laugh. Guildford Berton leaned over him, then dashed to the bell.

In a moment or two the porter and a footman came to the door.

"Quick!" said Guildford Berton. "Run for the doctor! The earl has had a paralytic fit."

(To be Continued).

SILVER BOMB FOR CZAR

AGENTS OF THE RUSSIAN REVOLUTION AT WORK IN LONDON.

Sensational Stories Told of Muscovite Outrages by Jewish Refugees in England.

Russian revolutionists are working in London for the overthrow of Czarism, which they hold responsible for all the massacres of the last twelve months.

Whitechapel is the headquarters of a group of five leading Jewish members

Yokom comes out with a statement that he was cured of a serious illness by Dodd's Kidney Pills, everybody knows it must be so.

"For a year or more I had Kidney Trouble in all its worst symptoms," says Mr. Yokom, "My head was bad, I had no appetite and I lost weight fast. At times I was entirely incapacitated. I doctored with a physician of vast experience but got no good results.

"I became despondent of ever being well again, when by good luck I chanced to try Dodd's Kidney Pills and from the first they seemed to suit my case. Five boxes cured me completely."

DOCTORS AS EMPIRE BUILDERS.

The East India Company, in their attempts to make headway in India, were signally indebted, in various stages of their progress, to humble practitioners in medicine. It was in consequence of a cure effected on the favorite daughter of one of the Mogul Emperors that they had first been allowed a footing in Bengal. Later still, in the year 1715, a medical man named Hamilton, as a reward for curing the reigning Emperor of an illness, obtained for the company a grant of three villages near Madras, a permission to purchase thirty-seven townships in Bengal, and the privilege of introducing and conveying their merchandise from Calcutta through Bengal without duty or search. The footing thus gained, and the accompanying patronage and encouragement, enabled the East India Company to make such progress as to cut out all foreign rivals. So England, through the Company, gradually obtained full sway over India.

BOYCOTT OF BRITISH GOODS.

Native Revolt in Bengal Assumes More Serious Aspect.

The native boycott of British goods in Bengal owing to the recent divisions of the province has assumed a more serious aspect. It has developed in excesses which take the form of frequent assaults upon Europeans. This is particularly the case in Calcutta, where the hostile attitude of the natives calls for stern repressive measures.

The opinion is gaining ground that the Bengal Government has made a mistake in adopting a lenient policy towards the ringleaders of the boycott. J. B. Fuller, the Lieutenant-Governor of the newly-formed Province of Eastern Bengal and Assam, has warned the student element that if they are found to be concerned in political agitation they will be debarred from Government employ, and he also threatens to withdraw the grants from offending colleges.

THE SAME HAT, INDEED!

"I think," said the man who had bought a season ticket for the opera, whispering to his neighbor, "that I'll try to have my seat changed. Every night that girl sits in front of me with that same huge hat on and—"

"Excuse me," said the girl, turning around indignantly, "it's a different hat every night."

DREAM EXTRAVAGANCE.

"Don't the Highflyers live beyond their income?"

"Dear me—why, they live beyond the income they wish they had."

THE PILLS ARE SOLD ONLY IN LONDON.

possible, and a new bill must be promoted for next session.

EARLY PROPOSAL.

Train ferries as connecting links between England and France first began to attract attention about 1862, when Sir John Fowler, a warm partisan of this mode of transit, gave the subject his attention, and soon afterwards introduced it to Parliament. Difficulties were thrown in the way, however, by the Admiralty and French Government, and scheme was subsequently dropped. Sir John Fowler's vessel, says the writer, were paddle-steamers, 450 feet long, with a beam of fifty-seven feet, and engines capable of propelling them at a speed of twenty knots.

The total cost of the scheme, harbors and ferry boats included, was put by Sir John Fowler at £2,200,000.

Although Sir John Fowler saw a blessing in disguise in the construction of new harbors necessitated by this scheme, that view did not gain universal acceptance.

SIBERIAN HOSPITALITY.

A Traveller Tells of His Experience in That Country.

Detained at the Siberian village of Krivochokovo, Mons. Jules Legras remembered that he had a letter to a notable of the place, and hastened to present it. Monsieur Gaukier, in his book on Russia, describes, in Monsieur Legras's own words, the cordial hospitality with which he was received, and also tells of the difficulty which concluded his charming visit.

"They had detained me till ten o'clock in the evening," he writes, "by repeating, 'Why are you in a hurry?' and I was on the point of making my departure when I heard the mistress of the house say in a low voice to her husband, 'Send I send for the carriage?' To which he replied, 'No.' At this word a shiver passed over me. Doubtless the host, who had made me send away the cookman, was unaware of what his refusal meant, else he would have said to me, 'Here is a sofa; sleep here!'

"My situation was perilous, but what could I do? At the end of a few moments I rose to take my leave, and having asked if I could get a cab, was met with the reply that at this hour none could be obtained.

"Krivochokovo is a village whose population constitutes the very bolshak and jetshak of Siberian civilization. The village has neither streets nor lights nor police. It is considered a cutthroat spot, where honest people shut themselves tight at night.

"I had neither stick nor revolver, and I had on me a large sum of money. Finally, I was ignorant of the exact position of my inn, situated over a mile away. First of all, dogs threw themselves upon me. I shook them off, and started as best I could.

"The night was inky black. Amid the irregular clusters of houses there was no regular street by which to guide myself. As I hesitated I heard a 'Who is that?' It was a watchman of a pole of wood who hailed me. He directed me, and giving me a large branch that would do as a stick, he said, 'You are wrong, Barine, to go about this way without a revolver; the place is not safe. May God protect you!'

"As I approached another cluster of houses a watchman sounded his rattle menacingly, and dogs flew at me savagely. When this watchman approached, I induced him to accompany me. He informed me that the evening before a traveller who was staying at my hotel, having started early to catch a train, had been assassinated about ten paces from there. Finally we reached the inn. It took a long time to make them open the door, but I finally got inside and reached my room, trembling with fever and fatigue, and fell down helplessly, only conscious of having passed an hour and a half whose remembrance will remain with me long. As for my amiable host, whose hospitality might have cost me my life, he will doubtless never know of this adventure."

Wise is the courageous man who knows when it is necessary to be afraid.

ton said:

"I expect she thought you were writing or reading, and did not like to disturb you, sir."

"Ah, perhaps so," he assented. "Er—you may have noticed, Guildford, that Norah has an affectionate nature."

"Indeed, yes."

"I—er—should not like her, to be alarmed."

Still more surprised at this novel exhibition of the earl's regard for his daughter's feelings, Guildford Berton nodded assent.

"I beg you will not mention this—er—slight attack of mine to her, Guildford."

"Certainly not, my lord. I should be the last person in the world to cause Lady Norah any disquietude or anxiety."

"You are considerateness itself, Guildford. I—er—think I will consult Sir Andrew to-morrow morning. These attacks may be of little gravity, but still—" He stopped, and startled Guildford by suddenly exclaiming, with perfect naturalness: "My God! am I going to die?"

"Oh, no, no. Everybody is subject more or less to these fainting fits, my lord. You will find Sir Andrew will attach no sinister importance to them."

"I hope not, I—er—hope not," faltered the old man; and then, as if ashamed of his sudden outburst, he said:

"I—er—was thinking of Norah, Guildford. It would be terrible to leave her alone. She has no mother, no one. If she were married—"

"You would feel more at ease," he said.

"Yes, yes; she is young and inexperienced. She is just the girl to be led away by her feelings. I have never mentioned it to you, but I had a dread of her becoming entangled by that young scoundrel who ran away with Betsy North—South—I have forgotten her name."

"Oh, no, my lord," said Guildford Berton, in a low voice. "You wronged Lady Norah by such a suspicion."

"I am delighted to hear it," faltered the old man. "But she is—imprudent and impulsive; she might marry—imprudently; I should have seen to it. Yes!" He drew a heavy sigh. "I fear—" he was going to say, "I have not done my duty, but he could not bring himself to utter such self-condemnation. "The—the subject pains me."

"And me also," said Guildford Berton.

Should he seize the opportunity created by the old man, and avow himself?

"I beg your pardon, Guildford? Painful to you?" he asked.

"Yes, my lord. It is not the time"—he moistened his lips—"there can be no time, perhaps, in which I should speak of what has so near my heart as to be a matter of life or death to me, but your lordship's words—your mention of Lady Norah's possible marriage—"

"I fear I fail to comprehend," he said. "Are you in any trouble? What has Norah to do with it?"

"Everything, alas! I must speak out now, my lord," he went on, "even though by so doing I lose your friendship. But, oh, I do trust you will bring yourself to remember how much your words will mean to me, that for years past I have experienced nothing but kindness at your hands, and that now I need it and your forbearance more than I have ever done. Be generous, I beseech you!"

"What is this?" he said, huskily. "Have you—been getting into debt, Guildford?"

"Debt? No, my lord. If that were all, I should fear far less acutely the doubt and fear that oppress me. My lord, what I have to tell you, the confession I must make, will, I know, take you by surprise, but I plead for your forbearance, your generosity. I love, Lady Norah!"

"I—I beg your pardon," he said. "What was that you said about Lady Norah? I—I am afraid this attack has left me a little deaf, Guildford."

Russian revolutionists are working in London for the overthrow of Czarism, which they hold responsible for all the massacres of the last twelve months.

Whitechapel is the headquarters of a group of five leading Jewish members of the Russian revolutionary organization, which are acting as directors of a band of secret agents, who accept without question the orders transmitted to them from St. Petersburg, Moscow and Odessa.

Not only are tons of revolutionary proclamations printed in the East-end and thence smuggled to the Continent but many thousands of rifles and revolvers have been shipped from the Thames to the Baltic and the Black Sea.

A more startling side of the work is the preparation of bombs, which is being carried on in the East-end. Hundreds of bombs have in the last six months been sent from the Thames. Their history is curious. Most of them arrive in London unloaded, from New York and Chicago, where they are made, and the preparation of the chemical contents is done in London by revolutionaries who have studied chemistry in Russia.

There is at least one maker of bombs themselves in the East-end—a young silversmith, who for more than a year has been manufacturing these weapons of the revolution.

Not long ago, it is stated, he showed some friends a bombshell the size of a man's fist, made entirely of silver.

"Why silver?" he asked. He answered, "We must have silver for the Czar."

SPREADING THE REVOLT.

Stories of the revolution are told every day by newcomers in the East-end.

"I am a locksmith," said a swarthy Jew who landed recently from Riga, "and was a delegate of the revolutionary party detailed to spread the revolution among the factory workers. For three months I worked in one factory; then I went to another, leaving behind me hundreds of converts."

"Twelve months ago in Riga a police spy denounced me, and I was taken to prison without trial. Until ten days ago I was in prison, and was never tried."

"Sixty-seven political were in the prison. Twenty-eight of us were in one underground room. Our only food was half-baked bread and cabbage. Some of us fell ill and two died."

"Ten days ago we tried again to escape. We knocked the guards down and jumped from a window. I got to the house of a revolutionist, who hid me for a couple of days. Money was collected for my passage, and I got away by sea."

"For four days I have been in London. I had a few roubles when I came, but I was swindled out of it all the first day. To-day I have had no food. Yesterday I had some bread. The day before I had nothing. At night I have walked in the street. Last night I slept in a court with ten other men like myself."

JOLLIES TO GO ASHORE.

Marines Will Form Garrisons at Great Naval Stations.

It is understood that the commission which has been sitting for nearly a year to decide the future disposition of the Royal Marines has at last come to an agreement.

That the marines will in the near future be withdrawn from the ships seems to be generally admitted, and it is probable that Dover, Gibraltar, Bermuda and other large coaling stations will be garrisoned by this corps, both the Blue and the Red Marines thus becoming practically Garrison Artillery.

This innovation will be hailed with joy by most marine officers, as at present their position on the ships is, and always has been, more or less an anomalous one.

Among naval officers themselves the consensus of opinion seems to be that the navy will suffer a great loss if deprived of the services of the highly-trained, well-disciplined and efficient marines from a ship's company.

YOUNG FOLKS

SAVING THE FAMILY.

Bobby had two grandmothers. One grandmother lived far away from him, and sent him presents—a striped worsted ball, a "Mother Goose's Melodies," a cotton-flannel pig, a calico cat, a rag doll and a pair of reins; and the other grandmother lived with Bobby, and had to play ball, read "Mother Goose," squeal for the cotton-flannel pig, "miau" and "scat" for the calico cat, make dresses for the rag doll, and drive Bobby all over the house, crying, "Get up, horsey!"

Of all his presents Bobby liked the reins best. They were red reins, hung with tiny jinglers.

When grandma had callers, and so could not play "horsey," Bobby used to loop the reins over a chair-back, and sitting on a cricket, drive round the country until the callers were gone.

Somebody else in the family liked the red reins with jinglers. That was Pussy Gray, the pretty Maltese kitten. She used to chase round after grandma and the prancing horse, and whenever the team stopped she would come frisking up, lift a little fore paw, and set the bright bells ringing.

One day grandma had several callers, and the last one was the minister, and he took Bobby up on one knee and Pussy Gray on the other. The reins were left over the chair-back.

"Those are my new reins," said Bobby. "My grandma that lives away off sent them to me. Do you know my grandma that lives away off?"

He slipped off the minister's knee, ran over to the table, and got an album. He laid this on the minister's knee, and turned the pages till he came to the photograph of a lady with white hair. "There," he said, "that's my grandma that lives away off. This is the whole family. Everybody's in it—grandma and papa and me and everybody."

The minister looked at all the photographs, and Bobby, standing at his side, told the name of each. This took a long time, so it was late when the minister said good-by.

Then grandma, Bobby and Pussy Gray went to supper. After supper grandma put Bobby right to bed; and the chair horse remained tied to the table all night.

In the middle of the night grandma woke up and heard a jingling of bells—like sleigh-bells; and not being really awake, she fancied that somebody was coming to give her a sleigh-ride. Then she woke up a little more and knew that it must be Pussy Gray playing with the jinglers on the red reins.

"I forgot to put her down cellar," thought grandma. "I must go now, or she may get into mischief. Why, it is raining, and I left the parlor window open a little way! Dear me, I must hurry!"

When grandma reached the parlor she found the rain beating in at the open window; and she was just in time to save the album, which had been left in an easy chair by the window, from a wetting.

In the morning she told Bobby about it. "In another moment," she said, "the whole family would have been flooded. We may thank Pussy Gray for it, because if she had not been playing horsey I should not have waked up. Pussy Gray saved the whole family from the flood." And grandma laughed.

"We must thank my horsey, too," said Bobby. "because he was standing still to be ringed. I tied him there. My horsey helped save the whole family, grandma."

A HOME-MADE ISLAND.

Whale Island, the large gunnery establishment for training seamen of the royal Navy, is not a natural island. Years ago it was only a mud bank, which was uncovered by water at low tide. When the authorities commenced to make the docks in Portsmouth, the earth from the excavations was deposited from barges upon this mud bank, until a small island was formed, showing at high water about the

FEEDING

The average horse, with the usual flow of saliva, eats one quart of oats in about fifteen minutes; with this flow partially stopped it takes thirty minutes.

This shows how important it is to have the proper quantity of saliva and digestive juices.

Clydesdale Stock Food

increases the saliva and digestive juices because the feed being made "tasty" it makes the animals "mouth water," the same as our own when we add butter or jam to our soda biscuit; it makes it more enjoyable to eat. The horse, therefore, eats its feed up clean.

The increased digestion and assimilation makes the blood circulate better, loosening the hide and making the coat glossy. Nothing injurious in it and can stop feeding it without harmful effects.

Our Heave Cure, Tar Foot Remedy, Colic Cure, Embrocation Liniment, Gall Cure, Balsam Pine Healing Oil, and Worm Powders are equally as good in their own way.

Money cheerfully refunded by the dealer if any Clydesdale Preparations do not give satisfaction.

Try Hercules Poultry Food. Clydesdale Stock Food Co., Limited Toronto, Ont.

crisis will occur in Germany, and there will be several deaths in the German royal family.

Austria is to have "an outbreak with an unlooked for sequel." South America is to have "trouble," and this year of gloom will end with the failure of several savings banks in various countries, including Great Britain.

Mme. de Thebes also predicts an epidemic in the United States, and the loss in France of several great artists. Some of these, she hints darkly, must beware of the sea.

OSTRICH BOXERS.

A fight between two male ostriches is amusing, as it amounts practically to a boxing match with their feet, as they dance lightly around each other. There is, however, this difference. If any boxer could hit as hard as they do, he might settle the championship with a single blow. Nor does the giant bird fail to make vigorous use of his terrible beak. In sparring the ostrich stands on one foot, with the other foot and wings raised, wide open bill, and distended neck. He strikes with the force of a sledge-hammer, and is wary in anticipating and dodging blows. It may happen in the heat of such a contest that a keeper who was within the danger zone has his leg broken, but this is taken as one of the incidental hazards of ostrich farming.

Quality is a Good Salesman. But combined with FAIR PRICES IT IS IRRESISTIBLE. We are proud of it.

UGANDESE UP TO DATE.

Are Acquiring Taste for Clothes, Bicycles and French Books.

The natives of Uganda are beginning to show a decided liking for European clothing. So says Lieut.-Col. Hayes Sadler in his report on the Uganda Protectorate, which he is leaving to succeed the late Sir Donald Stewart as High Commissioner of British East Africa.

Col. Sadler regrets, however, that as yet the untutored Ugandese prefer American goods to British and German beer to Bass'. Their great weakness is for "American," an unbleached calico made in the United States. This article accounts for 31 per cent. of the total imports of cotton goods.

Up-to-date natives are also taking to cycling; and the members of the best sets are cultivating a taste for soap and scents.

French novels and cigarettes are also demanded by the really smart people, and French books to the value of \$3,615 were imported last year.

Indigestion, that Menace to Human Happiness, pitiless in its assaults, and no respecter of persons, has met its conqueror in South American Nerveine. This great stomach and nerve remedy stimulates digestion, tones the nerves, aids circulation, drives out impurities, dispels emaciation, and brings back the glow of perfect health. Cures Fundulitis of "chronics" that have baffled physicians.—68

PARADOXICAL.

Whale Island, the large gunnery establishment for training seamen of the Royal Navy, is not a natural island. Years ago it was only a mud bank, which was uncovered by water at low tide. When the authorities commenced to make the docks in Portsmouth, the earth from the excavations was deposited from barges upon this mud bank, until a small island was formed, showing at high water about the size of a whale's back (hence its name). As the work proceeded the island grew rapidly, and a few years later a railway was constructed on piles from the dockyard works to the island, and the earth was deposited much more quickly than when barges were used. In 1860 this island had been made so large that the Admiralty decided to lay it out as a drill ground. A small pier was erected and a house was built for a warrant officer to live in and act as caretaker of the island. At the present time the island is about thirty-seven acres in area and provides accommodation for over 1,800 men.

WOMAN PREDICTS DISASTER.

Says 1906 Will be Full of Woe for German Empire.

Mme. de Thebes, the French Mother Shipton, has issued her annual forecast of the world's events of next year.

Madame's picture of the future is painted in sombre tones. "Nothing but dread and six will be a bad year," she says. Europe will be disorganized.

On one foot, with the other foot wings raised, wide open bill, and distended neck. He strikes with the force of a sledge-hammer, and is wary in anticipating and dodging blows. It may happen in the heat of such a contest that a keeper who was within the danger zone has his leg broken, but this is taken as one of the incidental hazards of ostrich farming.

Yes, indeed, "blood will tell." When blotches and incrustations mark the skin Weaver's Cerate and Weaver's Syrup make short work of all blood and skin troubles.

Professor Borem: "Yes, my dear madam, the baneful habit of sweets and tobacco is gradually affecting and rendering smaller the teeth of the coming generations. More than this—in the course of reactionary evolution, I may so term it, we shall undoubtedly have children born without teeth at all."

One of the greatest blessings to parents is Mother Graves' Worm Exterminator. It effectually expels worms and gives health in a marvellous manner to the little one.

JUST AS WELL.

Perhaps, after all, the best policy is never to do anybody any harm unless thereby you can do yourself some good.

A Little Loss of flesh, a little obstinate cough and a little pain in the chest are signs that must not be neglected. Allen's Lung Balsam loosens the cough and effects a cure without a grain of opium.

The Bachelor: "Say what you please, but I don't believe there was ever a man that could size a woman up." The Benedict: "My brother can." The Bachelor: "How do you know?" The Benedict: "Because he is a ladies' tailor."

The greater the irritation in the throat the more distressing the cough becomes. Coughing is the effort of Nature to expel this irritating substance from the air passages. Bickel's Anti-Consumptive Syrup will heal the inflamed parts, which exude mucous, and restore them to a healthy state, the cough disappearing under the curative effects of the medicine. It is pleasant to the taste, and the price, 25 cents, is within the reach of all.

Many a man who thinks himself a born leader meekly surrenders the job to his wife shortly after marriage.

South American Rheumatic Cure Cures Rheumatism.—It is safe, harmless and acts quick—gives almost instant relief and an absolute cure in from one to three days—works wonders in most acute forms of rheumatism. One man's testimony: I spent 6 weeks in bed before commencing its use—4 bottles cured me.—66

Some people take such excellent care of their consciences that they never use them.

Time Has Tested It.—Time tests all things, that which is worthy lives; that which is inimical to man's welfare perishes. Time has proved Dr. Thomas' Electric Oil. From a few thousand bottles in the early days of its manufacture, the demand has risen so that now the production is running into hundreds of thousands of bottles. What is so eagerly sought for must be good.

"Don't you smell fire?" "No I don't think I do." "I don't either; but most people do if you ask them."

Help the Overworked Heart.—Is the great engine which pumps life through your system hard pressed, over-taxed, groaning under its load because disease has clogged it? Dr. Agnew's Cure for the Heart is nature's lubricator and cleanser, and daily demonstrates to heart sufferers that it is the safest, surest, and most speedy remedy that medical science knows.—67

Father: "Sarah, I don't like that fellow who comes here to see you." Sarah: "I don't see why not, pa. I'm sure he bears the impress of a gentleman." Father (wriggling his foot): "If he comes again he'll bear the impress of another gentleman."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

Hundreds of "chronics" that have baffled physicians.—68

PARADOXICAL.

"It seems strange," said Deacon Mayberry, as he counted the money after church, "that a large congregation can be so small."

If You are Nervous and Irritable take "Perrovim," the great nerve and blood tonic; you will be a new person by the time you have used a bottle. All dealers.

Often we wonder if the waiter thinks as little of us as we do after we have realized how he has bulldozed us into tipping him.

A Pill for Generous Eaters.—There are many persons of healthy appetite and poor digestion who, after a hearty meal are subject to much suffering. The food of which they have partaken lies dead in their stomachs. Headache, depression, a smothering feeling follow. One so afflicted is unfit for business or work of any kind. In this condition Parmelee's Vegetable Pills will bring relief. They will assist the assimilation of the aliment, and used according to direction will restore healthy digestion.

Wife: "You don't seem to enjoy the dinner dear. What's the matter?" Husband: "I was wondering if there weren't some typographical errors in that cookery book of yours."

A Cry for Help.—A pain in the back is a cry of the kidneys for help. South American Kidney Cure is the only cure that hasn't a failure written against it in cases of Bright's disease, diabetes, inflammation of the bladder, gravel and other kidney ailments. Don't neglect the apparently insignificant "signs." This powerful liquid specific prevents and cures.—70

Ma: "Willie what's your little brother crying about?" Willie: "Just 'cause he don't want to learn anything. I took his candy and showed him how to eat it."

Only those who have had experience can tell the torture corns cause. Pain with your boots on, pain with them off—pain night and day; but relief is sure to those who use Holloway's Corn Cure.

LAUGHING AT THE LINER.

When George Stephenson first asserted that he could make a steam engine that would draw coaches along smooth iron rails, he was laughed at from one end of the country to the other, and in all ranks of society, from the Committee of the House of Lords, which examined his project, to the drivers of the stage coaches, who were destined so soon to be superseded. So, too, with marine steam-engines. Both in England and America those who first advocated them were openly described as lunatics. Steam navigation of the Atlantic was described as quite as ridiculous as a voyage to the moon. A few months later it was actually accomplished. Shortly before this time a once well-known engineer said of the proposals to run ships by steam that it was very ingenious, but it would never work because steam engines required a solid and steady basis to work upon. In short, both land and sea locomotion were considered to be absolutely ridiculous until they were actually accomplished.

SOME SECRET BURIALS.

Alaric, King of the Visigoths, and their victorious leader, was buried about 1,500 years ago by his soldiers in the bed of the River Busento, in Southern Italy. They first turned the waters into another channel, and, after burying their chief and his treasures, let them flow back again. His grave was dug by prisoners, who were all afterwards put to death, so that the Romans might never find his grave. Attila, King of the Huns, was buried A. D. 453 on a wide plain in three coffins—one of gold, one of silver, and the third of iron. In his case, too, all the prisoners who were compelled to dig his grave were immediately killed. Another secret burial, in later history, was that of Fernando de Soto, the discoverer of the Mississippi, whose coffin was sunk at midnight in the middle of the broad stream, to conceal his death from the natives, who had been told that he was an immortal child of the sun.

NORTH-WESTERN FARMS

ON THE Grand Trunk Pacific

I have two sections of land for sale entire or in part, on line of Grand Trunk Pacific, now under construction just west of Portage La Prairie. Ploughing in the Northwest will begin as early as February. You can sow oats, potatoes and alfalfa on breaking and get big prices from railroad contractors on the spot. Then hire out your teams for railroad grading at \$5 per day. You won't get such a chance for a start another year. Don't waste any time, as there is practically no other land for sale of equal quality in such a situation on such terms and at so low a price. Price \$10.50 per acre; six year terms.

J. L. R. PARSONS,
92 Winchester Street,
Toronto, Ont.

COULDN'T DO IT.

Sunday School Teacher—"Why, Willie Wilson! Fighting again! Didn't last Sunday's lesson teach you that when you are struck on one cheek you ought to turn the other to the striker?" Willie—"Yes'm; but he hit me on the nose, and I've only got one."

"Oh, slip on any old thing," said the midnight caller. So the doctor slipped on the top step, but he did not lose any time, as he slipped on "The Best" Menthol Plaster and all was right in a jiffy.

"So he said I was a polished gentleman did he?" "Well yes. It was the same thing." "Ah! What was the exact word?" "He said you were a slippery fellow."

Good Digestion Should Wait on Appetite.—To have the stomach well is to have the nervous system well. Very delicate are the digestive organs, in some so sensitive are they that atmospheric changes affect them. When they become disarranged no other organ is so procurable than Parmelee's Vegetable Pills. They will assist the digestion, that the hearty eater will suffer no inconvenience and will derive all the benefits of his food.

Unless a man has horse sense he is apt to make a donkey of himself.

"You sign this deed of your own free will, do you, madam?" asked the lawyer. "What do you mean by that?" demanded the large red-faced woman. "I mean that there has been no compulsion on the part of your husband has there?" "Him?" she ejaculated, turning to look at the meek little man sitting beside her. "I'd like to see him try to compulse me!"

For 33 Years

Shiloh's Consumption Cure, the Lung Tonic, has been before the public, and this, together with the fact that its sales have steadily increased year by year, is the best proof of the merit of

Shiloh

as a cure for Coughs, Colds, and all diseases of the lungs and air passages. Those who have used Shiloh would not be without it. Those who have never used it should know that every bottle is sold with a positive guarantee that, if it doesn't cure you, the dealer will refund what you paid for it. Shiloh

Has Cured

thousands of the most obstinate cases of Coughs, Colds and Lung troubles. Let it cure you.

"Last winter I coughed for three months and thought I was going into Consumption. I took all sorts of medicines, but nothing did me any good until I used Shiloh's Consumption Cure. Four bottles cured me. This winter I had a very bad cold, was not able to speak, my lungs were sore on the side and back. Six bottles of Shiloh made me well again. I have given it to several people and every one of them have been cured.—D. Joseph, St. Hyacinthe, Que." 601

SHILOH

THE above picture of the man and fish is the trademark of Scott's Emulsion, and is the synonym for strength and purity. It is sold in almost all the civilized countries of the globe.

If the cod fish became extinct it would be a world-wide calamity, because the oil that comes from its liver surpasses all other fats in nourishing and life-giving properties. Thirty years ago the proprietors of Scott's Emulsion found a way of preparing cod liver oil so that everyone can take it and get the full value of the oil without the objectionable taste. Scott's Emulsion is the best thing in the world for weak, backward children, thin, delicate people, and all conditions of wasting and lost strength.

A TARDY PROPOSAL

I.

It was exactly three years to a day since Harry Morton had set foot in the village, and the news of his return spread quickly amongst the inhabitants. The wildest rumors were, of course, afloat in next to no time, and he progressed from absolute beggary and failure to the very height of affluence and prosperity (and the reverse) in that brief winter's afternoon.

The simple truth, that he was neither rich nor poor, but that he had just managed to save a few hundreds and take a run home, would never have satisfied the gossip-loving villagers, to whom a voyage from Australia was such a stupendous affair that no man in his senses would undertake it otherwise than under great pressure.

It was getting late in the evening before the news reached as far as Willowlea Farm, which lay some miles away on the outskirts of the village, and that it has not lost anything in traveling was only to be expected.

"They do say," remarked Mr Marsden, as he settled himself down comfortably in a capacious chair at the fireside, lifting his churchwarden from the mantel at the same time "they do say as how young Harry Morton's come back."

"Young Harry Morton back?" cried his wife incredulously. "Why—"

A crash of breaking china in the scullery (which led out of the kitchen in which they were seated) cut short the worthy lady's sentence.

"Whatever are you doing now, Hetty?" she cried. "I declare you're always breaking something or another."

There was a muffled expression of regret, followed by a rapid acceleration in the speed of the duties being performed, and the farmer and his wife took up the thread of their interrupted conversation.

"Why, it's only three years since he left," Mrs. Marsden said, "and if he's come back the same as he went, then all I can say is that it's a bad job for his poor mother."

"Ah! but he's not," chuckled the farmer: "he's come back, so they say, with a big fortune, made up on the goldfields of Australia, and as to its being a bad job for his mother I never could see any harm in the lad—a bit wild, perhaps, but nothing worse."

Mrs. Marsden shook her head mournfully.

"You've changed your tune lately, Fred, that's all I can say then," she retorted. "Why, look at the time you chased him across the spinnery, and found when you laid hands upon him that he'd got his coat simply lined with hares."

"And many's the time I've done the same," he chimed in sentimentally, "only, of course, I didn't tell young Harry so—that would never have done."

"And then his carryings-on with the girl up at the 'Mit-e' and—there, that doesn't matter now. I tell you what, though: I don't believe a word about this fortune of his. He's not the sort of chap to put money by—it's easy come and easy go with him, to my way of thinking."

Mr. Marsden did not trouble to argue the point with his wife; but, like the good-natured man he was, allowed her to have the last word.

"Hetty!" he cried. "Come here, Hetty I want you."

She came into the kitchen at his call, her face as white as a sheet of

so much as a word or a line of parting, and she had never forgotten that hopeless, dreary winter's day on which she heard the news, with its long succeeding night of bitter tears and agony of remorse. How she had loved him! And he was lost to her for ever—he would never come back—oh, how she cursed the feminine folly and light-heartedness which had prompted her to refuse his manly declaration!

II.

Harry's home-stay was limited to one month, and the days sped swiftly by.

Hetty—her hope increased now tenfold—lived in a perfect frenzy of alternating hope and fear, at one moment declaring herself the unhappiest mortal alive, at another confident that all would be put right before he went away again. That he still loved her was certain, concealed the fact how he might, and she judged by the strength of her own feelings that it would be impossible for him to leave her, perhaps for ever this time, without a word.

Three weeks passed—four! In two days more his ship sailed, and it would be necessary for him to leave home overnight in order to be in London in time to reach the docks.

She had gone into the village that day, the last, to make a few purchases, and just as she emerged into the open country he had come up with her.

"I am just in time," he said, taking the heavy bag from her hand. "Why, what a weight for you to lug home by yourself."

"Oh, I am used to it," she smiled faintly, "and you know I am pretty strong."

"I have something to tell you, Hetty, something that has been upon my lips ever since I returned. I do not know that it will concern you much, but—"

She was looking up at him in wonderment. Not concern her much? Had he not guessed a thousand times how matters stood with the poor, pitiful, little heart? Had not her every wistful glance, her every timid response, her every pleading compliance with his lightest wish—had not these revealed to him how passionately she loved him?

"I am married, Hetty. I—"

She gave a low cry, like some affrighted, wounded animal, and shrank helplessly away from him, restrained only by his hold upon her hand.

"Yes, I was married a year ago in Australia. I found life right back in the heart of the bush, was intolerably lonely, and—but what is the matter, Hetty—you are crying?"

She felt she could not answer his question had the world been laid at her feet for so doing, but she crushed back the deadly sickness at her heart and said in a low voice:

"It is very silly of me, but I have not been very well lately, and—oh! do please let us hurry home."

No further word was spoken until they reached the gate at which they had parted three years ago; and here, despite her efforts to escape, he remained her.

"Do you remember the last time we stood here together?" he asked.

She strove to disengage her hand but he was too strong for her.

"Do you remember how you laughed at me, and let me walk off down the lane with never a word—"

"I called you—"

The words had escaped her lips unconsciously, wrung from her in the keenness of her agony, and he looked at her in amazement.

"You called me?" he asked.

"Yes," she retorted defiantly, casting shame and reserve to the winds. "I called you back and you would not come. I did not mean what I said, and—oh! but what is the use of talking like this?" she cried passionately. "It's all over and past now, and I wish I was dead and away from ever one."

He had released his hand, and she stood leaning against the gate, her

YOUNG FOLKS

THE "BUNDLE AUNT."

The first time the door-bell rang was before breakfast. When the family went into the dining-room there was a flat bundle in Mrs. Lane's chair.

"Dear me!" said Mrs. Lane. "I haven't had an express bundle since the last time—"

She did not finish her sentence, but untied the string, and there in a box was a beautiful fluffy black bog, just what she had been wishing for some time to buy.

"Who sent it, mother?" asked Greta and Nancy and Will and Johnny altogether.

"There's nothing on it to show who sent it," said mother smiling.

Just as they were leaving the breakfast-table the postman came, and Greta hurried to the door.

"Here's a package for you, father, and one for me," she said. "The addresses are printed on both of them, and I can't make out the postmark, can you?"

"No, I can't," said Mr. Lane, after looking closely at his package. Then he smiled at Greta, who smiled back at him.

Mr. Lane's package held a queer old book, which he was glad to add to his collection. Greta's was a pretty lace collar; just the thing she needed for her new Sunday gown.

"Dear me, what a mysterious morning!" said Mr. Lane, as he started down town. "I hope we may find out about some of these presents before night."

In the afternoon, just after Nancy had come home from school, there was a loud ring at the door-bell, and there stood a boy with a square package addressed to "Miss Nancy Lane." She had to sign her name in the boy's book, to show she had received the package.

When the wrapper was taken off, there was a box of chocolates,—all Nancy's favorite kinds,—but no card to show who had sent it.

"O-oh! I know!" cried Nancy; and then she hugged the box and said nothing more.

At four o'clock came a furious peal of the bell, as if somebody could not wait a minute! There was the delivery-van from the great toy-shop at the door, and on the steps stood a man with two big, queerly-shaped bundles. One was addressed to "Master William Lane," and the other to "Master John Lane."

Will's bundle proved to be the newest sort of mechanical toy engine, at which Will had looked with longing eyes for a fortnight.

Johnny's was a magic lantern outfit, which made him give a loud whoop of delight.

"I know! I know!" cried the boys together. Then they stopped and looked wise.

At six o'clock all the Lanes, big and little were in the parlor, waiting for something. Anybody could have told that from the way they listened whenever a carriage went past, and the way Johnny kept running to the window to pull aside the shade.

There came from the kitchen a most delicious odor of hot biscuits and gingerbread and coffee and several other things, and just then the bell rang again!

"It's the bundle aunty!" cried the Lanes together, as they gathered round a dear little old lady, and tried to kiss her all at once.

For that was the way the "bundle aunty" always came.

FRED'S BIRTHDAY GIFTS.

For many weeks Fred had been looking for his birthday. He had been promised a party; he was to be eight years old and felt himself a very happy, big boy.

At length the long-looked-for day came, and Fred's guests began to arrive with their many birthday wishes and gifts.

One of Fred's playmates, Joe Long

MYSTERIES OF OCEAN BED

THE STRANGE LIFE SEEN BY A DEEP SEA DIVER.

Changes in Forms of Fish at Great Depth — Giant Crabs and Devil Fish.

The disaster which happened to the French vessel Sully not so very long ago when it went to the bottom not far from Saigon has afforded, says the Scientific American, the divers intrusted with examination of the submerged ship opportunities for making exhaustive and important explorations of the bottom of the sea. In these fields of sub-aqueous exploration special distinction has been won by a young naval engineer named De Plury, who by the aid of an apparatus of his own invention, succeeded in reaching a depth of over more than 336 feet—a depth which had never before been attained.

De Plury has invented a kind of metal armor which affords him every protection, while by means of a special chemical combination respiration is automatically provided for. Thanks to this, he has already made more than 115 most daring descents with perfect safety. He has thus been able to discover a most marvellous world, hitherto seen by no eye but his; the sea bed is a scene of marvels combined with no small amount of tragic horrors.

"The first sensation experienced," said this intrepid diver at a recent interview with an Italian journalist, "is something like that which is felt on descending into a mine, but you soon get accustomed to it. At a depth of about nine feet medusæ began to be found in large quantities. Seen through the water, everything appears magnified, and they are apparently of

ENORMOUS PROPORTION.

All recollection of the protection afforded by the glass front of the helmet is forgotten, and the first impression is that these masses of horrid flaccid and slimy medusæ will adhere to your face.

"Just a little lower down, and a scintillating multitudinous shoal of small fishes is encountered, shimmering like so many strips of shining copper, or other metal, in a state of continuous vibration.

"At a depth of about 162 feet thick masses of seaweed are traversed; some of these are horrible vegetable growths, with arms from twenty to thirty yards in length, which, with a kind of horrid vitality, wrap themselves round every part of the body. These algae constitute a grave danger, as they can easily paralyze the diver's movements and by rising up above and around him, can weigh him down with a weight amounting to several hundred weight—sufficient to break a rope or lifeline when hauled on.

"Below 162 feet there are small snake-like fishes of about three feet in length, and also other denizens of the deep resembling dolphins. These latter hurt themselves violently against the diver. If, as already remarked, he is somewhat young at the game, and has forgotten the protection afforded by his helmet, he is still filled with a mortal dread lest they should succeed in smashing the glass front of the helmet despite its four inches of thickness. Of course should that occur, death would be almost instantaneous.

"Still other and worse monsters are the polypi or devilfish, who wrap their slimy tentacles round the bold explorer; but although repugnant, these monsters are cowardly, and immediately renounce their attack in coming in contact with the unfamiliar feel of the metal armor plating of my diving dress. There are also equally horrible, and much more intrepid, giant crabs. Some of those I have seen have measured as much as

THREE FEET IN DIAMETER.

Due to their strong shells and formidable claws, they constitute a continual menace to the safety of the diver which is by no means to be despised.

"This is about all that can be said in the scope of the deep sea fauna. The deformation of fish is not very noticeable at such a small depth, but deeper

Mr. Marsden did not trouble to argue the point with his wife; but, like the good-natured man he was, allowed her to have the last word.

"Hetty!" he cried. "Come here, Hetty. I want you."

She came into the kitchen at his call, her face as white as a sheet of paper.

"Why, lord, sake alive! what's the matter?" exclaimed her mother. "You look as though you'd seen a ghost. What's the matter with you?"

With a knowledge born of long experience, Hetty threw herself down in the rug at her father's feet, musing words to the effect that her head was aching, and the good man, with a frown and a shake of the finger at his wife, put his mouth down close to the girl's ear and whispered:

"Have you heard the news, Hetty? Young Harry Morton's come home."

He had expected to see her raise her head and a brilliant smile to come into her eyes; but he was miserably disappointed, for she only distinctly uttered a few words, and then merely a mechanical:

"Oh! it's he?"

"Yes, and he's come back as rich as a—"

"Oh, hedges!" interpolated the practical Mrs. Marsden. "don't you believe what he's saying, Hetty; it's only idle village talk."

"But he is really back?" hazarded Hetty, feeling that some remark from her was called for. "Isn't he?"

"Back? Yes," cried her mother, "and—well, bless my heart, if that isn't his knees—I should know it in a thousand."

She ran and opened the back door—the front one was only used on state and ceremonial occasions—burning half a minute later followed by Harry Morton.

Hetty had risen hurriedly from her seat upon the floor, as red now as she had been white before, and stood brunk back into the shadow until her congratulations between her parents and the visitor were over. Then there was no help for it—she advanced timidly, yet with a certain air of defiance, and put out her hand.

He took it quietly, with a quick look into her eyes and a sudden flushing of color into his bronzed cheeks.

"You haven't changed a bit, Hetty," he said; and she, laughing now, assured him that if his name had not been announced she would never have recognised him at all.

His three years of rough life had certainly wrought a wondrous change in him, and there were now a decision and manliness in his bearing, a firmness in his strong mouth, and a will and purpose in his keen, grey eyes which contrasted favorably with his self as she had formerly known him.

Hetty had not as yet trusted herself to take a full and comprehensive view of him, her sidelong glance having been sufficient to cause her heart to beat rapidly and her eyes to become dim and misty.

What a little fool she had been not to accept his offer of three years' back, when they stood together that night at the gate of the farm.

"I have always loved you, Hetty, darling!" he had said—and oh, how low and tender his voice had been! "and if only you could love me in return just a little bit—"

And she had swept his declaration aside with a laugh, spurning the offer even at the very moment when her own heart was palpitating with passion. Another word from him and she would have confessed her love; but he had turned angrily upon his heel, and gone at a rapid pace down the road. "Once she had called him back; but her voice was choking with sobs and he did not hear her. And, with a coldness of death at her heart, she had staggered into the house and thrown herself in a passion of rage and tenderness—the two strangely blended—upon the bed.

A week later, Harry had gone on his long trip to Australia without

not come. I did not mean what I said, and—oh! but what is the use of talking like this?" she cried passionately. "It's all over and past now, and I wish I was dead and away from ever, one."

He had released her hand, and she stood leaning against the gate, her face buried in her folded arms, her tears flowing unrestrained.

He touched her lightly and pitifully upon the shoulder.

"You must not cry so, Hetty," he said. "It has all been a horrible mistake—I can see it now, and," she felt his breath upon her face, "if I were to ask you the same question, would you—"

He turned her tear-stained face upon him.

"You mustn't ask me," she cried, her cheeks aflame. "You are—marrying, and I—"

Again he said her name.

"But if I were—"

"Tell me, would you really be so kind?" There can be no harm in a simple reply, and I really have a reason for asking."

"But you have no right to ask me," she cried. "It is in his letter, and it is—"

There was a strange light shining in his eyes, and suddenly, ere she could speak, his arms were around her, and he was pressing his lips feverishly to her hot cheek.

He endeavored to push her away, with all the strength of her two hands, but she was a little child in his grasp, and at last, worn out with her exertions, she hung, set and exhausted, at his mercy.

"Tell me," he was saying. "Tell me—and I will release you—only tell me."

His persistence had conquered, and she gave the faintest shade of the head and a tremulously muttered "No"; and he instantly released her to catch her again the next moment as she was sliding half faintly to the ground.

"Oh, let me go!" she cried wildly. "You mustn't—oh, you mustn't!"

"Really," he laughed, "I think I may. Hetty!"—she shrank from the cool incisiveness of his tones—"when I went away from here three years ago I swore never to set foot in the village again; but my love for you proved stronger than my resolution, and I was forced to return. Since I have been back I have learnt to love you more and more every day; but I did not dare to confess it to you, I have waited and waited, putting it off until this last day of all and now—"

He paused, and took her cheeks between his hands, forcing her to look up into his eyes.

"Now, Hetty, darling! now you have said you will not repulse me, I have gathered the necessary courage, and I ask you—to be my wife."

"But—"

"Oh!" he laughed, "you need not fear. I shall not be committing bigamy. My first wife is a—pure myth, and if you will say 'Yes'—"

She did not say "Yes" even then; but under the circumstances, perhaps, words would have been superfluous.

The shipping company made no objection to Harry's postponing his passage for a month, on the understanding that he would require tickets for two in place of one.—Pearson's Weekly.

NEW DRINK CURE.

The authorities in Norway have discovered a novel way of curing drunkenness. The "patient" is placed under lock and key, and his nourishment consists in great part of bread soaked in port wine. The first day the drunkard eats his food with pleasure, and even on the second day he enjoys it. On the third day he finds that it is very monotonous, on the fourth day he becomes impatient, and at the end of eight days he receives the wine with horror. It seems that the disgust increases, and that this cure gives good results.

promised a party; he was to be eight years old and felt himself a very happy, big boy.

At length the long-looked-for day came, and Fred's guests began to arrive with their many birthday wishes and gifts.

One of Fred's playmates, Joe Long, who lived at the other end of the block, and who had very little money, came running up the steps with his bright, jolly little face just beaming. As he shook hands he gave Fred a package. Fred quickly unrolled it, and there was just one cent's worth of candy. Fred looked at it; in a second his face clouded and his eyes showed he was disappointed.

But fortunately his mother stood by, and said so brightly and quickly: "Well, this is very kind; Joe has spent all his money to give you a birthday gift."

Fred then said, "Thank you, Joe; you know what I like."

Among the last to come was Fred's grandmother. She had wondered and thought again and again, what she could take Fred. Like a good many grandmothers, she had very little money to spend, so she finally concluded she would give him her own cup and saucer. It was a very beautiful one; Fred had never seen her use any other, and his grandmother knew it was very much more handsome than any she could buy again. She bought a common cup and saucer for herself, and wrapped up her own for Fred and gave the package to him.

His grandmother kissed him just eight times, and then Fred hurriedly unfolded his package. Can you guess how Fred looked this time? His smile once more disappeared, and his face, more plainly than any words could say it, told how disappointed he was.

But his mother, like all mothers, after happened in the right place at the right time, and said: "Why, grandmother! do you mean to give Fred this beautiful cup and saucer, that you always use yourself?"

Grandmother held Fred closely, saying: "I want to give them to Fred, for his very own, that he may always remember his grandmother."

Fred never forgot his grandmother's face as she said this, smiling, but with two great tears in her eyes.

He always remembered this birthday, not because of his party, or on account of his gifts, but because he had learned how to value gifts. He learned one of the best lessons of life, that the money value of a gift is as nothing compared with the kind, sweet thoughtfulness that makes the giver offer, his best, no matter how little it may be, no matter how poor it may be, no matter how old it may be.

POISON IN EGGS.

Another Startling Discovery of French Medical Investigation.

One by one our most cherished articles of diet disclose deadly designs upon our well-being under the fostering care of the medical profession, supported by the medical press.

Hitherto the egg has been regarded as absolutely innocuous, until at least, it has reached an age which qualifies it to take an active part in politics.

But now a French medical man has discovered a hidden danger lurking in its yolk, and the dreadful intelligence has been spread far and wide by the "Lancet."

The yolk of the eggs of hens, ducks, and tortoises, he declares, contain a substance which, when injected into the veins, under the skin, or into the general body cavity, eventually causes death from an acute intoxication of the central nervous system.

Hen's egg yolk is less toxic than that of the duck, but that of the tortoise is more poisonous than either.

It is comforting to observe, however, that the great majority of the general public who eat eggs in the ordinary way are not threatened.

George (nervously)—"I'd like ever so much to marry you, Kitty, but I don't know how to propose." Kitty (promptly and practically)—"That's all right, George. You've finished with me; now go to papa."

Due to their strong shells and formidable claws, they constitute a continual menace to the safety of the diver which is by no means to be despised.

"This is about all that can be said in the score of the deep sea fauna. The deformation of fish is not very noticeable at such a small depth; by deformation I mean not only change of form, but also of character. This takes place at a depth of about 1,000 yards; here their nature changes entirely, and they assume the forms and constitutional modifications necessary to enable them to bear the enormous pressure to which they are subjected, and have their being.

"Hitherto it has been quite impossible to obtain living specimens of these submarine creatures, as they reached the surface with their volume quadrupled due to the reduction of pressure. All these creatures are carnivorous, and their voracious maws not infrequently serve as the tombs of unfortunate sailors whose ships have gone to the bottom, and their bodies gradually sink deeper and deeper, while the formidable pressure to which they are subjected in an increasing intensity soon smashes all their bones, and finally crushes the corpses quite flat. But enough suffice it to say that this awful spectacle is scarcely visible after a depth of thirty feet.

"One curious fact attending these submarine explorations is afforded by the light, which forms a strange blend of green and violet, the color being a little similar to that of the caverns which are to be seen in icebergs. At a depth of thirty-two yards the light begins to get more and more diffused, and the sun viewed through the mass of super-numerous water appears like a reddish orange globe, but—and this is somewhat strange—when sheltered from the rays of the sun (behind a rock for instance) the stars become visible even at midday.

"One day, just about noon, I saw a never to be forgotten sight at a depth of 120 feet. The sun was right at the zenith. The bottom upon which I stood consisted of fine white sand, and the reflection of the light upon the snowy carpet gave me the impression of standing upon

A PLAIN OF MOLTEN GOLD.

At a depth of 226 feet the obscurity is complete; at 327 feet the darkness is impenetrable, and it is necessary to have recourse to electricity for purposes of vision. I use electric lamps of 10,000 candle-power, but even these cannot diffuse the light beyond a radius of ninety feet. A most tragic spectacle is then presented by sunken vessels, broken boats, splintered hulls, gaping decks and broken masts."

No scenes of horror can be surpassed by the awful panoramas of death and disaster, which have been witnessed by Engineer de Plury in the course of his professional experiences as a diver.

"In the vicinity of Ostend," he relates, "I was requested once to examine the wreck of a vessel which had sunk not long before. This was the occasion upon which I was assailed by a veritable horde of those giant crabs of which I have already spoken. They were at the time busy devouring the corpses of the dead sailors. One of these monsters seized me by the leg, which would have been crushed, as it squeezed by a jaw of steel, had it not been protected by the powerful armor of my diving dress. I had a kind of sword in my hand, with which I succeeded in killing two of these monsters: the shells I still possess.

All objects at the bottom of the sea are covered with a kind of curious gowder, and a terrible gloom and silence prevails. What a scene of melancholy! The floor of the ocean is strewn with bones, not a few of them of human origin. A very singular fact which I have observed is that the sea for a certain period of time keeps bodies in a perfect state of preservation. I once visited the hull of a vessel which had gone down with all hands.

"The crew were mostly asleep at the moment when the disaster occurred, and had thus practically passed instantaneously from sleep to death. So far they had not been bitten or gnawed

of by any fish, as most of the hatchways were closed. The men still appeared as if asleep. There they lay, wrapped in a calm and mysterious slumber. I approached, and climbing down to the hatchways, touched one of the corpses with my hand; the flesh seemed to dissolve and vanish under my hand, leaving nothing but

A GRINNING SKELETON.

"And the treasures of the seas! Millions alone are engulfed not far from Vigo. Personally, I have never been there, but one of my men once went down there clad in the old diving dress. The unhappy man died almost directly he reached the surface again, but he had had time to see several galleons lying at the bottom, with the masts still standing and the timberwork still sound. These, of course, were some of the famous treasure ships, but I do not think it would be possible to recover them. All metals would have been destroyed by rust by now, as they have been below water ever since 1707.

"I have seen personally the vessel which, about 1808, was conveying Napoleon's treasures to Holland, but it was wrecked en route and sank with 100,000,000 of gold on board. Of these, 56,000,000 have been recovered, but the remainder, as I have said, is still in the bottom of the ocean. The Prince of Monaco states that he has found near Cyprus a galley still full of objects of art at the bottom of the sea. This is where submarine boats will have such a great future before them, as, by their aid, we shall one day be able to explore unknown deep sea grottoes, rich in unknown forms of life, vaults full of untold wealth, and the tomb of many a poor sailor."

BIRDS WHICH WORK TOGETHER.

A Naturalist Tells of Them Turning Over a Fish.

Turnstone is the name of a variety of shore-birds that are allied to the plovers and the sandpipers. This name has been given to them because of their singular manner of feeding. With their strong bills they turn over the small stones lying in the sand of the beaches to find the insects that may be sheltered underneath. If the stone is too heavy for the bill, they push it over by applying the breast to the upper side. A Scotch naturalist tells how a number of these birds worked together to turn over a fish which was too heavy for one alone to move.

Passing along the seashore, he says, I observed on the sands, at a considerable distance before me, two birds beside a large object. Knowing by their appearance that they did not belong to the species which are usually met in this quarter, I left the beach and proceeded along the sand, an eminence of shingle intervening, until I concluded that I was almost opposite the spot where the birds were employed.

At last I came in sight of the two little workers, which were busily endeavoring to turn over a dead fish that was fully six times their size. Not wishing to disturb them, and anxious at the same time to witness their operations, I observed that a few paces nearer them there was a deep hollow among the shingle, into which I contrived to creep unobserved.

Having got fairly settled down in my pebbly observatory, I turned my undivided attention to the birds before me. They were boldly pushing at the fish with their bills and then with their breasts. Their endeavors, however, were in vain; the object remained immovable.

On this they both went round to the opposite side and began to scrape away the sand from beneath the fish. After removing a considerable quantity, they again came back to the spot which they had left, and went once more at work with their bills and breasts, but with as little apparent success as before. Nothing daunted, however, they ran round a second time to the other side, and recommenced their trenching operations with a seeming determination not to be baffled in their object, which evidently was to undermine the

HEALTH

EMERGENCY REMEDIES.

In every household there should be what might be termed an "emergency medical chest." This cupboard or chest need not be very large. They do not cost very much, or they can be made at home. About twelve inches high and ten inches wide and have at least two shelves.

They should contain vaseline soft cloth for bandages, mustard plasters, arnica, witch-hazel, benzine and borax.

A fine mixture to use in case of burns or scalds is composed of equal parts of lime water and sweet oil, beaten up, and will afford instant relief if applied to a burn. A burn may also be relieved by applying sweet oil and then sprinkling with flour. This prevents the air from getting at the injured part. If a person is badly burned or scalded no attempt should be made to remove the clothing covering the injured part until cold water has been poured over the spot.

A bad cut can instantly be relieved by applying diluted tincture of arnica—one part arnica to ten parts water. Draw the edges of the cut tightly together and bind up well with a piece of clean linen, or cotton soaked in this solution.

Sticking plaster should not be applied to a cut until it has at least stopped bleeding.

If bleeding is very severe and comes in jerks, an artery has probably been severed. In this case the limb should be bound tightly between the heart and the wound. Apply cold water and call a surgeon as quickly as possible. For severe bleeding from the nose apply something cold to the spine, and inject a strong solution of alum through the nostrils. A piece of ice inserted into the nostrils will often afford quick relief.

In case you swallow a fishbone, and it continues to stick in the throat, swallow a raw egg at once, and it will be sure to carry the bone along with it.

A salve to cure chapped hands or lips can be made of marrow of fresh beef bones, add a small piece of white wax about the size of a filbert nut. Melt these together over the fire and add to this result a piece of gum camphor about the same size as the wax and an ounce of glycerine. Stir this until the camphor is dissolved and add a few drops of oil of roses to add a pleasant odor. Apply this to the chapped parts before going to bed.

The juice of a lemon in a tumbler of water and taken last thing at night and first thing in the morning will have a wonderfully good effect on the eyes and complexion and assist the liver in its work.

DROWSINESS.

Ordinary drowsiness, sleep-hunger, it might well be called, is nature's appeal for rest, and a warning against the dangers of overwork.

Physiologists have generally explained it by assuming that the blood-supply of the brain has been diminished or that the composition of the blood has been changed; but since it has been found that prolonged action of the muscles and nerves produces a poison that causes fatigue and the attendant mental depression, it is probable that normal drowsiness differs from that due to disease chiefly in the character of the poison that induces it.

There are many ailments in which the blood becomes so changed in quality or in circulation as to induce drowsiness, particularly anemia, nervous prostration and weakness of the heart. The poisons that result from indigestion and those retained through degeneration of the kidneys are similar in effect, and the toxins formed by the bacteria in the acute infectious diseases of children nearly all induce a desire for sleep.

Habitual drowsiness so pronounced as to interfere with nutrition rouses a suspicion of the taking of narcotic

WITH FLINT AND STEEL

HOW THE TINDER-BOX WAS USED IN THE OLDER DAYS.

Sometimes Took a Long Time to Strike a Light — Early Lighting Device.

Few people living to-day remember when the tinder box was a necessity. But these few are the only ones who thoroughly appreciate the convenience of matches. With the aid of a tinder box one sometimes obtained a light in less than two minutes, but if the conditions were unfavorable one might spend a half hour or more before getting from the reluctant tinder box the spark which would kindle the fire.

The process sounds simple. The lid of the box was removed and a bit of candle stuck in the socket. Next the flint, steel, matches and dampener were taken from the box, one match being drawn from the bundle and laid ready for immediate use. The handle of the steel was grasped firmly in the left hand and the flint held between the thumb and forefinger of the right hand. Nine inches was considered the proper distance between the steel and the tinder. This was measured, roughly in the dark by placing the tip of the little finger on the rim of the box, spreading the hand upward, and placing the bottom of the steel on the tip of the thumb. The flint was then struck sharply with the steel several times, obliquely and downwards.

SPARKS FROM STEEL.

The impact caused the steel to give off sparks, really minute globules of molten metal, at a temperature of several thousand degrees, and these, falling upon the tinder, soon set it alight. The box was then taken in the hands and gently blown to cause the smoldering tinder to glow more brightly, and to this glow the point of a sulphur match was quickly applied. The flame of the burning sulphur quickly kindled the wood of the match and it was then easy to light the candle or morning fire.

Although the process was not difficult for an expert under favorable circumstances, it was at best slow and tedious. One might strike a hundred modern matches, one by one, in less time.

The flint commonly used in the tinder box was such as might be picked up in any flint district. All that was necessary that it should be so shaped that it could be held easily between the fingers and should have sharp, clear edges. These were commonly sold in the streets of London for a penny, and are still manufactured in Brandon, England, for export to Spain, Italy and the East. The match then used was not like those of to-day, which ignite spontaneously when struck.

FIRST MATCHES.

Originally a "match" was any substance, which burned readily and slowly. The bit of slow burning hempen rope steeped in a solution of saltpetre, which the ancient gunner carried in order to discharge his arquebus, was a "match." It burned at the rate of about three feet in an hour. The old sulphur match was intended not to produce but to convey fire. In London matches were commonly sold by the poorest and raggedest class of street merchants, who lived in dirty lodgings in the poorest districts where they made the matches, carrying them about in a basket for sale. Few houses with any pretension escaped without at least one call a day from these vendors as long as the trade lasted.

The difficulty was to find dry tinder. Naturally it was very ready to absorb moisture, and when allowed to become damp the difficulty of obtaining a light in the morning was great. To avoid this trouble the tinder box was usually kept in a specially dry place. Often there was a small niche made on purpose in the brickwork at the back of the room

THE SUNDAY SCHOOL

INTERNATIONAL LESSON, JAN. 7.

Lesson 1. The Shepherd's Find Jesus. Golden Text, Luke 2: 44.

LESSON WORD STUDIES.

Note—The text of the Revised Version is used as a basis for these Word Studies.

The Narrative of a Professional Man.—Luke, the author of the third gospel, was a physician (Col. 4: 14) of scholarly tastes and instincts. At the time of his writing his narrative of the life of Jesus (about A.D. 70 or a little later) there already existed in addition to the vast oral traditions clustering about the name of Jesus and still fresh in the memory of the first generation after Christ, several written accounts of the words and work of Jesus (Luke 1: 1). Two of these were doubtless the gospels of Matthew and Mark, the narrative of Mark being the older of the two. There were also, without doubt, still many persons living who had themselves been eyewitnesses of the events connected with the life of Jesus. This vast source of written and oral material from which to draw in constructing his narrative Luke approached in the spirit and with the method of a scholar, tracing "the course of all things accurately from the first" (Luke 1: 3), before proceeding to write. Concerning Luke we know, apart from that which we are told and may infer concerning him from his writings (the gospel and the book of Acts), that he was for a time the companion of Paul, being with the great apostle at Rome when he wrote his epistles to the Colossians, to Timothy, and to Philemon (comp. Col. 4: 2 Tim. 4: 11; Phil. 24). From these references we may infer that he was a Gentile by birth, with which agrees the Greek form of his name, Loukas, though this was doubtless derived from the longer Latin form Lucanus. The character and language of the gospel itself bears out the inference that it was intended not for a Jewish but for a Gentile, though Christian, circle of readers. It presents a chronological account of the lifework of Jesus, as complete as the sources available to the author enabled him to make. It is addressed to one Theophilus, who may be considered representative of the class which the gospel was intended to influence. The place if its writing it is not possible to determine.

Verse 1. In those days—That is, in the time when the events narrated in the preceding first chapters were taking place.

Caesar Augustus—The well-known first Roman emperor, B. C. 63 to A. D. 14, whose authority extended over Palestine and adjacent countries, Rome being at this time at the height of her worldly glory.

All the world should be enrolled—All the Roman world. It is probable that Luke's narrative at this point reflects the actual wording of the decree, which conveys to us a bit of the haughty and boastful spirit of the great world empire. The enrollment was a taking of the census. It did not necessarily involve a taxation. It is interesting to note the significance of the word "enrolled." There being no books of the kind we are used to, all writing was on long strips of parchment or other material, each long strip when rolled together corresponding to a single volume or book. The Greek verb means simply to write down, to register.

2. When Quirinius was governor of Syria—Quirinius is the Latin form of the name, while Cyrenius (which occurs in the King James Version) is the corresponding Greek form. Outside of our lesson narrative there is no record of this first governorship and enrollment of Quirinius. From

again came back to the spot which they had left, and went once more at work with their bills and breasts, but with as little apparent success as before. Nothing daunted, however, they ran round a second time to the other side and recommenced their trenching operations with a seeming determination not to be baffled in their object, which evidently was to undermine the dead creature before them, in order that it might be the more easily overturned.

While they were thus employed, and after they had labored in this manner at both sides alternately for nearly half an hour, they were joined by another of their own species, which came flying with rapidity from the neighboring rocks. Its timely arrival was hailed with evident signs of joy. I was led to this conclusion from the gestures which they made, and from a low, but pleasant murmuring noise to which they gave utterance as soon as the newcomer made his appearance. Of their feelings he seemed to be perfectly aware, and he made his reply to them in a similar strain.

Their mutual congratulations being over, they all three set to work, and after laboring vigorously for a few minutes in removing the sand, they came round to the other side, and putting their breasts to the fish, succeeded in raising it some inches from the sand, but were unable to turn it over. It went down again into its sandy bed, to their manifest disappointment.

Resting, however, for a space, and without leaving their respective positions, which were a little apart the one from the other, they resolved, it appeared, to give the work another trial. Lowering themselves, with their breasts close to the sand, they managed to push their bills underneath the fish, which they made to raise about the same height as before. Afterward withdrawing their bills, but without losing the advantage which they had gained, they applied their breasts to the object. This they did with such force and to such purpose that at last it went over and rolled several yards down a slight declivity. It was followed to some distance by the birds themselves before they could recover their bearing.

SAVING THE GOLD DUST.

Precautions Taken in the Manufacturing Jeweller's Establishment.

Washing machines seem all right enough in a laundry, but they would scarcely be looked for in the establishment of a manufacturing jeweller. Yet they play an important part in such a plant.

In a washing machine are washed daily all the aprons and all the blouses worn by the workers employed in the manufacture of articles of gold. Then the water in which these things have been washed is piped to a room where the gold contained in it is extracted and saved.

Particles of gold adhere to the hands and faces of the workers in the precious metal, and even get into their hair. Twice a day all the operatives wash their hands and faces; and the water is, like that from the washing machine, piped to the extracting room.

Here there is installed a big filter, with its filtering section made of canvas, and resembling outwardly the pleated section of a giant square concertina, as it would look partly drawn out. All the water from the washing machine and from the wash bowls in the factory is forced through this filter; and at regular intervals the filtering section is taken out and the gold removed from it.

All the floors in the factory is covered with tar paper, which catches and holds all the gold particles that fall upon it. From time to time a new paper covering is laid on the floors, the old being burned for the gold contained in it.

By these means there are saved in a factory annually thousands of dollars worth of gold that without such precautions would inevitably be lost.

tradition and weakness of the heart. The poisons that result from indigestion and those retained through degeneration of the kidneys are similar in effect, and the toxins formed by the bacteria in the acute infectious diseases of children nearly all induce a desire for sleep.

Habitual drowsiness so pronounced as to interfere with nutrition rouses a suspicion of the taking of narcotic drugs, and when it affects an infant, there is reason to fear that it is caused by soothing syrup, administered by the nurse, perhaps, to lessen her care; but of course it may be due to some other cause.

Drowsiness seldom indicates immediate danger, so long as there is neither fever nor a temperature lower than normal, and providing that the person can be roused by calling his name. But in advanced life it is sometimes an early symptom of Bright's disease, apoplexy or other malady. And yet many persons acquire a tendency to sleep with as much regularity and no greater harm than they eat their meals, and the tendency increases with the advance of age and fatness.

How to overcome excessive sleepiness must be determined from a study of the influences that brought it on. Unless it is due to anemia, an infection, or some organic disease, the administration of drugs is rarely necessary, and in convalescence from disease the patient may be encouraged to sleep, with only such intervals as are needful for food, drink and exercise. In many other cases the diet must be changed and chronic constipation overcome. More water must generally be drunk in order to increase the secretions, but it is often necessary, on the other hand, to withhold water when the kidneys are defective. Warm baths, massage, or an occasional Turkish bath may be beneficial, but all such methods should first be decided upon by the attending physician.—Youth's companion.

CURE FOR INSOMNIA.

Medical men are now ordering the use of hot water internally and externally as a cure for insomnia. Before going to bed, the persons so afflicted should bathe the feet in water as hot as possible. This is for the purpose of drawing the blood from the head, for when the blood-vessels are inflated they press against the skull, and fears, apprehensions, and dread of going to sleep result. But with the hot water application the blood is circulated and the pressure relieved.

CURE FOR INDIGESTION.

Dandelion tea is made as follows, and it is used as a tonic and to cure indigestion. Take the roots of six or eight dandelions. Having cut off the leaves, wash and scrape the roots, cut them into short pieces, pour over a pint of boiling water, let it stand for twelve hours, then strain through muslin, and it is fit for use. Dose: A wineglassful. Make a fresh supply every three days.

JAPAN AND THE EAST.

Japan's success with its war with Russia has influenced the Emir of Afghanistan to make a detailed study of the literature dealing with that conflict. An Indian paper comments: "There can be no doubt that the astonishing results shown by Japan have electrified the east. The Mussulman no less than the Buddhist and the Hindoo feels that Japan has indicated to him the possibilities of the power which is latent in the east. The Emir is bound to convince Russia that he is a power to be reckoned with."

QUAINT WEDDING CUSTOM.

At Eglingham, Northumberland, England, a quaint wedding custom, which has been in existence for hundreds of years, still prevails. At a recent wedding in the parish church after the ceremony the newly-married couple found that a bench had been drawn across the doorway. Over this bench the bride and bridegroom were compelled to jump before they could leave the sacred building.

The difficulty was to find dry tinder. Naturally it was very tender to absorb moisture, and when allowed to become damp the difficulty of obtaining a light in the morning was great. To avoid this trouble the tinder box was usually kept in a specially dry place. Often there was a small niche made on purpose in the brickwork at the back of the large open hearth place. Often the box was placed in the evening on the hearth, close to the fire, and at bedtime was carried up stairs, warm and dry, and placed beneath the pillow.

SAVING A COMRADE.

A Little Flock of Terns Rescued a Wounded Companion.

Stories of affection and apparent reason among wild animals have divided the "nature-writers" into two schools. One believes that animals act merely from instinct; the other holds that the dumb brute feels and reasons. In "The Life of a Scotch Naturalist" Mr. Smiles quotes from the journal of Thomas Edward the story of how a little flock of terns rescued a wounded companion which the naturalist had shot.

I fired, and he came down with a broken wing, screaming as he fell into the water. The report of the gun, together with his cries, brought together the party he had left, in order that they might ascertain the cause of the alarm.

After surveying their wounded brother round and round, as he was drifting unwittingly toward the shore with the flowing tide, they came flying in a body to the spot where I stood, and rent the air with their screams. These they continued to utter, regardless of their own individual safety, until I began to make preparations for receiving the approaching bird. I could already see that it was a beautiful adult specimen, and I expected in a few moments to have it in my possession, since I was not very far from the water's edge.

While matters were in this position I beheld, to my utter astonishment, two of the unwounded terns take hold of their disalred comrade, one at each wing, lift him out of the water and bear him out seaward. They were followed by two other birds.

After having carried him six or seven yards they let him gently down again, and the two who had hitherto been inactive took him up.

In this way they continued to carry him alternately until they had conveyed him to a rock at a considerable distance, upon which they landed him in safety.

I made toward the rock, wishing to obtain the prize which had been so unceremoniously snatched from my grasp. I was observed, however, by the terns, and instead of four, I had in a short time a whole swarm about me. On my near approach to the rock I once more beheld two of them take hold of the wounded bird as they had done before, and bear him out to sea in triumph, far beyond my reach.

LIGHT AND ENERGY.

Statistics showing the enormous waste of energy involved in the production of artificial light are always interesting, if for no other reason than that they must continually stimulate inventors in the search for better methods. Sir James Dewar recently presented these figures before the Royal Institution of Great Britain: In an ordinary candle the total amount of energy transformed into light is only 2 per cent. Oil and gas lamps are not more economical. The incandescent electric lamp utilizes 3 per cent. of the energy expended; the arc light 10 per cent., and the magnesium light 15 per cent. Then comes the glowworm and mocks us with its 90 per cent. of expended energy turned into light.

means simply to write down, to register.

2. When Quirinius was governor of Syria—Quirinius is the Latin form of the name, while Cyrenius (which occurs in the King James Version) is the corresponding Greek form. Outside of our lesson narrative there is no record of this first governorship and enrollment of Quirinius. From secular history we know that ten years later (A. D. 6) Quirinius was (probably a second time) governor of Syria, and that he, during this second administration, ordered a similar enrollment. This second enrollment is also mentioned by Luke (Acts 5. 37).

3. To his own city—That is, to the city of his birth.

4. Nazareth—A small town situated in a high valley among the most southerly of the limestone hills of the Lebanon range, on the northern border of the plain of Esdraelon, in the province of Galilee.

City of David—The city in which David was born. Compare "his own city," verse 3, above.

Bethlehem—The name means literally house of bread. The town is one of the oldest in Palestine. It is mentioned in Gen. 35. 16; Ruth 1. 2; 1 Sam. 17. 12; Mic. 5. 2; and other Old Testament passages, under the name of "Ephrath" or "Ephrathah" (fruitful). Here Rachel died (Gen. 35. 16); here Ruth and Boaz dwelt (Ruth 1. 22); and here Jesse, the father of David, lived (1 Sam. 17. 12). It is located about six miles from Jerusalem to the south.

5. Betrothed to him—According to Oriental custom, the betrothal was as binding as the marriage itself (comp. Luke 1. 26-33).

7. Swaddling clothes—Swaddling means to wrap or wind; hence, swaddling clothes would be clothes wrapped about an infant. According to the custom of the East, these were wrapped tightly about the whole body of the child, confining both arms and legs.

In a manger—the inn—The stables of the khan or inn of Bethlehem were according to an old and not improbable tradition, a limestone grotto, the manger itself being actually a niche in a limestone cave.

8. Shepherds in the same country—Probably the shepherds attending the sheep kept for purposes of sacrifice in the temple. The pastures near Bethlehem were the same from which David had been summoned to be anointed king over Israel.

9. Angel—Literally, messenger.

11. Christ the Lord—The word "Christ" means literally anointed, hence, as in the margin of the Revision, "anointed Lord."

13. A multitude of the heavenly host—A large company of angels or other superhuman beings whose dwelling place was heaven. Compare Dan. 7. 10, "Ten thousand times ten thousand stood before him;" compare also Rev. 5. 11, 12.

14. Peace among men in whom he is well pleased—The promise is not of absolute, universal peace, but of constant peace to those whose lives are pleasing to God. To such the message of Christmas brings joy. The literal Greek as translated in the margin of the Revised Version is simply "men of good pleasure." Some ancient authorities, however, read peace, good pleasure among men.

19. Mary kept these sayings—Not fully understanding the significance of all that transpired, she treasured all incidents in her memory, pondering them in her heart.

MILES OF BOOKSHELVES.

The British Museum catalogue now contains over 3,860,000 entries, and is growing at the rate of 60,000 a year. The library contains forty-three miles of shelves. Every year 276,000 numbers of newspapers and about 53,000 books are received under the Copyright Act, 10,000 are added to the collection. Annually presented, and about 30,080 volumes, chiefly of contemporary foreign literature, are purchased.

Sudden Death

Very sudden indeed was the death of Mr. John D. Quick on Thursday morning. After a few days illness with pneumonia. Deceased was a well known and popular young man, well known in Napanee and vicinity having been in the apple business for the past four years. and was well liked by all with whom he came in contact. The funeral takes place to-day, services in western Methodist Church and thence to the Eastern cemetery. Deceased was a little over twenty five years of age and leaves a young widow and small child to mourn his untimely demise.

Mrs. C. H. Finkle
with violin obligato by Mr. F. G. Miller
10. Organ Solo.....Mrs. Cairns Smith

Did Jos. Saad Wound Himself?

The Toronto detective department may be able to furnish a valuable suggestion in the case of the young farm-hand from near Kingston, who is now held on the charge of assaulting Joseph Saad, a Syrian peddler, who was found near Enterprise, Ont., badly wounded, supposedly with an axe, which weapon was found at the place where Saad had spent the night.

"Saad may have inflicted those wounds upon himself," suggested Sergt. Duncan to The Star. "Or he may have been in such a crazed frenzy the hired man may have had to resort to force to protect himself."

Detective Twigg stated that Saad was arrested in Toronto last summer for firing off a revolver in a most crazy fashion on the Dundas street bridge. Passerby and Saad himself were endangered. Saad worked himself into such a frenzy that he had to be taken to St. Michael's Hospital, from which he issued on July 12—going no one knew where.

"Any sane man would have come after his belongings," deduced Sergt. Duncan. "but he left his valuables, which we have here yet, \$15.54 in money, a revolver, razor, and other articles."—Toronto Star.

In regard to the statement that Joseph Saad, the Assyrian so badly assaulted near Napanee, a few years ago is wanted in Toronto on a charge of carrying concealed weapons, it is declared here that Joseph Saad was never further west than Shan-nonville, and it is said that the person referred to, his correct name being Joseph Saad. His friends here know nothing of the Samuel Yessuck referred to. The county crown attorney here heard nothing from the police authorities in Toronto in reference to this matter.

Installation of Officers.

On Thursday evening the following officers were installed for the ensuing term by the District Deputy Grand Master.

Arrested for Stealing.

Tamworth, Dec. 29.—George Thompson, of Eribsville, is charged with stealing a registered letter containing a small amount of money from the Eribsville postoffice. The authorities suspecting him, he fled to Kaladar, where he was arrested and sent back to jail here. He was brought before James Aylesworth P. M., on Tuesday, after hearing the evidence the magistrate committed him for trial and he was brought to Napanee gaol.

Thos. Newport the assailant of Geo. Saad, was further remanded for a week.

Thos. Newport the assailant of Geo. Saad, was further remanded for a week. H. M. Deroche, K.C., has charge of both cases for the crown.

Town Hall

Uncle Tom's Coming.

Manager Brisco has booked Stetson's Uncle Tom's Cabin for the Opera House and this popular company will open there on January 9th. This should be a welcome announcement to patrons of that popular playhouse as well as to the general public that love this charming old drama. It is a well-known fact that the Stetson Company is one of the best that has ever presented this great play and this season will add to its popularity with young and old, for it is even better than what it has been, if such a thing could be possible to so good a company. New features have been added the old ones given a better interpretation. The musical part of the program has been greatly increased. It is said to have the heaviest scenic equipment of any company traveling. Prices—25-35-50c.

Open 9 a.m. to 10 p.m.

East End Barber Shop.

MADOLE & WILSON.

Right Hon. Joseph Chamberlain has issued his election manifesto, in which he expounds his fiscal policy and attacks the Liberals as a "Home rule Little Englander Government."

At Montreal ten thousand Sunday School children of the Presbyterians, Methodist, Congregationalist and Baptist denominations faced the Union Jack at a New Year's demonstration and repeated the following sentence, "I promise to be loyal and true to the Union Jack and to the Empire which it represents." New Year's greetings were sent to the King.

Belleville, Ont., Jan. 2—Ernest Coughlan, a thirteen-year-old boy of this city, is believed to have been drowned in the Bay of Quinte yesterday. He was out skating on the bay, yesterday afternoon, and was using a sail which carried him along at a great speed. When last seen he was making the Prince Edward shore, on the edges of which there was open water. Enquiry all last night and this morning failed to locate the lad, and it is feared he is drowned.

NEWBURGH.

The English Church congregation held their annual tea meeting for the Sunday School children and members of the church at Finkle's Hall, Jan. 2nd. The tables were well laden with tempting dishes. The children had tea first, after tea a splendid programme was given by the children, consisting of carols, songs, recitations, violin solos and a kindergarten song by 4 girls which brought the house down. Mr. Herkimer Aylesworth kindly gave two numbers. Mrs. C. H. Finkle deserves the thanks of the parents for training the children and also Mrs. Wm. Sutton Mrs. Anson Aylesworth, Mrs. Shorey and Mrs. Adams for getting up the tea. A purse was presented to Mr. J. J. Shorey by Mrs. C. H. Finkle after a few remarks by the chairman Rev C.E.G. Radcliffe in appreciation of his services as superintendent of the Sunday School, a position he has filled so well for many years.

ton, spent a few days this week the guests
of Chief and Mrs. Graham.

The Life of a Salmon.

Salmon never eat during the spawn-
ing season. When they pass from salt
water into fresh water in search of a
nesting place they are very fat, having
stored up a food supply for the coming
months of struggle, for that is what the
spawning season always is. They
spend three or four months in fresh
water, exploring and fighting over the
places they find. Meanwhile, as they
do not eat, their alimentary canals
seem to wither up from disuse. And
when at last the spawning season is
over, the actual time, barring nest hunt-
ing, being from ten to fourteen days,
the fish are so exhausted from the
struggle, lack of food and the effort of
reproduction that death is inevitable.
The life of a salmon is spent in the
perpetuation of its kind, but to the
credit of each is an average of 5,000
eggs.—New York Herald.

The annual ball in connection with the
C.M.B.A will take place on Tuesday the
30th January, in the town hall. The best
music will be provided for the occasion.

STRATHCONA

The place has greatly changed since
the cement works has been removed.
The lime kiln and paper mill are run-
ning. The paper mill employs quite a
number. A. C. Granger with his son
Harry and family intend leaving for
Minnesota next month. Mrs. Nelson
Shannon of Melita Man., is here visit-
ing friends. Fred Card, St. Thomas,
Miss Lott and Mrs. Roy Lott visited
friends in Deseronto last week. Mr.
and Mrs. R. Shetler visited at B. Ross'
Thursday last. C. D. Hamm spent
Christmas day with his sister Mrs. R.
Briscoe Napanee. G. S. Madden was
in Napanee Tuesday. George Have-
lock was elected school trustee. Al-
bert Martin has returned after spend-
ing several months in Manitoba.

DR. C. H. WARTMAN
DENTIST.

It will be impossible for me to continue the
out of town visits, but if our friends at Yarker
and Tamworth will do me the favor of coming
to my office in Napanee, I will do my best
to please them. All work guaranteed first
class.

Collingwood Council defeated a proposal to submit a local option by-law to the people.

Liberals and Conservatives at Kingston have signed an agreement to conduct a clean election for the Legislature.

Burglars broke into the Bank of Montreal at Regina. They were disturbed by George Jucker, nightwatchman, and shot him through the leg. He returned the fire without effect and the police came and frightened the desperadoes away.

NEW EXPRESS.

\$1 per Year in advance: \$1.50 if not so paid.

DA—FRIDAY, JANUARY 12th, 1906

SELBY

The holidays passed quietly in the village. The New Year's entertainment was a grand success had a big crowd and a good time. Sleighing is very good at time of writing. Mrs. Hudgin and family have moved down to their farm east of the village and C. Gonn has bought their property in the village. Much sympathy goes out to Mr. Sexsmith and family. Mr. and Mrs. Hunt returned home after spending the holidays in Deseronto. Mrs. Sweet, we are sorry to say, is very poorly. Rev. Mr. Scott preached a fine sermon here Sunday evening. D. Vallean and family are spending the winter at home. H. Dean returned to Belleville Business College on Monday last. Visitors: R. Gibson and family at G. Vallean's; J. Wood, at A. Woods; Miss Young at E. Anderson's; Miss Ketcheson, at Rev. Mr. Duke's; Miss Breeze at L. Ballance's; J. Gonn at home.

Pocket Knives, Cutlery, Carvers, Rogers Silver plated knives, forks and spoons, guaranteed first quality.

MADOLE & WILSON.

ODESSA

On Tuesday, January 2nd, Miss Bertie Metzler entertained about fifty of her friends at a progressive party. Mr. and Mrs. Delbert Snider are moving in the village in C. Rodden's house. Two surprise parties last week, on Wednesday night at T. McConnell's, and, on Thursday at H. Bowman's, Aseltine. J. W. Clark and J. M. Pagnat addressed the members of farmers institute at the town hall on Saturday. The new council held its first meeting on Monday. R. Lampum Wilton, and R. Bennett, Odessa, were appointed auditors and Sidney W. Clark, assessor. The reeve had several applications for the township but the council refused to entertain the applications.

The team belonging to James F. Dawson took fright while standing near saw mill and ran for some distance. No serious damage was done.

Owing to Judge Price being in the registration board of Kingston, division court will be adjourned from Jan. 12th. to Jan. 29th.

The agricultural society held its annual meeting on Wednesday afternoon and elected its officers for the ensuing year.

Our young people are taking advantage of the ice on the pond these few days back.

Nickle Tea Pots and Kettles, also a good line of line of scissors and all kinds of knives cheap. Buy one for Christmas at GREY LION HARDWARE.

DENBIGH.

Considerable more than usual interest was taken by the Electors in our Municipal Elections for this year and the following gentlemen are members of the Municipal Council for Denbigh, Abinger and Ashby for 1906: John S. Lane, Esq., Reeve, and Messrs. Oscar Chaston, Wm. John, Erdman Marquardt, and Wm. Sallans, Councillors.

At the first session of the Council, held yesterday, Mr. Paul Stein was reappointed Township Clerk Messrs. Chas. Both and Emil Warlick were appointed Auditors of the Treasurers Books and Accounts, and Mr. Joseph Rahm was appointed Assessors. A grant of \$5.00 was made to the Kingston General Hospital, which was supplemented by a few personal donations from Councillors who considered that a larger grant should have been made.

Dr. J. Chant was appointed Medical Health Officer of the local Board of Health and Messrs. Milo Hall and Thos. Pringle were appointed Members of said Board. Mr. George A. Snider of Napanee has

President of York County Loan Co. Arrested.

Mr. Joseph Phillips, President of the York County Loan & Savings Company, was arrested about 5 o'clock yesterday afternoon, January 8th.

The arrest was made by local detectives, and followed upon instructions to Crown Attorney Curry by Hon. Mr. Foy, the Attorney-General. The latter's decision to order such action was the result of findings set forth in the interim report of Mr. W. H. Cross, who made an investigation for the Government of the affairs of the company.

The information on which the warrant for the arrest was issued alleges that the accused conspired, with others, whose names are unknown, "by deceit, falsehood, and fraudulent means, to defraud the public."

Under the clause of the act upon which information was made, if guilt is proven a maximum sentence of seven years may be imposed.

The sections of Mr. Cross' report which were the chief factors in leading to the decision to place Mr. Phillips under arrest are to the effect that the installment share account was grossly incorrect, the shortage appearing to be at least a million dollars, "and the published statements issued by the company were increasingly untrue each year, accompanied by similarly false returns to the Government." For this the report holds Mr. Phillips responsible, the ignorance of the other officials as to the gross misstatements "being possible, and even likely."

Stoves, Stoves, Stoves.

The largest sales in our history. We carry an assortment that cannot be beaten. MADOLE & WILSON.

EMPLOYEES BANQUETED.

Mr. W. T. Gibbard, Manager of the Gibbard Furniture Co. banqueted the Employees on the eve of his holiday trip South.

On Saturday evening the Employees of the Gibbard Furniture Company and a few friends to the number of about seventy-five were invited by Mr. W. T. Gibbard, Manager of the company, to an oyster supper at Rikley's restaurant where a tempting array of refreshments were provided. After the supper some short addresses were made by Messrs. H. Meng, who acted as Chairman, Alf Wagar, Ham Loucks, Chas. Vandervoort, Harry Fralick, employees of the Company and by Mr. M. S. Madole. Mr. John Gibbard the founder of the present business occupied the place of honor at the head of the table and though ninety-three years of age enjoyed the supper immensely and made a very neat speech. After the speeches Mr. John Baker read an address, which we give below, and presented Mr. Gibbard on behalf of the employees, with a handsome steamer trunk, dress-suit case and a pair of gold eye glasses as a small remembrance from the employees. Mr. Gibbard made a very feeling reply to the address expressing his appreciation of the gifts of the employees.

Mr. and Mrs. Gibbard left this week on their trip to California, Mexico and Florida and we hope to see them return with renewed health and benefitted by their well

A Problem For People With Even Very Sharp Eyes.

Here is a problem for people with sharp eyes: As we all know, a horse when walking or trotting advances only one leg of each pair at a time, but when galloping lifts both forefeet together and then both hind feet. Now, the question is how other animals manage this matter. The birds, of course, flap both wings together, but which birds run and which hop? We human beings "trot" when we walk and "gallop" when we swim—that is, if we are using the plain breast stroke. The dog, however, "trots" for both. Now, do the amphibious animals—the seals, otters and the rest—swim like men or like other four footed creatures?

Then there are the fish. One would rather expect that, as they move their tails from side to side, they would flap alternately with the fins, which are their hands and feet. Who can tell whether they do or not, and whether all fish at all times follow one rule? By the way, how does a frog use its "hands?" The great anatomist, E. Ray Lankester, has pointed out that, while the "thousand legs," such as our common galleymoth, advance two feet of a pair together, the centipeds, which are much like them, do exactly the opposite, and the swimming worms also alternate the stroke of each pair of paddles.

Few people can tell on which system the caterpillar manages its dozen or so legs or whether the adult insect walks, trots, paces or gallops on its six. How does the spider use eight? Altogether, this is a large field for observation. A field, too, where any one may discover new facts as yet unrecorded, and thus

IN THE SURROGATE COURT OF THE COUNTY OF LENNOX AND ADDINGTON.

In the matter of the estate of Mary Jane Madden late of the village of Newburgh in the County of Lennox and Addington, Widow, deceased.

NOTICE is hereby given pursuant to the Revised Statutes of Ontario 1897, Chapter "123" Sec. "38" and "Amending Acts" that all persons having any claims against the estate of the said Mary Jane Madden, deceased who died on or about the Second day of December, A.D. 1905, are required to send or before the FIFTEENTH DAY OF JANUARY, A.D. 1906 to send by post prepaid or to deliver to the undersigned Solicitors for George S. Madden, Executor of the said Mary Jane Madden, deceased, their names, addresses and descriptions and full particulars of their claim or claims and the nature of the security (if any) held by them duly verified.

AND NOTICE is hereby further given that after the said Fifteenth day of January, A.D. 1906 the said Executor will proceed to distribute the assets of the said estate among the persons entitled thereto, having regard only to those claims of which he shall then have had notice, and the Executor will not be liable for the assets or any part thereof to any person or persons of whose claims he shall not then have had notice.

DATED at Napanee this 13th day of December, A.D. 1905.

DEROCHÉ & DEROCHÉ,
Solicitors for the Executor.
George S. Madden.

FOR SALE—BRICK HOUSE AND Lot, in desirable locality on Bridge street also several good building lots. Apply to S. GIBSON.

NOTICE TO CREDITORS.

IN THE SURROGATE COURT OF THE COUNTY OF LENNOX AND ADDINGTON. IN THE ESTATE OF ANNIE FRANCES CLAPP, late of the Town of Napanee in the County of Lennox and Addington, Widow, deceased.

NOTICE is hereby given pursuant to It. 8. O. 1307 Chap. 123 Sec. 38 and Amending Acts, that all persons having claims against the estate of the said Annie Frances Clapp, who died on or about the 17th day of November, A.D. 1905, are required to send by post prepaid or to deliver to JOHN ENGLISH, solicitor for the Executor, on or before the 12TH DAY OF JANUARY, A.D. 1906, their names, addresses and description and a

Dr. J. Chant was appointed Medical Health Officer of the local Board of Health and Messrs. Milo Ball and Thos. Pringle were appointed Members of said Board.

Mr. George A. Snider of Napanee has been engaged as Principal of our village school, and has entered upon his arduous duties.

Mr. Thomas Ferguson died on the 6th of Dropsy and Heart Disease after a long and painful illness. The funeral took place yesterday at the Methodist Church Cemetery.

Mr. and Mrs. A. Fritsch, Mrs. Louisa Daun, and Mrs. C. Stein are visiting friend and relatives at Raglan Country.

Mrs. Emil Stein who has not been in very good health lately has come to Brookville to visit her sister, brother-in-law Mr. and Mrs. Albert Stein, and will probably remain awhile to avail herself the best medical treatment the Brookville Hospital affords.

Mr. M. Rowe who was severely injured a while ago and got his arm nearly crushed by a log rolling over him, is improving fine and will soon be able to use his arm again.

Mr. Julius Fritsch, of late a resident of Grey County has returned to the old home once more and is visiting friends and relatives here.

Blankets all weights, both nickel and plain, and one new cutter which will be sold at a bargain at

GREY LION HARDWARE.

BELL ROCK.

We have good sleighing here now and business would be booming if the crossing was good over the long bridge in the drowned land. It is time something should be done to make the road passable at all seasons of the year.

Miss Lemanon, Kin ston, was the guest of Miss Minnie Wheeler during the holidays.

Mr. Chas. G. Yorke has taken charge of the school here for another year.

Miss Stella VanVolkenburg has taken a school near Glendower for the ensuing year.

Miss Grace Pomeroy is in Kingston, this week visiting her grandmother Mrs. H. McDowell, Princess street.

Mrs. H. A. Martin will spend the winter with friends in Michigan and Wisconsin.

J. H. Amey left for the West on the 5th inst. after a short visit with his parents here.

S. B. Pomeroy spent Christmas week with friends in Tweed.

Mrs. Moore has returned from a pleasant visit with friends in Norwood.

Visitors: Mr. L. H. and Mrs. Rutan Moscow, at I. B. Wheeler's; Miss C. Yorke, of Tamworth, at J. Yorke's; Mr. F. L. and Mrs. Amey, Selby, and Mr. Ernest and Mrs. Amey, Moscow, at D. L. Amey's; Mrs. E. M. Yorke, Verona, at J. Pomeroy's; Mrs. Evans, at J. Timmons.

Rossini and Meyerbeer.

Rossini, walking one day on the boulevard with the musician Braga, was greeted by Meyerbeer, who anxiously inquired after the health of his dear Rossini. "Bad, very bad," answered the latter. "A headache, a side ache and a leg I can scarcely move." After a few moments' conversation Meyerbeer passed on, and Braga asked the great composer how it was he had suddenly become so unwell. Smilingly Rossini reassured his friend: "Oh, I couldn't be better. I only wanted to please Meyerbeer. He would be so glad to see me smash up."

The Moba in Servia.

Servian peasants help each other by means of an institution known as the moba. A man who has not hands sufficient to plow or reap his farm calls in the moba—that is to say, invites all his neighbors to come and help him. He pays nothing for this service, providing only generous supplies of food and drink; but when any of them apply for the moba it is understood that he will take his turn.

address expressing his appreciation of the gifts of the employees.

Mr. and Mrs. Gibbard left this week on their trip to California, Mexico and Florida and we hope to see them return with renewed health and benefitted by their well earned holiday.

Napanee, Jan'y. 6, 1906.

MR. W. T. GIBBARD.

For some time it has been pretty generally known that you had decided to retire yourself from the heavy strain consequent upon such a position as manager and superintendent of The Gibbard Furniture Co., by taking a well-earned and much needed rest and a trip to a southern clime. From day to day you have gone in and out among us, and while our work has not always been done without room for criticism at times, yet when such has been given you have done so in a manner becoming the dignity of your position. We have all learned to esteem you as a gentleman and a man of sterling integrity and feel that you have a kindly interest in our welfare. During your absence you may rest assured that we shall endeavor to work for the interest of the institution which to many of us has been our support for a good many years. Before you leave we could not let the opportunity pass without giving you in a tangible form some little expression of our good will. To that end we would ask you kindly to accept this dress suit case and steamer trunk, not on account of their intrinsic value but as a slight token of our esteem. We trust that you will find them useful while on your vacation. We all wish for you and Mrs. Gibbard a very pleasant trip, and trust that you both may have the protection of Him, in whose hand are the wind and the wave, and that you may return to us refreshed and rejuvenated. Signed on behalf of the employees.

H. MENO,
H. E. FRALICK,
A. C. BAKER.

Relief at Last.

To all sufferers from Asthma, bronchitis, &c we have no hesitancy in recommending the new remedy, Taft's Asthmalene. It is working wonders with the hardest cases. Trial size 80 cents Regular size \$1.50 at the Medical Hall. Fred L. Hooper.

The Tweed stage was struck by a train at Bellville and part of it carried away. William Perry, the driver escaped unhurt but both horses were killed.

The succession duties received by the Provincial Government last year will total about \$700,000.

Mr. Chamberlain, speaking at Birmingham, made a direct appeal to the trades unions to support his fiscal schemes.

Tuck's Rheumatic Bone Oil

Is one of the best remedies that any family has, but there are often sudden and acute attacks of some painful disease that require immediate treatment, such,

The Family for instance, as rheumatism, Doctor neuralgia, lame back, etc.

Tuck's Rheumatic Bone Oil makes the calling of the doctor unnecessary. It will give relief before he could answer the call, and if faithfully used will cure the most stubborn attacks of rheumatism, neuralgia, lumbago, pain in the chest or back, soreness, sprains or strains. It is a powerful, penetrating oil that goes straight to the seat of the trouble and roots out the cause. It relaxes the stiffened joints, soothes the affected part and allays the inflammation which causes the torturing pain. It is therefore a valuable remedy not only for rheumatism and kindred diseases, but it is equally good for croup, bronchitis and quinsy. One father writes that it cured his child of a violent attack of croup in five minutes. A mother writes that her boy was subject to quinsy and two or three times each year was confined to his bed and could not speak. When threatened with another attack this fall she rubbed his throat and chest with the Bone Oil and by three applications warded off the attack. The wonderful curative powers of this remarkable remedy are being talked about by everyone. A bottle should be in every home. For sale by all medicine dealers at 50c. a bottle or will be sent prepaid on receipt of 50c. by The Tuck Bone Oil Co., Limited, Smith Falls. Money refunded if not satisfied.

trots, paces or gallops on its six. How does the spider use eight? Altogether, this is a large field for observation. A field, too, where any one may discover new facts as yet unrecorded, and thus add to the store of knowledge.

The Breathing Earth.

That the earth breathes is a well known scientific fact. It is often to be verified by that peculiar earthy smell which arises immediately after a thunderstorm, the lowering of the barometric pressure causing the flow upward of air, just as it is once more squeezed downward when the barometer rises. A resident of Geneva discovered a natural barometer at Ferney-Voltaire. It is a deep natural well or cave with a very small opening. When this opening is made small enough just to fit a whistle the different sounds as the earth inhales or exhales the air warn the neighbors of the coming weather. A lighted match or a feather shows the direction of the flow as well. It is said to be an excellent weather prophet.

The "Man Eater."

Lower California is the home of a species of lizard which appears to be at least a second cousin of the famed "Gila monster." It is of a mottled yellow and brown color and only about fifteen inches long. The natives of that region have given it the terrible name of "man eater," because it has a habit of attacking every human being it sees, going at one open mouthed, but does not appear to mind either wild or domestic animals. The man eater's body is almost as brittle as that of the mythical "joint snake."

the said Annie Frances Clapp, who died on or about the 17th day of November, A. D. 1905, are required to send by post prepaid or to deliver to JOHN ENGLISH, solicitor for the Executors, on or before the

12TH DAY OF JANUARY, A. D. 1906, their names, addresses and description and a full statement of particulars of their claims and the nature of the security (if any) held by them duly certified, and that after the said day the Executors will proceed to distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which they shall then have notice.

SEEMED TO HAVE HIM CORNERED.

The teacher was discoursing to the class on the wonders of nature. "Take the familiar illustration of the sting of a wasp," he said, "as compared with the finest needle. When examined through a microscope the sting is still sharp, smooth and polished, while the needle appears blunt and rough.

"It is so with everything. The works of nature are infinitely superior to those of art. Try how we may, we cannot improve on nature."

"It isn't so with my eyes, teacher," said a little girl in the class.

"Why, how is that, Nellie?" he asked.

"Cause nature made me cross-eyed," she said, "and the doctors fixed my eyes all right."

PATHETIC LITTLE DOLLS.

Some of the Indian women have a very pathetic custom. When an Indian girl dies her mother often substitutes a doll for the lost little one. She fills the empty cradle with feathers arranged in the form of a child, and carries this about as she did her child, crooning to it and caressing it. Sometimes, instead of doing this, she ties the clothes, toys, and other articles belonging to the little one and, fastening them to the cradle board, carries it as she originally did her child. The Jibways call these "unlucky dolls," because they represent the dead; but the Indian woman's idea is that the little dead child is too small to find its way to Paradise, and that by substituting the doll she will assist it to get there.

Holloway's Corn Cure destroys all kinds of corns and warts, root and branch. Who, then, would endure them with such a cheap and effectual remedy within reach?

His Mother: "What are you moping about the house for, Tommy? Why don't you go over and play with Charley Pinafore?" Tommy: "Cause I played with Charley Pinafore yesterday, and I don't s'pose he's well enough yet."

Much distress and sickness in children is caused by worms. Mother Graves' Worm Exterminator gives relief by removing the cause. Give it a trial and be convinced.

Lady Visitor: "That new girl of yours seems very nice and quiet." Mistress of the House: "Yes, she's very quiet. She doesn't even disturb the dust when she's cleaning the room."

That Tormenting Cold that made you wretched will not come back if you take Allen's Lung Balm when your throat is raw and sore. This admirable remedy is free from opium. Take it in time.

CAUSE FOR THANKFULNESS.

He—Do you believe that love is a disease?

She—Yes; but thank goodness, it is one that we can have more than once.

60 Specialists on the Case.—In the ordinary run of medical practice a greater number than this have treated cases

ON MANGHURIAN FIELDS

TERRIBLE STORY OF WOLFISH APETITE.

Russian Soldiers Suffered Agonies From Cold and Hunger.

Mr. E. J. Dillon, in Harper's Weekly, thus describes some of the horrors which attended the war in Manchuria: "People who have not witnessed the horrors of actual warfare—and the present campaign is in many respects worse than the struggles of former days—cannot realize the fate that awaits the unfortunate men who are thus condemned without appeal to die. Death pure and simple would be a boon as compared with the destiny in store for them.

THE FIRST DECIMATION.

"From the day on which they take their places in the railway cars their ordeal commences. Cooped up like sardines in a tin box, they have too little room, too little air, too little food, too little exercise, too little heat in winter, too much in summer. They are not as well off as the cavalry horses in the wagons next their own. Fatigued, cramped, weak, emaciated, they are whirled through Siberia, and dumped at some little station in Manchuria, where no preparations have been made for them. Hungry and thirsty, they have then to march for miles and miles in a strange and difficult country, they know not whither or wherefore. All at once, without a word of warning, they are decimated by a slanting hail of bullets, which seemingly come from nowhere. They cannot reply, for there is no indication of the enemy's position.

DOWN IN THE SNOW.

"After that baptism of fire the real horrors of war begin. Marches under a scorching sun until the boots drop off in shreds, the feet are swollen and lacerated, the tongue is parched and black, and the brain swimming with incipient madness. Or else it is winter, when the toes, the ears, the nose, and it may be the cheeks, are frost-bitten and disfigured forever, and when every snow-heap exerts a weird fascination over the jaded and drowsy soldier, who often flings himself surreptitiously upon one and enters upon his long and last sleep.

HORRID HUNGER.

"But hunger and thirst are the two awe-inspiring demons of war whose victims are more to be pitied even than Ugolino in his hunger tower. I have heard of soldiers who, to quench their maddening thirst as they lay wounded on the millet-fields of Manchuria, drank human blood. I could, if needs were, name some who came back from the war to their native village inviolated, and whose experience has been even still more horrible. 'We lay helpless in the fields like children, covered by the millet grass. My leg was as stiff as a board. We were fiercely hungry, like wolves—human wolves. We would have eaten refuse had there been any at hand. But there was nothing. Every now and then we cast

THE HEIR OF SANTLEIGH

OR
THE STEWARD'S SON

CHAPTER XXVIII.

The hall porter tore off for a doctor, and Berton knelt beside the stricken old man with a feeling of devout thankfulness.

He had narrowly escaped committing a second murder!

He was also extremely grateful to the luck which seemed to stand by him through thick and thin.

For the first time in his life he had been hurried by passion into making a great mistake; he had shown his hand too soon, and but for this sudden attack, would have had to leave the house, would have been kicked out, so, to speak, and been beaten in the game he had played so carefully! But now the old man lay helpless, powerless, smitten, doubtless, to death, and Guildford Berton was saved from the consequences of his rashness.

We are told that the devil looks after his own, and Guildford Berton at that moment believed in the superstition up to the hilt.

In a few moments the room was full of frightened servants, and between them they carried the earl to his room.

"Be quiet!" said Berton, hoarsely. "Lady Norah must not be alarmed on any account," and he made them walk on tiptoe past her bedroom door.

But, quiet as they were, Norah heard them. She had not gone to bed, but had dismissed Harman, and was sitting wrapped in her dressing gown and lost in thought. She was thinking not only of Cyril, but of what Lady Ferndale had said—"your Guildford Berton. The pronoun haunted her. She heard the passing footsteps, and opening her door, saw the still form carried past. For a moment she stood with her hand on her heart, then she sprang forward, with a low cry. Guildford Berton held up his hand and turned his white face to her.

"Don't be alarmed. He will be all right."

Norah passed him, and threw herself beside the bed on which they had laid the earl, and took his hand.

She could not speak, could not even ask what had happened to him, but knelt, white and silent, and overwhelmed.

Berton bent over her, and in answer to the dumb question in her terrified eyes, said:

"He has had a fit. Pray, pray, don't be frightened. I have sent for the doctor. He will get better."

She turned her face from him, even at that moment with instinctive repulsion, and clung to the thin, limp hand, and "Papa, papa!" dropped from her white lips.

"Take her away, persuade her to go!" whispered Berton to Harman, huskily; but Norah heard him, and shook her head.

"No, no! I will, I must stay! Oh, papa, papa!" and the tears rushed to her eyes and she hid her face upon her arm.

Harman sent the terrified servants out of the room, and kneeling beside Norah, begged her to go, but Norah raised her head and shook it.

The outburst of grief over, she was calm and collected again, though she was trembling in every limb; and Guildford Berton left the room and waited outside.

The doctor came and examined the

"Please tell me what is to be done. I am staying in the house, and will see that your instructions are carried out."

The doctor inclined his head and went upstairs again, and Berton followed him.

Norah was still kneeling beside the bed, the earl's hand fast clasped in hers, and she looked up eagerly as the doctor entered.

"What is it?" whispered the doctor.

"I—I think he moved!" said Norah almost inaudibly.

Even as she spoke, the old man stirred and opened his eyes. They wandered vacantly round the room for a moment, then, as they fell upon her face, a gleam of something like intelligence came into them, and his lips moved.

Guildford Berton, standing at the foot of the bed, felt a sudden thrill of fear. Was the old man coming to his senses? Would he be able to speak the truth, and expose him?

The earl looked at her piteously, and then, as he caught sight of Guildford Berton's face, his eyes seemed to flash and he looked from him to Norah, and his lips moved.

"It is something he wants to tell me," she murmured. "Oh, what is it, what is it? Papa, papa! It is I—Norah! Speak to me."

The doctor did not interfere, and she bent lower, until her face was close to the old man's lips.

The piteous, imploring look in her eyes grew more intense, and at last a sound came from his lips.

"Yes, papa!" panted Norah.

With a great effort he gasped:

"Scoundrel! Scoundrel! Don't—"

Then a vacant smile played over his face and he wandered off.

"My daughter, your ladyship! My daughter. Beautiful! Yes. Her mother—"

Then his eyes closed, and the face seemed to fall back into deathlike rigidity.

Guildford Berton almost uttered a cry of thanksgiving.

"He is delirious," he said, sorrowfully.

Norah with a moan, hid her face, and the doctor laid his hand upon her shoulder.

"You must bear up, Lady Norah," he said, gently. "I am not sure that he is quite unconscious, and—"

"Yes, yes, let me stay!" she pleaded, piteously. "I will not let him see, I will not distress him. You will let me stay with him?"

"She must stay," he said to Guildford Berton, in an undertone, but Norah heard him and murmured her gratitude. "Better send for a nurse, and Lady Norah can remain and assist her."

Guildford Berton went downstairs and dispatched a servant to one of the hospitals, then flung himself into the chair from which the earl had fallen, and covering his eyes with his hands, thought deeply.

The earl might die, but if he lived, it was scarcely probable that he would regain the full use of his senses. In either case he, Guildford Berton, was safe and secure.

But if he died, how would Lady Norah stand? She was to be his wife, and he had a right to inquire, he told himself, and his eyes wandered to the small iron deed box which always accompanied the earl.

It would contain either the will itself or a copy of it. He must see

She—Yes; but thank goodness, it is one that we can have more than once.

60 Specialists on the Case.—In the ordinary run of medical practice a greater number than this have treated cases of chronic dyspepsia and have failed to cure—but Dr. Von Stan's Pineapple Tablets (60 in a box at 35 cents cost) have made the cure, giving relief in one day. These little "specialists" have proven their real merit.—72

"Do you think that music is of any practical benefit in life?" "Well," answered Miss Cayenne, "judging from the photographs of eminent violinists, it must keep the hair from falling out."

Weak and Pale Women foolishly keep this way when by the use of "Ferrovin," the best tonic, they could very quickly recover their health and strength. Try it.

Winkle: "After all, the first year of married life is the most unhappy, don't you think?" Tod: "Oh, yes! It takes about that time for a man to learn how to conceal things from his wife."

Tested by Time.—In his justly-celebrated Pills Dr. Parmelee has given to the world one of the most unique medicines offered to the public in late years. Prepared to meet the want for a pill which could be taken without nausea, and that would purge without harm, it has met all requirements in that direction, and it is in general use not only because of these two qualities, but because it is known to possess alternative and curative powers which place it in the front rank of medicines.

"Is it true," asked the caller, "that your husband ordered Dr. Smoother out of the house?" "Yes," Bone Jack had been carrying the baby all night and every night for a week, and was run down to a thread. I called the doctor, and he told Jack that he must take more exercise."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

"Gentlemen of the jury," queried the clerk of the court, "have you fully agreed to disagree?" "We have," answered the foreman. "The lawyers have bungled the case up so that we don't know any more about it than they do!"

RHEUMATISM AND PARALYSIS.

Their complete home cure. Post free to readers of this paper. For limited period only.

A handsome illustrated treatise giving full description of Rheumatism and Paralysis, with instructions for a complete home cure, describing the most successful treatment in the world, recommended by the Ministry and endorsed by medical men. This valuable instructive book was written by W. H. Wingo, a gentleman who has made a study of these diseases. The preface is by a graduate of the University of Wurzburg. Send postal order today, and you will receive the book free by return.—Address, The Vero Drug Co., 24 King St., West, Toronto.

TIME OF A WINK.

By pasting a bit of paper upon the eyelid a photographic record has been made of the duration of time required in winking the eye. It has been found that a wink requires one-third of a second.

covered by the millet grass. My leg was as stiff as a board. We were fiercely hungry, like wolves—human wolves. We would have eaten refuse had there been any at hand. But there was nothing. Every now and then we cast hungry looks at our dead comrades, and then we gazed at each other. We spoke with our eyes. We agreed with our eyes to commit a heinous crime. All the talk was done by evil glances. I can't say how, but we understood each other perfectly. And then—then we did it!

"I break off the gruesome narrative here. It was poignantly realistic. Every detail burned itself into the souls of the invalid's artless hearers. They saw the whole sickening picture rise up in all its ghastliness before their eyes. It filled them with horror."

SENTENCE SERMONS.

Faith's fervor is more than effectiveness.

The lights of the world are not advertising signs.

He knows no good who boasts he does no harm.

Losing the temper takes the edge off any argument.

He can easily be fearless who dare not make foes.

Sow the seed and you reap only grit in your teeth.

Love's music is never perfect without the chords of pain.

Obstacle is often only another way of spelling opportunity.

No man ever broke his back under his brother's burden.

You are not likely to slay the enemy by drawing a long bow.

A niggardly purse in the pocket becomes a thorn in the side.

Many a man mistakes a floating indebtedness for a sinking fund.

Tears over to-day's broken toys blind us to to-morrow's treasures.

Many a man thinks he is mellowing when he is only getting molty.

You cannot cure your sorrows by taking them out in a wheel chair.

The fear of reputation is often taken for the love of righteousness.

He who has a good word for no one cannot have the word of God for any one.

Many a man thinks he is virtuous because he feels vicious when he sees others happy.

The reason some are not wedded to one bad habit is because they are counting so many.

When folks get to fighting over creed the enemy takes his forces to another part of the field.

When you have to do with those who are blatantly honest it is time to buy more padlocks.

The next best thing to the opportunity to take a college course is the ability to forget most of it.

Cheerfulness is a virtue hard to practice when you persist in indulgence in late suppers and manufactured "happiness."

It would be wrong to send some people to heaven; they would miss so much the chance to worry over the wildness of their neighbor's children.

CURIOUS FLOWERS.

The Chinese, Japanese, and Siamese are particularly skillful at botanical feats. One of their wonderful achievements is known as the "changeable rose." This bloom is white in the shade and red in the sunlight. At night or in a dark room this curiosity of the rose family is a pure, waxy white blossom. When transferred to the open air the transformation immediately commences—the time of the entire change of the flower from white to red depending on the degree of sunlight and warmth. First the petals take on a kind of washed or faded blue color, and rapidly change to a faint blush of pink. The pink gradually deepens in hue until the lily-white rose of an hour before is as red as the reddest peony that ever bloomed.

outburst of grief over, she was calm and collected again, though she was trembling in every limb; and Guildford Berton left the room and waited outside.

The doctor came and examined the stricken man with the professional, leisurely gravity which carries so much weight. They had got the earl into bed, and he lay, apparently, unconscious and as like death as life can be.

"Is—he very ill? What is it?" asked Norah.

The physician dropped his eyelids in the way a doctor has when he does not mean to tell the whole truth.

"The earl has had a fit, Lady Norah," he said. "Yes, he is very ill; but do not be alarmed. There is always hope, always. Do not distress yourself. Were you with him when—"

Norah shook her head and glanced at Guildford Berton, who stood, white and anxious, at the foot of the bed.

The doctor nodded, and after a while motioned to Guildford Berton to follow him out of the room.

They went down to the library. "It is paralysis?" said Guildford Berton.

"You were with the earl when the attack occurred?" he said. "Was there any sudden shock—excitement?"

"None whatever," replied Guildford Berton, quietly. "I had come in from the theatre and found him sitting here, in that chair. He was given to sitting up late, reading and writing."

The doctor nodded, and wrote.

"We talked about one thing and another—ordinary topics, and not in any way exciting."

"You are sure of that?" interrupted the doctor.

"Of course. I could repeat almost every word," answered Berton glibly.

"I had said something that made him laugh—but not heartily or excitedly—and a moment after he fell forward."

"Strange," said the doctor. These attacks generally follow upon great excitement or display of passion.

There are certain signs which indicate the usual cause, too—hem!"

"Is it a bad attack?" asked Guildford Berton, sorrowfully.

"Yes, it is."

"And—do you think he will die?" his heart beating quickly.

"I do not say that," replied the doctor, gravely. "The earl is an old man, his age is against him, but on the other hand he has led a remarkably quiet life of late, has he not?"

"Yes, I can say that positively," said Guildford Berton. "I may tell you that I am his most intimate friend, and acquainted with his habits. A very quiet life."

"That's in his favor. He may live for some time."

"But he will not recover from his paralysis?"

"It is scarcely probable."

The doctor wrote a prescription.

"Send for this please," he said. "I will remain here for the present. The young lady is Lady Norah, I presume? Hem, yes, the earl's daughter. There is no son, I believe?"

He was a fashionable physician, and had the peerage by heart.

"No a nephew," replied Berton, fully understanding the purport of the question.

"Yes, the Viscount Santeleigh. I think it would be well to send for him in case of accident."

"That is easier said than done, doctor," he said. "Lord Santeleigh's whereabouts are not known."

"Then they should be discovered without loss of time. Mind, I don't say that there is any immediate danger, but—"

"I understand. I will do my utmost to find him; but, as you may be aware, the earl and he have not met—"

"I have heard something of it," said the doctor. "But surely there can be little difficulty in finding him! Meanwhile—"

wine, and he had a right to inquire, he told himself, and his eyes wandered to the small iron deed box which always accompanied the earl.

It would contain either the will itself or a copy of it. He must see that at any cost.

He sat staring at the box, and turning over possibilities in his eager mind until he heard the doctor coming down the stairs, and he rose and met him.

"He is still the same. I don't think I can do any more to-night, Mr. Berton; you can send for me if there should be any change, which I do not anticipate, however. I need scarcely say, that perfect quietude and an absence of all disturbing influences, etc. I am sorry that Lord Santeleigh is not here."

"He shall be found. I do hope there is some chance for my old friend!" and he turned away and passed his hand over his eyes.

"There is a chance of his living, but I fear, I very much fear, that he will never regain the power of speech—that is, intelligent speech. Of course, there is no need to apprise Lady Norah of this mournful fact, yet a while."

Guildford Berton let him out, and then returning to the library, softly locked the door and got down the deed box. It was locked and the key was in the earl's pocket. He stood for a moment irresolute. A sharp blow with the poker would smash the lock, no doubt, but the lawyers might ask disagreeable questions.

He set the box in its position and stole upstairs. The earl's valet was standing outside the door in readiness, in case he should be wanted, and he stood aside to let Berton pass.

"No, I won't go in just yet, La-farge," he said, softly. "It is not well to have too many in the room. By the way, I think I should remove his lordship's clothes from the room. The sight of them might disturb him. You know his love of neatness."

The man was too bewildered and overcome to feel surprised, but timidly went in on tiptoe and gathered the clothes from the chair on which they had been thrown.

"Give them to me; I will take them to the dressing-room," said Guildford Berton. "You had better not leave your post, in case you may be wanted."

"Yes, sir, thank you," said the valet, and Berton carried the clothes to the dressing-room. The keys were in the coat pocket, and he carried them downstairs into the library. His hand shook as he unlocked the box and turned out the papers, and his heart leaped as he found among them one indorsed:

"My last will and testament."

It was on an ordinary sheet of foolscap, and written in the earl's small, neat—not to say snickling—hand, and Berton made himself comfortable in the easy-chair and read it carefully.

His own name, after that of the old servants to whom legacies were bequeathed, occurred first, and the small handwriting jumped up and down before his eyes. Then he laughed with bitter cynicism. The earl had left him only a favorite watch and chain, "as a mark of my esteem and regard."

A watch and chain for all the years of patient service and endurance! Then came the important clause.

"And the remainder of all that I possess, or have power to bequeath, I will to my daughter—"

Strange to say, a blank occurred where the name should have been written.

He puzzled over this singular fact for some minutes, then turned to the date, and hit upon the solution. The earl had made the will soon after Norah's arrival at the Court, and he had not known with any certainty whether she had been christened any other name in addition to Norah.

Doubtless he had intended to ask and fill in the space, but he must have forgotten it—or being too proud to ask the question, had put it on

from day to day, and left the space blank.

Guildford Barton held the will in his hand, thinking almost painfully. He had no great liking for forgery, but he would not have hesitated to manufacture a new will leaving everything to himself, if he had thought it politic to do so. But forgery is, in a sense, more risky even than murder, and he shook his head.

Besides, what need to alter the will, seeing that Norah, to whom all was left, would certainly be his wife? For at that moment he felt assured of his ultimate success than he had ever done. Fate had stood by him with persistence almost miraculous, and his luck would remain with him to the end.

He put the will back, and the deed box in its place, and leaning back, gave himself up to the luxury of anticipation.

If he could only have the titles, as well as Norah and the earl's money! Or the Court! But they must both go to the wandering vagabond of a nephew—the Viscount Santsleigh, who was no one knew where!

"Perhaps he might be persuaded to sell his birthright even now, and the knowledge of the earl's illness could be kept from him," he thought; and at the mere thought that he, Guildford Barton, might some day reign and rule in the great house at which his father was steward, his blood grew warm and his heart beat pleasantly.

At any rate, Norah—his future wife—would be one of the wealthiest women in England. The earl could not make another will, and he, Guildford Barton, would take care the existing one should not be destroyed.

Altogether, he spent a pleasant hour or two, while Norah upstairs sat holding the unconscious hand of the stricken earl.

(To be Continued.)

NAVAL OFFICERS STEAL

JAPANESE GOVERNMENT IMPOSE PENALTIES.

Paymaster Goes Down for Eleven Years — Lighter Punishment on Others.

A recent issue of the China Post, of Hong Kong, published an article stating that the Japanese Government has begun action against thieves in the navy.

Naval Paymaster Inspector Kaki in October 28th, 1904, was sentenced to seven years' imprisonment with labor by the Tokio naval court-martial on the charge of peculation. Paymaster Kaki during his visit to Sasebo from the 5th to the 16th of October, and while serving at a certain naval base as chief paymaster, embezzled 34,000 yen of Government money in his charge.

GOT ELEVEN YEARS.

Naval Paymaster Inspector Takeuchi Jujiro on July 21st, 1905, was sentenced to eleven years' imprisonment with labor by the Tokio naval court-martial on charges of manipulating official documents and peculation. While in London in 1902 as paymaster in connection with the construction of ships and armaments this officer, in concert with Paymaster Inspector Kaki of the Takasago, appropriated to his own use 113,000 yen of Government money between June and the 20th of October, 1902. He also embezzled a certain sum in his charge, resulting in defalcations to the extent of 335,512 yen.

Naval Paymaster Sakuma was sentenced to two years' imprisonment with labor. While serving at the Maizuru naval arsenal stores and when in Tokio early in December, 1903, Paymaster Sakuma speculated in rice and stocks through brokers of the Tokio Rice and Stock Exchanges in concert with Paymaster

HE'S ONLY ONE OUT OF SCORES

BUT DODD'S KIDNEY PILLS MADE HIM A NEW MAN.

Richard Quirk Doctored for a Dozen Years and Thought His Case incurable—Dodd's Kidney Pills Cured Him.

Fortune Harbor, Nfld., Jan. 1.—(Special).—Scores of people in this neighborhood are living proofs that Dodd's Kidney Pills cure all Kidney ailments from Backache to Bright's Disease. Among the most remarkable cures is that of Mr. Richard Quirk, and he gives the story of it to the public as follows:

"I suffered for over twenty years from Lumbago and Kidney Disease, and at intervals was totally unable to work. After ten or twelve years of doctor's treatment, I had made up my mind that my complaint was incurable. Reading of cures by Dodd's Kidney Pills tempted me to try them. I did so with little faith, but to my great surprise I had not taken more than half a box before I felt relief, and after the use of seven or eight boxes, I was fully cured and a new man."

"Yes, Dodd's Kidney Pills cured my Lumbago and Kidney Disease, and the best of it is I have stayed cured."

One of the London police courts a young hooligan was charged with assaulting an elderly man. The magistrate, noticing an old offender in the hooligan, thought he would give him a little fatherly advice, and remarked, "Young man, I'm surprised at a big, strong, healthy-looking fellow like you always getting into trouble. You seem to be continually wanting to fight. Why don't you go for a soldier?" A smile illuminated the magistrate's face when the youth replied, "I did once, your worship, and he nearly killed me!"

20 Years of Vile Catarrh.—Chas. O. Brown, journalist of Duluth, Minn., writes: "I have been a sufferer from Throat and Nasal Catarrh for over 20 years, during which time my head has been stopped up and my condition truly miserable. Within 15 minutes after using Dr. Agnew's Catarrhal Powder I obtained relief. Three bottles have almost, if not entirely, cured me." 50c-73

THE OTHER ONES.

"Come, now," said mamma, who had taken the children for a walk through the Zoo, "let's go home and see papa." "Oh, no," protested Elsie, "let's see these other monkeys first."

Its Power Grows with Age.—How many medicines loudly blazoned as panaceas for all human ills have come and gone since Dr. Thomas' Electric Oil was first put upon the market? Yet it remains, doing more good to humanity than many a preparation more highly valued and extending its virtues wider and wider and in a larger circle every year. It is the medicine of the masses.

KOREAN IS A FOP.

Dress is the Greatest Ambition of His Life.

The Korean is above everything else a man of the drawing room and all his instincts move along the leisurely ways of life. Anything like haste or "on presenment" is unknown to the eternal laws that govern him. This characteristic of his is evident in all his actions at all times and under all conceivable circumstances. Being a drawing room gentleman, dress is the great ambition of his life. From the shoes of his feet to the topknot on the top of his head he is ordered so as to be seen and admired of men.

His shoes during this year of mourn-

sentenced to two years imprisonment with labor. While serving at the Maizuru naval arsenal stores and when in Tokio early in December, 1903, Paymaster Sakuma speculated in rice and stocks through brokers of the Tokio Rice and Stock Exchanges in concert with Paymaster Inspector Kaki, then in Tokio, and lost 10,046 yen of Government money.

SIX YEARS FOR PAYMASTER.

Paymaster Kikumuru was sentenced to six years' imprisonment with labor. This officer, while serving on the Asahi, stole 456 yen of Government money.

Lieutenant Makomoto was sentenced to four months' imprisonment with labor on the charge of theft. He stole 40 yen from the kit-bags of officers.

It is announced that Paymaster Inspector Takeuchi, whose defalcations while in London amounted altogether to 33,512 yen, absconded in November last, and his whereabouts is at present unknown.

THE OTHER ONES.

For Thin Babies

Fat is of great account to a baby; that is why babies are fat. If your baby is scrawny, Scott's Emulsion is what he wants. The healthy baby stores as fat what it does not need immediately for bone and muscle. Fat babies are happy; they do not cry; they are rich; their fat is laid up for time of need. They are happy because they are comfortable. The fat surrounds their little nerves and cushions them. When they are scrawny those nerves are hurt at every ungentle touch. They delight in Scott's Emulsion. It is as sweet as wholesome to them.

Send for free sample.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

at an times under an conceivable circumstances. Being a drawing room gentleman, dress is the great ambition of his life. From the shoes of his feet to the topknot on the top of his head he is ordered so as to be seen and admired of men.

His shoes during this year of mourning must be spotlessly white. No atom of dust or fly speck shall mar them. His socks beautifully pulled, are stitched to perfection, his pantaloons, big enough for a Broddingnag, are padded, quilted and ironed until they come forth looking like some mysterious fabric of polished marble, his jacket likewise and his overcoat and wristlets.

Not only has he a headband, a topknot and a hat on his head, but he buys a pair of spectacles and adds them to his already overcharged headgear, and thus rigged, with a ring on his finger and a fan in his hand, he goes forth to make his way through this troubled world.

UNANIMOUS.

The late Lord Leighton, president of the Royal Academy, once had a chance to learn something about himself that perhaps he had not suspected. His chance came to him at a picture-gallery, where his painting, "Helen of Troy," was on exhibition. He joined a group of ladies who were standing before it just in time to hear one of the number say: "It is a horrid picture, simply horrid."

"I'm sorry, but it's mine!" Lord Leighton exclaimed, involuntarily. "You don't mean to say you've bought the thing?" questioned the same lady.

"No, I—painted it," the artist numbly replied.

The critical lady was momentarily abashed; then she said, easily: "Oh, you mustn't mind what I say."

"No, indeed, you mustn't," another began, earnestly. "She only said what everybody else is sayin'!"

MALARIA ???

Generally That is Not the Trouble.

Persons with a susceptibility to malarial influences should beware of coffee, which has a tendency to load up the liver with bile.

A lady writes from Denver that she suffered for years from chills and fever which at last she learned were mainly produced by the coffee she drank.

"I was also grievously afflicted with headaches and indigestion," she says, "which I became satisfied were likewise largely due to the coffee I drank. Six months ago I quit its use altogether and began to drink Postum Food Coffee, with the gratifying result that my headaches have disappeared, my digestion has been restored and I have not had a recurrence of chills and fever for more than three months. I have no doubt that it was Postum that brought me this relief, for I have used no medicine while this improvement has been going on." (It was really relief from congestion of the liver caused by coffee.)

"My daughter has been as great a coffee drinker as I, and for years was afflicted with terrible sick headaches, which often lasted for a week at a time. She is a brain worker and excessive application together with the headaches began to affect her memory most seriously. She found no help in medicines and the doctor frankly advised her to quit coffee and use Postum.

"For more than four months she has not had a headache—her mental faculties have grown more active and vigorous and her memory has been restored.

"No more tea, coffee or drugs for us, so long as we can get Postum." Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the little book "The Road to Wellville" in page.

Mrs. Hix: "Mrs. June strikes me as being entirely too masculine for a woman." Mrs. Dix: "Yes, indeed. Why, every time she has an ache or pain she makes as much fuss about it as a man would."

Have You Eczema?—Have you any skin disease or eruptions? Are you subject to chafing or scalding? Dr. Agnew's Ointment prevents and cures any and all of these, and cures Itching, Bleeding and Blind Piles besides. One application brings relief in ten minutes, and cases cured in three to six nights. 35 cents.—71

George (nervously): "I'd like ever so much to marry you, Kitty, but I don't know how to propose." Kitty (promptly and practically): "That's all right, George. You've finished with me; now go to papa."

While more prevalent in winter, when sudden changes in the weather try the strongest constitutions, colds and coughs and ailments of the throat may come in any season. At the first sign of derangement use Bickel's Anti-Consumptive Syrup. Instant relief will be experienced as the use of this medicine until the cold disappears will protect the lungs from attack. For anyone with throat or chest weakness it cannot be surpassed.

THE KEY TO THE POLE.

Commander Peary Expects Assistance From the Eskimos.

In the most northern human settlement in the world, on the western shore of Greenland, live the little people on whom Commander Robert E. Peary relies for assistance in his endeavor to reach the north pole. They have assisted him on former expeditions, and they will not fail him now, for he has their confidence, and the Eskimos are faithful to their friends. In his present attempt Commander Peary will make this village his starting point. Its inhabitants, therefore, are of particular interest.

When the explorer's ship reaches the village, these people will come paddling out among the ice-floes to greet him, in frail little kaiaaks, made by stretching the skins of arctic animals over a light framework made of bones lashed together. In this northern country there are no trees, so there is no wood out of which to make boats; but the people have conquered the severity of their surrounding conditions, and have become clever in splicing the bones of arctic animals to form the framework of their canoes, their summer homes, and for other purposes, and have likewise attained great skill in sewing together skins of animals to cover this framework.

These small boats, or kaiaaks, are decked over all except a small hole, in which the hunter sits, where the covering is made to fit his body tightly. In consequence of this tight fit it is said that an Eskimo can turn his kaiaak completely over in the water and right it again.

For travelling and moving from village to village a large boat made of the same materials is used. This is not decked over. It is called a umiak. Boats of this general style, but differing slightly in detail, are found along the entire arctic coast of America, and even on the Siberian side, where Eskimos have colonized within comparatively recent times.

In his dash for the pole Commander Peary will not use these boats. He will travel on the ice-cap and northward from northern Greenland by means of dogs and sledges.

The sledges will be practically the same as those in use in Labrador, Alaska and Siberia. The dogs are great husky fellows, and one of the difficulties which the explorer is bound to encounter is that of getting enough food for his dogs. They require a large amount. He will be obliged to transport meat for the dogs as well as food for himself and his Eskimo assistants.

The Eskimos require practically the same kind of meat as is eaten by the dogs, so before leaving the vil-

sea mammals already mentioned.

When the sledges are loaded with the food and the outfit of the party which of course will include instruments for scientific observation, the dogs which carry them on the march will have need of stout harnesses and they will have them. The harnesses will be the work of the Eskimos, who make them very cleverly of thongs cut from the skins of arctic animals, with toggles of ivory which serve the same purpose as the buckles on our horse harnesses.

If the expedition is successful a fair share of the glory will be given to the helpful Eskimos and the faithful dogs, for it is believed by those familiar with arctic exploration that the best native help is the one who even usually will fly his country's flag from the north pole.

"Ah," remarked Mr. De Robinson "my wife is a great collector of curiosities." "Indeed!" replied his friend "has she been at that long?" "Oh, bless you, yes; for years." "Before she married you?" "Oh, yes."

Scratching is foolish; it only makes a bad matter worse. Weaver's Ointment cures the pain, it bleeds the skin of eruptions and other sores. Why not buy a bottle to-day?

"Doctor, I want to thank you for your valuable medicine." "It helped you, didn't it?" asked the doctor, very much pleased. "It helped me wonderfully." "How many bottles did you find it necessary to take?" "Oh, I didn't take any of it. My uncle took one bottle, and I am his sole heir."

Rheumatism will Succumb to South American Rheumatic Cure because I gave right to the seat of the trouble and removes the cause. Many so-called cures but deaden pain temporarily; only to have it return again with doubled violence. Not so with this great remedy. It eradicates from the system the last vestige of the disease and it cures are permanent.—74

"I've got a washing machine here, began the inventor. The capitalists looked at him in the cold, calculating manner common to capitalists, and answered:—"Well, if I were you, I'd run straight home and use it." That night the anarchist band received another application for membership.

It is a Liver Pill.—Many of the ailments that man has to contend with have their origin in a disordered liver which is the organ particularly susceptible to the disturbances that come from irregular habits or lack of care in eating and drinking. This accounts for the great many liver regulators now pressed on the attention of sufferers. Of these there is none superior to Parnelle's Vegetable Pills. Their operation though gentle is effective, and the most delicate can use them.

"My dear, don't you intend to invite Mr. and Mrs. Green to your party?" asked Mr. Biller. "Certainly not. Why not, my dear? They are good friends of ours." "What if they are?" am going to invite Mr. and Mrs. Brown." "Well, can't you invite the Greens as well?" "Why, John Biller you shock me with your taste. Brown and Green in my parlor together! Why next you'll be asking me to wear blue and yellow. I declare you men have no idea whatever of harmony."

Dear Mother

Your little ones are a constant care in Fall and Winter weather. They will catch cold. Do you know about Shiloh's Consumption Cure, the Lung Tonic, and what it has done for so many? It is said to be the only reliable remedy for all diseases of the air passages in children. It is absolutely harmless and pleasant to take. It is guaranteed to cure or your money is returned. The price is 25c. per bottle and all dealers in medicine sell.

SHILOH
This remedy should be in every household

MARTIAL LAW PROCLAIMED

Troops Have Been Sent to Rescue General Linevitch.

NO SEARCH WARRANTS.

A despatch from St. Petersburg says. M. Durnovo's sweeping orders to search houses and arrest suspicious persons are being carried out on a wholesale scale throughout the country, the police having authority to enter any house without a search warrant. Arrests are now counted by thousands. They have been made on a scale such as was not known even in the time of Alexander II.

Following the lamentable condition of affairs it is not astonishing to hear that martial law has been proclaimed along the entire Siberian railway, while General Zakamelski, in charge of a picked force, has been sent to bring the mutinous soldiers back or shoot them. Thus the people have the extraordinary sight of troops being sent to rescue General Linevitch.

Simultaneously troops have been sent from Moscow to relieve Vindan, which, together with Mittau is in a bad state.

Count Vorontzoff-Daschkoff remains a prisoner of the revolutionists in the Caucasus, who let no news out. All that is known is that the town of Novorissisk is completely in their hands.

Governor Asanchevsky of Tomsk, whom the revolutionists repeatedly refused to allow to leave, has escaped disguised as a postman. He brought 75 pounds of letters, the first mail received from there for weeks.

PLOT TO MURDER CZAR.

A St. Petersburg despatch to London under Monday morning's date says a plot by anarchists to assassinate the Czar was frustrated by accident. Trustee artillery officers are implicated. The chief conspirators are two students, who, with the army officers, have been arrested.

The plot was discovered by one of the officers losing a carefully drawn plan of the Tsarskoe-Selo Palace.

The St. Petersburg correspondent of the London Times, denying rumors that Minister of the Interior Durnovo will replace Prime Minister Witte, says that the financial situation, in which the Government is most vulnerable, necessitates the retention of Count Witte. There will be need of all his resources to provide the 2,500,000,000 roubles (\$1,250,000,000) required in 1906 in a country whose credit is impaired and a vast proportion of whose inhabitants cannot or will not pay taxes, owing to the commercial and agrarian distress and the revolutionary propaganda.

IN MEMORY OF "RED SUNDAY."

A despatch from St. Petersburg says: A general meeting of the Workmen's Council and delegates of all the proletarian organizations has been in session secretly, perfecting their future programme. All that is thus far known is that they are planning to turn the anniversary of January 22nd ("Red Sunday"), when the most serious rioting in St. Petersburg occurred, into a day of national mourning, during which it is planned to make demonstrations in memory of the "martyrs."

All the shops, factories and theatres will be closed, and the street car and railroad services will be stopped. Requiem masses will be celebrated, and processions, in which the workmen will wear crape on their sleeves, will march through the streets. No paper will be allowed to appear, except with black borders. It is proposed to make a gigantic, peaceful manifestation, but if they attempt to carry it out the leaders fully understand that it is sure to precipitate bloodshed on a large scale.

A private despatch from Ufa, in European Russia, says that the Governor has been shot and severely wounded. His assailant was arrested.

have called on the peaceful part of the population for its co-operation in running down the revolutionists, and in restoring tranquility."

KILLED IN SLEEP.

A despatch from Riga, Livonia, Russia, by courier to St. Petersburg says: About 5,000 armed workmen before daylight on Tuesday morning invaded and took possession of the Provodnik rubber factory, and the military, as this message is forwarded, are bombarding the factory. The revolutionists killed the policemen who were guarding the building and a detachment then crept into an adjoining structure where a patrol of dragoons was asleep, and murdered eight dragoons and six stablemen and wounded eleven others. One man managed to escape, and gave the alarm to the troops, two regiments of which with artillery and six quick-firing guns, arrived at the scene by daylight. In the meantime the revolutionists had thrown up barricades and a terrific fire was opened by the troops upon these defences and on the factory.

In the midst of the confusion existing as this despatch is written, it is impossible to ascertain the number of killed or wounded, but many men have been killed, and over a hundred wounded have already been carried to the hospitals.

The soldiers are almost insane with fury. The territory in which the factory is located has been picketed off by guards who threaten to kill any person approaching. The correspondent had a narrow escape. He unwittingly entered the prescribed territory through a side street, and was twice fired upon before he had an opportunity to explain.

ROJESTVENSKY'S WILD STATEMENT

Declared That British Fleet Was Ready to Crush His Squadron.

A St. Petersburg despatch says: With official permission, the Novoe Vremya published on Wednesday a letter from Admiral Rojestvensky, availing that the British fleet was concentrated at Wei-Hai-Wei during the battle of the Sea of Japan in readiness to annihilate the Russian fleet, in case the Japanese fleet had proved unable to defeat it.

Mr. Spring-Rice, the British Charge d'Affaires, without waiting for instructions from his government, demanded an explanation from Foreign Minister Lamsdorff of the statement contained in the Admiral's letter.

Referring to the absolute secrecy of Admiral Togo in regard to the disposition of his forces, Rojestvensky declares "this was unknown even to the Admiral of the British fleet allied with the Japanese, who concentrated his forces at Wei-Hai-Wei in expectation of receiving an order to annihilate the Russian fleet if this, the final object of Great Britain, was beyond the power of the Japanese."

SENSATION CREATED.

The charge that the British admiral concentrated his ships at Wei-Hai-Wei expecting to receive an order to destroy the Russians in the event of Admiral Togo proving unequal to the task, has aroused a considerable sensation in diplomatic circles, all the more so as Admiral Rojestvensky's letter was published with the permission of the Minister of Marine, and no doubt is entertained that it will be the subject of diplomatic representations to Great Britain.

REPUDIATED IN RUSSIA.

A London despatch says: The St. Petersburg correspondent of the Daily Telegraph says he has had a conversation

LEADING MARKETS

BREADSTUFFS.

Toronto, Jan. 9.—Wheat—Ontario—Chicago and Winnipeg prices are firmer, 78c for No. 2 white and 77c for red and mixed, at outside points. Goose and spring, 73c to 74c.

Wheat—Manitoba—Quotations at lake ports steady, at 89c for No. 1 hard, 86c for No. 1 Northern and 83c to 83½c for No. 2 northern.

Flour—Ontario—Quiet, exporters bid \$3.10 to \$3.15 for 90 per cent. patents, in buyers' bags, at outside points. Domestic sales at \$3.35 to \$3.45. Manitoba steady, \$4.50 to \$4.80 for first patents, \$4.30 to \$4.40 for second patents, and \$4.20 to \$4.30 for bakers'.

Millfeed—Ontario—Bran scarce, at \$15.50 to \$16 per ton, in car lots, outside, shorts \$17 to \$18; Manitoba bran, \$17 to \$17.50, shorts \$18.50 to \$19.50, at Toronto and equal freight points.

Oats—34c to 35c, outside, for No. 2. Barley—46c for No. 2, 44c for No. 3 extra, and 41c for No. 3, outside. Peas—77c to 78c, outside.

Rye—in demand, at 70c, outside. Buckwheat—Nominal, at 51c to 52c, outside.

Corn—Canadian—Holders ask 44c, Chatham freights, 42c bid; American No. 3 yellow is easier, at 50c to 50½c, at Toronto, and 2c to 4c more at outside points.

Rolled Oats—\$5 in barrels and \$4.75 in bags on track here; 25c more for broken lots here and 40c outside.

COUNTRY PRODUCE.

Butter—Prices are quoted unchanged. Creamery 24c to 25c do solids 23c to 24c Dairy B. rolls, good to choice 21c to 22c do tubs 21c to 22c do medium 20c to 21c do inferior 19c to 20c Cheese—13c for large and 13½c for twins.

Eggs—Quotations unchanged at 24c to 25c for fresh gathered, 22c to 23c for cold storage and 20c to 21c for lined.

Poultry—Fair lots are coming forward but the demand is not brisk. Prices are steady. Fat chickens, 8c to 9c, thin 7c to 8c; fat hens, 6½c to 7½c, thin 5½c to 7c; ducks, 11c to 12c, thin 6c to 8c; geese, 10c to 11c; turkeys 13c, with 13½c for choice small lots.

Potatoes—Steady; Ontario, 65c to 75c per bag on track here, 75c to 85c out of store; eastern, 75c to 80c on track and 90c to 95c out of store.

Baled Hay—Easy in tone and quoted unchanged at \$8 per ton for No. 1 timothy in car lots here and \$6 for No. 2.

Baled Straw—Car lots on track here are quoted unchanged at \$6 per ton.

BUFFALO MARKETS.

Buffalo, Jan. 9.—Flour—Firm. Wheat—Spring unsettled; No. 1 Northern, 95½c asked storage paid; Winter, nothing doing. Corn—Quiet; No. 2 yellow, 49c; No. 2 corn, 48½c. Oats—Irrregular; No. 2 white, 36½c; No. 2 mixed, 35c. Barley—Strong; 47c to 56c. Rye—Dull; No. 1 on track, 72c.

NEW YORK WHEAT MARKETS.

New York, Jan. 9.—Wheat—Spot firm; No. 2 red, 91½c elevator; No. 2 red, 90½c f.o.b. afloat; No. 1 Northern Duluth, 95½c f.o.b. afloat; No. 1 hard Manitoba, nominal, f.o.b. afloat.

CATTLE MARKET.

Toronto, Jan. 9.—Trade in all lines of stock continued active at the Western Cattle Market this morning. The run was heavier than it has been for some time, but everything was pretty well cleared up, and in butcher cattle prices were firmer.

Export Cattle—Choice are quoted at \$4.60 to \$5, good to medium at \$4 to \$4.50, others at \$3.75 to \$4, bulls at \$3.20 to \$4, and cows at \$2.75 to \$3.50.

Butcher Cattle—Picked lots \$4.10 to \$4.50, good to choice, \$3.75 to \$4, fair to good \$3 to \$3.50, common \$2.50 to \$3, cows \$2 to \$2.75, bulls \$1.75 to \$2.25, and canners \$1.75 to \$2.50.

Stocks and Feeders—Short-keep feeders are quoted at \$3.60 to \$4, good

SETTLE OLD DISPUTE.

The Great Lakes Fisheries Question May End.

A Washington despatch to the Chicago Tribune says: Secretary Root is about to settle the great lakes fisheries question with Great Britain, and practically all the other controversies existing with Canada, save that of reciprocity. An agreement will be made shortly, it is expected, by which the United States will buy out all the Canadian sealers, and agree to pay the British Government annually a small per cent, of the value of the seal caught.

With this agreement will terminate the dispute which about fifteen years ago brought the United States and Great Britain to the verge of war. As soon as this matter is disposed of Secretary Root and British Ambassador Durand will take up the question of the revision of the treaty of 1817, limiting the armament of each power on the great lakes. Then will be discussed the minor questions in connection with the transmission of goods in bond, and the regulation of immigration.

11 HORSES DESTROYED.

Outbreak of Glanders in an Ottawa Livery Stable.

An Ottawa despatch says: For some time past the existence of glanders in the stable of Joseph Landreville, Sparks street, had been suspected by the veterinary officers of the Department of Agriculture, and the animals were placed under close surveillance. Finally the disease developed plainly, and on Thursday, by order of Dr. Rutherford, Chief Veterinary Inspector of the Dominion, Inspector Morse destroyed eleven horses, which showed symptoms of glanders. The loss will be a severe one to Mr. Landreville, as the Government allows only \$50 per head for each animal killed, while the eleven horses made away with were worth on an average \$150 each.

REVENUE FROM ASYLUMS.

Large Increase in Receipts From the Paying Patients.

A Toronto despatch says: The revenue from paying patients at the Provincial asylums for the four months ending December 31 was \$66,712.51, compared with \$36,786.08 for the corresponding period of 1904, an increase of \$29,926.43. The largest increase for any month was \$11,313, in December. During the four months the department collected arrears totalling \$29,938.67, which amount is included in the revenue previously mentioned. The increase is largely due to the systematic plan of making collections from relatives, able to afford it, of patients who have agreed to pay for their maintenance, and from trustees or guardians of patients who have property or incomes.

LARGEST BANK IN KINGDOM

Balance Due Depositors is Ten Million Sterling.

A Glasgow despatch says: At the annual meeting of the Glasgow Savings Bank in Glasgow, the Lord Provost, who presided, said for the first time in the bank's history the balance due to depositors had reached ten million sterling. The bank was the largest of its kind in the kingdom. No fewer than one hundred thousand depositors had ten pounds at their credit. Glasgow depositors had more at their credit than Liverpool and Manchester combined.

CHARGE WILL BE MURDER

Victim of Indian Shooting Dies in Brantford Hospital.

A despatch from Brantford says: Alexander Green, Indian, who was shot at a dance at Fairfield Plains, Christmas Eve by another Indian, John Hill, died at the hospital at midnight Saturday. Hill is in jail, and authorities announce

they attempt to carry it out the leaders fully understand that it is sure to precipitate bloodshed on a large scale.

A private despatch from Ufa, in European Russia, says that the Governor has been shot and severely wounded. His assailant was arrested.

LOSS OVER \$3,000,000.

A despatch from Moscow says: Statistics place the pecuniary loss by the strike that has just come to an end at \$3,125,000.

PLUNDERING COUNTY SEATS.

A despatch from St. Petersburg says: A party of Estonians, calling themselves Social Democrats, are plundering country seats and setting fire to manor houses along the Baltic coast of Estonia. Many estates have been destroyed and the owners of them imprisoned. Owners who have escaped have formed themselves into corps, and are co-operating with the Cossacks and infantry in pursuing the marauders. *begin inville*

REPUBLIC IN THE CAUCASUS.

A despatch from London says: The correspondents at Odessa send stories daily of the orderly progression of the North Caucasian Republic, the name the successful revolutionists in the Caucasus have bestowed on their new Government. It is stated that the new administration is implicitly obeyed. Order is willingly maintained by the civil guard. All citizens enjoy peace and security. The Imperial ex-governor continues to be held a prisoner. He is quartered in a railroad car, but is well treated. Twelve hundred Cossacks, who were sent to crush the rebellion, fraternized with the insurgents, and withdrew after a time, during which they were treated as guests, to Ekaterinodar. They were ordered thence to Poti, to repress the republican movement but refused to go. The battleship *Panteleimon* formerly the *Kniaz Potemkin* Tavritchesky, whose name was changed because of the mutiny that occurred on board of her, and a torpedo boat destroyer were sent the other day to Novorossisk, from Sebastopol, on a similar mission. Their arrival has not been reported, and it is surmised that they are likely to become the nucleus of a republican navy.

APPALLING VANDALISM.

A despatch to the *Paris Eclair* from Warsaw says that the Russian troops operating from Brousk are encountering almost insuperable difficulties in suppressing the rebellious Letts, who number 60,000 and are well armed. The revolutionists are displaying a cruelty and vandalism which are appalling. In the neighborhood of Hapsal and Meria every castle has been razed, resulting in the total loss of priceless art treasures.

No vessel is allowed to leave any port of the Baltic provinces without the permission of the revolutionists. The northern Baltic provinces are a vast ruin, the result of the havoc wrought by the terrorists.

Although the troops are now gaining the upper hand, the famous Guards regiments have suffered more than one severe defeat.

RIOTERS DISPERSED.

A despatch from Moscow says: "Against the brilliant conduct of the troops and police the resistance of the insurgents in Moscow has been shattered. The legions have been dispersed and are fleeing in disorder. Many of their chiefs have been arrested, and the others have fled far and wide."

With these words Governor-General Doubassoff begins a long account of the rising here, which he issued on Thursday. Continuing the account says—

"Though organized revolt has been crushed, some of the most desperate fanatics remain, and continue to fire on the troops. I cannot suffer the shadow of this terror to hang over the people during the joyful Christmas festival. I have, therefore, given positive orders that by Christmas eve (next Saturday), according to the Russian calendar, every quarter of the city must be swept clear of the last traces of revolution, and I

of Marine, and no doubt is entertained that it will be the subject of diplomatic representations to Great Britain.

REPUDIATED IN RUSSIA.

A London despatch says: The St. Petersburg correspondent of the *Daily Telegraph* says he has had a conversation with Count Witte, in which the Premier stated that the Emperor and his Ministers alike were astonished at Admiral Rojestvensky's allegation that the British admiral had concentrated his ships at Wei-Hai-Wei, expecting in order to destroy the Russian fleet in the event of Admiral Togo being defeated in the battle of the Sea of Japan. Count Witte said he was taking measures to clear up the matter, but he added it was self-evident that no level-headed man in Russia would attach importance to the allegation which the Minister of Marine, he said, had not noticed until it appeared in print.

TO STRENGTHEN ARMY.

British Secretary of War Has Been Given Free Hand.

A despatch from London says: Richard Burdon-Haldane, Secretary of War, speaking at a free trade meeting in London on Thursday night, said it was the intention of the Liberal Government to maintain an adequate army. But that it would be necessary before real reform commenced to clear away much of the trash and litter left by his predecessors. He paid a tribute to his immediate predecessor, H. O. Arnold-Foster, but said that the former Secretary had not been given a free hand by the Unionist Government.

Secretary Haldane said it was true that the standard of comparison of the military needs of Great Britain was to compare the German army, plus the German navy, with the British army, plus the British navy. It was the intention to bring the British army to an adequate position, and on this basis the artillery must be kept up to its present standard. The volunteers, he said, must be given every encouragement, but in every case needless expenditures must be avoided. He said that the Premier, Sir Henry Campbell-Bannerman, had given him entire freedom of action and he was now working to evolve a practical scheme, which did not include conscription.

SNEEZED, THEN ARRESTED.

German Haled Before Court and Fined for Disturbing Peace.

A Berlin despatch says: One of the most remarkable trials ever held in Germany was that of Herr Pirna, in Saxony for sneezing, blowing his nose and coughing too loudly in the streets at night. Policeman Lamm swore that the prisoner coughed very noisily at midnight when most people were already asleep. When asked to cough less violently he sneezed and used his handkerchief in a way unusual in polite society when promenading the street. The court imposed a fine of three marks (75 cents), solemnly warning the defendant to desist from his evil courses.

BRITISH TAR IS HEALTHY.

Navy Reports Show That Sailors Are Getting Stronger.

A despatch from London says: The British sailor is looked upon as the personification of health and strength, and a belated report just issued for the year 1904 shows that he is getting healthier as the years go by. The average number of sick men daily was 3,467, giving the rate of 31 per thousand, and showing a decrease of 5 in comparison with the last seven years' average.

BRITISH TRADE RETURNS.

Increase in Exports and Imports During Past Month.

A despatch from London says: The returns of the Board of Trade for December show an increase of imports of \$4,004,340 over the same month last year. The exports increased \$2,900,300.

Butcher Cattle—Picked lams \$4.10 to \$4.50, good to choice, \$3.75 to \$4, fair to good \$3 to \$3.50, common \$2.50 to \$3, cows \$2 to \$2.75, bulls \$1.75 to \$2.25, and canners \$1.75 to \$2.50.

Stockers and Feeders—Short-keep feeders are quoted at \$3.60 to \$4, good feeders at \$3.40 to \$3.65, medium at \$2.50 to \$3.50, bulls at \$2 to \$2.75, good stockers run at \$2.80 to \$3.50 rough to common at \$2 to \$2.70 and bulls at \$1.75 to \$2.50.

Milk Cows—The range of prices quoted is unchanged at \$30 to \$60 each. Calves—The market is quoted at \$4 to \$12 each and 4c to 6½c per lb.

Sheep and Lambs—Export sheep are quoted steady at \$4.25 to \$4.40 per cwt. for export ewes \$3.25 to \$3.50 for bucks and \$3 to \$3.50 for culls. Lambs are firmer at \$6 to \$6.30 per cwt. for ewes and wethers and \$5.50 to \$6 for mixed culls, etc.

Hogs—Quotations are 15c higher, at \$6.25 for choice lightweights and \$6 for heavies.

LESS LIQUOR WAS USED.

Decline of Over 360,000 Gallons Consumed in Canada Last Year.

A despatch from Ottawa says: Excise returns just issued, showing the quantity of spirituous liquor consumed in Canada afford satisfaction to the temperance reformer. During the last fiscal year 3,112,843 gallons, valued at \$5,947,126, were entered for consumption, as compared with 3,481,287 gallons, of the value of \$6,656,602, in the previous twelve months, being a decrease of 368,444 gallons in quantity and \$709,476 in value.

There is an increasing foreign demand for Canadian spirits, the quantities exported for the last five years being as follows:

	Proof gallons.
1900-1901	148,151
1901-1902	151,799
1902-1903	157,666
1903-1904	180,291
1904-1905	211,525

There has been an increase in consumption of malt liquors. The quantity of malt by pounds given in the returns as consumed in 1905 was 75,509,810, as against 75,430,347 for the year previous. There were 30,330,070 gallons manufactured, being an increase of 3,004,085 gallons.

Voluntaries of the fragrant weed show no signs of diminishing devotion, for in the last fiscal year 8,115,904½ pounds of tobacco, 6,708,800 cigarettes, and 93,084,295 cigars went up in smoke. Compared with 1903-04 this is a gain of 401,199½ pounds of tobacco, 4,522,309 cigarettes, and 5,739,266 cigars.

HOUSE TO MEET MARCH 15th.

Federal Government Has Fixed Date of Session.

A despatch from Ottawa says: The Dominion Government has decided to call the next session of Parliament during the second week in March. The date on which they have agreed is Thursday, March 15, but unforeseen exigencies may cause them to postpone it until the following week. They expect that by that time the Tariff Commission will have completed most of its work, and will be ready to draft a tariff bill embodying the changes considered necessary.

STEEL PLANT AT SANDWICH.

May be Commenced in Spring—Options are Renewed.

Sandwich, Jan. 3.—There now seems no doubt that the United States Steel Company will complete the purchase of the property it has under option here and build the \$10,000,000 steel plant talked of some months ago. All of the options have been renewed and representatives of the United States Steel Company have taken soundings all along the shore in front of the property under option. This is taken to mean that the location of the docks is being decided upon and that the erection of the new plant will probably begin as soon as spring opens.

A despatch from Brantford says: Alexander Green, Indian, who was shot at a dance at Fairfield Plains, Christmas Eve by another Indian, John Hill, died at the hospital at midnight Saturday. Hill is in jail, and authorities announce he will be charged with murder. The shooting was the result of a dispute over a girl for whom both were rivals at a dance. Hill pleads self-defence.

CANADA'S REVENUE \$71,000,000.

But Over \$5,000,000 Was Added to the Public Debt.

A despatch from Ottawa says: The Financial Department's report on the public accounts of Canada for the fiscal year ending June 30, 1905, shows total revenues of \$71,182,772, a surplus of \$7,862,689 over the outlay on consolidated fund. After meeting the capital expenditure, however, the result is an increase of \$3,356,448 in the public debt. The net rate of interest fell from \$2.46 to \$2.26.

The Deputy Minister of Finance, Mr. Courtney, refers to the wonderful prosperity that characterized the last year. This applied not alone to the public accounts, but to the railway traffic receipts, immigration, bank clearings and bank deposits. It is satisfactory to know that Dominion loans maintain their high position in Britain. It is pointed out that during the next seven years loans aggregating \$143,168,665 will have to be refunded. Of this amount \$134,895,331 will have to be refunded between 1906 and 1910. Against this large sum sinking funds to the amount of \$45,365,000 have already been accumulated. After these debts have been paid off there will be no more loans maturing till 1938.

The bounty payments during the year were \$2,234,685, and the railway subsidies \$1,275,629.

The balance to creditors in the Government and Post-Office Savings Banks at the close of the year was \$140,995 less than in June, 1904.

CANNIBALS EAT DOCTOR.

Rides Bicycle Into Hostile Village and Is Killed.

A Liverpool despatch says: The steamship *Glenda*, of the Elder-Dempster line, which arrived here on Friday, brought a horrible story of cannibalism in Nigeria, of which Dr. Stewart, of the Southern Nigerian Government, was the victim. The doctor accompanied an expedition to the interior, but was separated from the main body. With only a few carriers he proceeded to Calabar River. He was riding a bicycle, and being outstripped by the carriers, missed the main road and ran into the village of a hostile tribe. The carriers returning, found Dr. Stewart's bicycle and later parts of his body. Joining the main force, they gave information as to their discovery. The investigation which followed showed that the body had been horribly mutilated, and there was undoubted evidence that it had been partly eaten.

It is stated that the village is only two days' march from Calabar River. It is known that the natives often indulge in cannibal feasts.

ENTOMBED BY EXPLOSION. . .

Twenty-one Workmen Meet Death in West Virginia Mine.

A Bluefield, West Virginia, despatch says: Twenty-one miners were killed in an explosion of mine gas in the shaft of the Cooper Mine Company, at Coal-dale, W. Va., at noon on Thursday. Immediately following the explosion, which was heard for several miles, rescue parties set to work to explore the wrecked shaft. All hope of recovering alive the miners entombed by the explosion was shattered by the pouring forth of gases from the different entries. If the twenty-one men were not all killed instantly by the explosion, it is believed that they must have succumbed to the great accumulation of gas following the explosion.

HOME.

SOME DAINTY DISHES.

Sardine Salad—Remove skin and bones from a box of sardines and pour a little lemon juice over fish. Place leaves from a head of lettuce in a salad bowl, arrange the fish in them and scatter over two hard-boiled eggs, chopped. Serve with a plain dressing.

English Pork Pie.—Make a pie crust not over rich and put around the sides of a deep baking dish. In the bottom and above put layers of thin sliced bacon, thin sliced potatoes, onions chopped or sliced fine, and lean fresh pork cut into small pieces. Season with pepper, salt and sage. Fill the dish with any good gravy left from roasts or with water thickened for the occasion with some butter added. Cover with crust and bake about one and a half hours. Cover the pie with thick brown paper if it gets too brown.

Pork Toast.—Cut salt pork in thin slices and fry. Remove to a dish to serve then put equal parts of hot water and sweet milk, about a teacup of each, with the gravy. When it comes to a boil stir in a teaspoon of flour wet with cold milk. Then dip in slices of toast and bread. Lay the toast in a deep dish and pour over the gravy. Milk may be used alone if preferred richer.

With Fried Apples.—Cut half pound salt pork in slices. Fry slowly in a deep frying pan. When done take up on a hot dish. Meanwhile wash, wipe, and cut in slices six sour apples. When the pork is taken up put them into the frying pan and cook in the gravy till tender. Serve hot on the platter with the pork.

Dried apple parings are most useful in a sick room. These should be dried in a cool oven as they are ready. When required place on an iron shovel over a few hot cinders. If this be carried about a sick room, it purifies the air greatly.

Vegetable Rissoles.—Take any cold vegetables with plenty of cold potatoes. Chop the vegetables finely, mash the potato with butter. Season all with pepper, salt and a little tarragon, form into balls, dip in eggs and breadcrumbs, and fry till a golden color.

For porridge, keep to these proportions: Take one pint of water and add to one teaspoonful of salt. When the water boils thoroughly, add gradually a teacupful of oatmeal, stirring meanwhile. When all is mixed boil slowly for half an hour, stirring at intervals.

Coffee Milk.—Boil a heaped dessert-spoonful of coffee in about three-quarters of a pint of milk for fifteen minutes. Then add a few shavings of isinglass to clear it, let it just boil up and then stand on one side of the fire to grow fine. Pour into a cup carefully so as to avoid the sediment.

Onion Sauce for Keeping.—Heat half a pint of the vinegar in which onions have been pickled and place it in a jar with one ounce of chopped eschalot, half an ounce of cayenne pepper, one table-spoonful of soy, two of mushroom cat-sup, two of walnut vinegar. Let this stand for a week, shaking frequently, and keep it corked. Then add half pint more vinegar, stand it another week, strain and put into small bottles.

Saucer puddings are made thus: Take two ounces of flour, two ounces of caster sugar, one ounce and a half of butter, two eggs, and half a pint of milk. First beat the butter to a cream, then add the eggs, yolks and whites beaten separately, sift in the flour gradually with the sugar, lastly add the milk. Beat all the batter for ten minutes, then run it in a thin layer on to saucers and bake in a quick oven for ten or twenty minutes. When done turn each cake on to a hot dish, spread half of it with preserve and fold the other half lightly over. Arrange in a heap and sift white sugar on the topmost.

Macaroni and Cheese Pudding.—The ingredients required are a quarter of a pound of macaroni; two ounces of grated cheese; teaspoonful of butter; one

dry, then rub gently with a dry corn-cob; it will not roughen the goods as a brush does. Lake or sea sand will freshen velvet and remove the dust. Apply fine sand quite freely, then brush until none remains, always brushing the pile the wrong way.

NEW LOCOMOTIVES.

The Grand Trunk Railway Orders Eighty-one.

A despatch from Montreal says: The Grand Trunk have decided to spend more than a million dollars by placing the following exceptionally large orders for motive power:—Ten ten-wheel passenger engines with the Locomotive & Machine Co., Montreal; ten ten-wheel passenger engines with the Locomotive Co., New York; fifteen Richmond compound consolidated engines, Locomotive & Machine Co., Montreal; six Richmond compound consolidated engines, Canada Foundry Co., Toronto; 40 Richmond compound consolidated engines, Locomotive & Machine Co., Montreal, making in all 51 locomotives, 20 of which are passenger, and 61 freight engines. As the former cost approximately \$15,000 each and the latter \$18,000 each, the total outlay represented amounts to \$1,398,000. The locomotives when completed will be placed in service wherever needed on the system, though it has not yet been definitely decided where.

REVENUE SIX MILLIONS.

Receipts of Province May Equal Those of 1904.

A Toronto despatch says: The revenue of the Ontario Government for 1905 was over \$6,000,000. The complete returns from all departments have not yet been completed and it may be found that the total will equal the receipts of 1904, which were \$6,128,358. There has been an increase of revenue in nearly every department, in addition to the \$100,000 receipts from the Temiskaming & Northern Ontario Railway.

During the year 1904, the sum of \$1,664,000 was received as bonuses on timber sales; last year the amount received on that account was only \$520,000. But the ordinary revenue from Crown lands last year was \$548,000 more than in the previous year.

It is expected that Hon. Mr. Matheson, the Provincial Treasurer, will be able to show a surplus after meeting all expenses of the year.

DEATH BEFORE DISGRACE.

British Officer Implicated in Stores Scandal Commits Suicide.

A despatch from Pretoria, Transvaal Colony, says: Capt. J. Hopkins, quartermaster of the Second Dragoon Guards, whose name had been mentioned in connection with the war stores scandal, was found dead on Thursday morning under circumstances pointing to suicide.

COAL OIL JOHNNY IS DYING.

Man Who Squandered \$2,000,000 in Riotous Living in a Few Months.

John W. Steel, known as Coal Oil Johnny, who in seven months in 1892 squandered a fortune of \$2,000,000 and earned the reputation of being the most remarkable spender in history, is dying on the Fee farm, near Franklin, Penn. At his bedside his faithful wife is his sole companion. He has the necessities of life and nothing more. His last forty years have been spent in grief because of his earlier folly.

"Coal Oil Johnny" was 20 years old in 1861 when his foster mother was blown to pieces while trying to ignite a fire with coal oil. That accident gave Johnny his nickname, also a farm under which were oceans of oil and a bank account of \$600,000.

He had to wait a year to get possession of this wealth, and for twelve months he plotted and planned how he could cut a figure with his fortune. His

CANADA.

There were 5,816 births in Toronto last year.

Canada's national debt amounts to \$388,224,166.

Manitoba will erect a new provincial jail, at a cost of \$110,000.

Ernest Nold was killed at Galt by a drill press falling upon him on Friday.

The contract has been let for a new \$60,000 school in the South Ward, Calgary.

William Goodine was caught in a shaft at Rossland, B. C., and killed on Friday.

Calgary Board of Trade wants winter wheat grown in Alberta named Alberta.

The Ontario Lord's Day Alliance will not apply to the Legislature for Sunday legislation.

The Grand Trunk have let the contract for an electrical system to operate the Sarnia tunnel.

Edmonton residences are to be numbered, and talk of a street railway system is being revived.

Samples of Cobalt ores have been sent to Baron Rothschild, who is experimenting with them.

Chancellor Boyd decided at Ottawa that married women cannot be committed to jail for debt.

London's customs receipts, for December were \$70,340.33, an increase of \$9,217.37 over last December.

The collections of Montreal customs for the year amount to \$12,279,836, as against \$11,658,775 last year.

James Bond, ex-Mayor of Toronto Junction was instantly killed by a car on the Mimico electric line on Saturday.

The Supreme Court of New Brunswick decided against the admission of Miss Mabel French to practise as attorney.

Mr. Donnelly, Canadian agent in Mexico, complains severely of the packing of consignments of apples received recently.

The Manitoba skating rink and several small buildings in course of erection at Winnipeg were wrecked by a strong gale on Friday.

The increase in the public deposits in the chartered banks averages over \$1,000,000 a week, and over \$500,000,000 is now on deposit.

The land department of the Canadian Pacific Railway sold 52,218 acres of western lands in December. The price averaged \$5.40 per acre.

Nearly \$1,500,000 was paid to Hastings county farmers in 1906 for cheese. The industry was introduced 40 years ago from Oxford county.

The Manitoba Hotel at Portage la Prairie was destroyed by fire on Saturday. The hotel was filled with guests, who escaped in night apparel.

The collecting and compiling of the data for use in the preparation of plans for a 20-foot canal on the Georgian Bay and Ottawa route is under way.

The Pacific Bank of Canada is applying to Parliament for permission to change its name to the United Empire Bank of Canada and to remove the head office from Victoria to Toronto.

Six hundred and two marriages were performed during the last six months in Windsor making over 1,200 for the year. Most of these were couples from the United States, despite the vigorous enforcement of the laws to prevent Windsor from being a Gretna Green.

Better care of the overland route between Edmonton and the town of Lesser Slave Lake is urged. The Hudson's Bay Company lost four teams of horses and precious cargoes of merchandise Christmas week on the ice route over Slave River, and if the overland road was in good shape there would be no tendency to use the ice road, where accident after accident has occurred the past year.

GREAT BRITAIN.

Ex-Premier Balfour received very noisy treatment from an audience at Manchester.

The London Jewish Chronicle states

ON THE FARM.

WINTER WHEAT RUSHING NORTH

The success which attends the growing of winter wheat in the Canadian Northwest is one of the most surprising of the many surprises that have arisen during recent years regarding the adaptation of plants. When I visited southern Alberta in 1903, some mention was made of growing winter wheat by one of the residents of Lethbridge, writes Prof. Thomas Shaw. My attention was at once arrested. Through the aid of the deputy minister of agriculture for the territories I was able to obtain the address of three or four farmers living at points between Lethbridge and Edmonton; my interest in the matter lay in the fact as to what it told about the possible agriculture of the country. Any country that will grow sure crops of clover and even alfalfa. Any country that will grow these will also grow live stock in good form, and is, therefore, judged from the standpoint of production, a good country to live in. I wrote to the men whose addresses I had received, and was of course glad to learn of the success that had attended their efforts to grow this important cereal.

What was my surprise on going back to southern Alberta, to find that in 1904 the crop of winter wheat grown embraced 8,926 acres, that the average yield per acre was 18.33 bushels for the whole province, and that for central Alberta it was 28.67 bushels per acre. The winter wheat crop in Alberta this year is put at 2,000,000 bushels.

I found this crop being regularly grown in the cultivated areas in Northern Alberta. It has succeeded in the neighborhood of Regina on the main line of the C.P.R., and near Hawley on the Prince Albert branch.

It is my conviction, however, that winter wheat will come to be grown as a regular crop throughout the greater portion of tillable Alberta, over large portions of central and northern Saskatchewan, and in certain of the northern areas of Manitoba. If the conclusion is correct it will open up a new empire for the growth of winter wheat, as the country referred to in Saskatchewan and Manitoba covers an area of several hundred miles, from east to west. From Dauphin to Edmonton, the line of the Canadian Northern covers a distance of 647 miles.

A CONCRETE FLOOR.

The first essential of a good floor is a solid foundation. Upon this spread about 4 inches of gravel containing sharp sand, especially in the surface layer. This must be tamped down hard with pounders made for the purpose. A piece of 2-inch oak plank 6 inches square with a handle attached answers for ordinary purposes. After the gravel is rammed down solidly and is perfectly level on top it is ready to receive the concrete. Mix at the rate of four parts of gravel to one of cement. None but the best make of cement should be used. The mixture should be only moist enough to dampen the cement and gravel. When applied to the floor, it must be tamped down hard into all crevices. Too much care cannot be taken at this stage of the work. The grouting should be at least 3 inches thick on the floor for ordinary use to give satisfaction.

Where heavy work is to be done on the floor, the thickness should be considerably increased. In making a floor of this kind, three points should be held clearly in mind—a good foundation, best cement and thorough mixing. I have a floor made in this way which was put down 12 years ago. It now has the appearance of lasting a score of years more. Always such a floor should be allowed to stand for at least a week after being put in place.—P. Wiley.

LIVE STOCK NOTES.

A hen that earns from \$1 to \$2 a year beyond the cost of her keep is a useful

minutes. When done turn each cake on to a hot dish, spread half of it with preserve and fold the other half lightly over. Arrange in a heap and sift white sugar on the topmost.

Macaroni and Cheese Pudding.—The ingredients required are a quarter of a pound of macaroni; two ounces of grated cheese; teaspoonful of butter; one beaten egg; breakfast cupful of milk; teaspoonful of mustard, and pepper and salt to taste. Place the macaroni into plenty of boiling water, with a little salt and pepper, and boil for an hour. Strain off the water, put in the milk, and let it simmer for about ten minutes, or until the macaroni has absorbed nearly all the milk; add the butter, the seasoning and the mustard and sugar, and mix gently. Half the cheese is then put in, and lastly the beaten egg is added. Turn all into a well buttered dish, sprinkle the remainder of the cheese on the top, and bake in a quick oven until the surface is browned.

In sweeping carpets remove all furniture or cover it thoroughly, as the dampness will cause the dust to stick to the woodwork and soil the fabric. Sweep quickly and carefully from the corners and sides to the centre of the room to prevent the soiling of the wall paper. Take the dust carefully into the dustpan, carry to the kitchen and burn it. If you have a carpet sweeper run over the carpet quickly to brighten it and remove the dust.

Black lace may be washed in a tepid lather, then rinsed in warm water, and finally in water to which a little blueing or ammonia has been added. Black lace which has become brown through neglect, should be soaked in warm tea of moderate strength and then washed in a mixture of tepid tea and soap lather. Under no circumstances should starch be used for a black lace. It will give an ugly glazed look. If any stiffening be required let it be gum arabic dissolved in tea. Just the same care must be exercised in ironing a black lace as any other, though soft paper may be substituted for the muslin. Seemingly hopeless lace may be absolutely restored. Even a bit of neat mending may seem unnoticed.

HINTS FOR HOME LIFE.

To prevent the skin discoloring after a blow or fall, moisten a little starch and cold water and lay it on the injured part.

Stains on knives will disappear if rubbed with a piece of raw potato dipped in brick dust.

Put a drop or two of glycerine or sweet oil in the crevice about the tight stopper. In an hour or two the stopper will be looser.

Glue can be removed from woodwork by rubbing over with a cloth dipped in vinegar. Vinegar is always much better to dissolve glue than water.

For those troubled with roaches and water bugs, borax burned on a shovel or old pie tin and sprinkled in the runways, will induce them to leave their happy homes "for good."

Always allow cold water to run over sardines before using them for sandwiches or serving them whole. The oil used to cover them is rarely of the best, and sometimes it is positively bad. The delicate flavor of the fish is not affected by the cold water.

Ribbons may be freshened, if not too much soiled, by sponging with weak ammonia water and hanging for a few minutes in the fresh air. They should then be put between pieces of white tissue paper and ironed with irons as hot as can be used without scorching.

If a dainty bit of neckwear or a light blouse has acquired an unsightly spot rub both sides of the cloth well with a cake of magnesia and lay away for a day or two. When the magnesia has been carefully dusted off the spot will in most instances have disappeared.

Mice are said to object to the odor of mint, a suggestion on that may be utilized to advantage by the housekeeper. Who objects just as strongly to the small rodents. If fresh mint is not obtainable liquid peppermint applied to the shelves of storeroom and pantry is said to be equally efficient.

To remove mud splashes from soft dress material leave until thoroughly

to pieces while trying to ignite a fire with coal oil. That accident gave Johnny his nickname, also a farm under which were oceans of oil and a bank account of \$600,000.

He had to wait a year to get possession of this wealth, and for twelve months he plotted and planned how he could cut a figure with his fortune. His record as a spendthrift is told in a book written by a brighter mind than Johnny's because he never learned to read or write. It is a story of awful folly.

This young man marched about the streets of Oil City, Petroleum Centre and other oil towns bedecked in currency of the United States. Bills of various denominations were pinned to his coat and trousers. He used paper money as a lining for his hats.

He scattered his wealth broadcast each day, paying \$5 for a shoe shine; \$10 for a shave. His tips to waiters amounted from \$5 to \$10. He gave friends money to gamble with and once bought a hotel and gave it to the clerk.

In New York he hired a cab, then bought it and made a present of it to the driver. After he had bought all the champagne in a New York hotel once, he ordered several cases and had attendants to spill it in a bathtub. Then he bathed in the costly liquid.

Coal Oil Johnny would pass along the street, see a pretty girl and present her with a hundred dollar bill. He paid for everything that pleased his fancy. He raised the price of everything.

After six months of this riotous living in 1862 he got to the end of his string. He sold his oil properties and royalties for a song.

One morning he awoke dead broke. Friends deserted him, and he had hard work getting a job that paid \$1.50 a day. He went West and lived in Kansas, South Dakota and Washington Territory. He never made more than \$2 a day. He was so disgusted with oil fields that the sight of a derrick made him sick. He came home to die a year ago, and is now at the point of death.

A DYAK LOVE TRAGEDY.

The Practice of Head-Hunting and Its Result.

The ancient custom of head-hunting has not yet died out in Borneo, and a gruesome story in this connection is told by a correspondent of The British North Borneo Herald.

Hathnaveg, a tribesman, had been persuaded by Dutch missionaries to abandon the practice of head-hunting. He remained true to his promise, and for a time led a quiet life. Recently, however, he fell in love with a Dyak maiden. The girl, although returning his passion, disdained his offer of marriage, because he no longer indulged in the ancient practice of cutting off and bringing home the heads of the enemies of the tribe.

Hathnaveg, goaded by the taunts of the girl, who told him to dress in women's clothes in future, as he no longer had the courage of a man, quitted the village and remained away a considerable time.

When he returned he entered his sweetheart's hut, carrying a sack on his shoulders. He opened it and four human heads rolled upon the bamboo floor. At the sight of the trophies the girl at once took him back into her favor, and, flinging her arms around his neck, embraced him passionately. "You wanted heads," declared her lover. "I have brought them. Do you not recognize them?"

Then, to her horror, she saw they were the heads of her father, her mother, her brother, and of a young man who was Hathnaveg's rival for her affections. Hathnaveg was immediately seized by some of the tribesmen, and, by way of punishment was placed in a small bamboo structure such as is commonly used by the Dyaks for pigs, and allowed to starve to death.

New Roomer.—"Is this all the soap there is in the room?" Landlady (decidedly)—"Yes, sir; all I can allow you." **New Roomer.**—"Well, I'll take two more rooms and have two more pieces. I've got to wash my face in the morning."

tendency to use the ice road, where accident after accident has occurred the past year.

GREAT BRITAIN.

Ex-Premier Balfour received very noisy treatment from an audience at Manchester.

The London Jewish Chronicle states that the Russian relief fund now amounts to about £100,000 raised in Russia.

Mr. Chamberlain, speaking at Birmingham, made a direct appeal to the trades unions to support his fiscal schemes.

Right Hon. Joseph Chamberlain, speaking at Birmingham, advocated courting the favor of the colonies before the United States and Germany offer advantageous trade reciprocity.

UNITED STATES.

John A. McCall has resigned the Presidency of the New York Life Insurance Company, and Alex. E. Orr was appointed in his place, at a salary of \$50,000 a year.

The United Presbyterian congregations of the United States will take steps toward the semi-centennial celebration of the church to be held in Pittsburgh in 1908 when \$2,000,000 is to be raised to be divided among interests of church at home and abroad.

The first half of the fiscal year closed with a deficit in the United States Treasury of \$7,243,086, which is a lower figure than many persons believed would be reached this year. There was a surplus in the month of December amounting to \$5,418,717, the current receipts amounting to \$50,350,463, while the expenditures were only \$44,931,746.

GENERAL.

The Russky Viedomosto of Moscow has been suppressed for publishing a dignified protest against wholesale executions without process of law.

Germany has ordered 20,000 freight cars for troop transportation, in view of the military activity in France, and the tension over the Moroccan dispute.

TORNADO IN GEORGIA.

Spreads Wreck and Desolation Over City of Albany.

An Albany, Ga., despatch says: A tornado of terrific force passed over Albany at 1 o'clock on Wednesday afternoon, spreading wreck and desolation over portions of a dozen blocks. Several persons are dead and others will die as the result of injuries, while many are more or less seriously hurt.

Reports of the tornado after it left Albany have not been received. The storm was preceded by a blinding deluge of rain, and the wind attained a high velocity. It struck the Thair place, south-west of the city, where it killed a boy and fatally injured two others. The buildings on the place were demolished. Striking the big plant of the Virginia-Carolina Chemical Company, the storm demolished the two principal buildings. One man was killed at this place.

RECEIPTS WERE HEAVY.

Provincial Secretary's Department Made a New Record in 1905.

A despatch from Toronto says: The gross receipts at the Provincial Secretary's Department for the month of December were \$11,686, making the total for the year just closed \$131,909. It is not expected that refunds will amount to more than \$1,500, so that the net receipts for the year will total nearly \$130,409, the largest in the history of the department. For 1904 the net receipts were \$101,943.

HOLOCAUST IN JAPAN.

Hundred and One Persons Burned to Death in a Mine.

A despatch from Tokio to the London Daily Telegraph, says that on Thursday an explosion set fire to a mine at Atsuta, on the main island of Japan, and that 101 persons were burned to death.

pearance of lasting a score of years more. Always such a floor should be allowed to stand for at least a week after being put in place.—P. Wiley.

LIVE STOCK NOTES.

A hen that earns from \$1 to \$2 a year beyond the cost of her keep is a useful member of the home community. There are some that will do it in every flock.

There are none of the domestic animals that will make surer and quicker returns to the farmer than sheep. The cost in feed and labor on a small flock of sheep is such a small item that it would hardly be noticed, and they will give a larger percentage of return for their cost than any other animal on the farm.

If you have been in the habit of feeding the cows cornmeal, or corn and cornmeal, during the winter season, get some cottonseed meal and substitute one pint for a like amount of the cornmeal. Gradually come up to one quart of the cottonseed meal, leaving out a like amount of cornmeal, and note results. If the cow's milk is not doubled I am mistaken.

There is probably no better place to winter bees than in a good, dry cellar. While this is not absolutely necessary for safe wintering, it will be a great saving of honey. If the cellar has a variable temperature it will not be so good for the bees as one in which the temperature can be kept near 45 degrees. If too variable, the bees would be better off outdoors. There are many ways of fixing the hives, but doubtless the cheapest plan is to leave on the hive covers, sealed down tight, but with the bottom boards entirely removed. The first tier of hives should be set eight inches apart; the next tier on top of these, and directly over the space between each two hives; the next in the same way on top of these, until as high as wanted.

SQUEALS.

Sows should be mated so they should farrow at about a year old.

Pigs must be kept growing every minute to be made profitable.

The runt pigs will gain more rapidly if permitted to remain with the sow a few days after the others are turned away.

Clean out the hog troughs every day if necessary. Troughs half full of litter do not make very desirable places for the pigs to eat out of.

Because a hog is a hog is no reason why he should live all the time in a muss. He will be about the cleanest animal on the farm if you will let him.

The stunted pigs will make fine fat porkers for the meat barrel next winter if singled out now and penned by themselves where you can give them extra attention.

When five to six months old select the choicest sows desired for breeding. Put them in a pasture and supply less carbonaceous food than those intended for killing market.

When pigs are weaned early they should be taught to eat as soon as possible. Otherwise they are apt to suffer from the change in diet and lose in weight which means to check in growth.

SURROUNDED BY SHARKS.

The Tragic Experience of Three French Sailors.

A Paris despatch says: A French destroyer has brought into Bizerta the sole survivor of the steamer *Albula*, which foundered off Cape Bon. The crew of eighteen left the sinking vessel in a dinghy and a lifeboat, but the former was immediately swamped, and the lifeboat soon capsized, only three men escaped by clinging to the upturned keel. One of the men had been wounded, and was bleeding freely. The blood attracted a number of sharks and he was soon dragged under. The two survivors, Erikson and Liset, clambered on to the lifeboat, and during three days subsisted on a single biscuit. They were surrounded by sharks, and eventually Erikson went mad and tried to kill Liset, who was obliged to knock him down and drop him into the sea. Liset finally risked the sharks and swam ashore.

THE ONTARIO Government will be commended by both parties if it pursues a policy that will prevent the tying up of idle mining land. The public are awaiting results.

COMPLETE THE PEOPLE'S RAILWAY.

Ontario's first experiment in public ownership of railways has some of the elements of an Arabian Night in it. A Government which while building a

development does not appear. There are indirect benefits which cannot be withheld, however. The community which is founded on the successful working of the mines will have an immediate effect in settling and developing the nearest agricultural lands, and thereby imparting an impetus to settlement generally in that northern region. The amount of scrutiny which will be directed to New Ontario through the search for further fields of precious metals will be advantageous, whether the object of the quest is found or not. The new community will also attract commercial attention to that country earlier than would otherwise be the case. To this end the Government railway should be completed. Not only should it be united directly with the Grand Trunk, but inquiry should be made as to the feasibility and advisability of connecting it with the Sudbury-Toronto branch of the Canadian Pacific Railway now being constructed. By connecting directly with both lines the Government road would be in a strong position to get rock-bottom through rates between new and old Ontario. These are matters for the Temiskaming Railway Commissioners to consider, and it is to be hoped—and the hope is expressed with some confidence—that they will show themselves as capable of appreciating the importance of their trust as their predecessors were.

WHAT OTHER PAPERS SAY.

Montreal Herald.

The gist of Mr. Chamberlain's appeal to the British voter is that by an arrangement with the colonies wider markets for British produce, and therefore steadier employment for British workmen, might be obtained. Where is there any evidence that our Canadian manufacturers are prepared to widen the Canadian market for British products?

Peterboro Examiner.

The use of such associations is beyond question. Like other good things however they may be abused and if used for exhortation rather than for protection they are undoubtedly an evil. No manufacturer, or dealer, or workman has any right to take any advantage of organization to "unduly enhance" the price of his products or wares. If he does he should be made to pay the penalty. On the other hand all credit to the employer who, in the stress of international competition, with many employees depending on him, joins in an honest endeavor to secure stability in the market and protect all classes from inordinate speculation.

London Advertiser.

Sixty-four Ontario municipalities voted for local option Monday. These municipalities will be fortunate if they have good hotels, after getting rid of the bar-rooms. A first class temperance hotel would be something unique, and yet it ought not to be impossible where there are no rival hotels, able to offer cheaper rates by reason of the profits from liquor selling.

Brockville Recorder.

The bye-election will probably take place in Kingston during January. Mr. Pense, who will again be the liberal candidate, was one of the most useful members of the legislature, and in him the Limestone City had a representative that was ever vigilant in her interests.

Kingston Freeman.

Leading Canadian Physicians Endorse The Canadian Discovery

Fruit-a-tives or Fruit Liver Tablets.

DR. ALEXANDER FALKNER, Williamstown, Ont., a physician who has enjoyed a large practice for the past thirty years:—"I have much pleasure in certifying to the value of 'Fruit-a-tives' or 'Fruit Liver Tablets' as a medicine for chronic constipation and biliousness, dyspepsia, etc., etc. I have prescribed this medicine for the past six months and can strongly recommend 'Fruit-a-tives' in all cases of constipation, indigestion and flatulence, headaches due to weakened digestion, etc.

DR. A. FRANKFORD ROGERS, Ottawa, a physician who has enjoyed one of the largest practices in that city, states:—"I have no hesitation in recommending 'Fruit-a-tives' or 'Fruit Liver Tablets' as the fact of these tablets being made from a laxative material extracted from ripe fruit appeals, and has appealed to my judgement, and I have used these tablets extensively in my practice and always with most gratifying results. The proprietors of this medicine do not hesitate to furnish the formula of the tablets to physicians, and hence any physician can use these tablets and recommend them without loss of self respect. The formula of 'Fruit-a-tives' is certainly a magnificent one, and in my experience no medicine ever used by me has given such excellent results in constipation and stomach and liver trouble as 'Fruit-a-tives' has. That these tablets act beneficially on the kidneys and skin is beyond doubt and in many cases where the skin was sluggish and inactive and the complexion bad 'Fruit-a-tives' have given the most pleasing results."

DR. D. J. COSTELLO, member of the internal staff of the General Hospital, Ottawa, and who has extensive experience, states:—"I have used 'Fruit-a-tives' or 'Fruit Liver Tablets' with most beneficial results in obstinate constipation and biliousness, and found their action mild and non-irritating, and yet more curative than any medicine ever used previously. I strongly recommend 'Fruit-a-tives' to those suffering from these complaints."

At all druggists or sent postpaid on receipt of price. 50c. a box or 6 boxes for \$2.50.

FRUIT-A-TIVES LIMITED, OTTAWA.

Soluble Glass.

Soluble glass, or water glass, as it is sometimes called, is an artificial silicate of sodium or potassium or a double silicate of both of these alkalis, and thus in its essential ingredients the same as ordinary glass. But ordinary glass is to a slight extent soluble in water, owing to the alkali which it contains, and by varying the proportion of the alkaline constituents the compound becomes readily soluble to any desired degree. Attention was first directed to it by Fuchs, a German chemist, about 1824. It has been used to some extent, and quite successfully, in preventing the decay of stone walls and edifices under the action of the weather. The surface is covered with a coating of a suitable solution, and the water soon evaporating, a thin, transparent glaze is left over the stone, effectually protecting it from the disintegrating action of the atmosphere. Several public buildings in various parts of the world have been successfully treated in this way.

He Let It Drop.

After the battle of Sharpsburg General Jackson, happening to ride in the rear of Early's division, found the men scattered for miles along the road, some executing dance steps, some crying, others singing gay songs or psalm tunes. Early had tried to reduce the ranks to their usual orderly condition, but had not succeeded. Finally an orderly rode up and handed him a dispatch from General Jackson:

Headquarters, Left Wing.

Sir—General Jackson desires to know why he saw so many stragglers in rear of your division today.

A. S. PENDLETON.

After reading this communication the grim old soldier got a piece of paper and wrote the following reply:

Headquarters, Early's Division.

Captain—in answer to your note, I think it probable that the reason why General Jackson saw so many of my stragglers today is that he rode in rear of my division. Respectfully,

J. A. EARLY.

General Jackson let the investigation drop.

Flowers That Shoot Like Guns.

Birds and insects carry seeds about almost as busily as the wind. The rough and hairy coats of quadrupeds often capture the seeds of the plant they come in contact with and carry them for thousands of miles. Rivers and all running waters perform a similar use. Multitudes of plants are found growing upon their banks, the seeds of which have been brought by the current from distant localities, and, being stranded when the water is low, they find at once an anchorage and a suitable place for growth. There are plants even that jerk and dart out their seeds like shots from tiny guns for the purpose of scattering them. Touchmenot and cardamines form quite a miniature artillery when ripe, discharging their little batteries with a vigor that is quite comical.

RESTORED TO MANHOOD

Not a dollar need be paid unless cured for you can pay after you are cured. Drs. K. & K. established 25 years. We treat Varicocle, Nervous Debility, Stricture, Blood Diseases, Kidney

ownership of railways has some of the elements of an Arabian Night in it. A Government which while building a comparatively short railway lays bare an immense deposit of precious metal is a lucky Government, however its subsequent history may seem to challenge that description. Nor were the Cobalt fields the only treasure the Ross Government left to its successor. So far as the public treasury is concerned, the succession duties are a far more reliable Eldorado. Whether there is any danger that Mr. Whitney and Mr. Matheson may implement the disfavor with which they formerly regarded this source of revenue by repealing the law has not yet been announced. It is worth noting, however, that up to date the Treasurer is taking everything that is coming in and asking 10 questions. The size of the checks has served materially to relieve the gloom which naturally enough possessed him when the London bankers refused to give him ninety-six cents for what is easily worth ten cents more.

So far no revenue is reported from the Cobalt district. It will doubtless be a source of some expense to the Province, but whether the public is to have any further direct interest in this

Every Two Minutes

Physicians tell us that all the blood in a healthy human body passes through the heart once in every two minutes. If this action becomes irregular the whole body suffers. Poor health follows poor blood; Scott's Emulsion makes the blood pure. One reason why

SCOTT'S EMULSION

is such a great aid is because it passes so quickly into the blood. It is partly digested before it enters the stomach; a double advantage in this. Less work for the stomach; quicker and more direct benefits. To get the greatest amount of good with the least possible effort is the desire of everyone in poor health. Scott's Emulsion does just that. A change for the better takes place even before you expect it.

We will send you a sample free. Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

It is now said that the police will allow no man with his hands in his pockets to approach President Roosevelt. Men with their hands in other people's pockets, however, are allowed to circulate as freely as usual.

Toronto Star.

The discovery that most of the paint sold in Canada is adulterated explains perhaps why different shades of red are produced on the noses of patrons regularly using the same brand.

Deafness Cannot be Cured.

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Kincardine Review.

Suppose you had a good proposition at Cobalt, you would develop it yourself, if you had the money. If you had not the money, you could get it easily enough, because there never was a camp where money was so easily obtained. Posters are displayed in the town containing offers to buy up good prospects or furnish the money to develop them, on a partnership basis—something that an old miner tells the Review he never saw in any other mining camp. Accordingly, there is no need to divide up thousands of shareholders if you have a good thing. But if you have not—well, then, you form a company, get out a prospectus, promise dividends, and "rope in" investors who know nothing about mining. Dear reader, if you want to invest in Cobalt companies on this understanding, go ahead. You have our permission, but look out for the Fool-killer.

NEWSPAPERS IN SCOTLAND.

It is Sometimes a Very Difficult Matter to Buy One.

The American custom of glancing over the morning paper as you sip your coffee at breakfast goes with you abroad, but it is no simple thing always to get a morning paper. On coming down to breakfast the first morning in Edinburgh, I found there was no paper to be had, but, thinking it was a simple matter to buy a Scotsman on the street, I went out on Princes street and walked three blocks without the sight of a newsboy. "Where can I get the morning Scotsman?" I said to a policeman. He thought for a moment. "Weel," said he, "there's a great news shop about three blocks up, and ye might find one there." I followed the direction and found myself in a large news distributing depot. There were stacks and stacks of newspapers and magazines all about. "I would like the morning's Scotsman," I said. The man in charge looked bewildered. "I'll see," he said, "if we have one." He fumbled around a little while, and then went back into the rear of the store for fully three minutes. At last he came back, saying, "We haven't one." "Weel," I said, "this is about the strangest thing I have seen. Can't get the morning paper here in Edinburgh." "No," he said, "ye'll find it difficult." "What do

they publish papers here for, anyway?" I rejoined. "Do they want to keep them out of the hands of the people? Don't they want people to read them? Do they print papers to keep the news secret?" He bridled at once. "I want ye to understand," he said, "that the Scotsman is not published for the general public; it's published for the subscribers."

The Scotsman, you know, probably ranks next to the London Times. "Well," I said, "this is all new to me. In my country publishers want to have their newspapers read. They want to sell all they can. They don't try to keep them out of the hands of the 'general public.' Can you tell me where I can get one, for I want to see the morning paper, though perhaps I shall have to get a letter of introduction to buy one?" "Weel," he answered, "there's a woman about a hundred yards from here that takes the Scotsman. She might sell you hers." I took the direction carefully, found the woman who took the Scotsman—she kept a thread and needle store—I bought her copy, and reached the hotel a half hour late for breakfast, which I had ordered before going out on the difficult quest of buying a morning paper in the great city of Edinburgh.

La Grippe Cured

Twelve times and out! Doctors say that LA GRIPPE will come two or three years more and disappear again for 50 years. It has a periodical run of 12 years. Each time it comes it is worse than the time before. This time LA GRIPPE is prophesied to have terrible neuralgic and rheumatic pains as a symptom and afterclap. These pains are the most excruciating—worse than the rack and torture. Avoid LA GRIPPE, prevent LA GRIPPE, or cure LA GRIPPE, by taking the specific, scientific remedy

BUSINESS SENSE.

All things come to him who doesn't wait, but hustles.

Too many clerks and not enough salesmen—that is the cry.

The sheriff is always making goooey eyes at the store that doesn't advertise.

Resolve not to worry so much about your competitor. Take the lead for a change.

Many succeed because they advertise correctly and ever so many fail because they don't.

If you never do more than you are paid for, you will never get paid for more than you do.

If you have no confidence in your employer, for heaven's sake be honest and go in and tell him so. Draw your pay and quit.

First Use of Potatoes in Ireland.

In the garden adjoining his house at Youghal, Raleigh planted the first potatoes ever grown in Ireland. The vegetable was brought to him from the little colony which he endeavored to establish in Virginia. The colonists started in April, 1585, and Thomas Harriot, one of their number, wrote a description of the country in 1587. He describes a root which must have been the potato:

"Openank are a kind of roots of round form, some of the bignesse of walnuts, some farre greater, which are found in moist & marshy grounds growing many together one by another in ropes, as though they were fastened with a string. Being boiled they are very good meat."

The Spaniards first brought potatoes to Europe, but Raleigh was undoubtedly the first to introduce the plant into Ireland.

Her Scholarship

By ANNA WEBBLING

Copyright, 1905, by P. C. Eastment

Millie sat on the edge of the dock and looked up the road. Far up the dusty line, running between green fields, a toiling wagon spoke of passengers for the ferry, and she swung herself lightly into the launch and busied herself with starting the motor.

It was hard work for a girl, but something had to be done, and the Millie M. was her only resource. It had been fun, in her summer vacations, to play about the boat and help her father at the wheel, but now that he was ill she must take his work and every day, in fair weather or wet, make the hourly trips across the four mile stretch of water which lay between the two states.

Could she have finished her course at college she might have found some other way of supporting herself and her father, but there was an opportunity here to continue her studies, and when rheumatism had laid her father flat upon his back she had given up the last term and had come home to be both captain and engineer of the little ferry.

Between December and April the lake was frozen over, and if business was brisk this summer there might be a chance to take a half year. It would delay her graduation at least a year, perhaps two, but her chief duty was toward her father, who, since her babyhood, had striven so hard to replace that mother she had lost. He lavished upon her the affection a child naturally would expect from both parents.

When Captain Blake had been compelled to take to his bed his first thought was for his daughter, the second for the ferry line. If he gave it up some one else would start a line, and when he should be better he would find his means of livelihood gone.

But even at that he would not hear of Millie's giving up the term, and the girl settled the matter herself by calmly coming home and putting the launch in commission as soon as the ice went out.

It had been a busy season, for after hours the patrons of the big hotel on the bluff were wont to hire the boat for excursions, and the entries on the credit side of the bank book cheered Millie when at times it seemed that she, too, would have to give in.

There were eight in the party that wanted to cross the lake, but only the strapping sheriff attracted her attention as he dropped into the launch and climbed over the partition separating the engines from the space reserved for passengers.

"Most ready to give in, Millie?" he asked as the girl made room for him on the seat beside her.

"Not yet," she answered as she reached for the wheel. "I won't let them say that I married you so as to be able to complete my course."

"I guess they know well enough that we have been engaged ever since I went into long trousers," he urged. "Besides, if you really love me you will not care what people say."

"Can't you understand how I feel?" she demanded. "I do love you, Dick, but they must not say that I married you just because you had the money I needed. They must realize that I married you because I wanted you. You have your spurs as sheriff to win; I

With eyes straining through the deepening gloom, she drove the boat ahead until, with a crash, it buried its nose in the soft, sticky mud. The shock threw the men to the bottom of the boat, and with a spring Millie possessed herself of the pistol.

"If you make a move I'll shoot!" she cried.

In spite of the warning, one of the men rose to his feet. With a courage born of desperation the girl pulled the trigger. With a yell, he fell heavily to the bottom of the boat, a bullet in his hip.

The shot was answered by one nearer the shore, and, backing toward the engine, Millie blew the whistle at intervals until two rowboats loomed up through the darkness, and Dick Davis sprang into the launch.

There was a short, sharp fight, but the captors were too many for the fugitives.

Millie fainted, and it was not until the launch had been towed and shoved from the mud that she revived, and with trembling hands headed once more for the home dock.

After the posse had been paid there was still \$1,900 left, and by the end of the summer Dick Davis' brother had learned to run the launch and Millie Davis went back to college on what she laughingly explained to her husband was the "sheriff scholarship."

Dick had insisted upon her marriage before she went, and, somehow, that evening in the boat had showed her how much she needed him.

BLUFFED BY BEN BUTLER.

Made General Bingham Believe He Had Booth's Diary.

General John A. Bingham was a member of the military tribunal that tried Mrs. Surratt and the Lincoln assassination conspirators.

After the trial in the subsequent debates in the house General B. F. Butler frequently charged that the commission had arrived at an unjust verdict and had convicted an innocent woman. In a memorable debate he boldly proclaimed that if the contents of a diary which had been found on the dead body of J. Wilkes Booth were ever made public it would disclose the fact that it contained the proof of Mrs. Surratt's innocence, which proof had been infamously suppressed by the commission. When General Bingham made a movement as though he would repel such an accusation, Butler dramatically drew a memorandum book from his breast pocket and held it aloft, but did not utter a word. Bingham naturally supposed that Butler had a copy of a diary such as he had spoken of. As a matter of fact the book contained nothing but blank leaves. General Butler was just bluffing.

The diary was in possession of Secretary Stanton, but President Johnson finally demanded it. It was an interesting book, but it threw no light upon the great conspiracy. Johnson's private secretary was W. W. Warden, who was the correspondent of the Baltimore Sun, and besides was in the employ of the New York Tribune bureau to supply it with all the information he consistently could. To him Andrew Johnson intimated that he would not be averse to the publication of Booth's diary and permitted him to make a copy of it.

Warden took it after midnight to James Rankin Young, the Washington correspondent of the Tribune, and the next morning the Tribune and the Baltimore Sun had a big beat. Sam Bowles of the Springfield Republican

Not Always a Sign.

"Knowit must be one of the brightest and best informed men in town."

"Why do you think so?"

"Because I understand he is running an intelligence office."

A chauffeur recently fined at Kensington, England, said he had agreed with his employer that he (the chauffeur) should pay all fines. The practice, he added, was almost universal in motoring circles.

Notes on Poetry.

When I feel inclined to read poetry, I take down my dictionary. The poetry of words is quite as beautiful as that of sentences. The author may arrange the gems effectively, but their shape and luster have been given by the attrition of ages. Bring me the finest simile from the whole range of imaginative writing, and I will show you a single word which conveys more profound, a more accurate and a more eloquent analogy.—"Autocrat of the Breakfast Table."

WHY CAN'T I EAT LIKE OTHER MEN DO?

WHY?—BECAUSE YOU'RE A SLAVE TO DYSPEPSIA—INDIGESTION—OR OTHER STOMACH DERANGEMENTS THAT ONLY CAN BE REACHED AND CURED BY SUCH A TRIED AND TRUE REMEDY AS

needed. They must realize that I married you because I wanted you. You have your spurs as sheriff to win; I have my diploma to work for. Then we can be married."

"And live happy ever after," he completed. "Just wait until I capture the Mayville bank robbers, and I'll win your consent in spite of you."

"Who are they?" she asked curiously. He laid a slip of paper on the seat, but just then the last of the passengers settled themselves and the boat glided out into the lake, Millie's hands as steady upon the wheel as though the man she loved were not sitting beside her.

She thought no more of the paper until she came down to the dock after supper to get the launch ready for a trip down the lake with a party from the hotel. Then she glanced over the printed slip, offering an aggregate reward of \$20,000 for the three men whose robbery of the Mayville bank was the latest of a daring series.

So engrossed did she become that she had to hurry at the last, and just as she looked up from her task, ready to pull out and run down to the hotel dock, she faced an exceedingly businesslike revolver held by a determined looking man.

"We want to cross the lake," he said roughly, "and you can't get across any too quick either."

"This boat is engaged for the evening," she said calmly, though her heart beat high as she realized that there were three in the party—the very men at whose portraits she had been looking.

"You bet it's engaged," was the rough response, "and you want to make a start mighty prompt."

Her quick ear caught the beat of hoofs down the road, and she sought to make a delay, but there was something in the leader's face that meant business, and, with no comment, she turned to the motor and the boat glided out into the lake.

At the direction of the leader she crowded on full speed, and soon the chug-chug of the explosions became a whirr as the screw churned the water and the boat shot ahead.

From the talk aft she knew that the pursuers had taken to rowboats, but they had small chance against the Millie M., and the three men amused themselves by jeering at their pursuers.

Once across the lake Millie knew that

they would have an opportunity to escape before the officers could be aroused, and the chance of Dick Davis getting the reward would be lost, since the arrest would be made in another state.

All at once an idea flashed through her brain, and she gave the wheel a twist. The men were quick to notice the maneuver, and the leader was at her side in an instant.

"If you're turning round," he declared, "you're going to run right straight into eternity."

"I gathered from your talk that you did not expect friends to meet you at the landing pier," she laughed. "As long as you insist upon being taken across I was heading for a point lower down. There is a small station there where you can take your train if you want one."

The leader lowered his pistol. "You've got sense," he declared admiringly. "Instead of having hysterics you know your business. You'll land us there and we'll make the passage money a hundred apiece. Pretty good pay, ain't it?"

Millie laughed an assent, though her heart was in her mouth. Just beyond was a sand bank, the only one in this part of the lake. At the speed the boat was going she could drive it into the mud so tightly that they could not work it off. This would give Dick a chance to catch up with them.

next morning the Tribune and the Baltimore Sun had a big beat. Sam Bowles of the Springfield Republican reproached his correspondent for failing to get a copy.

"Well," said the correspondent, "I am not like Jim Young. I have a home to go to, and don't have to prowl around till daylight." Nobody enjoyed this retort as much as James Rankin Young.

POINTED PARAGRAPHS.

No one likes a man who is everlastingly saying "Beg pardon."

The man who talks too much, as a rule, does not talk enough at the right time.

Two heads are better than one, but one of them nearly always does the business.

Most men have the same experiences. The only difference is that some men talk and some don't.

When you are working very hard take some comfort in this: Those who are idle don't seem to be having a very good time.

We suppose newspapers do annoy their readers a good deal. Still newspaper men, as a rule, do the best they can. It is an annoying business.

The word "homemaker" is working overtime when applied to any rich woman who keeps several servants. The real "homemakers" work overtime by not keeping any.

The Uncomfortable Howdah.

The elephant's howdah is that bed of Procrustes in which one can neither sit nor stand with any approach to reasonable ease, and in which a recumbent attitude is impossible. Its advantages are, first, that, standing in it, a man can shoot on every side of him; second, that it is convenient for the carriage of the occupant's paraphernalia, his guns on racks on either side, his ammunition in a trough in front, his other requisites in leather pockets here and there on the sides of the machine or, as to that, bee blanket on his seat, and, third, that in the hinder compartment an attendant can sit or stand to hold that monstrous umbrella over his head or, when quick loading is required, take from his hand the gun just fired and recharge it. Those are advantages; otherwise the howdah is an abomination.

Edwin Booth as a Smoker.

Without a cigar Edwin Booth, the tragedian, was scarcely ever seen. Even while engaged on his professional duties his beloved weed was present in the wings, ready to be snatched from his dresser's hand for enjoyment during the sometimes exceedingly brief intervals between the exits and entrances. Twenty-five cigars a day were at one time his usual allowance, an allowance, however, not infrequently exceeded.

The Nation's Timekeeper.

Americans get their correct time from a little room in the naval observatory, located on Georgetown heights, in the suburbs of Washington. The observatory was originally intended to detect errors in ship chronometers and to regulate them properly. This work constitutes one department at the institution, but perhaps its most important function is that of being the nation's timekeeper.

The Captain's Place.

"What do you mean by writing 'Among the prettiest girls at the dance was Captain Andrews?' The captain is a man."

"Yes, but he spent most of his time among the prettiest girls there."

Gray's Syrup to keep the children safe from CROUP. It dissolves the thick sputum—clears the throat—breaks up a cold—and CURES COUGHS. Keep

Gray's Syrup of Red Spruce Gum

always in the house. A bottle of this famous remedy is your best protection against those sudden night attacks of croup. Equally good for all throat and lung troubles—for young and old. 25 cts. bottle.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRs,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

If You Suffer

From Germ Troubles, Please Learn What Liquozone Can Do.

Thousands who were sick—like you, perhaps—are well to-day because of Liquozone. Many had doctored long. Many were discouraged because other treatments had failed. But they were treating germ diseases with remedies which do not kill germs.

We offered to buy them a bottle of Liquozone—just as we offer you. They did with it what other remedies failed to accomplish. And those countless cured ones—scattered everywhere—are now telling others what Liquozone has done.

Kills Disease Germs.

Contact with Liquozone kills any form of disease germ, because germs are of vegetable origin. Yet to the body Liquozone is not only harmless, but helpful in the extreme. That is its main distinction. Common germicides are poisons when taken internally. That is why medicine has been so helpless in a germ disease. Liquozone is exhilarating, vitalizing, purifying; yet no disease germs can exist in it.

The virtues of Liquozone are derived solely from gases. They are generated from the best producers of oxygen, sulphur dioxide and other germicidal gases. The process of making requires large apparatus, and from 8 to 14 days' time. The object is to so fix the gases, and to combine them, as to carry into the system a powerful tonic-germicide.

We purchased the American rights to Liquozone after thousands of tests had

been made with it. Its power had been proved, again and again, in the most difficult germ diseases. Then we offered to supply the first bottle free in every disease that required it. And over one million dollars have been spent to announce and fulfill this offer.

The result is that 11,000,000 bottles have been used, mostly in the past two years. To-day there are countless cured ones, scattered everywhere, to tell what Liquozone has done.

But so many others need it that this offer is published still. In the last few years, science has traced scores of diseases to germ attacks. Old remedies do not apply to them. We wish to show those sick ones—at our cost—what Liquozone can do.

Where It Applies.

These are the diseases in which Liquozone has been most employed. In these it has earned its widest reputation. In all of these troubles we supply the first bottle free. And in all—no matter how difficult—we offer each user a two months' further test without the risk of a penny.

Asthma
Abscess—Anemia
Bronchitis
Blood Poison

ting the boys go home and entering up the rest of these contracts ourselves?" Blake nodded.

It was nearly 4 o'clock Sunday morning when little Mrs. Blake jumped suddenly to her feet and gazed at the familiar library with sleepy, startled eyes. Yes, she remembered now. Tom had telephoned at 8 o'clock and again at 11, and through the telephone she had caught the buzz of voices and thrilled in sympathy with that irresistible force that sends men forth to grapple with the world.

As the little clock struck 4 the first faint twitter of a bird's call mingled with a man's firm tread swinging briskly up the walk.

She flew to the door—to the porch—down the steps—to be caught and held tight in eager, infolding arms. "There is no doubt about that new dining room rug now," he laughed softly.

She glanced apprehensively across the street. What would Cousin Margaret say to a home coming at this unseemly hour? Then she drew herself up proudly and regarded her husband with happy, tender eyes. He was magnificent, she thought—transformed with the exultation of the conqueror. Cousin Margaret could have her hand waving, "Patience" playing, home staying husband. Thank heaven, she had married a man!

FORGING ANTIQUITIES.

Even Experts Tricked In Distinguishing Real From the Spurious.

Dr. Oliver Tonks in the Outlook Magazine shows the difficulties of distinguishing real from spurious antiquities. Here is one of his anecdotes:

At times the forger is content to take ancient fragments of ancient vases or statuettes and complete them with clay or plaster of paris. These new "old" wares he then paints up and passes to the unsuspecting, and sometimes unsuspecting, purchaser as real antiques. The story is told of a forger in Athens that he protested that when he had finished "improving" an antique he himself could not always tell where the genuine part ceased and the false began. Under such circumstances it may not be wondered that at times even experts are tricked.

The following incident shows how forgeries turn up in very unexpected places: One hot day a party of us were taking up a steep ascent in the island of Melos when we saw above us a number of Greeks seated on a parapet of ruins. We had been cruising long enough among the Aegean islands to know that these people of the place had seen our ship drop anchor in the water below and were now waiting to sell us antiquities. At the sight of these Greeks one of our number, a tireless Scotchman, scrambled ahead of us to the top, where we could soon see her, wind blown and outlined against the blue sky, bargaining for a vase. When we reached the top after a more leisurely climb she put her purchase in my hands and asked me what I thought of it. My hands were moist with perspiration from the exertion of the climb, and for answer to her question I held them out to her all blackened from grasping the vase. The sweat had attacked the modern paint with which it was covered, and by thus coming off on my hands the color had betrayed its falsity. The whole vase had been patched up from six or seven pieces and then painted over to conceal the repairing.

CONCERNING DREAMS.

Harvey, who discovered the circula-

The Story of a Story

By CONSTANCE CAMERON

Copyright, 1905, by Ruby Douglas

"Let's move into the shade," Helen suggested.

Melville thought this a pity, for the sun had been doing its level best—not unsuccessfully—to discover unsuspected tints in her gold brown hair, but, of course, he said nothing, and shifted the garden chair within the shadow of a big acacia.

The girl toyed for a few moments with the two long pins in her hair

hat. Then she leaned slightly forward and pressed the ends of her fingers together, a pretty little way she had when she was seriously interested.

"What were you writing awhile ago, Tom, when I interrupted and asked you to play tennis? I'm afraid you weren't giving your story a happy ending, you looked so tremendously blue and sad. Do you know, I was thinking of that look of yours all through the game, and—"

"You made some mighty good back-handed strokes across the court, Helen," said he, a bit irrelevantly, picking up her discarded hat and fanning her with it.

"Come, now," the girl said softly, touching him never so lightly on the coat sleeve, "tell me about it, won't you?"

"Well, you see," he answered with a genial smile, "I was a bit perplexed just then when you found me. I've presented my characters a problem—and they can't solve it."

"Ethical?" questioned Helen, pointing a copper colored tennis shoe and gazing at it demurely.

"If ethics is the philosophy of conduct, yes, decidedly it's ethical," returned he promptly. "But don't let's talk shop, please. I'm sure it will bore you."

"What are they like, your characters? And what is it you've given them to solve?" she said cheerily. "Is it so very difficult?"

"The man in the story," he began hesitatingly, fixing his eyes straight on the top of a tall pine tree, "is a pretty decent sort of chap. He has a good name—the descendant of a long line running back a number of generations without getting out of alignment, you know. He has fair ability, energy, ambition and all that, with a position that secures him just about enough money to live on. And the girl in the story—"

Melville cleared his throat.

"And the girl?" demanded Helen.

"Well, when they were children the girl and he had played together with mud pies and seesaws in their back gardens. Their mothers had been college chums, you see, but the father of the child in kilts died and left his son nothing but his unblemished name, while the father of the little girl kept on growing daily more and more like Croesus."

"When they grew up did they still care for each other, your boy and your girl?" asked Helen in a low voice. She was giving his recital her keenest attention.

"The man loved the girl," he answered in a voice that seemed inappropriately grave. "He loved her so much—but it's enough for our purpose to say that he loved her."

Helen shot a furtive glance of inquiry at him from under her thick lashes, and her eyes looked like a purple black cloud that has in its heart the forked lightning, but he was gazing down the vista of trees, so she said merely:

"And the girl loved the man?" He started.

"He—he wasn't sure," said Melville. "He was sure she liked him; otherwise—otherwise she wouldn't have spared him so much of her time and been so sweet to him in lots of ways, but—"

"But he didn't know whether she loved him!" cried Helen. "If he was made of big, manly stuff, as somehow I fancied from your description he was, couldn't he have found out easily enough?"

"You see," began Melville, "here was the girl's money. People would think"—But Helen interrupted him with fine scorn:

"So your worthy hero was afraid of 'what people would think.' And so he kept the door of his heart locked tight, and all the time the girl might have

Vapo-Cresolene

Established 1879.

Whooping Cough, Croup, Bronchitis, Cough, Grip, Asthma, Diphtheria.

Cresolene is a boon to Asthmatics

Germ-destroying, disinfectant and standard remedy for the cold, croup, whooping cough, etc. It penetrates the air passages, soothes the inflamed mucous membrane, loosens the phlegm, and gives relief to the sufferer. It is a valuable remedy for the treatment of chronic bronchitis, and for the relief of the most severe cases of influenza.

Vapo-Cresolene is sold in all drug stores. A Vapo-Cresolene bottle is a household necessity. Free literature on request. Address: The Vapo-Cresolene Company, 100 North Dearborn Street, Chicago, Ill.

EAGLE HILL PUBLIC SCHOOL.

Report for December
(Names in order of merit)

Fourth Reader—Maximum of Mark 456; Min. of Marks 228; Katie Marquardt 251, Pearl Ready 141, Fanny John, 229.

Third Reader Sr. Class—Max. 456, Min. 228. Albert John, 219.

Third Reader, Jr. Class—Max. 372, Min. 186. Leslie Fox 293, Norris Ready 217, Arthur Ready 206

Second Reader, Sr. Class—Max. 371, 371, Min. 185, Hazel Irvine, 241.

Second Reader, Jr. Class—Max. 106- Min. 103, Lorne John 181, Jimmy Marquardt 168, Puril Villneff 158, Dolphs Villneff 156, Lorne Ready, 143, Frieda Mieske 123.

First Reader, Part 1—Max. 156, Min. 78, Andrew Ready 130, Kasper Irvine 128.

On roll for Dec.—16.

Average attendance for Dec.—10.

On roll for term (1906.)—34.

Average attendance for term.—16.

FRANCES STEWART,
Teacher.

Fancy Dishes Given Away.

If you buy your groceries from us. We give coupons on dishes free. Call and see them at GREY LION GROCERY.

CAMDEN EAST.

A grand Social will be held in Hinch's Hall, under the auspices of the Ladies of the congregation of St. Luke's church, Camden East, Thursday, January 18th, 1906. The Yarker Orchestra and String Band will be in attendance. Couples, 50 cents; Adults 25 cents each. Doors open at 7:30 p.m. Proceedings will terminate at 12 o'clock sharp. Come and have a good time.

CENTREVILLE.

We are enjoying splendid sleighing just now perhaps the best we will have this season, and everyone seems to be taking advantage of it.

Our council for 1906 met on Monday and disposed of quite an amount of business.

The Farmer's Institute held two meetings on Tuesday at 10:30 and 7 p.m. Two delegates from the Experimental Farm addressed each meeting.

A large number of Orangemen from the surrounding country attended the district meeting held in their hall here on Tuesday.

Misses Kennedy and Wilson teachers have commenced duties in sections 18 and 19 respectively.

E. Lyons is recovering from his recent illness.

Geo. McFarlane suffering for some time from blood-poisoning has gone to the General Hospital for treatment.

John Hinch merchant has removed to the old Hinch Estate recently purchased from Mr. McKnight.

Visitors—Miss Nellie Hinch, Camden East; B. J. Ingo-d-by, Watertown

FINCH.

Mr. John Munro and bride returned from their wedding trip last week and have settled down to housekeeping.

The Euchre club met this week at Mrs. Gormley's there were a large number present and a most enjoyable time spent. Phil Kee is still the champion.

Miss Kit Munro has left Finch and is now residing in Montreal.

District Deputy Grand Master Alex W. Reveler and his assistants of Moorwood installed the officers of Finch Lodge No. 339 I. O. O. F. on Monday evening, the following officers were installed viz—

N. G.—D. K. Cook,

V. G.—J. A. Munro,

Treas.—A. H. McLean.

Peruna is recommended by fifty members of Congress, by Governors, Consuls, Generals, Majors, Captains, Admirals, Eminent Physicians, Clergymen, many Hospitals and public institutions, and thousands upon thousands of those in the humbler walks of life.

Fin. Secy.—W. J. Kee.
There were a large number of members present.

Mr. I. Jacobson says there is no place like Cobalt and expects to be there by 1st of March. There is also a rumor that he is to be married to a Montreal girl next month. We will miss him very much here as he is the funny man of the place.

Rev. Montague Gower Poole, of Crysler, holds Divine Service in Hamilton's Hall every Sunday afternoon at 3 o'clock, all are invited to attend.

pertine habitude of the snakes are place lights and chant hymns in order to be assured of their favor.

Every morning the king and queen of the serpents are bathed, and fruit and milk are offered to them, to be followed at noon by cooked rice and fried grain. On certain days the idols in grove and household temple are carried in procession to the house, where propitiatory offerings are made. The presiding functionary must be the eldest female member of the family, who has to practice celibacy from the day she attains

and, being carefully treated and bled, is then placed in a cage and left there. All over the country the people when they see a snake approaching say, "The god is coming," and make way for the deity. Children play frequently about the groves while their serpentine friends are gliding about or basking in the sun and have never been known to be harmed. When the groves become overrun with serpents the surplus population is removed and sent to other shrines, certain pious Brahmins being usually called to see this

R. c. Secy.—G. L. McLean.

"Please Smile AND Look Pleasant."

When a woman says "I am racked with pain," the word "racked" recalls the days when they stretched the tender ladies of women on the rack with rope and pulley until the very joints cracked.

Fancy an attendant saying to the tortured woman, "Please smile and look pleasant."

And yet the woman "racked with pain," is expected to smile through her agony and to make home happy. She can't do it. It is against Nature. Generally speaking, the racking pains of ill health such as headache, backache and "bearing-down pains" are related to derangements or disorders of the organs distinctly feminine. When this condition is removed the general health is restored, and with health comes back the smile of happiness.

Any woman may regain her health at home without offensive questionings or examinations by the use of Dr. Pierce's Favorite Prescription. Sick women may consult Dr. Pierce, by letter, free of charge. Such letters are treated as sacredly confidential.

"It affords me pleasure to relate the wonderful merits of your great medicine, especially your 'Favorite Prescription,'" writes Mr. J. Wesley Rhine, of Woodbury, N. J., "for some time past, having suffered severely with bearing-down pains, aching in back, and many other complaints peculiar to women. She was very weak, could not do all kinds of work now. She is soon to become a mother but we do not fear the result (as heretofore), all due to your wonder-worker, 'Favorite Prescription.'"

"Your 'Pleasant Pellets' are also worth many times their price. I have used them for biliousness and stomach trouble, and have found them to be all that you claim. They are my constant companions—once used, always kept."

Given away. The People's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. The book contains 1008 pages, over 500 illustrations and several colored plates. Send 31 one-cent stamps for the paper-bound book, or 50 stamps for the cloth-bound. Address, Dr. R. V. Pierce, Buffalo, N. Y.

Rev. Montague Gower Poole, of Crystler, holds Divine Service in Hamilton's Hall every Sunday afternoon at 2 o'clock, all are invited to attend.

The people of Finch are about applying to the local Legislature to pass a special Act to incorporate the Village all loyal citizens of the place are most anxious to have this act pass.

J. G. Harkness, Barrister of Cornwall was at his office in Finch on Tuesday.

Finch has six mails coming in and the same number going out every day where is there a village of its size in Ontario to beat this?

And Wasn't Ashamed

Mr. Devoe—Why don't you wear that dress to the party?

Mrs. Devoe—I'd be ashamed to be seen in it.

Then she put on a sleeveless affair cut four inches lower in the neck and went.

Time makes the title page of our lives, death the final, and the grave becomes the binding.

SNAKE DIVINITIES.

Fantastic Forms of Worship on Southwest Coast of India.

Serpent worship and the propitiation of snake divinities, which once spread all over Asia, still maintain a tenacious hold on the little native states of Cochin and Travancore, on the southwest coast of India. Here Hindus high and low revere the cobra as they did a thousand years ago, and it is considered a heinous crime to injure the reptile or neglect its interests.

In the district of Travancore alone there are between 15,000 and 20,000 shrines dedicated exclusively to the worship of snakes which possess extensive and valuable properties for their maintenance and for the cost of the ceremonies which the keepers have to perform from time to time.

In these shrines the Hindus set down fantastic idols of serpents on a stone base, and the shrine is protected by a mud wall. Householders to assure their welfare should make offerings of dough, milk and cooked rice to the ser-

cession to the house, where prophetic offerings are made. The presiding functionary must be the eldest female member of the family, who has to practice celibacy from the day she attains the position.

At famous snake festivals at Travancore pilgrims gather from all parts to join in the worship, bringing offerings of gold, silver, grain, pepper, spices, oil, sandalwood, silk and other things. The cost of the festivals is defrayed by the revenues of the paddy fields and gardens attached to the shrines. It is believed that unless the ceremonies are conducted with reverence the largest cobras of the grove will come out and show themselves to the members of the house. The natives also believe that snake bites in the neighborhood of these shrines never prove fatal. Be that as it may, deaths from snake bites are very rare, though many groves contain as many as thirty cobras and the shrines in Travancore number between fifteen and twenty thousand.

The snakes of India are rarely aggressive, but generally keep to them-

known to be harmful. When the groves become overrun with serpents the surplus population is removed and sent to other shrines, certain pious Brahmins being especially applied to for this purpose.

Wonderful Indian Runners.

An Indian has been known to carry a letter from Calcutta to Chinnahna and back again in five days, the distance being nearly 800 miles. In some parts where the Tamulians serve the Mexicans they are used to run in the wild horses, driving them into the corral. It may take them two or three days to do it, sleeping at night and living on a little pinole. They bring in the horses thoroughly exhausted, while they themselves are still fresh. They will outrun any horse if you give them time enough. They will pursue deer in the snow or with dogs, in the rain, for days and days, until at last the animal is cornered and shot with arrows or falls an easy prey from sheer exhaustion, its hoofs dropping off.

Backache, "The Blues"

Both Symptoms of Organic Derangement in Women—Thousands of Sufferers Find Relief.

How often do we hear women say: "It seems as though my back would break," or "Don't speak to me, I am all out of sorts?" These significant remarks prove that the system requires attention.

Backache and "the blues" are direct symptoms of an inward trouble which will sooner or later declare itself. It may be caused by diseased kidneys or some uterine derangement. Nature requires assistance and at once, and Lydia E. Pinkham's Vegetable Compound instantly asserts its curative powers in all those peculiar ailments of women. It has been the standby of intelligent American women for twenty years, and the ablest specialists agree that it is the most universally successful remedy for woman's ill-known trouble.

The following letters from Mrs. Oakes and Mrs. MacNamee are among the many thousands which Mrs. Pinkham has received this year from those whom she has relieved.

Surely such testimony is convincing. Mrs. J. P. Oakes of Prince of Wales Hotel, Head of St. Margaret's Bay, near Halifax, Halifax County, Nova Scotia, Canada, writes:

Dear Mrs. Pinkham:— "After what your Vegetable Compound did for me, I am a firm believer that it is a wonderful medicine, and that any woman who is troubled with any of the ills we suffer from should try it and she will soon be convinced of its worth. Six bottles changed me from a peevish, despondent, sickly, ailing woman to a sweet tempered, healthy one, who rarely ever has a pain now, and who before was rarely without one. As a regulator, strengthener and a tonic, I think it has no superior and I certainly endorse it."

Mrs. Anna R. MacNamee of corner
Ask Mrs. Pinkham's Advice—A Woman Best Understands a Woman's Ills.

Queen and Wellington Streets, Kingston, Ont., writes:

Dear Mrs. Pinkham:— "Lydia E. Pinkham's Vegetable Compound has done all the good in the world for me. I suffered with irregularities, backache and were pains all through my body, and was very nervous and blue. I think I used a dozen different kinds of medicines, some prescribed by the doctor and some recommended by friends, but one bottle of Vegetable Compound was worth more to me than all the other medicines put together. My general health began to improve as soon as I began to use the Compound, and in three weeks I was a perfectly well woman."

When women are troubled with irregular, suppressed or painful menstruation, weakness, leucorrhoea, displacement or ulceration of the womb, that bearing-down feeling, inflammation of the ovaries, backache, bloating (or flatulence), general debility, indigestion and nervous prostration, or are beset with such symptoms as dizziness, faintness, lassitude, excitability, irritability, nervousness, sleeplessness, melancholy, "chill gone" and "want-to-be-left-alone" feelings, blues and hopelessness, they should remember there is one tried and true remedy, Lydia E. Pinkham's Vegetable Compound at once removes such troubles.

No other medicine in the world has received such widespread and unqualified endorsement. No other medicine has such a record of cures of female troubles. Refuse to buy any substitute.

FREE ADVICE TO WOMEN.

Remember, every woman is cordially invited to write to Mrs. Pinkham if there is anything about her symptoms she does not understand. Mrs. Pinkham's address is Lynn, Mass., her advice is free and cheerfully given.

"Let the GOLD DUST TWINS do your work"

"Your Servants, Madam!"

The Gold Dust Twins are always ready to work; they are certainly artists in the cleaning line. There's nothing cleanable which

Gold Dust Washing Powder

will not clean—and do it better, more quickly and more economically than anything else can. You are not serving your best interests if you're trying to keep house without GOLD DUST.

OTHER GENERAL
USES FOR
GOLD DUST

Scrubbing floors, washing clothes and dishes, cleaning wood-work, oil cloth, silverware and tinware, polishing brass work, cleaning bath room, pipes, etc., and making it as fine as soft soap.

Made by THE N. K. FAIRBANK COMPANY, Montreal, P. Q.—Makers of FALTY SOAP.

GOLD DUST makes hard water soft

THE NEW YEAR'S OUTLOOK

At the Beginning of the Year Men Take Time for Review and Preview.

Blessed is the people that know the joyful sound; they shall walk, O Lord, in the light of thy countenance. In thy name shall they rejoice all the day. —Psalms lxxxix., 15-16.

What the future will be depends largely on the eyes with which we now look at it. If we look for joy we find it; if our ears are tuned to the joyful sound our lives go singing all the time. It is part of our life's business to find this blessedness; it is a duty to be happy, a sin to be artificially sad. There are few things that, in the coming year, men need to fight more seriously than popular pessimism.

The denouncing of life as a fraud, the impeachment of the universe by some petty, overgrown infant who has only played with life is a serious offense against humanity. It is like a child kicking against the door he will not try to open. With his much crying he makes himself heard and heedless men take his ravings to heart; the hatred of life is stirred in them and its joyousness hidden. A moral anarchist is he who, too lazy to run in the race and too blind to see the rightness of the rules, berates the whole game of life.

Yet the cynic and the pessimist, the devotees of melancholia, are often regarded as the apostles of modern thought. The people who economize their brains are ever ready to take the moonings of moral malaria as the height of modern wisdom. It is time for men and women of red blood and rejoicing hearts to preach

THE GOSPEL OF HAPPINESS.

This is a good time for every man to determine to cultivate the ear for the joyful sound every day of this year, to make a record recollection of happiness.

It is only the people who live on the froth of life who are ready to adopt the faith of despair. Life is a sad business to those who have no other business than that of being foolish or of finding excitement and merriment. If you will try to live on mustard you will find the average of daily bread decidedly flat. Life is always a failure to those who have no special reason for being alive. But the people whose hands are busy, the people who work the hardest, have

least interest in the mumblings and murmurings of the drones and the dreamers.

There are other ways of drying up sloughs beside drinking them dry, and there are other ways of helping this world beside the exploiting of all its horrors. Faith in the essential rightness of things, in the happiness and loveliness of this world, is the first step toward sweeping away its wrongs, and sorrows, and unloveliness. You do not have to believe that the world is as good as it might be; but you do need to give its people credit for as much good, and perhaps a little more, than you find in yourself.

Life is not such a sad business after all. Every day brings good cheer, every hour some happiness; every step of your way you can catch some echo of the joyful sound that the All-loving ever sings through the ages. Into the darkest lives there comes

SOME CONSOLATION.

The deeper we go into the valley of the shadow, the more keenly do we realize the kindness, the sympathy, the essential goodness there is in the world.

Sometimes we need sorrow to give us new eyes and keener ears. A man never learns until he loses his money the worth of friends not bought with gold, the deeds of love that could not be hired, nor how rich is humanity in the eternal wealth of everyday goodness. Many a heart has first caught the anthem of heavenly happiness through the minor chords of pain.

Seek happiness. Cultivate faith in your fellows, in their sincere seeking to be decent, and kind, and better men and women. If this old world is a sad world don't try to sweeten it with vinegar. Don't warehouse all your happiness in heaven. Circulate the currency of that happy land here. If you feel pessimistic get out and saw wood, hunt up some one in need and help them. Pray God to deliver you from the poison of despair.

Seek the joyful sound. Of all the good things of which men may boast at last the best of all will be to have touched up the dull places with light, and lifted the heavy hearts with the magic of love, to have made the world just a little better by believing in it and loving it.

MILLIONAIRES' FREAKS

INGENIOUS WAYS OF SPENDING MILLIONS.

One Wore Diamonds as Large as Good-Sized Raspberries for Vest Buttons.

The late Mr. Tweed, of New York, when in the zenith of his power as "Boss of New York," was standing one day in a gentleman's office. There were three other gentlemen present. A large diamond stud dropped upon the floor and rolled to the feet of the gentleman who relates the incident. He picked it up—it was a diamond nearly as big as a good-sized raspberry—and offered it to the Mayor. Said the Mayor, "It is not mine." "Nor mine," said one after the other of the gentlemen. "Stop a minute, though," said Mr. Tweed, suddenly fumbling with his clothes. "Ah, yes! I believe it must be one of the buttons off my under-vest!"

The same Mr. Tweed had golden knives and forks for everyday use, jewelled furniture, and a gateway of solid gold opening into a conservatory.

HORSES SHOD WITH GOLD.

This reminds one of another millionaire who had gold fittings to his stables

tion to their coffins and funerals. One eccentric gentleman stipulated in his will that an electric light should be kept constantly burning in his tomb, and another in his coffin for twelve months after his death.

Another, apparently having a sort of Chinese belief that he might wake up hungry, ordered that there should be placed with him in his tomb a bag of gold, a bottle of port and some sandwiches.

A third directed that his grave should be planted with twenty acorns, a professional gardener being retained to attend to them, and to protect and rear the tree.

One of the most extraordinary cases before the British Court of Chancery was brought about through the eccentricity of a millionaire. Who he was, where he originally came from, no one knew, but some ten or twelve years before his death he had appeared in London, managed somehow to get introduced to a certain set of society, and ended by marrying a titled lady of means. He was poor at the time, but his wife's money brought good fortune. His wealth increased by leaps and bounds, and in a very few years he found himself a millionaire.

One morning he set out to see his solicitor, who had offices near the law courts. He dismissed his coachman at

SIMPLE LIFE FOR KING

IF NOT THAT THEN ENGLAND WILL PERISH.

Too Much Wealth and Time are Devoted by Rich Men and Women Merely to Pleasure.

According to a committee composed of some of the most influential local representatives of the people in the London district of Saint Pancras, King Edward will have to stop motoring, horse racing, smoking and other things which the sovereign has hitherto indulged in, writes a London correspondent. If he wishes to keep the British nation from going to the demdition bow-wows, he will have to lead the simple life, and try to induce other rich people to do likewise.

A strongly worded address has been prepared for his majesty's benefit by the Reverend Hubert Handley, the well-known vicar of St. Pancras, and seconded by the president of the famous Passmore Settlement.

The King was asked to use his influence "and personal example" to reform the richer section of society; and the distress committee protested "with all the fervor and depth of their patriotism against the luxury, excessive love of pleasure, and inordinate attention to sport of the rich."

As the resolution has not yet been presented to the King owing to some dissentient voices who objected to its exact wording, the Reverend Hubert Handley, the instigator of the movement, was interviewed by me at his home in London.

"The movement we inaugurated," said the Reverend Mr. Handley, "was not directed particularly against the King, save as the leader of the wealthy social class in England, among which class, I must admit, the pursuit of pleasure is growing."

MORE ABSORBING DAILY.

We feel that if the King would lend his countenance to our efforts it would have an immense and far-reaching influence on all these people, who, to-day are leading perfectly empty existences—tearing about the country in motor cars with no object save pleasure; devastating whole tracts of fine agricultural districts in Scotland for no other purpose than keeping them as game preserves; yachting, theatres and amusements—leading, in fact, an absolutely vapid life."

"Could you give any instances of particular persons who live this way?" I asked.

"Without naming anyone in particular," replied Mr. Handley, "I know that there are a number of men in England with annual incomes of, say \$500,000, out of which they spend \$350,000 on nothing else but pleasure as I have mentioned."

"But what should these people do—does not the spending of their money benefit the community at large?" I asked.

"The spending of vast sums in mere pleasure does not benefit the community at large, as has been shown by such economists as John Stuart Mill and others. If one man employs labor to till the soil and the other employs the same labor merely to dig a hole and fill it up, the labor in one case is wasted; while in the other it is beneficial."

"What we claim is," continued Mr. Handley, "that people with \$100,000 a year income should live on \$5,000 a year and that the rest of their time and money should go to philanthropic and patriotic work of some kind—serving on local governing boards, or in

CHARITABLE INSTITUTIONS.

and so forth. The life and labor of the rich man are demanded by his country, and no man has a right to squander his time and wealth as he pleases. He has merely the right to spend as much as would keep him in health, and enable him properly to discharge the duties he owes to the nation. If the rich man with \$350,000 spent on himself were to spend nearly the whole of his money on benefitting, uplifting and helping his fellow man, what a great

HEALTH

EAT AN APPLE.

In these days of indigestion, Of fever and congestion, A new and pleasant remedy has lately come to light;

'Tis a cure-all pure and simple. The very latest wrinkle— Just eat a big round apple and you'll be all right.

Then good-bye to inflammation, To pain and ulceration; The vermiform appendix will be forgotten quite;

Throw away your pills galore, You won't need them any more? Just eat a big round apple and you'll be all right.

If swear words rise and choke you, If an awful thirst come o'er you, And you cannot find the keyhole in the middle of the night.

This will bring the peace of mind After which you long have pined— Just eat a big round apple and you'll be all right.

Then good-bye to palpitation, To germs and amputation, The surgeons and the specialists are in a dreadful plight;

Throw away your pills galore, You won't need them any more; Just eat a big round apple and you'll be all right.

SLEEP.

The object of sleep is presumably the restoration of nerve force, a form of energy about which little is known, and without which life cannot be sustained. In sleep we may obtain complete rest, both of body and of mind. But rest may be obtained without sleep, and sleep does not always afford rest.

In the ability to obtain restful sleep there is much variability in the same person at different times and under different influences. Profound sleep is generally more refreshing than light slumber, but the fact that one can be roused without difficulty does not always signify that his rest is deficient. Quiet slumber is always more restful than sleep that is broken by dreams, even though the dreams be so light as not to be impressed upon the memory.

The character of sleep is affected by many influences, both mental and physical. The person who, upon retiring for the night, fails to put away the cares of the day that is past, or borrows the thoughts of the morrow, is slow to reach the depths of sleep, and wakes but little refreshed.

An overfilled stomach prevents sound sleep, but hunger should be relieved before retiring, and for this purpose there is nothing better than a glass of warm milk.

The bed should be smooth, but neither too hard nor too soft; the position of the body preferably lying on the right side, with the head not too high, and the disposition of the limbs such as not to impede the circulation of the blood. It is generally better not to interfere with the fantastic attitudes of little children until they have slept awhile; but the head must never be permitted to remain covered.

For a wakeful child a warm bath at bedtime is better than drugs, and usually more effective; and it is a safe rule for older persons also to refrain from taking medicines to induce sleep until after they have tested the efficacy of the warm bath.

The amount of sleep required by a person can be determined better by the effects obtained than by the number of hours consumed, for it differs greatly with age and the condition of health. Few fallacies are more dangerous than that which is often adopted by busy people, more especially by those engaged in scientific or other forms of intellectual work, when they assume that the duration of sleep is largely a matter of convenience. The harmfulness of deficient sleep may not reveal itself un-

one of the buttons off my under-vest!" The same Mr. Tweed had golden knives and forks for everyday use, jewelled furniture, and a gateway of solid gold opening into a conservatory.

HORSES SHOD WITH GOLD.

This reminds one of another millionaire who had gold fittings to his stables and shod his horses with the same precious metal. And of another whose daughter possessed a bicycle with turquoises and brilliants.

A terrible wanton waste such freaks are to poor folks, yet seems better that millionaires should spend their money however foolishly, rather than hoard it up, as some have done, for the benefit of a few. One millionaire in New York owned a strip of land in the middle of the city which was just seven feet wide. When the adjoining plot was built upon, an offer of \$10,000 was made to him for the useless strip. The offer was indignantly refused, and the millionaire proceeded to build a house on it for his own occupation. And he did not even avail himself of the full seven feet of width. The largest room was six feet wide and ten feet long, and would only admit a table fourteen inches wide. Here the man lived, carrying his own coals, chopping his own wood, cooking his own miserable meals. He lived on less than \$500 a year, and died leaving behind him twenty-five million dollars.

MISERY AMONG MILLIONS.

Another miser millionaire lived with his family in extreme poverty. He underwent terrible hardships, even allowing his wife to go out charring, and one of his children to die of starvation. When he himself died his wife, old before her time, worn and grey, with wrinkled hands and weary face, found herself the possessor of over \$5,000,000. On the day of the millionaire's death his little child, a girl of eight, had no shoes to her feet.

Another millionaire, who made the mistake of hoarding his money, had no only son whom he determined to bring up rigorously in the belief that when he inherited his fortune he would know how to take care of it. He was taught to work hard for little money. He had no indulgences, and for all he knew he would not get a penny at his father's death. When this took place, and he found himself a millionaire, he proceeded to scatter the hoarded gold right and left. In five years he was penniless. To-day you could find him on Yarmouth beach, half starved, wholly hopeless, getting some sort of a living, somehow, amongst the fishermen there.

Why is it that poverty often has a curious attraction for rich men?

MANIA FOR DISAPPEARING.

One millionaire of the present day is in the habit of disappearing, living as a poor man for months and even years at a time. He has a house like a palace in Chicago. When he is at home he lives like a fairy prince, surrounded by the most extravagant luxuries. But when he goes for one of his mysterious trips he takes nothing with him but a small and shabby bag and the clothes he stands up in. Where he goes no one knows, and he does not tell. And he has been known to make \$100 last in many months.

But the freaks and whims of millionaires are usually exhibited in their houses. One man in Chicago lives in one that is an exact copy of Windsor Castle. Another lives in a mansion that is a model of the Castle of Chillon, and a third has an Elizabethan house furnished throughout with old oak, brass, and tapestry. No modern luxury or nineteenth century invention is allowed inside his house. Even the utensils in the kitchen are Elizabethan. The millionaire lives plainly on roast beef and beer, and refuses to allow such things as entrees or modern dishes on his table. He uses pewter plates, old silver, two-pronged forks, and horn knives. What little glass he uses is old and thick. No tablecloths are allowed, and straw covers the floor. He sleeps on short, narrow old oak four-poster bedsteads, and washes his face in a

A MODERN SOUP PLATE.

After they have built their houses, millionaires seem to turn their atten-

tion to marrying a third lady by means. He was poor at the time, but his wife's money brought good fortune. His wealth increased by leaps and bounds, and in a very few years he found himself a millionaire.

One morning he set out to see his solicitor, who had offices near the law courts. He dismissed his coachman at the door, saying that he would probably walk home, and passed into the office.

MADE HIS WILL AND WENT AWAY.

"I want," he said to his lawyer, "to make a fresh will, and I want you to make note of my wishes now and to bring the will for my signature to me to-night at my house."

The lawyer made preparations. He took his pen in hand and glanced at his client. He was known to be "odd at times," but his oddly puzzled the solicitor to-day. He looked ill, and his eyes had in them something that haunted the man of law long after he had gone.

"I want," said the millionaire, "to leave half my property to my son."

"To your son?" The lawyer dropped his pen. The millionaire was childless.

"To my son. He was born in Liverpool twenty-five years ago. My first wife died soon afterwards, and I deserted him. I disappeared. My sister took charge of him, and I have never seen or heard from her since. But I have watched my boy, and to-day he has just finished serving three years' imprisonment for fraud. He is out to-day and I—I have found that I have a conscience after all. It has been my fault that he has fallen into bad ways. I should have looked after him. I go to see him now. You, Mr. —, bring me the will to my house to-night."

He went out, leaving the lawyer considerably astonished. He passed out into the street, and the lawyer got the will ready, and that very night made his way to the millionaire's house.

But the millionaire had not returned. He was found two days later floating in the river somewhere below Hammer-smith. There were marks of violence upon him, he had been robbed, and it was proved that he had visited a disreputable tavern on the day he had seen his lawyer. In that tavern were several men who had served sentences, and amongst them an evil-looking youth, the millionaire's son.

The shock of the discovery eventually killed his wife. The lawyer, believing the son to have murdered, or assisted at the murder of his father, raised endless obstacles when he claimed the estate, with the result that it was thrown into Chancery, and is likely to remain there. And to-day the son is one of the cleverest professional begging letter writers known to the police.

LOZENGE CURE FOR DRUNKARDS.

Church Army in England is Supplying Antidote.

The Church Army of England is trying to make people sober by lozenge. Experiments have been on the way for a month, and in that time one hundred-weight of the new patent cure-preventive sweets has been sold. The experiment has succeeded, and testimonials from rescued drunkards are pouring in by scores.

The Rev. Wilson Carille sketched out the life history of the sweetener the other day. "Three physicians have put their hands together and made the lozenge. It is a successor to the Church Army nerve tonic, another and older aid to temperance.

"People told me that when they felt like drinking alcohol a draught of the tonic saved them," said the chief of the Church Army; "but one cannot always be drinking out of a bottle in the street; hence the lozenge."

Mr. Carille hopes to establish a lozenge factory in the near future but he was careful to point out that the charge of sixpence for some fifty-one lozenges leaves no margin of profit for the inventors. The lozenges are white and odorless; their shape and general appearance do not betray the user.

Two of life's urgent requisites are good health and a little more money.

his time and wealth as he pleases. He has merely the right to spend as much as would keep him in health, and enable him properly to discharge the duties he owes to the nation. If the rich man with \$350,000 spent on himself were to spend nearly the whole of his money on benefiting, uplifting and helping his fellow man, what a great change it would bring about in the state of our country?

"With our whole nation suffering from terrible social disorders, and with our institutions of learning crying for aid, is it right for these people to go on living as if life were an empty dream?"

"But how is this wonderful change to be brought about?" I asked.

"The man himself—the rich spend-thrift," replied the vicar, "must be converted. He must see the danger of England is the danger of other great prosperous empires in their prime. These wealthy men must be brought to see the uselessness of their existence. The rich man must set his teeth and clench his hands and, as the saying goes, decide to 'burn what he adored and adore what he burned.' The rich must begin to lead simple lives—they must sacrifice themselves to save the nation."

"But would you expect rich men to give up everything—their clubs, horses—and all their amusements?" was asked.

"No set rules can be laid down," was the reply, "but only the principle must be admitted that, at the present day, the rich in the country are throwing themselves more and more into the

VORTEX OF PLEASURE;

and they should be brought to a stand; call a halt and see where it is leading them. It means ruin both for themselves and the nation."

"But are there not certain rich men in England who are already leading simple lives?" I asked.

"There have been a few," was admitted, "but it must be general. If the rich people would only imitate the late Lord Leigh, lord lieutenant of Warwickshire. With an income of about \$200,000 a year, he practically gave up his whole life to the good of his district. He took an interest in all educational and poor work, visited the prisons, interested himself in the hospitals, and, in fact, was the life and soul of the country. His influence is felt there to-day, though he himself has passed away."

"If these rich people, instead of wasting their precious lives in hollow mockeries, would take a vital interest in the affairs of their fellow-men, how much happier they would be themselves."

"It is for this reason that our committee has decided to appeal directly to the rich to leave their extravagant ways; to give up both their lives and their wealth to the good of their fellow men. We cannot but feel that we shall reach many; and we are confident the conscience of the rich in England can be reached and will awaken to a sense of their duties. We hope for great things from this movement."

HOW LETTERS ARE ENDED.

There is a large choice for endings of letters, ranging from the official "Your obedient servant" to the friendly "Yours truly," "Yours sincerely," and "Yours affectionately." James Howell, the historian (1720), used a quaint variety, such as "Yours inviolably," "Yours verily," "Yours really," "Yours in no vulgar way of friendship," "Yours, yours, yours!" Walpole wrote "Yours very much," and to Hannah More, in 1789, "Yours more and more." John Bright ended a controversial letter in the following biting terms: "I am, sir, with whatever respect is due to you." The habit of the old Board of Commissioners of the Royal Navy to subscribe their letters to officers, "Your affectionate friends," was discontinued when a disgraced captain replied to them in similar terms. He was desired to discontinue the expression, and in consequence he ended his next communication, "I am, gentlemen, no longer your affectionate friend."

with age and the condition of health. Few fallacies are more dangerous than that which is often adopted by busy people, more especially by those engaged in scientific or other forms of intellectual work, when they assume that the duration of sleep is largely a matter of convenience. The harmfulness of deficient sleep may not reveal itself until the age of decline has been reached, but it will surely hasten the decline, and the weakened heart, the contracted blood-vessels, feeble digestion and damaged kidneys that result from it all unite to rob old age of its comfort.—Youth's Companion.

HOME TREATMENT FOR CONSUMPTION.

Families having members who are inclined to weakness of the lungs may do much at home to help in fighting the disease.

Tuberculosis is pre-eminently a disease of the mal-nutrition. Overcome this and the battle is won, failing in this, no matter what else may be accomplished the patient will die. Hence, everything done must be with a view to increasing the bodily nutrition.

Of all foods for the consumptive, milk and eggs easily stand first. They are readily digested and meet all the requirements of ideal foods. The following diet is recommended:

A glass of hot milk before rising at 7 a. m.

Breakfast at 8. Glass of milk beaten with two raw eggs at 10.

Dinner at 12.30. Glass of milk beaten with two raw eggs at 3.

Supper at 6. Glass of hot milk just before retiring. Beef tea is frequently substituted for milk and eggs. Milk is used as a drink at mealtimes. A cup of coffee or cocoa may be had with the breakfast and a cup or tea at supper.

It is not advisable to urge upon the patient a greater amount of nutriment between meals, as this is done at the expense of the appetite at mealtime. The meals must be well prepared, of the best the market affords, and placed upon the table in an attractive manner. The appetite must be tempted. Patients are in almost all cases able to go to the table.

Breakfast consists of a cereal with cream, beefsteak, creamed potatoes, toast and coffee or chocolate.

Dinner. Soups, roast meat, potatoes with one or two other vegetables from the garden, dessert of fruit and wafers, or a light pudding with milk.

Supper. Cold meat, baked potatoes, rice, fruit, sauce, tea, milk.

HEALTH HINTS.

Charcoal sweetens the breath after smoking, drinking or eating onions and other odorous vegetables.

For persons liable to cramp and kindred affections of the fingers, knitting is regarded as the most beneficial exercise.

In case of mental fatigue apples are a wonderful tonic. Apples in some form should be on the table or side-board at all times.

Obstinate cases of malaria, that have withstood the ocean voyages, mountain heights and quinine dosing, are said to have been conquered by systematic and continued walking.

People who are bilious should not eat hot meats, sweets, rich sauces, or pastry or cake of any kind. They should drink plenty of water, taking a glassful at night and one the first thing in the morning.

PUBLIC BATHS FOR DOGS.

Dresden, Germany has developed a curious idea. The public baths of that city will shortly receive an addition that is probably without parallel. The new annex will consist exclusively of bathing establishments for dogs, or, as they are called in the strictest lines of class distinction. There will be first, second and third class, sub-divided into swimming and single wash-baths. It is even gravely stated that there will be a hair-dressing department for canine customers.

Young 'Un—I've had five thousand left me by an uncle. 'O's new 'sen me! Old 'Un—That explains it!

S ME NARROW ESCAPES

DANGEROUS POSITION OF A MOUNTAIN CLIMBER.

Man Imprisoned on Top of Chimney—
Boy Fastened in Wheel of
Moving Vehicle.

Surely one of the most terrible experiences which ever befell man, says Pearson's Weekly, is that which befell the Hon. Gerald Fitzgerald while on Monte Rosa, in attempting to descend to Macugnagna. He had left the Margherita hut, and was tied between two Swiss guides named Alner, father and son.

On the way down they were passing along a dangerous ledge, when Mr Fitzgerald and the younger guide fell over. The rope held, however, and young Alner succeeded in dragging himself up over the face of the rock. After he had saved himself he returned to the Margherita hut, whence he telephoned to Alagna for immediate assistance.

It was impossible for Mr. Fitzgerald to raise himself, as he had broken his right leg. There he remained for seven long hours, supported by a rope and suspended over a precipice at a height of 10,500 feet. Could a more horrible situation be imagined? There he had to remain all those weary hours hanging BETWEEN LIFE AND DEATH.

It was the old guide who succeeded in supporting Mr. Fitzgerald the whole of the time. Old Alner stood motionless for seven hours, with his legs propped against a boulder, the whole weight of Mr. Fitzgerald being upon his body. Eventually, when help arrived, poor old Alner appeared utterly exhausted by the vast strain being put upon him. Eight guides and two physicians conveyed Mr. Fitzgerald to Alagna. It is needless to say that all the inhabitants warmly cheered old Alner as he came down the mountain.

A tourist named Gregorex has been on the edge of a precipice a much longer time than this, but still he was not suspended in mid-air. Mr. Gregorex was found on a narrow ledge of rock on the Emir, where he had been six days. Of course, he had been the whole of the time there without food or drink, and if he had moved he would have fallen down the side of a precipice 600 feet deep. It is surprising how long life may be maintained in the midst of cold. For instance, in Westmoreland a sheep has been discovered which was buried on Dent Fell for twenty-two days. It was got from the crevasse and thawed out, when it was able to walk a mile and a half home.

There has been built recently a great factory chimney in connection with Lowfield Mill, Belfield, near Rochdale. One day three workmen, named Walter Dempsey, Joseph Evans and Samuel Bardsey, were engaged in winding up some of the material for the top when it became entangled in the scaffolding and would move neither up nor down. Thus it was that the men were effectually imprisoned in their aerial position.

THE TOP OF THE CHIMNEY.

Eventually the Rochdale steeplejack, Joseph Smith, was summoned to the scene and he devised a method of escape. Acting upon his advice, one of the men tore his shirt into strings and tied the pieces together to form a rope. One end of this shirt rope was let down and to it was tied a good stout rope, which was hauled up to the top of the chimney and made secure. After this a saddle was fastened to the end of the rope and it was hoisted up, and eventually the men were lowered safely to the ground after four hours imprisonment.

The other day an errand boy, with a medicine box on his arm, jumped on the back axle of a cab at Teignmouth. The result was that the wheel of the conveyance dragged his box into the spokes and the boy after it. The boy's head was on the outside of the wheel and his legs inside, and in this position he was dragged a distance of 400 yards. At every turn of the wheel he revolved, and yet at the end of his remarkable ride he was not hurt.

Some little time ago the Keighley police were attracted to a pawnbroker's shop in Park street by the shouts of

amption and the bullet lodged in her head but could not be located. Recently, the girl said she thought the bullet had moved its position; later in the day she died. An inquest was held at Weedon, and it was proved that death was caused through inflammation of the brain, the bullet having been in the young woman's brain the whole of the time.

An almost miraculous escape from death was that of two little children in a bungalow in Bengal. A tiger rushed out of the jungle and broke in after the children. As he rushed at them he came across a looking glass, and there he saw what he took to be another tiger rushing at him. Furiously he attacked his reflection, smashing the glass into ten thousand pieces. The noise and excitement so frightened him that he fled into the jungle, leaving the children unhurt.

Fashion Hints.

THE LATEST MANDATES.

Short skirts for evening wear are still popular among very young women. For dancing there is no question about their being practical and decidedly comfortable. But a woman over 25 should not think of it.

Another little invention for the neck is out. It is a little velvet stole with short broad ends. It is worn inside the coat, as a sort of chest protector, hence the name of "muffler." The velvet is in rich dark colors, lined with pale satin, and on each broad end is embroidered a gold bow knot. Under a coat the effect is something like an embroidered velvet chemise.

One fashion is brought on by another as regularly as night follows day. The short sleeve so much worn this winter necessitates numerous devices to compensate for its chilly brevity. Of these the most recent is a half-sleeve of soft leather, beautifully lined and finished. This is to slip on over the forearm, either with a short glove or over one of elbow length. What with the hugeness of the muffs—also a consequence of short sleeves—the two-piece glove and these leather half-sleeves, it seems we might almost as well wear a full-length sleeve and be done with it.

Among hats, a very effective idea for trimming is a combination of small light grapes and a huge French rose of the same color—a sort of fawn. The foliage has a tinge of olive. This is very odd, but very stylish, and makes a good back or side trimming under the brim.

A French evening gown, remarkable for its beauty and simplicity, is made of light green messaline, trimmed with the creamy point d'Alencon, laid flat over the shoulders and following a sort of trellis design down the front to the floor. The diamond spaces formed by the trellis are embroidered in green silk of darker shade. On the buffed elbow sleeves are chiffon headings.

Behold an actual novelty in shirt waists. The newest mannish waist has taken unto itself a little rippling pepum or basque not over two inches deep. This is worn with a straight, narrow belt. A wide stock of the same material points down at the front and is finished by a Toby frill. This is a distinct innovation for the shirt waist. Plain and colored linens, wash silks, and challies make up in this style prettily for girls.

Women who seek the picturesque may now choose from three distinct styles. The vogue of princess lines allows the pretty chateleine style for slender figures. The straight front pointed stomacher, the full sweeping skirt, and the broad shoulder effects permit a close imitation of the dignified dress of the Tudors. At the same time, the short puffed sleeve, the square-cut, deep yoke of the Empire modes make gowns a la Josephine quite correct for the figures that can wear them.

THE S. S. LESSON

INTERNATIONAL LESSON.

JAN. 14.

Lesson II. The Wise Men Find Jesus.
Golden Text, Prov. 23. 24.

LESSON WORD STUDIES.

Note.—The text of the revised version is used as a basis for these Word Studies.

Glad Tidings to the Jews.—That Jesus of Nazareth was of a truth the long-looked-for and eagerly expected Messiah of the Hebrew people, the Son of David and the Saviour King of Israel, is the burden, though not the sum total of the first evangelist's message to his fellow-countrymen, who, having believed on Jesus for his work's sake, yet needed for the strengthening of their faith just such a setting forth of his life and work in the light of the Old Testament prophecies which in him found their complete and only fulfilment. The author's purpose being argumentative rather than biographical, he does not always in his narrative observe the exact chronological order of events for which the gospel of Mark is a better guide. In addition to endeavoring to strengthen the faith of Jewish Christians in Jesus as the Messiah, he sought also to enlarge the vision of those for whom he wrote by making plain that the kingdom established by Christ was universal in scope, embracing all nations and all peoples and thus abolishing all narrow Jewish limitations.

Very early tradition uniformly ascribes the writing of the first gospel to Matthew, one of the less conspicuous of the apostolic group. But the book itself does not mention the name of its author, and there are many able and conscientious scholars who believe that this tradition in its earliest form means simply that the substance of the gospel message, though probably not the form of the narrative, is to be ascribed to the apostle whose name the gospel bears. There is, however, no positive proof for this contention, the problem resolving itself rather into a question of the interpretation of the rather meager data available. We are therefore justified in assuming that the earliest tradition concerning the authorship of the gospel is correct—that is, that Matthew, the apostle, did write the gospel bearing his name and that he wrote it in substantially the form in which it has come down to us. Concerning the date and place of the composition of Matthew's gospel nothing definite is known, though the data available points to the years 68-70 as the approximate time and to Palestine as the probable place of its composition.

Verse 1. When Jesus was born.—Our present system of chronology, according to which we number years forward and backward from the birth of Christ (A.D., Anno Domini, year of our Lord, and B.C., before Christ), dates back only to the middle of the sixth century, about which time a Roman abbot, Dionysius Exiguus, is reputed to have been instrumental in inaugurating the system. But in fixing the date of the birth of Jesus which was to be the starting point of the new order of calculation an error was made by Exiguus and his co-laborers, the date of the Nativity being placed several years later than it should have been. From the gospel narrative we know that Jesus was born shortly before the death of Herod the Great. But Herod died in the year of Rome 750-751, which corresponds to the year which we now designate as B.C. 4 to B.C. 3. Hence Jesus was born at least as early as B.C. 4. But allowing for some months to elapse between the birth of Jesus and the slaughter of the babes at Bethlehem by Herod, and again between this event and the death of the king, during which time Joseph with Mary and the young child sojourned in Egypt (com. Matt. 2. 1, 16, 19), the more probable date becomes B.C. 5 to B.C. 4.

Herod the King.—Son of Antipater, governor of Idumaea (Edom), the territory south of the Dead Sea where dwelt the descendants of Esau, founder of the

YOUNG FOLKS

THE GARDEN OF LIVE FLOWERS.

One day Max and Maisie were scrambling about on the rocks at the foot of the cliff on which perched their summer home. I daresay nobody had ever before been on that shore of the island, for it was a bad landing place, and no boat could ever have come in from the sea on account of the big waves that dashed up on the sharp rocks; and nobody would have thought of scrambling down the steep cliff and over those rocks unless, like Columbus, he was an adventurous explorer, looking to see what he might find. And that is just what Max and Maisie were. They were explorers, and they had their eyes very wide open indeed to see what might be in this new place which they had never before visited.

They hopped over the little rocks and climbed over the big ones, and crawled under some and slid down others, which were very slippery, for the tide had just gone out. Here and there the rocks were full of little pools which the sun had not dried. There were shells and seaweed and star-fish in these pools. But the children did not stop to gather them, for they had seen so many like them many times before. So they scrambled on towards a big, big rock that stood up right across the way between the cliff and the foamy water.

"We can't go any farther," cried Maisie.

"O, we must go farther," cried Max. "Perhaps there is some big discovery just beyond. Why, Maisie, suppose Columbus had stopped the first time he was discouraged, he wouldn't have discovered America. And then where should we be now?"

Maisie could not answer that question. So they decided to go on. Max helped Maisie and Maisie helped Max, and they scrambled and climbed and puffed and panted, and bumped their knees on the rock, which was the hardest one they had ever climbed. But at last they came to the top, and beyond, down below, was a flat rock which the tide had just washed clean as a sandy floor.

"Pooh!" said Max. "I don't think that is very much to find. I hoped there would be a cave."

"Let's go down," said Maisie. "I think it looks nice. See there is a shelf over the edge. Perhaps there is a cave or something under this big rock. O Max, suppose there is!"

So they slid and scramble again, and it was a great deal easier to slide down than up, as you know. In a very few moments Max landed on all fours upon the flat platform, and in another minute Maisie had bumped down beside him. Then Maisie cried, "O, O!" Now, perhaps you think she said this because she had bumped her little nose on the rock and had plunged her foot into ice-cold water. But that was not the reason. Maisie never cried, even when she bumped herself hard, even when she fell into the water all over. For she was a brave little girl.

No; Maisie cried "O!" because she had made a Discovery. There was something under the shelf of rock down which they had slid. There was a pool of ice-cold water, and it was into this that she had plunged her leg. But that was not all. The pool ran under the rock and became a cave, a deep beautiful cave, all purplish-pink, with the roof tall enough for a child to stand upright, and a big rock in the middle to sit on, dry and comfortable.

Max cried "O!" too, as soon as he looked around, and in a minute the two children had scrambled into the cave and were sitting on the big rock, staring with all their eyes at the wonderful place. My! But I wish you could have seen how beautiful it was. It was a living flower-garden.

The walls were moist and dripping, where the tide had washed them clean. For at high tide this cave was all full of water, and no one could go in there. If the children had come at a different

was on the outside of the wheel and his legs inside, and in this position he was dragged a distance of 400 yards. At every turn of the wheel he revolved, and yet at the end of his remarkable ride he was not hurt.

Some little time ago the Keighley police were attracted to a pawnbroker's shop in Park street by the shouts of a man. There they found that the man had the upper part of his body protruding through the glass panel of a door. When the officers asked the man what he was doing he replied that he was wedged in and could not get out.

Then the constables tugged and pulled and jerked and pushed at the human carcass fastened in the door, but it was firmly wedged. It was necessary to break in the door before they could possibly release the man. When a policeman got inside the house to break the door he found a considerable number of articles of wearing apparel already packed.

IN READINESS FOR REMOVAL.

This is surely one of the most comical captures of a burglar ever known. When upon trial he appealed to be sent to Armley Jail instead of having to lie on the bare boards of Keighley police station, he told the magistrate, amid a considerable amount of laughter, that for a long time he would not like to sit and sleep on bare planks.

Lance Sergeant Murphy, of the Singapore water police, has had a remarkable adventure. It was set him to arrest two notorious gamblers who had taken refuge on a barge moored off the boat quay. Immediately the men sighted him they dived under the water. Sergt. Murphy, however, was not baffled, for he dived in after them and found the two criminals in the slimy mud at the bottom of the harbor. There he seized hold of them and brought them to the surface. He swam straightaway to the adjoining steps with his captives, and took them off to the police station.

A blind boy, who was left in charge of a baker's horse and van near the Clifton Suspension Bridge at Bristol, had a most marvellous escape from a cruel death. The horse walked straight over the cliffs and fell to the bottom, a distance of 200 feet. The boy himself tumbled into a tree, whence he was afterwards extricated unhurt, while at the foot of the cliff the cart was found smashed to atoms. The miraculous escape does not end here, as it was found that the pony was uninjured.

The stout old ship Fannie Kerr has had a miraculous escape. She was abandoned on fire in the Pacific Ocean in May of last year while on a voyage from Newcastle, New South Wales, to San Francisco. A short time ago this ship drifted ashore at South Cape, Formosa. She must have been a derelict vessel for over twelve months, and during the time she was abandoned it is calculated that she drifted nearly 4,000 miles. This is not bad for a ship that had been abandoned as unseaworthy.

A REMARKABLE ESCAPE.

From death is that of a girl who was admitted to the St. Bartholomew's Hospital in Rochester. This female patient was the daughter of a local police officer, and by some accident she had a needle thrust right into her heart. A remarkable operation was performed at the hospital as the result of which, after a considerable amount of suffering on the girl's part, the needle was successfully removed from the heart.

At the thirty-first congress of the German Chirurgical Association, held at Berlin, a very remarkable patient was introduced to the congress. This was a young man who, attempting suicide, shot himself with a small calibre gun. The bullet had penetrated his heart, but the wound had healed up very rapidly. The Röntgen rays were turned upon the man's heart and the bullet was discovered in the right ventricle, bouncing about with each beat. The man was for all the world as though his heart were a rattle. After some time the bullet gradually became encased and now it moves rhythmically with the heart without causing the slightest inconvenience to the patient.

Equally remarkable was the temporary escape from death of a domestic servant named Ellen Kiesby. Some years ago she was accidentally shot near North-

ures. The straight front pointed stonemacher, the full sweeping skirt, and the broad shoulder effects permit a close imitation of the dignified dress of the Tudors. At the same time, the short puffed sleeve, the square-cut, deep yoke of the Empire modes make gowns a la Josephine quite correct for the figures that can wear them.

The high-class shops show lengths of cloth, hand-embroidered in this style, and shaped somewhat, but not exactly, like the robe dresses. For wear at Southern resorts and later in the spring, the short coat is indispensable. Indications point toward Empire, and half-coat, half-cape effects, since both styles respond satisfactorily to dressy treatment.

The demand for hand-embroidery upon lace and textiles is undiminished despite its expense. We have seen, and not on one costume merely, but upon scores, roses and chrysanthemums joined by curling stems and leaf-sprays, embroidered in close satin-stitch over a raised filling, and scattered over the entire surface of the gown. The work is indescribably rich upon gowns of cloth or velvet, when embroidered in lustrous silk of the same shade. The finished result is that quiet elegance so universally admired, but so rarely attained.

Shoes and even spats are now captives to the spell of the embroiderer. Every high-class shoe shop is showing cloth and suede top shoes hand-embroidered in self-color and in flowers of nature's coloring. These beautiful boots are worn with visiting gowns only. We can conceive of nothing more incongruous than a pair of embroidered boots showing beneath a walking skirt.

Color is as lavishly used on hats as on gowns. Occasionally one sees the quiet effect of the monotone costume so good last year; but oftener, by far, we see a becoming hat, whatever its dominant color, worn with a gown of a different hue. Good taste, however, prevents the combination of colors that antagonize each other.

SMOKE RUINS PICTURES.

Art Treasures of British Nation Are in Danger.

'Until we rid London from the poison there can never be durable painting in the metropolis.'

Sir W. B. Richmond, B.A., pronounced this opinion at the final sitting of the conference on smoke abatement, held at Westminster recently.

"Pictures," he said, "become black or a deep yellow if shut up in a case for any period. Titan used to dry his pictures in the sun, and leave them in the open all night, and obtained the advantage of the morning dew. I have tried this in London, with disastrous effects."

"Marble is poisoned by smoke, and priceless Greek and Assyrian works of sculpture in the British Museum are slowly but surely decaying."

"The National Gallery is worth millions of money; the British Museum and South Kensington Museum are likewise worth millions, and private collections in London and other dirty cities are also priceless."

"Putting the matter on the lowest ground of commercial interests, is it wise to risk the certainty of destruction, which must come sooner or later unless public opinion forces that impenetrable talking house, Parliament, to legislate firmly and sternly?"

Sir John Primrose, of Glasgow, urged the making of a systematic comparative analysis of the air of towns and a consolidation of the law dealing with smoke emissions. A smoky atmosphere, he added, was inimical to health, conducive to depression and destructive of plant life as well as of building material.

ASHAMED OF RELATION.

Ellie—"You are always talking about your uncle Jim. It's strange I never see you with him."

Jim—"It would be stranger if you did. When I visit my uncle I look out that nobody sees me."

Ellie—"Why, is he such a bad man?"

Jim—"Well, he has his redeeming features."

king, during which time Joseph with Mary and the young child sojourned in Egypt (com. Matt. 2, 1, 16, 19), the more probable date becomes B. C. 5 to R. C. 4.

Herod the King—Son of Antipater, governor of Idumæa (Edom), the territory south of the Dead Sea where dwell the descendants to Esau; founder of the Herodian family and dynasty, and known later as Herod the Great. Soon after Syria and Palestine became part of the Roman empire, at the time of the invasion of Asia by Pompey the Great, this Idumæan family became prominent in Palestine affairs. In B. C. 37 Mark Antony, the friend and avenger of Julius Cæsar, placed Herod on the throne of Judea. Josephus enumerates eight wives of Herod, and he is known to have had two others; he had eight sons and six daughters. A cruel, unscrupulous, and ambitious tyrant on the throne, he nevertheless seems never to have indulged in religious persecution, and on different occasions proved himself a good friend of the Jews. His life was surrounded by plots, suspicions, and intrigues, and this doubtless accounts for the increased cruelty, as well as for the fear and misery of his old age.

Wise Men—Greek, Magi, a title given to learned men, priests, and physicians of the Persians and Babylonians, who were also versed in astrology, soothsaying, and in the interpretation of dreams. In Jer. 29, 3, 13, Balaam, a prince of the king of Moab, is given the title "Balaam the Magi." That the wise men were three in number, and that they were kings, is mere tradition resting on very meager foundation.

2. His star—A supernatural phenomenon vouchsafed these men to guide them first to Jerusalem and then to the house in Bethlehem (comp. verse 9). The simplicity of the narrative at this point is characteristic of all New Testament passages in which miracles are mentioned.

3. He was troubled—Herod's reign had been much disturbed by plots and intrigues, and as he grew older he became doubly suspicious and fearful lest some usurper or pretender should rob him on his throne. He knew also of the expectation of the Jews concerning Messiah who was to be their King.

All Jerusalem—All who heard of the visit and in inquiry of the wise men, especially those in authority whose position, like that of the king, was apparently endangered. An example of hyperbole.

4. Chief Priests and scribes—Mentioned in the Hebrew Scriptures, and who therefore might be expected to be familiar with every prophecy concerning the Christ, the anointed, that is, the Messiah. Probably members of the Sanhedrin are referred to here.

5. Thus it is written—in Mic. 5, 2, 4: "But thou, Bethlehem Ephrathah, which art little to be among the thousands of Judah, out of thee shall one come forth unto me that is to be ruler in Israel. . . . And he shall stand, and shall feed his flock in the strength of Jehovah, in the majesty of the name of Jehovah his God; and they shall abide."

8. Sent them to Bethlehem—In accordance with the information gained from the priests and scribes.

9. The star . . . went before them—They were not permitted to remain dependent upon the directions received from the treacherous king, who was already plotting the death of the newborn babe.

11. The house—Not necessarily the same in which the babe had been born, now doubtless some days, if not weeks, ago.

Frankincense and myrrh—Both resinous gums obtained from trees found in Arabia, used for medicinal purposes and for embalming, and very expensive.

12. Another way—Possibly proceeding south from Bethlehem, past Hebron, and through Idumæa eastward, or to the northeast across Jordan, leaving Jerusalem to the west.

Lots of men are too busy trying to save the country to catch an honest living.

ing with all their eyes at the wonderful place. My! But I wish you could have seen how beautiful it was. It was a living flower-garden.

The walls were moist and dripping, where the tide had washed them clean. For at high tide this cave was all full of water, and no one could go in there. If the children had come at a different time of day they might not have found the cave, and they would never have known that it was there. On the roof and sides of the cave grew all sorts of sea creatures—lichens and seaweeds and shells. The whole cave was painted a brilliant purple-pink, bright as Maisie's lips, and this looked very lovely through the green water. It was, I suppose, the painting of some little animal like a coral creature.

In the next place, up from the pinkness on the bottom of the cave grew tiny plants of seaweed, green and brown and yellowish, branching out like little trees and bushes, and waving in the water just as trees wave in the wind. There were sponges, too, growing on the rocks, barnacles and periwinkles, with their shells upon their backs. Among the seaweed lived pink and purple and yellow starfish, and big red crabs cuddled together in bunches under cracks of the rocks.

Here and there a funny little hermit crab scuttled about in his sly way, keeping tight hold of the shell house which he had stolen for his home, and acting as though he was afraid that some one would arrest him for robbery. Swimming around among the leaves of the seaweed trees Maisie spied a little conger eel, waving his two fins as though they were wings—this queer ocean bird!

But what made Max and Maisie cry, "O, O, O!" was the living flowers.

Living flowers! You have read in fairy-books about flowers that came alive, but this is no fairy-story, and these flowers were real, truly live flowers, flowers that were happy and hungry, that ate and drank and moved, opening and closing whenever they chose.

Some of the flowers were brown—little brown sacks with a daisy flower growing out of the end, waving its petals to and fro to catch its dinner of tiny live things that dwell in the sea water. Some of the flowers were green, some were yellowish-pink, some pale greenish-blue. There were flowers as big as roses, and others as tiny as babies no bigger than pin-heads. There was just one growing on the roof of the cave that was like a little ripe, red strawberry, and it looked good enough to eat! The greeny-blue flower stars had no stems, but grew flat on the rocks, and they looked like daisies with white centres.

One was growing in a little crack close beside Maisie's hand, and when she put her little finger down carefully into the white centre, which was the flower's mouth, it closed its petals tightly, for it thought that it had found something nice for dinner. It was a funny, tickly, prickly feeling, and Maisie did not like it. So she drew away her finger, but very gently, so as not to hurt the sea flower.

Then Max put his finger into the mouth of one of the big fat pinky flowers, and the feelers did not move. He tickled the flower gently, and it seemed to like this feeling, which I daresay was as new to the flower as the flower was to Max. For the children had never before seen a garden of live flowers.

For a long time the children sat and watched the wonderful things going on in the cave, and they never noticed that a storm was gathering out to sea. By and by they saw that the flowers were closing up, one by one.

"Why, what makes the flowers go to sleep?" cried Maisie. "It is not night yet, and garden flowers do not go to sleep until dark."

"It is growing dark," said Max. "There is a cloud coming over the sun." "Sure enough. A heavy cloud rolled over the sun, and all the flowers closed their eyes tight. Then Max and Maisie looked around out of the cave, and my! but they were surprised. A heavy mist was coming in from the sea and it was going to rain very soon. They had been so interested in the flower garden that they had not noticed.

"Oh, it's going to rain!" cried Maisie. "Let's run home."

THE HIGHLAND BAGPIPE

ORIGIN OF THE SCOT'S OWN MUSICAL INSTRUMENT.

The Average Englishman Neither Appreciates Nor Understands It.

According to the encyclopaedia, the bagpipe is a wind instrument the fixed characteristic of which has always been two or more reed pipes attached to and sounded by a wind chest, or bag which bag has in turn been supplied either by the lungs of the performer or by a bellows says the London Globe. The original instrument was presumably the simple reed, or shepherd's pipe, which was well known to the Trojans, Egyptians, Greeks and Romans. But the strain of blowing these ancient pipes was so great that some genius conceived the idea of having a reserve supply of wind in a bag attached to the pipes; and hence the bagpipe. The real instrument is believed to have been a skin of a goat or kid, with two pipes, through one of which the bag was inflated, the other emitting the sound. In early times the bagpipe was common in Great Britain and abroad. At one time there were five different kinds known on the Continent, some inflated by the mouth and others by bellows; while in the British Isles three kinds were known—the great Highland bagpipe, the Lowland bagpipe of Scotland (which closely resembled the Northumbrian) and the Irish bagpipe. In the great Highland bagpipe, which originally had but one drone, a valved tube from the mouth to an airtight bag, which has four other orifices, three large enough to contain the base of three fixed long tubes termed drones, and another smaller, to which is fitted the chanter. The three are thrown on the shoulder, while the latter is held in the hands. All four pipes are fitted with reeds, but of different kinds. The drones are tuned by means of sliders,

OR MOVABLE JOINTS,

and this tuning or preparation for playing, which generally occupies a few minutes of the pipe's time before he begins the tune proper, is heard with impatience by those not accustomed to the instrument. Indeed, it gave rise to the saying, applied in Scotland to those who waste time over small matters: "You are longer in tuning your pipes than in playing your tune."

The Scottish Lowland bagpipe, like the Northumbrian pipe, was in two forms, one consisting of a smaller and milder toned edition of the Highland instrument and the other a miniature of this and having the same relation to it as the life has to a German band. Its great drawback, from the point of view of the devotees of the Highland bagpipe, is that it is unsuited to perform what they consider the perfection of pipe music—the pibroch. These small pipes were, however, gentler than the Highland, having the same tone, but less sonorous. It was to the strains of such a bagpipe that Chaucer tells us the company of pilgrims left London, and it is the same instrument that is alluded to in Shakespeare as the Lincolnshire bagpipe. The Irish bagpipe is the instrument in its most elaborate form and is supplied with wind by a bellows. The drones are all fixed on one stock and have keys which are played by the wrist of the right hand. The reeds are soft and the tones very sweet and melodious, and there is a harmonious bass which is very effective in the hands of a good player.

THE IRISH INSTRUMENT

is fast dying out, but there is believed to be at least one player in Glasgow, an old man, bent with years, but devoted to his pipes, who takes his stand near the top of the

BURGLAR LIVED IN LUXURY.

Sumptuous Grotto With Environments of a Palace.

A cultured hermit, who gratified his refined tastes by appropriating his neighbors' goods, has been sent to the prison of Waldenberg, Switzerland on many charges of theft.

He lived in the greatest luxury in a grotto in the forest of Bretzwil, near Basle. When the police broke into the grotto they found it beautifully and artistically furnished. Shaded electric lamps threw a soft light on the apartment, the floor of which was covered by a rich Turkey carpet. The hermit himself lounged in a comfortable armchair, smoking a fragrant cigar. Half a dozen eichings after Meissonier and Millet hung on the walls, and in one corner stood a well filled book-case. Most of the volumes were of a philosophical nature, and included nearly all the works of Kant, Nietzsche and other modern German philosophers. At the time of his arrest he was reading a volume by the French poet, Paul Verlaine.

The larder was full of delicacies and fine wines, cigars and cigarettes. No fewer than seven different brands of champagne were found, and the discretion of the thief was apparent from the fact that only the choicest vintages were taken by him.

He had lived in the grotto, which is concealed in the middle of an enormous tangle of underwood, for two years, maintaining himself by burglaries which had deeply puzzled the police. He had fitted up an electric light plant himself. The work showed an intimate knowledge of engineering.

His discovery was due to a defective stove-pipe, which during his absence one day, emitted clouds of smoke, attracting the attention of a woodman. The woodman informed the police, who kept watch and saw the hermit returning one morning laden with the proceeds of his burglary. They lost him in the underwood, but finally stumbled on the grotto, where he was reposing after his toil.

STUDY CULINARY ART.

British Army Officers Institute a Course in Cooking.

The British military officer is learning to cook in addition to the other new duties which are gradually convincing him that the army is a serious profession.

For the first time in its history a class of officers assembled at the Army School of Cookery at Aldershot the other day for a special course of instruction in the theory and practice of military cookery.

This course is intended to give them the necessary knowledge to supervise the cooking of the soldier's food and to be a wholesome check on the shortcomings of the master cooks, who have managed hitherto, for want of practical supervision, to do pretty well as they liked.

Other classes of officers will, from time to time, be assembled at the School of Cookery until there is a qualified officer chef in every battalion.

Sir John French has decreed that every officer who has to take the responsibility of the cook houses and field kitchens on his shoulders is henceforth to be more than a figurehead.

For years it has been the custom in the army to leave all matters concerning the preparation of the soldiers' rations in barracks and in the field entirely in the hands of the master cook, a non-commissioned officer prepared for the position by a course of instruction at the Army School of Cookery.

Whatever that official chose to direct should be done, and whatever material he requisitioned was never questioned; and if things went wrong there was generally a plausible excuse to shift the blame from the shoulders of the automatic of the regimental cook-house.

SIX-FOLD MURDER.

KAISER MENACES EUROPE

HE MISSED HIS OPPORTUNITY TO ATTACK FRANCE.

May Succeed in Bringing About Confusion at the Coming Morocco Conference.

The close of the most eventful year in recent history finds European opinion inclined to regard the immediate political outlook with anxiety and apprehension, says a London correspondent. It is a pleasure to be able sincerely to disagree with the prevailing pessimism and to record a firm belief that the scarcely disguised fears of a general war in the near future will prove unfounded.

It is in England and France that political alarm is the greatest, and it finds a frank expression in the usual reviews of the year in the chief journals. Thus the London Times declares that the year closes with the horizon overcast with anxiety.

The Spectator says: "It cannot be pretended that the new year opens auspiciously," and "grave apprehension as to the future is entertained in Paris, not merely by the man in the street, but by persons of knowledge and responsibility."

The sole cause of all this anxiety is the universal suspicion felt regarding the purposes of a single individual whose name in England and France has become a synonym for danger to the peace of the world.

FEARED MOST TALKING PEACE.

And yet no man in Europe protests more insistently his love of peace than the German Emperor. He has literally come to pass that Emperor William is suspected and feared most when he proclaims the loudest his peaceful purposes.

The Spectator speaks the truth when it says that many well-informed Frenchmen believe the Germans have decided to attack them, and that they will be attacked with all the suddenness and overwhelming force that modern military organization renders possible.

A Paris correspondent, writing, after consulting the French Foreign Office, says, "France is not misled by the Kaiser's private pacific utterances. Nothing has passed officially to confirm the newly-developed peace views of the Emperor. The French authorities are surprised that official representatives of Germany in France are as frigid as ever; at least they show no eagerness in bringing officially to French ears the change of soul in their illustrious master."

WILL GERMANY ATTACK.

The best answer to all these alarms is contained in the question: "Is it reasonable to expect that Germany will attack France to-day after she is forewarned and ready, when she held her hand last summer at a moment when France was unprepared and almost at her mercy?" The time for Germany to have struck if ever, was last June. That opportunity will not recur. It is now a matter of common knowledge that war was only averted then by Great Britain's firm declaration that she would make common cause with France if Germany wantonly attacked her.

That position remains the same, for Sir Edward Grey, the British Minister of Foreign Affairs, has taken the earliest opportunity to announce the Liberal Government's adhesion to this policy. In addition, the French military position has completely changed in the last six months, and never was the French army so powerful as to-day.

COOLNESS WITH CHANCELLOR.

There is some confirmation from Berlin itself that the German Government realizes that the time has gone by for attacking France. It is reported that there is a growing coolness between Chancellor von Buelow and the Kaiser. The latter sees now that the Chancellor has played his cards badly. Instead of separating Great Britain and France he has thrown them completely together and has given France an opportunity to necessary military preparations. So it is said, the Kaiser has abandoned the

A JEALOUS LION.

Reacts Removal of Mate and Kills Animals Who Succeeded Her.

The demon of jealousy was responsible for an exciting scene in the lions' cage at Messrs. Bostock and Wombwell's menagerie, Belfast, the other morning. For a long time two magnificent lions, Duke and Duchess, which were christened when cubs by the Princess Royal in Edinburgh, have occupied adjoining cages. On Tuesday evening, however, Duchess was removed, and in her cage a South African lion and lioness were placed.

This roused the ire of Duke, the largest lion in captivity, and about 4 o'clock in the morning he commenced to demolish the partition. He soon tore it into splinters, and at once attacked the lion. By this time all the animals in the menagerie were howling in concert, and Mr. Bostock and the attendants hurried to the scene of battle. The two male lions were at each other's throats, while the lioness was crouching in a corner growling.

Duke made short work of his antagonist, and before anything could be done he had laid open his flank and torn out his windpipe. The attendants obtained pitchforks and tried to put a stop to the encounter, but without success.

Seeing that his opponent was dead, Duke attacked the lioness, and in a few moments she lay dead beside her mate, with a gaping wound in the throat. The victor then returned to his cage, and throughout the day showed no symptoms of unusual excitement. The value of the animals destroyed is said to be \$2,000.

MAKING CAMPFIRE.

When a camphor-tree in Japan has been felled, it is cut into chips, which are laid in a tub or a large iron pot, partly filled with water, and placed over a slow fire. Through holes in the bottom of this tub steam slowly rises and, as it heats the chips, generates oil of camphor. There is a closely-fitting cover to the tub, from which a bamboo pipe leads to a succession of other tubs similarly connected, the last of which is divided into two compartments, one above the other, and perforated between them, so that the oil and water can pass to the lower compartment. In the upper chamber is a layer of straw, which catches and holds the deposit of camphor in crystals, as it cools. The camphor is then separated from the straw, packed in wooden tubs, and sent to market. The Japanese use the oil for illumination and other purposes.

PERSONAL POINTERS.

Interesting Gossip About Prominent People.

The King of Greece is the greatest linguist among monarchs; he reads twelve languages, and speaks most of them.

The Duchess of Devonshire has preserved the freshness and vivacity of her youth to such an extent that she has earned for herself the sobriquet "The Evergreen."

The Mikado is very fond of outdoor sport, and warmly encouraged the introduction of football into Japan. He is a good hunter and fisherman, and an excellent shot with the rifle. His devotion to lawn-tennis is marked, and he is clever as a wielder of the racket.

King Leopold of Belgium is said to be the most frugal of all monarchs. He rises at six and works till nine o'clock in the morning, when he eats a little bread with marmalade, perhaps an apple, and drinks a cup of tea. This constitutes his breakfast. For luncheon he eats still less, often omitting this meal

THE BRAVEST MAN IN ENGLAND.

The sum of five hundred pounds was left by the will of a clergyman named Narcross, of Framlingham, to "the bravest man in England." The executors of the estate applied to the Duke of Wellington who replied: "It is gen-

is being tried, but there is believed to be at least one player in Glasgow, an old man, bent with years, but devoted to his pipes, who takes his stand near the top of the classic High street and to a small but appreciative audience renders Scottish and Irish airs on the bagpipe of Erin.

The bagpipe, though at one time fairly common, never obtained a firm hold in England. It lost favor and gradually deteriorated, until it is now practically extinct. A famous poet irreverently once compared its notes to "the shrill screech of a lame goose caught in corn," while another heretic writer likens its sound to a "horrible, noisy, mad Irishman," or to the cries of the "eternally tormented." To the Irish people it appeals more strongly; they still possess in a degree the feeling of attachment to the bagpipe which is so general among Scotsmen. There is evidence of this in the revival of pipe bands in certain Irish regiments. But it is undoubtedly more closely associated with Scotland, both in the Highlands and Lowlands, than with any other country; the particular instrument in use being the great Highland bagpipe, which, as already explained, consists of three drones, including the big drone, which was added about the beginning of last century; it is this type which has gradually superseded the Lowland pipe. There is no doubt that the bagpipe was in use in Scotland from a very early period; and it is in Scotland that it has been brought to the highest degree of perfection. Its music distinctly connects it with Scotland, as is clear in the pibroch, the strathspey, the reel, the march and other popular melodies. There are proofs that the instrument was cultivated in that country certainly in the twelfth century, and of its universal popularity as early as the fifteenth century; while in the seventeenth century nearly every town in the Highlands and Lowlands boasted of its piper.

It is not sufficiently realized that the great Highland bagpipe is fitted for

HIGHLAND MUSIC ONLY.

It is most offensive to those who understand and appreciate the instrument to hear English and other unsuitable airs attempted on it. It is the exponent of Highland music, and of that only. It also belongs to the open air as naturally as heather belongs to the hills and salmon to the sea lochs. It is quite a modern innovation, though a pleasing one, perhaps, to Scotsmen, for the pipers of Scottish regiments to play round the mess table after dinner. There has been quite a revival in the popularity of the bagpipe in recent years, and it is now heard in Irish regiments and in the Northumberland Fusiliers, the sides having been introduced into the Indian and Egyptian armies. These regiments are in every way entitled to have pipers, so long as there is no attempt to dress or otherwise disguise them in the Scottish national uniform. When all is said and done, the fact remains that the bagpipe, as at present patronized, is the national instrument of Scotland. To the Scotsman there is a particular charm about it that never fails to stir the blood. It intensifies his thoughts and inspires him in a manner which is difficult to describe in words. Nothing will rouse a Scottish audience as the pipes will, and no sound is more welcome at an open gathering than the wild notes of the national instrument.

Nail-biting is not always a wilful habit to be cured by some punishment, but sometimes an indication of the first stage of nervous degeneration. The habit should be treated as a disease. It affects the general health, as the pieces of sharp nail are swallowed, and may cause appendicitis. A little bitter aloes rubbed on the finger tips will cure it in children.

of the regimental cook-house.

SIXFOLD MURDER.

Prisoner Wears in Court a Flower in His Buttonhole.

Julius Linke, a glass manufacturer, was placed on trial for a sixfold murder at Camenz, Saxony, the other day.

The victims were his wife, four sons, whose ages ranged from 5 to 10 years, and his mother-in-law. The wife and children had been killed with an axe while asleep, and the mother-in-law, who appears to have been aroused during the murders, was strangled.

A watchman on a church-tower saw Linke's house ablaze, and called the fire brigade, which put out the flames. The mutilated remains of the six victims were found in the bedrooms, and Linke, who was in the house, declared he was unaware of the crime until he was aroused by the cries of fire in the street.

Linke, who is 36 years of age, is a tall, intelligent-looking man of distinguished appearance and dandified dress. He wore a flower in his buttonhole and was cool and self-possessed in face of the hostile feeling manifested against him in court.

When the judge pointed out to Linke that his shirt and trousers, stained with blood, were found hanging upon his own bedstead, the prisoner replied: "I suppose they were placed there by the murderer to excite suspicion against me."

The skulls of the victims were produced in court and the prisoner alone, of all the spectators, appeared to remain quite indifferent while Dr. Straet explained the nature of the injuries.

CHARGE OF THE LIGHT BRIGADE.

There can be no doubt that Tennyson founded the idea, metre, and movement of his grand poem, "The Charge of the Light Brigade," on Michael Drayton's "Battle of Agincourt," which was published in 1627. Here are two of its stanzas, in which the resemblance can be traced:

They now to fight are gone,
Armour on armour shone,
Drumme now to Drumme did grone,
To hear was wonder
That, with the Cryes they make,
The very earth did shake.
Trumpet to Trumpet spake,
Thunder to Thunder.

Upon Saint Crispin's day
Fought was this Noble Fray,
Which Fame did not delay
To England to carry.
O, when shall English Men
With such Acts fill a Pen,
Or England breed againe
Such a King Harry!

FRIENDSHIP AMONG FISHES.

The sea-cucumber, with long body, and mouth fringed with tentacles in a feathery circle, gives lodgings to smaller forms, which have been called its messmates, which actually live within its body, and swim in and out at will, thus finding a welcome shelter, and also feeding on the half-digested food of their hosts. In similar way sea-anemones, attached to a rock, and furnished with a circle of feelers or tentacles, with which they catch and hold their food, make friends with little fishes, which swim fearlessly within their grasp, and are constantly infolded for a few moments in what, to the prey of the anemone, would be a living tomb, but very soon the tentacles unclose and allow the playful little prisoner to escape at will. In similar fashion fish have been seen living and sporting within the arms of tropical starfish.

WANTED—LADIES TO DO PLAIN and light sewing at home, whole or spare time, good pay. Work sent any distance, charges paid. Send stamp for full particulars. NATIONAL MANUFACTURING CO. Montreal.

rating Great Britain and France has thrown them completely together and has given France an opportunity to necessary military preparations. So it is said, the Kaiser has abandoned the idea of reducing France to impotence.

There is little doubt that Germany's attitude at Algiers will be as aggressive and blustering as is apprehended, and nobody knows how to play this game better than the Kaiser. Heavy bluffing in a serious international crisis is dangerous, but it is least so when all the other participants are sincerely pacific in their intentions. The whole attitude of the French nation is admirable, and there is small chance of their being harried into a bellicose spirit or tactics. The panic of last summer has entirely disappeared. They are still intensely pacific, but are possessed of a stern determination to defend themselves to the uttermost.

GERMAN PRESS DELUSIONS.

The attempt of a section of the German press in the last few days to make it appear that the new Liberal Government of England cannot be relied on to support France has not had the slightest effect in Paris.

In fact, all the Governments which are to be represented at the Morocco conference are earnestly determined to settle all questions fairly and peacefully. Germany alone may have ulterior ends in view.

It is difficult to see how she can bring about a rupture save by the most wanton provocation. Even the Kaiser, inordinately ambitious as he is, can hardly put himself in the attitude of forcing an unnecessary war upon an unwilling world. Alarmists are justified, perhaps, in believing that he will attempt to create inextricable confusion in which the responsibilities will be obscured and any outcome may be possible, but if he succeeds in this it will be the fault of the members of the conference.

DETERMINED ON WAR.

It is not too much to assume that the Government will select representatives of sufficient ability to make this impossible. He can, of course, always turn to some other cause of dispute. This would mean that Emperor William is determined in one way or another to plunge Europe into war for what he might be able to gain from a general catastrophe. Such, indeed, is the only assumption on which the fears are based which find general expression to-day. Whatever may be said of the German Emperor, nothing in his words or deeds justifies a belief so abhorrent.

Turning from the immediate crisis to the general European situation, there is nothing to arouse fears of a cataclysm. The Russian insurrection is strictly domestic. No one can forecast its end. Whether the country remains one nation or splits into several sovereignties, need not involve the destiny of the other powers. The balance of power in Europe has undoubtedly been destroyed by the Russian collapse.

It must be restored by one method or other, but the problem need not involve the arbitrament of the sword. No nation in Europe except perhaps Germany, has any territorial ambitions on the continent. The desire for peace in the world at large was never before so strong. The Morocco conference itself instead of involving dangers to the world's peace, may furnish the inception of that league of peace between Great Britain, France and the United States, which is gradually becoming large in the domain of practical politics.

EXTRAORDINARY DENTISTRY.

Perhaps the greatest dental operation on record was performed upon an elephant in the city of Mexico. The aching tooth was 12 inches long and 4 inches in diameter at the root. After Mr. Elephant had been securely fastened with chains his mouth was prised open and a quantity of cocaine applied to deaden the pain. When this was done a hole was bored through the tooth and an iron bar inserted. Then a rope was twisted round the bar and four horses attached.

The sum of five hundred pounds was left by the will of a clergyman named Narceross, of Framlingham, to "the bravest man in England." The executors of the estate applied to the Duke of Wellington, who replied: "It is generally thought that the battle of Waterloo was one of the greatest battles ever fought by the English. The success of the battle turned on the closing of the gates of Hougoumont. These were shut in the most courageous manner, at the very nick of time, by Sir James Macdonnell; and he is the man to whom you should pay the five hundred pounds." When Sir James was told of this, he said: "I cannot claim all the credit for closing the gates of Hougoumont. My sergeant, John Graham, seeing with me the importance of the step, rushed forward to help me; and by your leave I will share the legacy with him." His modest and honorable request was granted.

THE MAGIC OF FIGURES.

Among many ingenious methods of telling a person's age the following is one of the best. Let us suppose that a boy is fifteen and that his birthday is in August. Tell him to write down on paper the number of the month in which he was born, and to proceed as follows, without of course, telling you the figures:

Number of month	8
Multiply by 2	16
Add 5	21
Multiply by 50	1050
Add his age	1065
Subtract 365	700
Add 115	815

When the boy has completed these steps he tells you the result, and you can at once tell him that August, the eighth month, is the month of his birth, and that his age is fifteen. The two figures on the right of the result always indicate the age up to 100, and the remaining figure or figures tell the month.

EARLY USE OF TAR AND FEATHERS.

We learn from the English annals of the historian Hoveden, who was Court Chaplain to Henry III., that the old custom of tarring and feathering is one that dates back to the time of Richard the Lion Hearted. He tells us that this renowned king, on setting out for the third crusade, made this enactment, among others, for his fleet: "A robber who shall be convicted of theft shall have his head cropped after the fashion of a champion, and boiling pitch shall be poured thereon, and the feathers of a cushion shall be shaken out on him, so that he may be known, and at the first land at which the ship shall touch he shall be set on shore."

SOMETHING ABOUT SURNAMES.

Surnames were so-called originally from the early practice of writing them over the Christian names. Instances of this custom can still be seen in court-rolls and other ancient documents. They were first used in France, particularly in Normandy, and were introduced into England by the Normans after the Conquest. A very common source of their derivation is the good old Anglo-Saxon son, combined very often with the s of the possessive case. Thus we can derive from

Harry: Harrison, Harris, Herries.
Andrew: Anderson, Andrews, Henderson.
Walter: Watson, Watts, Watkins.
David: Davidson, Davies, Dawson, Daws.
Hodge: Hodgson, Hodges, Hutchins.
William: Williamson, Wilson, Wills.
Michael: Mixon (Mike's son).
Anna: Anson.
Nelly: Nelson.
Patty: Patterson.
and many more of similar sort.

THOUGHTLESS.

"Do you know, I have the greatest trouble in the world keeping my umbrellas?"
"How so?"
"I'm so careless. I forgot to remove the initials from the last three I had, and the owners recognized them."

POLITICS IN ENGLAND

SOME WAYS OF TREATING THE CHRONIC HECKLER.

Instances of Rapid Retorts at Public Meetings Given by British Statesmen.

The best way to treat a heckler at a political meeting is undoubtedly to humor him, not in the sense of tempting him to continue his pursuit, but in that of reducing him to silence by a witty reply, a course that rarely fails to find favor with the other members of the audience, says London Tit-Bits.

There are occasions, of course, on which the candidate finds himself in hopeless difficulties when seeking for a retort. For instance, some years ago Mr. Willis was orating at the top of his voice in a most strenuous manner, and he happened to use the well worn phrase from "David Copperfield," "Barkis is willin'," when a man in the back of the hall bawled out, "No, Willis is barkin'!" the laugh being against the politician.

One is bound to admit, however, that the ready witted candidate has frequently extricated himself from a desperate situation in the most triumphant manner when other men would have been COVERED WITH CONFUSION.

When Charles Burleigh, the Abolitionist, was called upon to answer a cowardly and despicable "rotten egg" heckler, he did so by calmly remarking as he wiped his face: "This is a striking evidence of what I have always maintained, that pro-slavery arguments are unsound." The late Sir Henry Havelock-Allan got over the difficulty by fixing his eyes on the spot whence the almost winged messenger had been projected into space, and remarking, with just the slightest indication of disgust, "I say, my friend, the hen that laid that egg had a very bad breath."

It is a strange circumstance that whereas candidates can perpetrate veritable herds of "bulls" without exciting the retort unbecomingly from the heckler, the same individual regards a quotation delivered in a language other than his own with feelings similar to those entertained by another species of bull when a red rag comes within his range of vision.

When at the general election of 1900 the chairman of an overflow meeting at Burnley remarked that many of our brave soldiers were sent to the front "without a pair of trousers to their backs" his remark failed to bring forth a comment from the heckler, while a statement of a platform speaker at Chipping Norton, about the same time, to the effect that the Unionist candidate had "laid down his life for his country, and expected to be returned by a large majority," was received with

TUMULTUOUS APPLAUSE.

"Why such remarks as these should not be commented upon, when so many others, far less provocative of interpolation, should be seized upon, it is difficult to say; but there are occasions, such as that upon which Sir Lewis Molesworth informed the electorate of Rodmin that "Home Rule is only dead so long as we keep it alive," when the nature of the remark temporarily deprives the heckler of his breathing capacity.

With regard to the foreign quotation interpolation, probably no more effective way of dealing with it could be devised than that resorted to recently at a trans-Atlantic political meeting, when Mr. J. H. Hawthornthwaite, a Lancashire-born man, though a member of the British Columbian Legislature, innocently let drop a Latin quotation, with the usual result that he was admonished to "talk to us in a language we can understand," whereupon, without a moment's hesitation, he turned to the heckler and made the hall re-

sound to a stentorian cry of "Hee-haw! Hee-haw!" When the convulsion of laughter had subsided, the speaker completed his adversary's discomfiture by quietly adding, "I regard it as a duty to oblige my friends to the best of my ability."

Although the sledgehammer retort is very effective in quelling the contumacious heckler, it can scarcely be expected to earn the vote of the victim, whereas the gentle answer that turneth away wrath undoubtedly has that pleasing effect at times. The Right Hon. John Morley is one of the few political speakers who can quell a heckler with a smiling retort as effectively as the famous Campbell, of Monzie, who, when he asked an Edinburgh burgess to vote for him and received the angry answer, "Vote for you! I'd sooner vote for Satan himself," sweetly replied, "Yes, but if your friend doesn't stand, may I depend upon your support?" a remark that earned him

A STAUNCH ADHERENT.

A short time ago, when Mr. Morley was speaking at Montrose, a heckler demanded permission to put an important question to the right honorable gentleman, that turned out to be, "Why doesn't he play golf?" in answer to which the sitting member probably retorted, "I don't think I'm old enough to begin yet," a statement that excited much hilarity, and put the audience on excellent terms with the speaker.

That success, however, does not always rest with the candidate was clearly indicated when Mr. J. Balfour Browne, K. C., was recently speaking in Dumfriesshire and an elector remarked: "Had we not better utilize our own resources to the full allowing labor and capital free access to the land of our own country instead of attempting to bolster up certain industries at the expense of others?"

Said the candidate, with emphasis: "I do not follow the question. It sounds like a question taken from a book on political economy, the author of which did not know much."

Then did the heckler lift up his voice a second time and remark: "It is taken from your own valuable book, Mr. Browne, on fiscal reform."

The situation in which Mr. Browne found himself was not, perhaps, particularly desirable, but it might have been worse. Candidates will recall with a shudder, for instance, that terrible moment when a speaker, wishing to emphasize his strict regard for the truth, remarked that in his youth he had been thrashed for telling it, when from the back of the hall was wafted through the atmosphere the cutting comment, "I guess it's cured yer, gov' nor!"

PORCELAIN OR GOLD?

"At one time," said a dentist, "everybody wanted his front teeth filled with gold; but now there are plenty of people who regard gold fillings that show as unsightly, and who have their front teeth filled and built up, if required, with porcelain, which matches the teeth in color. This porcelain work is one of the latest advances in the development of modern dentistry. In filling a tooth with gold we drill out the cavity, to make it larger within than at the opening, but the cavity for a porcelain filling is made slightly larger at the opening than at the base. The porcelain filling is held in place not by the narrowing in of its retaining walls at the opening, as is the case with other fillings, but by cement. There are many shades of porcelain material, there are also many inlay cements of many shades. The proper shade of cement having been selected and the surface around the cavity and that of the back of the inlay having been suitably roughened to make the cement hold the better, you mix the cement and apply it, and set the inlay into place, there to be held until the cement is hardened.

41,000 MILES OF POSTCARDS.

If you take the Postmaster-General's returns, some very interesting figures can be worked out, by the aid of simple arithmetic, to show the mass of post-

SUNLIGHT SOAP

Wash oilcloths and linoleums with warm water and

Sunlight Soap, rinse clean and wipe dry. The colors will be preserved and the surface unharmed.

Common soaps fade the colors and injure the surface. Sunlight Soap cleans, freshens and preserves oilcloths and linoleums.

Sunlight Soap washes clothes white without injury to the most delicate fabrics, or to the hands, for it contains nothing that can injure either clothes or hands.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way (follow directions).

Equally good with hard or soft water.

LEVER BROTHERS LIMITED, Toronto

LONDON STREET NAMES

THEIR ORIGIN IS A SUBJECT OF NO LITTLE INTEREST.

The Streets of the World's Metropolis Have Some Very Peculiar Appellations.

Many of the streets of London owe their appellation to the trade of which they were formerly the scene. Thus the Poultry marks the spot where in olden times the poulterers congregated; Coleman Street indicates the ancient resort of the coleman of charcoal-burners; Bread Street that of the bakers; while Budge Row was formerly inhabited by the dealers in "budge," a fine lambs' fur used for edging scholars' gowns.

Friday Street marks the old-time mart of the fishmongers, to whom Friday was the most busy day; in Trump Street dwelt the makers of trumpets that were used by the city watchmen and at tournaments; Cannon Street is a corruption of Candlewick Street, so called from the candle-makers that lived there; and Sermon Lane is an abbreviation of Sheremonger Lane, the abode of the shermoneymongers, whose vocation was that of shearing or clipping the bullion into shape for coinage at

THE OLD EXCHANGE.

Old Jewry and Jewin Street mark those parts of the town set apart in medieval times for the Jews; Lombard Street derives its name from having been the dwelling-place of the Lombards, who succeeded the Jews as the moneylenders and bankers of England; and Fetter Lane, formerly Fewtor Lane, is, according to Stow, so named from having been the resort of loafers, or fewtors, as they were formerly called. Some, however, aver that it owes its appellation to having been a sanctuary for "defayers," i. e., defaulting debtors, while others declare that it was the head-quarters of the felters or felt-makers.

Innumerable instances can be cited of streets being called after their builder, landlord or principal inhabitant. When the second Duke of Buckingham sold his House for building purposes he stipulated that his name should be handed down to posterity in the streets built upon his former property. To this we owe George, Villers, Duke, and

of the Franciscan Order, calling themselves Sorores Minores, became popularly known as Minoretresses.

Knighttrider Street bears us back to the days of chivalry, when knights rode that way on their road to the tournaments that were held at Smithfield.

GILTSPUR STREET

derives its euphonious name from the gilt spurs which these same knights wore as they went in procession to the lists. Pall Mall, as all know, was originally the spot where the game of pell-mell was played.

From not such savory origins have the names of some streets sprung. Houndsditch was primitively a ditch outside the City walls, into which garbage and carrion—a great part whereof consisted of dead dogs—were flung; Laystall Street, Clerkenwell, was so named from the open places—called laystalls—on to which refuse was thrown which were situated in the neighborhood.

Perhaps, however, no street name has a more curious and, indeed, more interesting origin than that of Beer Lane, Great Tower Street. This was formerly Beere Lane, and indicated the way by which Henry III.'s white bear—a present from Norway—was daily conducted from the Tower to Great and Little Bear Quays, now occupied by the site of the Custom House, whence it would dive into the river and catch fish. It was the duty of the Sheriffs of London to see that this ceremony was duly observed.—London Tit-Bits.

BRACING THE NERVES.

The number of people who suffer from "nerves" is very remarkable. It is the same in every country, and every nationality seems to have its own particular method for "bracing the nerves." Tea drinking is almost an international cure, but experts tell us that this is the least successful. It acts as a tonic, but the reaction is very harmful. Perhaps the best "bracer" for tired nerves is cold water. Russians make the most use of this cure. The face is splashed in cold water, and the hands held in it for four or five minutes. Then half a glass of pure fresh water is taken. The Japanese drink very hot milk, sipped slowly, very beneficial, and this, by the way, is strongly recommended by many medical men in this country. Many French doctors advise patients

EARN CASH

In Your Leisure Time

out a moment's hesitation, he turned to the heckler and made the hall re-

ment hold the better, you mix the cement and apply it, and set the into place, there to be held until the cement is hardened.

41,000 MILES OF POSTCARDS.

If you take the Postmaster-General's returns, some very interesting figures can be worked out, by the aid of simple arithmetic, to show the mass of paper which the postal authorities have to deal with. For instance, during the last twelve months no fewer than 734,500,000 postcards went through the post. If you placed these cards end to end, they would stretch away over 41,000 miles, or cover the distance between Liverpool and New York nearly fourteen times. Placed side by side they would cover an area of about 8,501,157 square yards, and if piled upon one another would extend upwards about 362 miles. Taken at the lowest estimates, the cost of sending these postcards amounted to £1,530,233. Just 2,024,600,000 letters went through the post. Even the Postmaster-General could not tell you how far their contents would extend, but, taking the lowest possible estimate of one penny per letter, we find that it would amount to £10,935,833 odd, and possibly their postage actually cost one-third as much again.

Innumerable instances can be cited of streets being called after their builders, landlords or principal inhabitants. When the second Duke of Buckingham sold work House for building purposes he stipulated that his name should be handed down to posterity in the streets built upon his former property. To this we owe George Villiers, Duke, and Buckingham Streets. At one time his name and title were commemorated in all by the existence of an Of Street, which, however, has now disappeared.

CATHERINE STREET

commemorates the visit of Peter the Great, after whose wife it is named; the navy was so called out of compliment to the Uncle of Eleanor, wife of Henry III. who, when he came to England, was created Earl of Savoy and Richmond; Little Britain marks the site of the palace of the Duke of Bretagne; and Bull and Mouth Street, Aldersgate, commemorates the capture of Boulogne Mouth, or Harbor, by Henry VIII. in 1544.

Blackfriars, Whitefriars, Charterhouse Square, Mincing Lane, and Crutched Friars reminds us of the many religious orders that at one time had their abode in London. So too does the Minories, where formerly stood the Abbey of St. Clare, whose inmates, a body of nuns

is cold water. Russians make the most use of this cure. The face is splashed in cold water, and the hands held in it for four or five minutes. Then half a glass of pure fresh water is taken. The Japanese find very hot milk, sipped slowly, very beneficial, and this, by the way, is strongly recommended by many medical men in this country. Many French doctors advise patients who are suffering from nerves to sit quietly for half an hour barefooted.

LONGEVITY AND LIQUOR.

It has come to be generally recognized as a fact that the alcohol habit is one of the main factors in determining the length of life. Figures furnished by insurance companies in England show that the average life of the total abstainer is nine years longer than that of the drinker, and one of our own concerns in the same line of business, the Equitable, has published a statement to the effect that the death rate among "moderate" consumers of liquor is 23 per cent higher than among teetotalers. Some of the companies on both sides of the water, indeed, put abstainers in a separate class among their policy-holders, making them a special allowance of 5 per cent, or more on premiums

EARN CASH

In Your Leisure Time

If you could start at once in a business which would add a good round sum to your present earnings—WITHOUT INVESTING A DOLLAR—wouldn't you do it?

Well, we are willing to start you in a profitable business and we don't ask you to put up any kind of a dollar.

Our proposition is this: We will ship you the Chatham Incubator and Brooder, freight prepaid, and

You Pay No Cash Until After 1906 Harvest.

Poultry raising pays.

People who tell you that there is no money in raising chicks may have tried to make money in the business by using setting hens as hatchers, and they might as well have tried to locate a gold mine in the cabbage patch. The business of a hen is—to lay eggs. As a hatcher and brooder she is out-classed. That's the business of the Chatham Incubator and Brooder, and they do it perfectly and successfully.

The poultry business, properly conducted, pays far better than any other business for the amount of time and money invested.

Thousands of poultry-raisers—men and women all over Canada and the United States—have proved to their satisfaction that it is profitable to raise chicks with the

No. 1—60 Eggs
No. 2—120 Eggs
No. 3—240 Eggs

CHATHAM INCUBATOR AND BROODER.

"Yours is the first incubator I have used, and I wish to state I had 52 chicks out of 52 eggs. This was my first lot, truly a 100 per cent. hatch. I am well pleased with my incubator and brooder. THOS. McNAUGHTON, Chilliwack, B.C."

"My first hatch came off. I got 170 fine chicks from 190 eggs. Who can beat that for the first trial, and so early in the spring. I am well pleased with incubator, and if I could not get another money could not buy it from me. Every farmer should have a No. 3 Chatham Incubator.—F. W. KASAT, Dunnville, Ont."

"The incubator you furnished me works exceedingly well. It is easily operated, and only needs about 10 minutes attention every day. H. MCGUFFIN, MOORE JAW, ASSA."

The Chatham Incubator and Brooder is honestly constructed. There is no humbug about it. Every inch of material is thoroughly tested, the machine is built on right principles, the insulation is perfect, thermometer reliable, and the workmanship the best.

The Chatham Incubator and Brooder is simple as well as scientific in construction—a woman or girl can operate the machine in their leisure moments.

You pay us no cash until after 1906 harvest.

Send us your name and address on a post card to-day.

We can supply you quickly from our distributing warehouses at Calgary, Brandon, Regina, Winnipeg, New Westminster, B.C., Montreal, Halifax, Chatham. Address all correspondence to Chatham. 314

THE NEW WILSON BUILDING

NOS. 60 AND 62 FRONT STREET WEST,

TORONTO.

ABSOLUTELY FIREPROOF.

SEVEN-STOREY HIGH.

Wholesale Warehouse Flats FOR RENT.

10,000 Square Feet to Each Floor.

THE only absolutely fireproof warehouse in Toronto will be ready for occupancy in a week or so. This new building is built entirely of concrete and steel and wired glass, without a particle of wood anywhere in its construction, even partitions, doors and windows are unburnable. The insurance rate for these reasons will be as low as 30 cents on \$100. The average wholesaler, occupying, say one floor of 10,000 square feet, would carry a stock worth at least \$100,000. The saving to the tenants in insurance alone on stock carried in this building will therefore total about **Sixteen to Eighteen Thousand Dollars annually**, as compared with the cost of insurance in other buildings in Toronto. Consequently a tenant could better afford to pay nearly \$2,500 per floor additional for accommodation here. Rentals, however, will be no higher than in buildings where insurance costs eight to ten times this low rate.

OTHER FEATURES of this exceptional building are **Magnificent Light**, nearly all glass on three sides; **Unusual Floor Strength**, the floors have already stood a test of over 1,200 pounds to the square foot—**Two Passenger and Three Freight Elevators**, and unequalled shipping facilities, as the building is **directly opposite the New Union Station on Front Street**, Toronto's recognized wholesale centre.

Firms contemplating moving to Toronto, or opening branches or offices there, should be interested in this building and in the proposition I can make on large or small space, groups of floors, single floors, or parts of a floor. The opportunity of securing this space is not likely to remain open for long, as several floors are already spoken for and new firms are opening in Toronto daily. For space and terms apply to

Silver Wedding

On Friday evening, January 5th 1906, about forty relatives gathered at the hospitable home of Mr. and Mrs. George W. Taylor, Shannonville, to celebrate the twenty-fifth anniversary of their wedding. A bountiful six o'clock dinner was served after which music and social converse made up a most enjoyable evening. After a late hour the company left for their homes wishing Mr. and Mrs. Taylor many happy returns of the day, leaving them beautiful gifts as reminder of the auspicious event. Mr. and Mrs. Taylor are parents of seven interesting children, all at home. Those who attended from a distance were: Mr. and Mrs. Edward Long, Mr. and Mrs. John James, Trenton; Mr. and Mrs. Isaac Taylor, Mrs. Willett Vaneau, Napanee; Clayton Taylor, Lvn; Mr. and Mrs. B. Osborn, Rossmore, P. E.; Henry Taylor, Belleville; Dr. and Mrs. Fred Taylor, Carson City, Mich.

Burned to Death.

Very sad indeed was the death of Mrs. Uriah Sills, of Richmond, which occurred on Thursday morning. On Wednesday morning while engaged in cleaning a lamp, the lamp broke and the oil falling on the stove and on Mrs. Sills clothing, in an instant Mrs. Sills was a mass of flames. Her husband ran to her assistance and quenched the flames but the burns were so severe that after a day of awful suffering Mrs. Sills passed away on Thursday morning. Mrs. Sills' maiden name was Addie Cecelia Haskell, and by her death, her husband loses a loving wife and her friends an esteemed neighbor and friend. The funeral will take place to-day from her late residence, Richmond, services will be conducted at the house, after which the remains will be placed in the Western Cemetery vault.

Mr. Uriah Sills is so badly burned about the arms as to be almost helpless and will be confined to his home for some weeks as a result of his gallant efforts to save his wife.

Carko Magnetic Razors.

A Coming Cold Snap.

Sleet and snow will take up their march across the country from the 8th to the 10th, says Hicks. These storms will reach their culminating crisis about the full moon on the 10th. Renewed storms of blizzards sleet, rain, snow, and high gales from the north-west will be most natural at this time. Seismic and volcanic disturbances will be reported on or near the 10th. One of the coldest periods of the winter should surprise none of our readers from about the 10th to the 14. The extreme southern part of the country will not escape the effects of colds and frosts at this time.

Jan. 16, 17, 18th.

A Happy Gathering.

January First, 1906 the beautiful home of Mr. and Mrs. Thomas Symington, John street, was the scene of a happy and well spent evening when the Men's Bible class of the Brick Church of which Mrs. Symington is and is much the teacher for many years, and is much interested in the class, invited the members and their wives to enjoy an evening at her home. There was about 30 entertained in a most interesting and instructive way. First a general hand shaking and welcome to all, and a social time for an hour, and then the invitation to the large dining room where was found all the delicacies of the season in abundance and each and every one seemed and did show themselves master mechanics at this part of the second act. After all had been satisfied and a few appropriate toasts had been given, the class divided and chose sides in one grand debate, the subject being which, Imagination or Reality does more for the benefit of mankind. Each member gave his opinion alternatively from each side until nearly all had been heard from. It seemed as though the case was won by the Reality side until from the farthest corner of the room came the sweeping wave from Mr. Thomas Symington which lasted but a few minutes but washed all our hopes far out to sea leaving the Imagination side winner of the debate. Then all retired to the parlors where instrumental and vocal music was heard for a time, then as the evening was far advanced, a beautiful prayer was offered by Mrs. Symington for the preservation of her class and all who love and obey the Lord our Saviour. Then a vote of thanks was given to Mr. and Mrs. Symington for the kindness and benefit derived from the occasion.

Admission 10c.

Direct from the Potteries in Europe.

at 7:30 p.m. and on Tuesday 23rd, three sessions. At the Monday evening session which will be a grand Rally of the Sunday Schools of the town and all others who wish to attend. The chair will be occupied by the President, Mr. I. B. Hudgins. Good music will be furnished. The Provincial Secretary, Mr. J. A. Jackson, B. A., of Toronto, will be the principal speaker. Mr. Jackson will also give addresses at each session on the following day besides a number of others who will take part. All interested in Sunday School work are urged to attend and each school in the county should be represented. Billets will be provided for all delegates. For further particulars, see programmes.

"Herpicide" guaranteed to cure Dandruff, stops hair falling, and prevents baldness, 10 cents an application, at

THE PLAZA BARBER SHOP
A. WILLIS.

Scott-Fraser.

A very pretty wedding took place on Wednesday evening, December 27th, at Poplar Hill Ernestown, home of Mr. and Mrs. Isaac Fraser, when their youngest daughter Blanche was united in marriage by Rev. G. W. McCall to Mr. Fred G. Scott. The ceremony was performed at eight o'clock, P. M., in the parlor under an arch of evergreens and mistletoe. The bride who was beautifully gowned in white carrying a shower bouquet of white carnations was accompanied by Miss Jessie Forward, of Kingston, also in white carrying carnations, while Dorothy McColl as maid of honor took charge of the ring for the time. The groom was supported by his brother, Mr. Arthur P. Scott. After a most aesthetic dejeuner and the kindest wishes of the gathering, the happy couple took the train for Montreal and Eastern points. The guests were limited to the immediate friends of the contracting parties. One pleasing incident was the presence of Mrs. Wm. Hogle, sister of Mr. Fraser, who fifty years ago was married in the same room. Mr. and Mrs. Jessie Amey were present at the wedding fifty years ago and were able to be out on this occasion also. The wedding presents were numerous and very choice. The young couple start life under the most favorable auspices and hosts of friends wish them all joy and prosperity.

F. CHINNECK'S JEWELLRY STORE.

Next Royal Hotel, Napanee.
Issuer of Marriage Licenses.

on Wednesday evening last when a board was elected for 1906.

The annual report shows a substantial balance in the treasury. The meeting was unanimous in urging that the Society enter upon its work this year with more vigour and energy, and endeavour to effect improvements that are much needed in our town.

There are many unsightly spots in our town, that could with very little effort be made very attractive. The manner in which the school grounds are kept at the West Ward School is an illustration of what can and ought to be done. There is no reason why the lawns in the front of our churches should not be made more attractive. The barren appearance of the Grand Trunk Station, is also a matter that should be endeavoured to have remedied. The river front could also be made more attractive, and there are unsightly places such as the half completed building opposite the Public Library, which either should be torn down or completed.

The Society will also distribute among its members, a more generous and better selected variety of plants and bulbs than have heretofore been given, and with the permission of the Town authorities, will undertake to improve the Harvey Warner Park, and with that object in view, a lecturer will be asked to come to Napanee, under the auspices of the Society, and will not only advise the Society as to the best manner in which the Park can be improved but will deliver a lecture upon all matters of interest to the lovers of flowers.

The Society is desirous of having the list of members closed as soon as possible, those therefore who wish to avail themselves of the Society should within the next ten days leave their names with Miss J. E. Ham, the Secretary, and pay their subscriptions for this year.

Any members of the Society desiring to obtain plants or shrubs kept in stock by the nurserymen with whom the Society are dealing may obtain the same through the Society, and obtain the benefit of wholesale prices, thus easily saving in freight and reduction of prices the amount of subscription.

Stock taking sale now on. Heating Stoves at cost. Bargains all through store.

BOYLE & SON.

YARKER

We have fine sleighing in the country now and the farmers are commencing to bustle with wood and timber. M Foster shipped another car of hogs from here. A grain market is one of Yarker's requirement. We will give Alpheus Vanliven's statement of eggs soon. His hens cap everything as layers. Gertrude Connolly has gone to New York. Stewart Connolly to Toronto, Lena Benjamin to Toronto, L. Benjamin to Belleville, A. W. Benjamin to Toronto.

The ice is not yet in condition for cutting. A medicine company has opened up here for a week in the hall.

Rev. Mr. Farnsworth has commenced revival services at Petworth.

Rev. R. C. Horner will be here and open the new church when a four days' revival will be held.

B. Babcock has the Woodmuckett saw mill in operation now, J. Lowry and wife, Winnipeg, are at A. Connolly's.

A cheese factory is being talked of. Edward Poreil has left for a trip. Charles Freeman is able to be out again.

J. W. HALL.

The annual ball in connection with the O.M.B.A will take place on Tuesday the 30th January, in the town hall. The best music will be provided for the occasion.

Mrs. Peter Waller of Saltfleet township swallowed a dose of carbolic acid, with fatal result.

The Grand Trunk have let the contract for an electrical system to operate the Sarnia tunnel.

The Manitoba Hotel at Portage la Prairie was destroyed by fire. The hotel was filled with guests, who escaped in night apparel.

Harry Diamond of Queensboro, whose mother was acquitted at the recent assizes at Belleville of the charge of poisoning his wife, died of pneumonia.

Thousands of suspects are being arrested throughout Russia in accord with Durnovo's sweeping orders.

The election address of Sir Henry Campbell-Bannerman is devoted to severe indictment of the late Government's record and its policy of protection.

The Attorney-General filed the anticipated writ against Henry Thompson and the Temiskaming & Hudson's Bay Mining Company, to cancel the leases in the Cobalt district held by the defendants.

Mr. Joseph Phillips, President of the York Loan & Savings Company, was arrested on a charge of conspiracy, and released on \$5,000 bail. The arrest followed the receipt by the Government of the report of Mr. W. H. Cross, who made an investigation into the affairs of the company.

Messrs. McEwen, Lot Kellar, Wm. Kellar and Lauce Kellar, Enterprise, were arrested and fined, on Thursday of last week for disturbing the Xmas tree entertainment in Merle's Hall, Enterprise, on Friday, Dec. 22nd.

Belleville, Jan. 7.—A swindler is at present operating in this city. He goes to a minister at night and says he is to be married to-morrow, and asks the clergyman's consent, gets it, and then the man says he has just arrived on the evening train, has no funds but a check on a bank asks the clergyman to advance him a little till the banks open in the morning. Some clergymen in this city have been caught, but the man never turns up to be married.

Joseph Saad, the Assyrian who was so viciously assaulted with an axe near Enterprise, December 22nd, and brought to the Hotel Dieu, is improving gradually. He is now rational in his talk and can tell the story of the attack. He claims that as he fell to the ground from the first blow, before becoming unconscious, he saw the face of the man who attacked him—he could identify him. The Napinee lawyer handling the case, has had the trial postponed indefinitely until Saad is able to attend. Whig.

Belleville, Ont., Jan. 9.—Burglars tried to effect an entrance into the house of Rev. Dr. Gardiner, a superannuated minister, living on Evans street and met a warmer reception than they bargained for. Mrs. Gardiner heard a noise at the front door and awoke her husband who is eighty-nine years old. Mr. Gardiner went down and found a man who had broken the plate glass in the front door and was trying to get in. The aged minister first tried to keep the man out with a cane, which was wrested from his grasp. He then picked up a pitch fork standing in the hall, and thrust it into the man, who fell to the floor of the porch outside. An accomplice then came up and took the wounded man away. This morning the pitch fork showed traces of blood on its tines, and

E. LOYST.

gives in the front door and was trying to get in. The aged minister first tried to keep the man out with a cane, which was wrested from his grasp. He then picked up a pitch fork standing in the hall, and thrust it into the man, who fell to the floor of the porch outside. An accomplice then came up and took the wounded man away. This morning the pitch fork showed traces of blood on its tines, and there is a large pool of blood on the floor the porch. The old couple have no idea of who the men were. The police are working on the case.

ADVERTISED THEIR TRADE.

Calling of Professional Men Once Told by Their Dress.

"Professional men do some things better than they used to," droned an attorney who doesn't practice if he can help it.

"That is," he went on to explain, "professional men don't do some things they once did, and I think they're better for it. There was a time, when I was growing up, when they advertised their calling by means of their dress. You could pick out a clergyman as far as you could see him, and it was much the same with lawyers. Nowadays preachers and pleaders wear raiment which makes them look like prosperous business men or high toned sports, and they seem to be more approachable and companionable, whether they are or not.

"But the greatest change in this respect has taken place among the physicians, not so much their clothes, perhaps, as their manner. I can remember when the old fashioned doctor entered a sickroom you felt that the jig was up, even if you were suffering from nothing more serious than a scratched ear, and you were sorry you hadn't led a better life. He'd tiptoe in with a face that reached from his forehead to his knees, clear his throat, whisper to mother, take out his watch, feel for your pulse and gaze gloomily into space—the spaciest, farthest away space ever. Then he'd whisper to mother again, write a prescription and steal out.

"Is there no hope? I used to ask mother.

"However, as I said, that's all gone by. They're cheerful and breezy when they appear, an odor of fresh air and maybe the smell of a cigar are clinging to them, and they laugh at your fears and talk out loud. That's a sight better than medicine in most cases. The trouble is I don't often have the luck to be ill lately."

TROT OR GALLOP?

Put Them Off Till Tomorrow.

Some things are very much better put off until tomorrow. Among them are the reprimand you mean to deliver, the defiance you mean to express, the resignation you mean to hand in to a heartless employer. Put off doing these and you'll probably discover that you don't have to do them.

The Sin of It.

Maud—Is it true that Millie's engagement is broken off? Clara—Yes; she accused Jack of stealing a kiss. Maud—Why, that's nothing, surely. Clara—Ah, but he stole it from another girl.

Memory is the primary and fundamental power without which there could be no other intellectual operation.—Johnson.

Not In Her Experience.

"This proverb," said Mrs. Hiram Offen over her evening paper, "always makes me tired."

"What proverb's that, dear?" asked her husband.

"Too many cooks spoil the broth." I don't believe there ever was such a thing as too many cooks."—Philadelphia Press.

TOWN COUNCIL.

Council Chamber, Jan. 15th, 1906.

The regular meeting of the Council was held in the Council Chamber.

The Mayor occupied the chair, and all the members of the Council were present, viz. Messrs. Graham, Kimmerly, Normile, Meng, Simpson and Williams.

The minutes of the last special and regular meetings were read by the Clerk and on motion were confirmed.

A communication was read from R. S. Kelsch in reference to replacing iron beams in Power house. Ordered to be filed.

REPORTS OF COMMITTEE.

From the Street Committee respecting Pringle's account. The chairman asked for further time for inquiring.

Re the market fees, it was proposed that tenders be advertised for, and resolved that proceedings be taken in accordance with the by-law.

Re, hearing the police call it was recommended that the Police Committee advertise for tenders for same. It was finally decided to leave the matter in the hands of the Committee.

BY-LAWS.

A by-law was presented to authorize a loan of \$3,000 from the Merchant's Bank of Canada, to the Corporation of the town of Napanee, towards the current expenses of the municipality. It was read a first, second and third time and passed.

The by-law for the appointment of an assessor of 1906 was read. After some discussion as to postponing its consideration until next meeting, Councillor Williams' motion that the appointment be made to-night was carried. W. L. Bennett was appointed at a salary of \$200 per annum.

The by-law to appoint a Sanitary Inspector resulted in the appointment of E. B. Perry at a salary of \$50 per annum.

The by-law to appoint members of the Council as a Court of Revision was passed, resulting in the election of the Mayor and Messrs. Kimmerly, Meng, Simpson and Williams.

Councillor Graham moved that the Fire, Water and Light Committee be instructed to do all in their power to forward the special legislation now in progress and that they report from time to time to the council any action they may take.

Councillor Graham moved that the use of the Council Chamber be granted to the Agricultural Society on Wednesday afternoon next. Carried.

It was decided to furnish the firemen with rubber boots.

Action was deferred on the tenders for electric supplies until next regular council meeting.

The Mayor's expenses to Toronto in connection with electric light legislation was ordered paid.

The following accounts were ordered paid: Thos. Robinson's, Dom. Bridge Co. for girders; Canada Law Book Co. for a copy of Wier's Assessment Law. The accounts of Madole & Wilson, and Lapum were referred to Fire and Light committee to report at the next meeting.

The Treasurer's report was read and passed.

Council adjourned.

The next regular meeting of the Council will be held on February 5th.

Departing from the Rule.

It is not our custom to advertise a patent medicine; but so many of our customers, who have been suffering with asthma, have derived so much benefit from "Tafel's"

passed.
Council adjourned.
The next regular meeting of the Council will be held on February 5th.

Departing from the Rule.

It is not our custom to advertise a patent medicine; but so many of our customers, who have been suffering with asthma have received so much benefit from Taft's Asthma Cure, that we have no hesitancy in recommending it. Trial size 30 cents. Regular size \$1.50 at The Medical Hall—Fred L. Hooper.

NEWS IN GENERAL.

A student was shot dead in "The Bee" restaurant, St. Petersburg, for refusing to honor the national anthem.

Diplomatic representatives are on their way to Algiers to participate in the Moroccan conference, which, it is said, will last about two months.

The members of the tack combine were sent up for trial by Police Magistrate Dennison.

Four applications asking for the winding up of the Henderson Roller Bearing Company have been filed at Osgood Hall, and argument will be heard this morning.

The King has sent a message of condolence to the family of the late Hon. Raymond Prefontaine.

It is stated that Hon. A. B. Aylsworth has purchased for \$9,500 the property known as "Linderles", situated on the hill north of Rideau Hall, at Ottawa.

The British Liberals have gained fifteen seats in London. Gerald Balfour has been defeated in Leeds (Central) by 109 majority.

Mrs. Bessie Hollister of Chicago was strangled to death with a fine copper wire. Her assailant made full confession.

Duke Almodovar, Spanish Minister of Foreign Affairs, opened the Moroccan Conference, emphasizing the territorial integrity of Morocco and the open doors. French and German delegates applauded.

Mr. John Watson was probably fatally scalded by falling into a hot water tank at Hyman's tannery in London.

Elections in West Assiniboia Saskatchewan and Sherbrooke, Que., will be held on Feb. 13th. Nominations a week earlier.

President Lynch of the International Union ordered the striking Guelph printers back to work pending a decision of the International Union on the matter in dispute.

Guelph printers are on strike over a difference of half an hour on Saturday afternoon.

The dead body of Mrs. Lawrence of Ste. Anne, Manitoba was found in a hole in the ice.

The United States Government have refunded \$6 illegally collected in the form of poll tax from officers of F. M. S. Drake at Niagara.

Max A. Roth, manager of the Canadian Finance Company of Montreal, was committed for trial on the charge of obtaining money from a debtor by false pretences and the use of a bogus telegram.

A Hamilton woman has used a Niagara Falls broker for \$1,000 damages because he kissed her.

Kingston, Ont., Jan. 15.—John Cunningham, born in Kingston seventy-three years ago, is dead from paralysis. He is father of Mrs. McGuire, wife of ex-Chief Justice McGuire of Prince Albert, Sask. Five daughters and two sons survive.

Bellefonte, Jan. 15.—Alderman Marsh, chairman of the executive committee of the city council, has addressed a letter to the papers, stating that three tax rolls are now outstanding, the total amount owed the city being over \$46,000. The threat is made that, if settlement is not at once made the city will issue warrants against the delinquents.

Pictou, Jan. 15.—Dennis O'Shea, Smith's Bay, ten miles from here, was burned to death this morning about five o'clock. The deceased was forty-two years of age and unmarried. Mrs. O'Shea, mother of deceased, resided with her son, but was visiting her daughter in Pictou. About five o'clock, this morning, neighbors discovered the fire, but were too late to be of any assistance to deceased, who was alone in the house. Cause of fire unknown.

POULTRY SHOW.

Over 300 Birds exhibited. Every class in the Prize List represented, Napanee Poultry Fanciers win a goodly number of Prizes.

The Napanee Poultry, Pigeon and Pet Stock Association are to be congratulated on the success of their first annual Poultry and Pet Stock show, held in the town hall on Tuesday, Wednesday and Thursday, of this week. The large number of entries crowded the hall and a probability is that a larger building will have to be secured for next year's show. A decided impetus will be given to the raising of first class fowl in the town country, a large number of spectators having expressed their intention of raising some thoroughbred stock next season and numerous inquiries are being received by exhibitors as to price of eggs and stock. To the indefatigable efforts of the President, Mr. M. H. Fralick, the secretary, Mr. Geo. Walters, the committee Messrs. A. F. Chinneck, H. Meng, A. Steacy and G. Degroff, and the members of the society much of the success of the show is due.

PRIZE LIST

When It Is True.
There are many phrases familiar to most of us, that are sometimes not quite true; but the following one "when you get it at Hooper's it's good" is always true. The Medical Hall—Fred L. Hooper.

The political gossip of the moment is to the effect that almost immediately an announcement will be made of the conferring of a senatorship on Hon. George W. Ross, ex-Premier; and leader of the Opposition in the Ontario Legislature.

There is but one vacancy in the Ontario representation in the Senate, that caused by the death of Senator Fulford, and though there are several gentlemen who would be proud of the honor if it were conferred on them, it is understood that no one of them would feel slighted or aggrieved if the offer of the appointment is made to Mr. Ross. The vacancy in the leadership in the Ontario House which will be caused if Mr. Ross goes to Ottawa will in all probability be filled by the selection of Hon. Richard Harcourt, former Minister of Education. The selection would be made by the Liberal members of the Legislature.

Sunlight Soot Destroyer.
Removes soot from chimney and stoves. Cleans them perfectly, no dirt. Try a package from
BOYLE & SON.

Toronto, Jan. 15.—(Special).—Master plumbers to the number of thirty-six, were fined this morning, the amounts ranging from \$200 to \$500, those paying the higher amounts being B. J. Wright, Alex. Purdy and J. B. Fitzsimmons.

All the others were allowed out on suspended sentence.
Chancellor Boyd, in delivering judgment made severe comment on the combine and expressed the opinion that Justice Clute in fining the other master plumbers from \$250 to \$500, erred on the side of leniency. He had taken those fines, however, as a basis in the present case.

BIGGEST ON RECORD
The Family Herald and Weekly Star of Montreal during December handled over fifty thousand subscriptions, which is more than any other paper in Canada receives in a whole year. It is an enormous figure, the greatest that paper ever reached, but reports say that January will do even better, and from present appearances they fully expect 75,000. The popularity of this great Weekly and the lovely picture that goes with it, "Queen Alexandra, Her Grandchildren and Dogs," are accountable for the increase, but it is said this special premium, "The Farmers' Manual and Veterinary Guide," has alone added over 20,000 new subscribers. They are printing another large edition of the book, and advise to all Farmers is to secure a copy before they are all gone. Samples of the picture and book can be seen at this office. Don't miss them.

Wherever Tuck's Rheumatic Bone Oil has been introduced everybody is talking about its wonderful curative powers. Here is what one sufferer writes:
A Letter
Dear Sirs—I want everyone to know, what Tuck's Bone Oil did for me. I suffered for a year and nine months from a sore leg and at times the pain was almost unbearable. If I moved about the house I was obliged to with my knee on a chair. I was under the doctor's care for months and was six weeks in the hospital from which my husband brought me home not much improved. A neighbor told me of Tuck's Bone Oil and advised me to try it. I did so and at once began to get relief. Four bottles cured me and I can now walk over town and back again at my ease. I think Tuck's Bone Oil is the best medicine ever made.
Mrs. J. Hopkins,
Smith's Falls.

For rheumatism, lame back, neuralgia, sprains, coughs, colds, quincy or bronchitis in short for any and all kinds of inflammation there nothing to equal Tuck's Bone Oil. HIGHEST AWARD, ST. LOUIS, 1904.

MONKEY THIEF TAKEN.

A monkey has been trained by its Parisian owner to perform all the duties of a watch dog. A chicken thief was so unfortunate as to cast envious eyes upon the roost over which the monkey kept guard, and he had just begun to fill his bag when the simian grappled with him to such effect that a long stay in the hospital was necessary before he could be brought to trial.

One Thousand Farmers Wanted.

We want 1,000 farmers for Western Canada for the spring of 1906. The renter, the young farmer with very limited small capital, and the farmer with a number of sons, for whom he wishes to secure farms, are the people who should write us as quickly as they read this notice. We can settle you in the great wheat-belt of Manitoba or the other Provinces of Western Canada, and give you such a chance as we confidently believe has never before been offered to settlers in any new country.

Our lands are the choicest, and situated in the best tried and the best settled farming and wheat-raising districts, and our plans are such as will surprise you by reason of their fairness and helpfulness. A man with a few hundred dollars and with health and energy, by adopting one of them, can in a very short time be well-to-do.

The ordinary settler coming here has to break his land and backset it the first year, and therefore does not secure any return from the land until the harvest of the following year is reaped. Under our plans, the settler will begin to have an income from the start, and at the same time will be going on getting ready his land for cropping. If you intend coming to Western Canada to farm, we can thus put you in the way of helping yourself from the first day that you arrive here, and thus of being independent. We want one thousand settlers for the spring of 1906.

Our lands have been all very carefully selected, and we guarantee the reports of our examiners on the same. No person need apply whose habits are not good, and who is not able to produce first-class references as to his character and industry.

Address, Western Canada Settlers' Mutual Land Co., 23 Canada Life Building, Winnipeg.

"Papa used to call me an angel," said the bride of six short months. "No wonder," rejoined the man, "you are always harping about something."

The Poisoned Spring.—As in nature so to man, pollute the spring and disease and waste are bound to follow—the stomach and nerves out of killer means poison in the spring. South American Nerve is a good purifier, cures Indigestion, Dyspepsia, and tones the nerves. The best evidence of its efficacy is the unsolicited testimony of thousands of cured ones.—76

Every dog has his day, and the watch dog also has his night.

Sympathy is all right in its way, but it is a poor substitute for beefsteak.

WALKER MADE FIRST MATCH.

But the Druggist's Invention Was Not a Success.

In the nineteenth century—the century in which so many wonderful things were done—the fourth step in the development of the match was taken. In 1827 John Walker, a druggist in a small English town, tipped a splint with sulphur, chlorate of potash and sulphid of antimony and rubbed it on sandpaper and it burst into flame.

The druggist had discovered the first friction chemical match, the kind we use to-day. It is called friction chemical, because it is made by mixing certain chemicals together and rubbing them. Although Walker's match did not require the bottle of acid, it nevertheless was not a good one. It could be lighted only by hard rubbing, and it sputtered and threw fire in all directions.

In a few years, however, phosphorus was substituted on the tip for antimony, and the change worked wonders. The match could now be lighted with very little rubbing, and it was no longer necessary to have sandpaper upon which to rub it. It would ignite when rubbed on any surface, and there was no longer any sputtering match, the match with which we are so familiar.

After the invention of the easily lighted phosphorus match there was no longer use for the dip-splint or the strike-a-light. The old methods of getting a blaze were gradually laid aside and forgotten. The first phosphorus matches were sold at 25 cents a block—a block containing 144 matches—and they were used by but few.

Now a hundred matches can be bought for a cent. It is said that in the United States about 150,000,000 matches are used a year. This, on an average, is about five matches a day for every person.

EVERY PLACE ON THE PRAIRIES

HAS ITS CURES CREDITED TO
DODD'S KIDNEY PILLS.

John White Could get Nothing to Help
His Rheumatism Till He Tried the
Great Canadian Kidney Remedy.

Yellow Grass, Assa, N. W. T., Jan. 8.—(Special).—No place on the prairies but can furnish some proof of the splendid work Dodd's Kidney Pills are doing in wiping out the kidney ailments of the West. It was near here that little Edith Harris was so wonderfully cured of Dropsy by them, and now Mr. John White is giving an experience almost as remarkable.

"I think," Mr. White says, "I should let the public know of the benefit I got from Dodd's Kidney Pills. I had Rheumatism for years, and neither doctors nor medicines did me a bit of good till last spring I tried Dodd's Kidney Pills. They did me a great deal of good. I

THE HEIR OF SANTLEIGH

OR
THE STEWARD'S SON

CHAPTER XXIX.

Three days before the papers announced the "serious illness of the Right Honorable the Earl of Arrowdale," Cyril Burne sat at work upon the beach at Lorient.

Brittany was anything but a beastly place, as Jack Wesley had declared, and the prospect of golden sands, deep blue sea and sky, and rugged rocks ought to have filled Cyril's artistic soul with rapture.

But the expression on his face was anything but rapturous, and he worked at his picture with the stolid, dogged countenance of a convict pursuing his allotted task.

Every now and then he stopped painting and stared at the canvas as if he were looking through it, and at such times his head sank upon his breast, and what little light had been in his eyes died out, and a hopeless, sick-and-sorry look crept over his handsome face; a look which was not good to see on the countenance of a man young, clever, and with all the world before him.

It is scarcely necessary to say that at these times he was thinking of Norah. It would be rather difficult to say when he was not thinking of her; and just as her thoughts of him were full of problems and unanswerable enigmas, so were his of her.

When a man falls in love with a girl, he flatters himself that at least he knows and understands her nature.

For instance: If any one had asked Cyril to describe Norah, he would have summed her up somewhat in this fashion:

"Beautiful, truthful, loving, honest as the day to all the world, and faithful to me unto death!"

And this girl, this pearl among women, had quietly and coolly jilted him; and, had either grown tired of him in a few days, or thrown him over at the behest of her father.

The more he thought of her and her desertion of him, the more bitter he became, the more puzzled and the more miserable. For, notwithstanding her treatment of him, he knew that he loved her still—that if she chose to turn to him and whistle him to her side he must fly to her, and kneel at her feet just as much her worshipper and slave as he had ever been.

In the words of the Persian poet Sadi, he had given his heart to her, and could not take it back.

Behind him, perched on the cliffs, was the house which Lord Newall had built for himself, but his lordship had gone away and left Cyril sole master. In fact, his lordship had found the young artist so gloomy and morose a companion that he could not stand him for longer than a week, and had flown in self-defense.

Cyril would have flown, too; quite a hundred times a day he had been assailed by an intense longing to kick his unfinished picture into the sea and start off somewhere, or anywhere; but he had learned something else beside the knack of painting, and that was that for his complaint there was no remedy half so efficacious as hard work. He could manage to forget Norah—say, for a quarter of an hour at a time—while he was painting, and he felt that if he threw up his work and wandered off nothing to do but brood over his trouble

haven't written, you know I'm glad enough. I always knew you'd be famous. The paper I saw the review of your book in said you were the coming poet, and for once a paper did not lie. And I suppose you are the lion of the off season, and will roar all through the next one, Dear old Jack!"

"Not much of a lion. I expect you'll do all the roaring, and none of the rest of us will be able to make ourselves heard."

"My roar will be a whine. I'm good for nothing; a failure of the very first magnitude. But go on."

Instead of going on, Jack, after a glance at him, looked round the room, which was furnished like a fashionable hunting box, but lined with pictures, among them being some of Cyril's earlier ones, showing that Lord Newall had taken a very solid fancy to Cyril's work.

"Comfortable quarters you've got. But, by the way, where is Lord Newall, for of course, this is his place? I beg his lordship's pardon for not thinking of him before."

"Oh, he's gone. He was to have stayed for a month, but he found a week of my genial society sufficient. He fled the festive scene which my cheery presence was rapidly transforming into a third-class funeral."

"And how did he like the picture?" asked Jack.

"I don't think he liked it all, if I may judge from his remarks. He observed that it wasn't up to my usual form, and I could have forgiven him—if I hadn't felt that he spoke the truth!"

"A little off color?" said Jack.

"Yes, but I shall be all right now. I wanted a glimpse of you, old man, that was what I wanted. There will be some heart in the daub, now, you'll see."

"And when do you come back?"

"Never. That is, I'm not sure. I shan't hurry; I like Brittany. It suits me; it's lonely and quiet and—"

"Better than Santleigh? put in Jack, quietly.

"Yes, better than Santleigh. Jack, if you love me, don't mention the place—not to-night, at any rate. There are chords in the human heart—"

"What's the matter with Santleigh? I thought the presence of a certain young lady beautified it and made it a distinct and precious paradise."

"For God's sake, don't chaff me, Jack," he said, and his voice shook. "If you knew all—"

"Tell me all," said Jack, quietly.

"Man, I can't," broke out Cyril, in a smothered voice. "It's bad enough to think of; impossible to put into words."

"What has happened? Is she dead?"

"That's a good word, Jack. Yes, she is dead—dead to me, at any rate. Jack, I've been almost mad. I think if you had not turned up this evening, I really should have gone melancholy silly. Don't say a word, and I'll tell you—I've lost her!"

Jack was silent a moment as he slowly refilled his pipe.

"You've lost her?" he said, quietly. "That bears rather a wide significance. What do you mean?"

"Do you want the proper word in all its vulgar brutality?" asked Cyril almost savagely. "Have it, then! She has jilted me! There, now you know what's the matter with me,

unscripted testimony of thousands of cured ones.—76

Every dog has his day, and the watch dog also has his night.

Sympathy is all right in its way, but it is a poor substitute for beefsteak.

Mother Graves' Worm Exterminator has no equal for destroying worms in children and adults. See that you get the genuine when purchasing.

"Now, were you drunk or sober?" enquired the magistrate of an Irish defendant. "Neither, sorr," replied the defendant; "I'm a teetotaler."

There is no turning a windmill with a pair of bellows and there is no turning in your chair if you have lumbago or lame back, but it would be quite easy if you had "The D & L." Menthol Plaster on your back.

It is safer to do business with a self-confessed sinner than with a self-admitted saint.

and inspires him in a manner which is difficult to describe in words. Nothing will rouse a Scottish audience as the pipes will, and no sound is more welcome at an open gathering than the wild notes of the national instrument.

HE HAD.

Life Insurance Agent—My dear sir, have you made any provision for those who come after you?

Harduppe—Yes, I put the dog at the door, and told the servant to say I'm out of town.

So popular is Bickle's Anti-Consumptive Syrup as a medicine in the treatment of colds and coughs or ailments of the throat, due to exposure, to draughts, or sudden changes of temperature, that druggists and all dealers in patent medicines keep supplies on hand to meet the demand. It is pleasant to take, and the use of it guarantees freedom from throat and lung diseases.

HER FAVORITE.

Miss Younger—"What is your favorite musical instrument?"

Miss Elderly—"The mandolin."

Miss Younger—"Oh, of course; there is a man to begin with."

A Few People can "wear out a cough," but it is about the most dangerous experiment imaginable. The other 99% of us weak ones had better take Allen's Lung Balm at once and be on the safe side.

HATES TO GO HOME.

The lover can't help showing

The girl he's calling on

That when he's slow in going

He's positively "gone."

Heart Sick People.—Dr. Agnew's Cure for the Heart is a heart tonic that never fails to cure—is swift in its effects—goes closer to the "border land" and snatches from death's grip more sufferers than any other remedy for any family of diseases and ailments in the category of human sufferings. Gives relief in 30 minutes.—75

ACCEPTED.

Mr. Plane (who is fond of dogs)—Miss Waite, don't you think you ought to have an intelligent animal about the house that would protect you and—

Miss Waite—Oh, Mr. Plane! This is so sudden!

remarkable.

"I think," Mr. White says, "I should let the public know of the benefit I got from Dodd's Kidney Pills. I had Rheumatism for years, and neither doctors nor medicines did me a bit of good till last spring I tried Dodd's Kidney Pills. They did me a great deal of good. I feel like recommending Dodd's Kidney Pills even stronger than I talk."

Dodd's Kidney Pills cure the Kidneys. Sound Kidneys strain all seeds of disease out of the blood. They tone up the body to its highest standard of health and energy.

HAIR CUT ON A BRIDGE.

Evidence That Saved a Man Accused of Murder.

Literally speaking, the life of Hugh Criggan of Iniscreeny, charged recently at Belfast Assizes with the murder of a former named John Gardiner, hung upon a thread, says the London Leader. The police based their case upon a human hair, a thread and a whiskey bottle.

The two men had attended a sports meeting at Lisnakea and were supposed to have started together for home. Gardiner was never again seen alive, but there was evidence of a struggle having taken place at Ballynadraragh Bridge, over which they would have passed.

At this spot Gardiner's broken umbrella was picked up the following day and his dead body, with a number of wounds, was recovered from the river 1,123 yards below the bridge.

The police investigations succeeded in discovering a hair on the parapet of the bridge, which, from its appearance, was stated to have been from the mustache of the victim.

They also found a thread near the hair, and this, it was alleged by the Crown, was from the tab of the coat which the prisoner was wearing.

An important link in the chain of circumstantial evidence was a black whiskey bottle. Thus, it was stated, was said to Gardiner at Lisnakea during the day preceding the night on which he met his death, and it was not seen again until produced and opened by the accused at a time subsequent to that at which the murder was stated to have taken place.

The medical evidence showed that Gardiner was not dead when he was thrown into the river.

Only one of the injuries on his body was proved to be a wound made before death, which might have been inflicted by a blow from a full bottle, but could not have been caused by an empty one.

Prof. Barklie, analyst, stated that on the trousers, shirt front and the tie of the prisoner he discovered blood stains, which, however, he could not determine to be human.

For the defence, evidence was produced to prove that rowdy scenes had occurred at Ballynadraragh Bridge at a time after the appearance of Criggan to the house of a friend, where he brought out the whiskey bottle.

About this time cries of distress were heard by those there, coming from the direction of the bridge. So far as the thread was concerned it was shown that it was from a coat similar to those worn in this part of the country by numerous people.

In reference to the hair found—four days after the murder—a number of witnesses declared that the inhabitants, instead of going to a barber shop, obliged each other by cutting one another's hair at the bridge.

Only the day before the tragedy the deceased cut the hair of a neighbor at this spot.

After three-quarters of an hour's deliberations the jury found the prisoner not guilty and he was discharged.

A queer-looking customer inserted his head into an auction room, and, looking gravely at the knight of the hammer, inquired, "Can I bid, sir?" "Certainly," replied the auctioneer, "you can bid." "Well, then," said the wag, walking off, "I bid you good-night."

also beside the back of painting, and that was that for his complaint there was no remedy half so efficacious as hard work. He could manage to forget Norah—say, for a quarter of an hour at a time—while he was painting, and he felt that if he threw up his work and wandered off nothing to do but brood over his trouble he should probably go mad.

So, he worked on silently and moodily. The good people of Lorient, who are sociable enough if you rub them the right way, could make nothing of the young painter who was staying at "milor'ds" house. The men got nothing to answer to their genial "Bon jour, monsieur," but a growl, and the girls—most of whom are terrible pretty—might as well have cast their smiles at the rocks and stones as bestow them upon the handsome young foreigner who did nothing but paint, paint, paint, or tramp, tramp, tramp, up and down the sea-shore.

They called him "The Silent Englishman."

On this particular afternoon he went on painting and thinking till the fading light warned him that it was time to leave off painting and take to thinking only, and he was just about to rise and put his things together, when he heard a step on the beach behind him.

He did not turn his head, because when he did so, the peasants, who had occasionally strayed from the fields across the beach, would persist in trying to talk to him, and he kept his eyes fixed sullenly before him until the footsteps came close behind him and a voice said:

"Good-evening, sir."

Jack!

"How doth the busy bee? Well, lad, how goes the picture?"

"Why, man, where did you come from?" he demanded. "What on earth brings you here?"

"I will be merciful and not reply the Havre boat and my own legs," said Jack, smiling. "Is there any law, French or otherwise, which forbids me to put foot on Breton shore?"

"I—I couldn't tell you how glad I am to see you if I tried!" said Cyril, his face flushed with the unexpected pleasure. "I was thinking of you not ten minutes ago, I was, indeed. How well you look, Jack!"

"And how unwell you look, Cyril!" he retorted, smiling still, but with a sneaking suspicion of tenderness in his voice, for the flush had died out of Cyril's face, and it looked pale and harassed. "What's the matter, lad? Brittany air doesn't suit you?"

"Oh, I'm all right."

"And this is the picture?" said Jack, standing before it.

"Yes. What do you think of it?"

"Pretty, very. I like the composition. That piece of graygreen is good, decidedly good."

Then he stopped and looked hard at it, and went behind the easel and stared at the back of it.

"What on earth are you looking for?" asked Cyril.

"The heart in it," replied Jack, ironically.

"You may look all day and not find it," he said, bitterly, "because there is no heart in it. But, never mind the picture. Here, help me with these things, and let us get up to the house."

They shouldered the easel and things and climbed the beach, talking as they went, and Jack noticed that Cyril talked continuously, as if he were afraid of a pause.

They reached the house, and were soon seated at the meal which served Cyril as dinner and supper combined.

"And now tell me all the news, old man," he said. "Try some of now you are hete, I know how I now you are here, I know now I have missed you!"

"That's nice. In absence the heart grows fonder. Yes, not a bad cigar. News—there is none. The House of Commons—"

"Hang the House of Commons! I've heard of your success, Jack, and I meant to write to you," he added, rather shamefacedly, "but though I

sawly reminded his pipe.

"You've lost her?" he said, quietly. "That bears rather a wide significance. What do you mean?"

"Do you want the proper word in all its vulgar brutality?" asked Cyril almost savagely. "Have it, then! She has jilted me! There, now you know what's the matter with me, and why you can't find any heart in my picture. I've no heart to put into it. Yes, she has jilted me, thrown me over as she would cast aside a worn-out glove, and I'm such a miserable imitation of a man that I'm wearing myself into a shadow over her."

He laughed bitterly.

"You know what the Spanish proverb says, that 'man was made for woman, and woman was made for herself.' And it is true by Heaven! For if she is false—and she is—there is not a true, unselfish woman in the world."

"That's rather a large order," said Jack, under his breath. "Why has she thrown you over, lad?"

"Ask of the winds that blow at even. Why shouldn't she, you mean? Why should the daughter of an earl be faithful to a man who she thinks is only a poor devil of an artist? I know it all, I can see it all. Heaven knows I've thought enough about it to enable me to arrive at the truth! It was all very well while I was with her, but when she was left to herself, to think of what she had done, to face the fear of her father—and yet—oh, Jack, I believed in her up to the hilt!"

"Why don't you write to her?"

"Why don't I? Oh, my good Caesar, what a question! I have written to her—twice. I put my heart into the letter, though I haven't into the picture. I implored her—there, that's enough! I begged her to write me one word, and—the rest is silence," as Hamlet says.

"She would not even write a word," said Cyril, grimly. "Not even the word 'Go!' Great Heaven, when I think of her I wonder whether I have not been dreaming; so true she seemed, so pure—the driven snow seemed not so pure, so unsullied as she was. And so brave—nothing should separate us, she said over and over again. I can hear her now."

He looked before him with fixed eyes, as if, indeed, he heard Norah's voice, and his head sank upon his breast.

"Yes, it was a dream, and sweet enough while it lasted; it's the awakening that is so bad. And it is bad, old man."

"And are you awake?" said Jack.

"That's something; for Heaven's sake, keep so! I'm sorry for you, lad; but, after all, there's something besides love in the world. It would be a bad sort of world for all of us if there weren't. You've your art left you; that's the mistress who never betrays you, never! Stick to her, lad, pay your devotions at her shrine, and reap your reward."

"You are a good fellow, Jack, and I've reason for being fond of you, and I admire you. Yes, my admiration runs on all fours with my love and gratitude but when I hear you talk like that I want to laugh; I want to laugh badly. You talk like a book, but like a book that describes mountain scenery by a man who has never been higher than Primrose Hill. You're a poet, but you don't know what love means—you haven't the A B C of it even. Did you never see a woman who touched your heart?" he wound up, savagely.

"That's a straight question, and deserves a straight answer. Judge for yourself. You said just now that I was the lion of this off season. That may or may not be. Anyhow, for some reason best known to themselves, the people who collect lions in their drawing-rooms have done me the honor to ask me to go and roar—or-bray—in them of late. Generally I refuse, but the other night I went to one of their confounded receptions. The card of invitation was marked 'small and early.' There was a terrific crush,

THE LAYING HEN

Is the paying hen beyond a doubt.
One dozen of eggs on the average sells for the same as one pound of butter, and the labor is much less.
Nothing on the farm gives such paying results, if properly fed, as the hen, as it is her natural action to lay eggs.

Hercules Poultry Food

contains the harmless ingredients that makes your hens lay in winter time when eggs are at the highest price.
Besides, it keeps them in splendid condition to resist disease.
HERCULES LOUSE KILLER will keep your fowl free from vermin, and **CLYDESDALE CARBOLINE ANTISEPTIC** will keep your hen-house clean.
This adds to the egg production.
All our preparations are sold under a **POSITIVE GUARANTEE OF SATISFACTION** or money cheerfully refunded by the dealer.
Clydesdale Stock Food Co., Limited, Toronto, Ont.

and everybody came late. I poked my nose inside the door, and, not liking the prospect of being jostled in a hot room, was bolting, when a woman I didn't know from Eve, but who turned out to be the lady of the house who had asked me, came up, and after saying something pleasant, offered to introduce me to a young lady who was a lioness. She hadn't written a volume of poems, or committed any crime of that kind, but she was simply famous for her beauty and her charms, as the old-fashioned writers used to put it."

Cyril sank into his chair and, leaning his head upon his hand, listened rather listlessly.

"I'm not a painter," went on Jack "and so I can't describe her. I only know that—well, she took my breath away. I dare say there are many more beautiful women in the world. I haven't taken much stock of them in the flesh; mine are born in my imagination; but this young person 'fetched' me in a manner peculiar and strange. She was neither dark nor fair. I remember she had a kind of red-gold hair, and that her face had very little color in it—what we writers call ivory-white, if I mistake not; and her eyes—I don't think I can tell you their color. They might have been brown, but I am not sure they were not blue; let's say they were violet. And when she spoke, a faint, shadowy kind of smile came over her face like the play of moonlight upon water. I beg your pardon if I grow poetical, but this young lady deserved all the poetry a man could grind out. Her voice—I heard her before I spoke to her—was like music; not the loud, obtrusive kind of music, but soft and low; the sort that steals over you and sets your heart aching with pleasure and pain nicely mixed."

"Heaven and earth!"
"She was dressed, well, I suppose she was the best dressed woman in the room. I'm not a painter; but if I were, I'd try to paint that girl, and when I'd succeeded—but I never should succeed—I'd remark, 'Finis,' and lay down my brush."

"You are in love with her!"
"Just so. I was. I forgot all the rest of the people. I was deaf to the noise of the idiots cackling and laughing; I ceased to hear the man at the piano who had been making life a burden to me. I thought of nothing but this beautiful creature with the face of an angel—angel he changed; a woman!—and I thought: 'Jack, my friend, if you ever fall in love, fall in love with some one like this, if you can find another like her. For here, enshrined in this lovely casket, is a heart of surpassing ten-

"And—what did she say?"
"She said—in her musical voice," he said, grimly, "you are mistaken; Mr. Cyril Burne is no friend of mine."

Cyril's hand fell from Jack's shoulder, and he dropped back into the chair and hid his face in his hands.
Jack rose and laid both hands on his shoulders.

"And then I knew that either some devilish work had come between this lovely creature and the man who loved her, or that a woman could be as fair as Eve, look as tender as a lily in the morning dew, and yet be utterly heartless, and I resolved to go to my friend and help him smash up his illusions, help him tear that Fata Morgana from his heart, and be a man again. I inquired about her afterward, and I heard that the man who won her heart—if she possessed one—was a certain Guildford Berton."

Cyril started.
"I saw him before I came away. A good-looking man—just the man to touch a statue in the semblance of a woman; just the man to take effect upon—Stop. Don't heed what I said, lad! By Heaven! even as I spoke the recollection of her face broke in upon me, and I cannot—I cannot believe her false, ay, even with her own words in my ears—"

"I know! Oh I know! She has cast her spell over you! But—but—oh, Jack, I'd written to her—I was going to send it to-morrow!" He took a letter from his pocket. "Here it is! See!" He tore it into fragments and tossed it into the wood fire burning on the open hearth. "I'm awake now, thanks to you, and there goes the great—the one sweet dream of my life! Fill your glass, Jack—fill it up, and let us drink perdition to all women!"

NORTH-WESTERN FARMS ON THE Grand Trunk Pacific

I have two sections of land for sale entire or in part, on line of Grand Trunk Pacific, now under construction just west of Portage La Prairie. Ploughing in the Northwest will begin as early as February. You can sow oats, potatoes and alfalfa on breaking and get big prices from railroad contractors on the spot. Then hire out your teams for railroad grading at \$5 per day. You won't get such a chance for a start another year. Don't waste any time, as there is practically no other land for sale of equal quality in such a situation on such terms and at so low a price. Price \$10.50 per

me a burden to me. I thought of nothing but this beautiful creature with the face of an angel—angel be hanged; a woman!—and I thought: 'Jack, my friend, if you ever fall in love, fall in love with some one like this, if you can find another like her. For here, enshrined in this lovely casket, is a heart of surpassing tenderness and truth. Here is the great prize for which mankind is ever and ever striving. Here is a pearl and a ruby, not to say a diamond, above price. If ever purity and unselfishness, and innocence of all sordid emotions dwell in a human heart, they dwell in the heart of this exquisite specimen of womanhood. Her smile is as the perfume of Shiraz; her voice is like that of the turtle that flies over Damascus; her face is a dream and a delight—'

Cyril groaned again. Norah lifted before him.

"And then I spoke to her. And she said: 'I thought I would try and win her good grace, for—oh! my friend, I happened to know the man who loved her, and I thought cunningly, that his name would bring a blush to her face, and I said something like this: 'I trust you will not receive me altogether as a stranger, for I hold as friend the man who loves you, Lady Norah.'—Cyril Burne."

"What! Have you seen her? It was Norah?"

"It was Lady Norah Arrowdale."

All Run Down

THIS is a common expression we hear on every side. Unless there is some organic trouble, the condition can doubtless be remedied. Your doctor is the best adviser. Do not dose yourself with all kinds of advertised remedies—get his opinion. More than likely you need a concentrated fat food to enrich your blood and tone up the system.

Scott's Emulsion of Cod Liver Oil

is just such a food in its best form. It will build up the weakened and wasted body when all other foods fail to nourish. If you are run down or emaciated, give it a trial: it cannot hurt you. It is essentially the best possible nourishment for delicate children and pale, anaemic girls. We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

SCOTT & BOWNE
Chemists

50c and \$1. All Druggists

the liver and kidneys than those who lead active, outdoor lives. The former will find in **Parmelee's Vegetable Pills** a restorative without question and most efficacious on the market. They are easily procurable, easily taken, act expeditiously and they are surprisingly cheap considering their excellence.

DEATH TRAPPINGS STOP WEDDING

Bridegroom Regarded Them as Augury of Bad Luck.

A funeral, a wedding that was to be, and a broken engagement are the principal features of an extraordinary lawsuit which will shortly be tried in the Paris courts.

In the will of Mme. Marris, an eccentric old woman who died not long ago, was a proviso to the effect that \$14,000 should be spent on her funeral. The heirs spent all they could, but found when they had concluded the arrangements that they had a few dollars still in hand. To get rid of this they gave orders that the black and silver draperies put up over the door of the house on the occasion of the funeral should be left for five days.

Another resident of the house, whose daughter's nuptials were to be celebrated, objected to the trappings of woe, and asked the concierge to remove them, and when the prospective bridegroom saw the funeral signs he saw, too, he said, an omen of ill-luck, and broke off the engagement.

The father of the disappointed bride has now begun an action against the landlord, holding him liable for the concierge's action in not removing the draperies.

THE SPAN OF ANIMAL LIFE.

The span of human life seems of late to have been extending under favorable conditions, and it exceeds that of most animals. Camels live for forty or fifty years, cattle, at most, thirty, sheep eight or nine, and dogs about fourteen. Instances are on record in which elephants have lived 150 years in captivity, which were of unknown age at that time of their capture, and it is believed that they may reach 300 years. Whales have, it is thought, a still longer span, and there is the well-known instance of longevity in the tortoise which was captured in 1693 and was killed by an accident in 1753. Among birds the eagle and the swan seem to enjoy the longest spell of active life, and among fish the record seems to be held by carp, which have been known by authentic records to live 200 years. Pike and river trout may attain respectively to ninety and fifty years.

INCIPIENT CONSUMPTION.

How Food Headed off the Insidious Disease.

The happy wife of a good old-fashioned Mich. farmer says:

"In the spring of 1902, I was taken sick—a general breaking down, as it were. I was excessively nervous, could not sleep well at night, my food seemed to do me no good, and I was so weak I could scarcely walk across the room."

"The doctor said my condition was due to overwork and close confinement and that he very much feared that consumption would set in. For several months I took one kind of medicine after another, but with no effect—in fact, I seemed to grow worse."

"Then I determined to quit all medicines, give up coffee and see what Grape-Nuts food would do for me. I began to eat Grape-Nuts with sugar and cream and bread and butter three times a day."

"The effect was surprising! I began to gain flesh and strength forthwith, my nerves quieted down and grew normally steady and sound, sweet sleep came back to me. In six weeks' time I discharged the hired girl and commenced to do my own housework for a family of six. This was two years ago, and I am doing it still, and enjoy it." Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the little book, "The Road to Wellville," in pigs.

you never asked me before. She said coyley, as she gave him her hand.

Lingering, stubborn old sores are erased from the skin by Weaver's Ointment. The good work of blood-cleansing is completed with Weaver's Syrup.

Reclor: "Remember, my young friend, there are things in life better than money." Young Friend: "Yes, I know that, but it takes money to buy them."

Thos. Sabin of Eglinton, says: "I have removed ten corns from my feet with Halloway's Corn Cure." Reader go thou and do likewise.

He: "As I sat there alone, Hilda came along and offered me a penny for my thoughts." She: "The extravagant creature."

Pile Terrors Swept Away.—Dr. Agnew's Ointment stands at the head as a reliever, healer and cure for Piles in all forms. One application will give comfort in a few minutes, and three to six days' application according to directions will cure chronic cases. It relieves all itching and burning skin diseases in a day. 35 cents.—79

A gentleman was once invited to a house where he considered the dinner was inadequate, and as he was leaving the host asked him when he would dine with him again. "Now," was the startling reply.

A Sure Cure for Headache.—E. Hous headache, to which women are more subject than men, becomes so acute in some subjects that they are utterly prostrated. The stomach refuses food, and there is a constant and distressing effort to free the stomach from oil, which has become unduly secreted there. **Parmelee's Vegetable Pills** are a speedy alternative, and in neutralizing the effects of the intruding bile relieves the pressure on the nerves which cause the headache. Try them.

Some druggists may not figure on golden harps and crowns in heaven, but they expect something "just as good."

Children who are pale and peevish want something that will make good rich blood; there is nothing to equal "Ferrovin" for this purpose. Mothers, be sure to get a bottle.

Mrs. Littlewit (proudly): "Only just think! Charles has gone to address a public gathering." Friend: "I didn't know he was a speechmaker." Mrs. Littlewit: "Nor I; but he has been called upon to make a statement before a meeting of his creditors."

A Good Medicine requires little advertising. Dr. Thomas' Electric Oil, gained the good name it now enjoys, not through elaborate advertising, but on its great merits as a remedy for bodily pains and ailments of the respiratory organs. It has earned its name with it wherever it has gone, and it is prized at the antipodes as well as at home. Dose small, effect sure.

ROBBED BY BRIDE.

French Bridegroom Has a Unique Experience.

A. M. Binet, of Paris, France, has just met with an experience which he is likely to remember for the remainder of his life. He recently made the acquaintance of a young woman aged about 22, with whom he became so infatuated that he begged her to become his wife. The marriage ceremony took place in Paris, and the wedding dinner was given in a well-known Paris restaurant. The bride looked charming in her white robe of innocence and orange blossom. After the dinner came the ball, and then Mr. Binet took his bride home.

She removed her white veil and her orange blossom, and then suddenly became deathly pale, and leaning against a sideboard, gasped, "A doctor, a doctor."

The horrified bridegroom rushed out to fetch a doctor, and in less than a quarter of an hour came rushing back with him in a cab.

When they got up to the room there were no signs of the bride, though her wedding gown lay on the bed. She had gone, and had taken with her a sum of \$4,000 which M. Binet had put away in his escrow.

The infuriated bridegroom immediately went with the doctor to inform the local police magistrate of his adventure, and learned to his astonishment that as he had married the woman he could not take any proceedings against her, as,

railroad contractors on the spot. Then hire out your teams for railroad grading at \$5 per day. You won't get such a chance for a start another year. Don't waste any time, as there is practically no other land for sale of equal quality in such a situation on such terms and at so low a price. Price \$10.50 per acre; six year terms.

according to French law, a husband cannot charge his wife with any criminal offence.

"The only thing you can do," said the magistrate, "is to take proceedings to force your wife to return to her conjugal duty."

And with this sorry consolation the bridegroom returned to his solitary home.

INTERESTING ITEMS.

The wedding ring is worn on the left hand because the right is symbolical of authority and the left of obedience.

Women of to-day are, on an average, two inches taller than they were twenty-five years ago.

High heels owe their origin to Persia, where they were introduced to raise the feet from the burning sands of that country.

While the wedding service is proceeding in Japan the bride kindles a torch and the bridegroom lights a fire from it and burns the wife's playthings.

The invention of the typewriter has given employment to 500,000 women.

It is believed to be bad luck to cut the finger-nails on Friday, and manicurists say their business is lightest on that day.

The average age at which women marry in civilized countries is said to be twenty-two years and a half.

Faith

You cannot be expected to have faith in Shiloh's Consumption Cure, the Lung Tonic, as a cure for Colds, Coughs and all diseases of the air passages, if you have not tried it. We have faith in it, and we guarantee it. If it doesn't cure you it costs you nothing. If it does it costs you 25c. That's fair. Try it to-day. Shiloh has cured many thousands of the most obstinate cases, and we do not hesitate to say that it will cure any Cold, Cough, Throat or Lung trouble. If we did not believe this we would not guarantee it. Shiloh has had an unbroken record of success for thirty years. It has stood every possible test without failure. Further

Proof

is found in the many testimonials of those who have tried Shiloh and been cured. Mrs. Archie Taylor, Asaph, Pa., writes:—"I bought a bottle of Shiloh's Consumption Cure, and found it very beneficial. I have two children, and they had a terrible cough. I gave them everything I could think of, but they got no better until one evening my husband bought a bottle of Shiloh. We gave it to the children when they went to bed, and they slept all night. It cured them completely. I shall always keep it in the house."

CURRENT TOPICS

In reviewing any twelvemonth upon the "passing into history" one is tempted to exaggerate the importance of the events it witnessed, the impressions of these being vivid and fresh as compared with those of earlier events. Yet it may be said with entire accuracy that the year 1905 will be remembered and treated by historians as in many respects a very extraordinary one. It will claim this distinction not merely on account of the events which fell within its span but also on account of the many shadows of coming events it had occasion to contemplate. It was truly a year of signs and portents. The world has felt that it was "on the eve" of momentous changes and transformations—political, social, industrial.

The collapse of the Russian autocratic-bureaucratic system which the memorable naval battle of the Sea of Japan emphasized in so startling a manner not only compelled the Czar to welcome President Roosevelt's peace suggestions but to inaugurate by a whole series of concessions and reforms a new order of things in the huge, backward empire. The terrible contest in the far East has been succeeded by an even more terrible—in its dreaded possibilities, at any rate—struggle of an internecine character. The revolution now in progress in Russia, with all its appalling features of red and white terror, spells a new and better era for the oppressed and misgoverned millions. The old regime is dead beyond resurrection, but how long and how catastrophic will the period of transition be? The wisest men cannot answer the question; and for Russia the year closes without decisive victories either for the government or the insurrection.

In Austro-Hungary the actual situation is no better than it was at the beginning of the year, but there are bright signs of improvement. At present all is chaos, but universal suffrage has been definitely offered to the people of both halves of the dual kingdom, and a comprehensive programme of economic reform in addition.

France has found the year strenuous and critical. The Moroccan episode brought her to the verge of war with powerful Germany, but the reasonableness of her ministry saved her and all Europe from that awful calamity. Her parliament has voted separation of Church and State—a step of historic significance—and addressed itself to difficult tasks of social legislation. In Great Britain a change of government has quietly been effected, but the people are yet to pass on the large issues to which that change was due. There, as everywhere, the paramount questions confronting government and electorate have to do with the life and labor of the masses, the distribution of wealth and the elimination of social evils.

In the United States the people are certainly "on the eve" of events that will profoundly affect their political and industrial future. Legislation of extreme importance is pending, and the Senate is on trial. The war on abuses of privilege, on graft and corruption, has yielded notable successes of a preliminary character. The ground has been cleared, needed light has been shed, preparations have been made.

WITTE WARNS THE DOUMA

Change in Attitude of the Russian Government.

ULTIMATE VICTORY.

The St. Petersburg correspondent of the London Times says that the newspapers, in reviewing events of the past year, almost unanimously predict a continuation of the revolutionary struggle in 1906. They do not venture to question the good intentions of the sovereign, but recognize the fact that the bureaucracy, which has so long successfully vitiated all sincere attempts at reform, remains master of the situation, and with the aid of bayonets, will be able to retain its mastery for many months to come. Through the sombre expectation, however, rings a note of confidence in the ultimate victory of freedom.

There was a ghastly incident Saturday at the Nicholas Food Station. A truck appeared full of corpses, which the Moscow authorities had shipped for interment in the country, but which, by accident, or design, came to St. Petersburg. An angry crowd gathered, but Cossacks dispersed them.

REACTION IN ASCENDANT.

The St. Petersburg correspondent of the London Times remarks upon the radical change in the Government's attitude in favor of reaction, citing among other indications, an article in the *Novoe Vremya*, inspired by Count Witte, declaring that the manifesto of October 30th in no wise affects the status of the autocracy and warning the Douma that it will be dissolved if it attempts to meddle with the fundamental laws of the empire.

Count Witte's secretary has telegraphed to Moscow, contradicting a statement that the Czar would swear to observe the constitution.

Twelve hundred frontier guards have been brought to St. Petersburg to strengthen the garrison.

The Government forces continue slowly to conquer the south-eastern part of the empire. Novorossisk has been recaptured after having been held by the insurgents for three weeks.

M. Kokovstef, Minister of Finance, in submitting the budget to the Council of the Empire, pointed out that there was a deficit of about 480,000,000 roubles (\$240,000,000) due to the non-inclusion of the war expenses in last year's estimates. This must be met with a loan. The Minister admitted that the finances of the country had been shaken by the war and the internal crisis, but he was confident they would be restored if the disorders ended. He announced that this would be the last budget to be examined solely by the Council, as the Douma would be hereafter empowered to co-operate in examining it.

ATTACK MILITARY TRAIN.

A despatch from Riga, Livonia says: News has just reached this city of a daring attempt of the revolutionists to capture a military train conveying a large sum of money from St. Petersburg to Libau. A band of revolutionists having advance information gathered at Hazenpot, burned two bridges and tore up the track. Two companies of infantry which were escorting the train left the cars and were joined by a detachment of dragoons. This force marched against the revolutionists, who, from behind improvised defences, opened fire on the soldiers. The infantry, after firing two volleys, which killed 65 and wounded nearly 100 of the revolutionists, charged with the bayonet, and the dragoons completed the rout by sabring the revolutionists they overtook.

THE OLIVE BRANCH.

The St. Petersburg correspondent of

colors to fight to the death against the revolutionists.

Krasnoyarsk also was for several days in the hands of insurgents, who elected a revolutionary government and exacted an oath of allegiance from all citizens.

FOUR PEOPLE BURNED.

Three Children and an Aged Woman the Victims.

A despatch from Portage la Prairie, Man., says: A fearful holocaust occurred on Sunday morning four miles east of here, when the residence of H. A. Brazil was destroyed by fire, and three of his children and his wife's aged aunt were burned to death. The household consisted of Brazil, six children, and the aunt, Catherine Quinn, who were sleeping on the second floor. Brazil, who slept down stairs, was awakened by one of the youngsters yelling fire, and not noticing it in the house, he rushed to the stable, and loosened his nine horses; then went to the house. By this time it was full of smoke and flame. In the meantime three of the children had escaped, and the mother had snatched the two-year-old baby out of bed, and laid it in the window sill. She climbed onto the porch, and slipped off, and the infant fell back into the burning house and perished. The eldest girl lost her life in an effort to save the others. The dead are: Catherine Brazil, 16 years old; Francis Brazil, 4; Cecilia Catherine Quinn, 75 years. Of the nine horses which Brazil released, seven stayed in the stables and were destroyed. It is said that the fire was of incendiary origin, but the police vigorously deny there is any foundation therefor.

STRANGLED WITH WIRE.

Woman Murdered in a Revolting Manner in Chicago.

A despatch from Chicago says: Mrs. Bessie Hollister, wife of Franklin C. Hollister of Hollister Brothers, one of the largest printing concerns in this city, was murdered on Friday night by Richard Ivens, a carpenter 24 years old. The deed in all its details was one of the most brutal and revolting in the annals of crime. Ivens has made a full confession, and at the Coroner's inquest he told without the slightest emotion of his efforts to assault his victim, whom he strangled to death with a fine copper wire when she resisted his attack.

At the close of the hearing, W. C. Hollister, brother-in-law of the dead woman, made an unsuccessful effort to shoot Ivens. He was making his way towards the murderer, revolver in hand, when a policeman caught sight of the weapon and grabbed Hollister. Other policemen hustled the frantic man from the room.

The entire city is aroused and excited over what is regarded as possibly the most hideous outrage ever perpetrated in its midst upon one of the most respected and popular of its citizens. There is loud and angry talk of lynching.

HOW TO MAKE DAMONDS.

Failure of a Well-Known Dairyman of Brockville District.

A Brockville despatch says: The failure of F. M. Scott, a well-known dairyman of this district, is a big one, and affects the whole section. Scott had several farm properties, four cheese factories and a butcher shop and butter factory in Brockville. He has been con-

IMPROVE THE DAIRY COW

DOING'S AT THE EASTERN DAIRY-MEN'S CONVENTION.

What the Dairy Industry Has Done for Canada — President Derbyshire's Annual Review.

That it pays the dairy farmer to keep only good cows and to study the individual cost of his herd, were the two main points brought out by the speakers at the opening of the twenty-ninth annual convention of the Eastern Ontario Dairymen's Association at Peterborough.

PRESIDENT'S ADDRESS.

President D. Derbyshire, M. P., said in part with reference to the dairy industry: "I might point out that both in the aggregate production and returns received, 1905 has been the banner year. It is certainly very gratifying that we made about the same quantity of cheese as formerly, and our butter production has beaten all previous records."

CHEESE EXPORTS.

"Our cheese exports from Montreal for the season closed were 2,121,101 boxes. I estimate the cheese on hand in Canada at the close of navigation at 450,000 boxes, which would make 2,600,000, valued at \$22,000,000.

"Our butter exports from Montreal were 573,449 packages, and the estimated stock in Canada is 125,000 packages, so we made in the season 700,000 packages, valued at \$9,000,000.

BACON TRADE.

"The bacon trade is closely allied with the dairy industry, amounted to about \$15,000,000.

"In the above estimates no account has been taken of our home market, and this must be looked into, especially for butter, for our Canadian people are consuming larger quantities of fine creamery butter each year. Our home consumption in 1905 was about 3,500,000 packages.

HUGE INCREASES.

"You will be glad to know that we received about \$10,000,000 more in 1905 than in 1904 for cheese, butter and bacon. It will be noticed that our dairymen produced (excluding condensed milk, milk for our cities, towns, etc.) cheese valued at \$22,000,000; butter, \$8,000,000; bacon, \$15,000,000, and the home consumption was \$50,000,000. We are sending our goods not only to the mother country, but to the Orient and Japan as well, and in increasing quantities each year.

"Our factories are being improved, and some really first-class ones are being erected, and our makers are becoming better educated. A larger number of and better qualified instructors have been employed, and are doing very satisfactory work. We had twenty-six instructors, besides our chief instructor and they have done good work—visiting, giving instructions and attending meetings.

THE REFRIGERATOR SERVICE.

"Our goods have been finer and more uniform than ever before. Our Dominion Department of Agriculture has rendered splendid assistance by giving us regular refrigerator service, not only by cars to Montreal, but on the steamships from Montreal to the British market, and employed inspectors at Montreal and the different English ports to examine our goods, and report weekly to our Dairy Commissioner at Ottawa the temperature of our goods on arrival at destination. This has been of great importance to dairymen, for the goods were never before delivered to their ultimate market in as fine condition.

"The watching of our goods arriving at Montreal, as well as the different ports on the other side, is working well for they do not now lay around the docks, but are quickly taken care of."

terme importance is pending, and the Senate is on trial. The war on abuses of privilege, on graft and corruption, has yielded notable successes of a preliminary character. The ground has been cleared, needed light has been shed, preparations have been made. During the new year some tangible results should be obtained.

DIED OF HYDROPHOBIA.

The Doctors Were Powerless to Prevent Fatal Issue.

A Philadelphia despatch says: Hydrophobia, resulting from the bite of a pet dog six weeks ago, caused the death of Miss Julia Curtin on Tuesday at the home of her parents, Mr. and Mrs. J. J. Curtin. Miss Curtin was 21 years old. Dr. Roland G. Curtin, a prominent physician, was her uncle. When all hope was gone and when she knew and her family knew that death could not be far off, she bade them a brave farewell in one of her lucid moments and asked them to leave the room. Then she was locked in a room with four physicians to meet her terrible end beyond the gaze of those who loved her best. Toward the last ether was administered with her consent to ease her pain, and she was under its influence for several hours.

SIX WERE HELD UP.

A Desperado Terrorized Business Section of Winnipeg.

A Winnipeg despatch says: About six o'clock on Saturday evening, when Main Street north was in its most crowded condition with shoppers and pedestrians, the business section was terrorized by a desperado, who held up at least six people at the point of a revolver and relieved them of sums ranging from 25 cents to \$15. Though the police were notified by the victims, the robber was not captured, and the theory of the officers is that he boarded a freight train and left the city.

PAY SERGEANT MISSING.

Men of "A" Battery Left to Mourn Money Losses.

A Kingston despatch says: Pay Sergeant Norwebb of "A" Battery, R.C.H.A., has disappeared, leaving many of his comrades short of cash, which he borrowed from them, the amount probably reaching \$800. He left his uniform at the barracks last night, and evidently went across to Cape Vincent, N.Y., this morning. Norwebb is an Englishman, and was married only a few months ago.

NEW ROLLING STOCK.

Large Orders Given by the Canadian Northern Railway.

A despatch from Montreal says: Mr. Hanna, Third Vice-President of the Canadian Northern Railway, said here on Wednesday night that Mackenzie & Mann interests would spend \$2,000,000 in equipment this year. Orders placed embrace 1,000 box cars, 400 flat cars, 50 stock cars, 30 first class day coaches, 16 baggage, mail and express cars, 5 sleepers, 2 diners and 44 high-class freight and passenger locomotives.

ALL-RAIL SHIPMENT.

A Hundred Cars of Wheat a Day Leaving Fort William.

A Winnipeg despatch says: Superintendent of Transportation Price arrived in the city at noon on Thursday from Port Arthur and Fort William. Speaking of conditions at the lake, Mr. Price stated that there was any amount of room for storage in the company's elevators at Fort William. Only about two million bushels are stored there at the present time. This amount is not liable to be increased, as four or five trains leave Fort William every day carrying wheat east by the all-rail route. About a hundred cars are thus shipped out East William daily.

ing two volunteers, which killed or wounded nearly 100 of the revolutionists, charged with the bayonet, and the dragons completed the rout by sabring the revolutionists they overtook.

THE OLIVE BRANCH.

The St. Petersburg correspondent of the London Times says he hears the Government has privately informed the labor leaders that if January 22nd, the anniversary of "Bloody Sunday," passed quietly, repressive measures will be suspended the next day. He adds that the Council of the Empire has commenced the discussion of new regulations for the suppression of the popular uprising. The minority favors the preliminary use of blank cartridges, but the majority thinks this would only embolden mobs and lead to greater bloodshed afterwards. The whole police force of St. Petersburg will be armed with rifles shortly.

Count Witte, in receiving a deputation from the league of October 30th, promises the removal of the restrictions for which Minister of the Interior Durnovo is responsible, but the Premier showed that he believed the restrictions had been necessary. He said:—

"There was a time when I sought the confidence of the people, but such illusions are no longer possible. I have always opposed repression, but have been compelled to resort to it as the result of having trusted my countrymen."

OFFICERS ARRESTED.

A despatch from St. Petersburg to a London paper reports the arrest of eight artillery officers of the St. Petersburg garrison on the charge of being engaged in a conspiracy to blow up the Troitsky bridge and to capture the fortress.

SEMINARY SHELLED BY TROOPS.

A despatch from Tiflis, Caucasasia, says: Nearly 350 persons were killed or injured as an outcome of an attack made by Cossacks on Thursday on the Armenian seminary here, following the throwing of two bombs from that institution at a passing patrol. Four Cossacks were wounded and a boy was killed by the explosion of the bombs. Artillery was immediately called up and the seminary was surrounded and shelled. The building soon burst into flames and the bombs and cartridges stored therein exploded. Thirty-three persons perished during the conflagration while three hundred were injured by fire or wounded by shells. The troops subsequently shelled another Armenian house where bombs and weapons were hidden and killed eight revolutionists.

WORST IS OVER IN SIBERIA.

A despatch from St. Petersburg says. The first advices received by the Government from Siberia after the restoration of telegraphic communication, show that the most critical conditions prevailed during the recent strike, but that now, with the arrival of reliable troops from Manchuria, the worst happily is over. Owing to the interruption of communication, the local governors were unaware of their authority to declare martial law, which was conferred by the Emperor's ukase. The military forces at their disposal were in open sympathy with the strikers, and many of them were revolutionaries, and this prevented energetic measures being taken to restore the authority of the Emperor, which practically was non-existent for many days.

Divisions under Gen. Sukhoten now have arrived and taken possession of Irkutsk, Omsk, Krasnoyarsk, and other towns, and are arresting the leaders of the insurgents, and disarming the unreliable troops.

The first telegram arriving from Irkutsk was a frantic appeal from the financial agent there for some one to take over the administration of the city, the vice-governor, the chief of police, and all his other superior officers having been killed or wounded during the insurrection. He reports that for several days the revolutionists were in control of the entire town except the administration building, and that this was only held because of the devotion of the cadets of the military school, who swore on the

Failure of a Well-known Dairyman of Brockville District.

A Brockville despatch says: The failure of F. M. Scott, a well-known dairyman of this district, is a big one, and affects the whole section. Scott had several farm properties, four cheese factories and a butcher shop and butter factory in Prescott. He has been operating the lot since last spring, and did a big business with the farmers of the Townships of Augusta and Edwardsburg. He purchased practically all the farmers' milk for the butter factory, paying about 82 more per ton than the cheese factories. All the farmers who patronized him are out the price of two months' milk, and some are behind more, having received cheques for previous months which they neglected to cash. It is a severe blow to many of them, and will have a severe effect on business.

It is estimated that the liabilities will amount to \$40,000. The assets consist of four cheese factories, four farms, and the Prescott stock and cattle. The Traders' Bank hold mortgages on one farm and two or three factories.

DAIRYMEN MAY BE LICENSED.

To Secure Better Sanitary Conditions in Factories.

A despatch from Toronto says: It is unlikely that any Government measure will be introduced at the coming session with regard to the licensing of cheese factories and creameries, in the opinion of Hon. Nelson Monteleith, Minister of Agriculture. Yet in view of the importance of the project he believes that if any measure is passed it should be a Government bill. The object of such legislation would be to secure the observance of sanitary conditions inside the factories. At present the local Boards of Health have power to enforce cleanliness with regard to the exterior surroundings of the establishments by closing them if orders are not obeyed. The dairy inspectors, who are virtually inspectors, can act in an advisory capacity, but have no means of compelling obedience.

By means of the license system it would be possible to revoke permits of the manufacturers of cheese and butter if regulations were not observed. There would also be a rigid system of inspection. However, the idea which has been agitated to a considerable extent will be left to be pronounced upon by the various dairymen's associations. A private member's bill may be introduced for discussion, but no action will result for another year.

TELLER BANWELL CAUGHT.

Man Who Robbed Crown Bank Arrested in Jamaica.

A Toronto despatch says: Edwin St. George Banwell the teller of the Crown Bank of Canada who absconded on Dec. 9th, 1905, in company with Norah Hector, whom he afterwards married, taking with him a large amount of the bank's money, was arrested by Detective Black, of Toronto, on Thursday afternoon in Kingston, Jamaica. All the money Banwell stole, with the exception of what he and his wife spent during their travels, was recovered.

As Kingston is a British possession no extradition proceedings are necessary, but it will be necessary to bring back Banwell and his wife by way of England. He will be arraigned in the Police Court at Kingston, Jamaica, under the Fugitive Offenders' Act, in company with his wife, who is also charged with theft, and as Mr. Black has enough evidence to make out a prima facie case, the magistrate will in all probability order that the prisoners be at once sent back to Canada.

MISSIONARIES IN PERIL.

Protection Against Anti-foreign Societies in China.

A despatch from Shanghai says: The missionaries in the Province of Hupeh have asked the American and British Consuls for protection owing to the increased activity of the anti-dynastic and anti-foreign societies.

mination. This has been of great importance to dairymen, for the goods were never before delivered to their ultimate market in as fine condition.

"The watching of our goods arriving at Montreal, as well as the different ports on the other side, is working well, for they do not now lay around the docks, but are quickly taken care of."

IMPROVE THE FACTORIES.

Having referred to the improved accommodation for the reception of goods in the old country, and having predicted even better prospects for 1906, the President urged all makers to attend the dairy school at Kingston.

"I would like," he proceeded, "to urge all factories to join our syndicate system and assist us to make a uniform high quality of goods everywhere in Eastern Ontario. While a large number of factories are good and well equipped, we still have a large number not fit to make cheese in, and where finest goods cannot be made. We must improve our factories, for no business in Canada rests on a more solid foundation, and why our factories should not be first-class buildings, well painted, clean and tidy, with proper drainage, no one can explain. Why should shade trees not be planted and the grounds around the factory made beautiful? Possibly I can explain why, because the makers of our cheese are the only class that are not properly paid. A large number of our best men are quitting the business. While the milk producers are prosperous this last year, our manufacturers are poorer, having more to pay for labor, fuel and furnishings. Why not give them one and a quarter cents for making and demand better boxes and a better service. We appointed a committee to report on licensing factories, and I hope their report will be favorable, so we can demand a good factory or close it up."

WATCHWORD FOR 1906.

President Derbyshire urged all to use their influence to improve the quality and increase the quantity of goods.

"With our present opportunities for education and instruction," he said, "there will be no excuse for having an ordinary maker, for they are dear at any price; or having an old open factory resting in the mud, with no drainage, or not having modern machinery, or not delivering your cheese to the station in clean wagons, with proper covers to keep the cheese or butter clean, or not doing everything in your power to make the watchword for 1906 cleanliness and improvement all along the line."

Finally, the speaker contended that by all working together they could step right out of the way of competitors by making and placing on the market regularly the finest goods in the world.

RESTORED FOUR FOLD.

Man Who Misappropriated Money of Kildonan Municipality.

A despatch from Winnipeg says: The treasurer of the municipality of Kildonan on Tuesday received \$140 conscience money from a man who misappropriated \$35 while running the municipal ferry twenty years ago, but who is now preaching in the west. He desired to restore fourfold, but has never been able to afford it. The municipality will probably return the surplus payment. His defalcation was never known.

TOKIO GREETED OKU.

Commander of Left Japanese Army Acclaimed in Capital.

A Tokio despatch says: General Oku, who commanded the left army during the war with Russia, made a triumphal entry into the capital on Friday morning. The General, who was accompanied by his staff, drove in the Imperial carriage to the palace. The greatest enthusiasm was manifested by the people who lined the route, cries of "Nanshan" and "Telling" greeting the General who isolated Port Arthur at a critical stage of the campaign.

W FORESTRY CONVENTION LEADING MARKETS

EARL GREY, THE PREMIER, AND MR. R. L. BORDEN SPEAK.
The Value of Timber Lands to Keep Up Water Supply—Valuable Suggestions.

The Canadian Forestry Convention, called to consider the forests of Canada, their importance to the nation, and to discuss means by which they may best be preserved, opened on Wednesday in the sallyway Committee of the Parliament Buildings, Ottawa. Some three or four hundred delegates were in attendance from different parts of the Dominion. Sir Wilfrid Laurier presided, Earl Grey was on the platform.

ADDRESS BY EARL GREY.
The convention was opened by his Excellency the Governor-General, Earl Grey, who spoke on the urgent need of measures to prevent the depletion of the land forests and mentioned the sterility of once fertile countries, a condition brought about by selfish destruction of the forests. He had been long enough in Canada to recognize how very desirable it was to focus the best brains of the Dominion on the problem of preserving the forests for the maintenance of the agriculture on which the prosperity of Canada depends. He had seen in India, in Asia Minor, in Italy and Greece extensive tracts, once fruitful, which had fallen into ruin because their forests had been devastated by generations ignorant of the value of forests, blind to any but their own selfish interests. They should guard against a repetition of this in Canada.

THE PREMIER.
Sir Wilfrid Laurier said it was an evidence of the recognition of preserving the forests. Great harm had already been done, and this was the time to check it. After a reference to the faint conception pioneers entertained of the value of forests, and the effects on agriculture, he spoke of the necessity of maintaining a large forest domain. In Canada, where public lands come largely under the jurisdiction of the provinces, it was the duty of Provincial Governments to preserve the forests, and where they had passed largely to private ownership the province should repurchase them.
Sir Wilfrid then referred to reforestation methods in other countries, and urged extra precaution against forest fires, with severe punishment where due to negligence. He thought railways should have patrols follow their trains through forest sections.

TREE-PLANTING ON HOMES.
Finally, Sir Wilfrid said there should be a policy of tree-planting. It was not sufficient to preserve a forest but people should be united to give more attention to tree-planting upon their homes, and especially upon their farms. The Premier alluded to the improvement being wrought in Alberta, where the farms in the once treeless prairie were being surrounded by beautiful groves. Winnipeg was spoken of as a city which had done marvels in tree-planting. There was a great deal to be done in the east, and especially in his own Province of Quebec. The French-Canadian had not been as careful as he should have been. He was a very handy man with the axe. In fact, there was none better.
Sir Wilfrid closed his address with the renewed expression of a desire that Canadian farmers should be impressed with the necessity of planting trees and covering every rocky hill and the banks of every running stream with timber.

LEADER OF THE OPPOSITION.
Mr. R. L. Borden promised that he and those that sat with him in Parliament would assist the Government in bringing in any regulations for the accomplishment of the objects mentioned by the Premier. Canada was specially interested because of her great forest

BREADSTUFFS.
Wheat—Ontario—78c to 78½c bid for No. 2 white outside, and less active demand for red and mixed at 77c to 77½c; 73c to 74c for spring and goose.
Wheat—Manitoba—Prices at lake ports are 88½c for No. 1 hard, 85½c for No. 1 Northern, and 82½c for No. 2 Northern.
Flour—Ontario—Dull export bids \$3.10, buyers' bags, outside, for 90 per cent. patents. The domestic market is steady, \$3.40 to \$3.55. Manitoba—\$4.50 to \$4.60 for first patents, \$4.10 to \$4.20 for second patents, and \$4 for strong bakers'.
Millfeed—Ontario bran \$15.50 to \$16 in car lots outside, shorts \$17 to \$18. Manitoba bran \$17 to \$17.50, shorts \$18 to \$19.50 at Toronto and equal points.
Oats—35c bid west for No. 2.
Barley—Dull, with No. 2 46c, No. 3 extra 44c and No. 3 41c outside.
Peas—Steady at 78c to 79c outside.
Rye—Firm at 70c outside.
Buckwheat—51c to 52c outside.
Corn—Canadian 42c to 44c, Chatham freight, American No. 3 yellow 50c to 50½c at Toronto.
Rolled Oats—\$5 in barrels and \$4.75 in bags on track here; 25c more for broken lots here and 40c outside.

COUNTRY PRODUCE.
Butter—The tone of the market continues easy, with plenty of all kinds coming forward.
Creamery 24c to 25c do solids 23c to 24c Dairy lb roll, good to choice. 21c to 22c do tubs 21c to 22c do medium 20c to 21c do inferior 19c to 20c Cheese—13c for large and 13½c for twins.
Eggs—30c for new laid, 21c to 22c for fresh and cold storage, and 19c to 20c for limed.
Poultry—Fat chickens 8c to 9c, thin c to 8c; fat hens 6½c to 7½c, thin 5½c to 7c; ducks 11c to 12c, thin 6c to 8c; geese 10c to 11c; turkeys 13c, with 13½c for choice small lots.
Dressed Hogs—Car lots here are quoted at \$8.25 to \$8.40 per cwt.
Potatoes—Ontario, 65c to 75c per bag on track here, 75c to 85c out of store; eastern 75c to 80c on track and 90c to 95c out of store.
Baled Hay—Quotations for baled hay are \$8 per ton for No. 1 timothy in car lots here and \$6 for No. 2.
Baled Straw—\$6 per ton for car lots on track here.

MONTREAL MARKETS.
Montreal, Jan. 16.—Grain—Very little inquiry for Manitoba wheat. Oats firm under small offerings and a fair demand for local consumption.
Oats—No. 2 white, 39c to 39½c; No. 2 white 38c to 38½c, and No. 4 white 37c.
Peas—78c to 78½c f.o.b. per bushel.
Barley—Manitoba, No. 3, 47½c; No. 4, 46c.
Corn—American, mixed, 52½c to 53c; No. 3 yellow, 53c to 53½c, ex-track.
Flour—Manitoba spring wheat patents, \$4.60 to \$4.70; strong bakers, \$4.20; winter wheat patents, \$4.25 to \$4.50; straight rollers, \$4 to \$4.10; do in bags, \$1.85 to \$1.95; extras, \$1.65 to \$1.75.
Millfeed—Manitoba bran, in bags, \$18; shorts, \$20 per ton; Ontario bran, in bulk, \$14.50 to \$15; shorts, \$20; milled mouille, \$21 to \$24; straight grain mouille, \$25 to \$27 per ton.
Rolled Oats—Per bag, \$2.40.
Cornmeal—\$1.45 to \$1.50 per bag.
Hay—No. 1, \$8.50 to \$9; No. 2, \$7.50 to \$8; clover, mixed, \$6 to \$6.50, and pure clover, \$6 per ton in car lots.
Cheese—Asking 13½c to 13½c for western and 13c to 13½c for eastern.
Butter—Local trade continues good at 23c to 23½c for creamery.
Eggs—Fair business is passing at 24½c to 25c for selected and 20c to 21c for Montreal limed and No. 2 candled.
Provisions—Straight lots brought from \$6.75 to \$7; abattoir dressed hogs have been correspondingly advanced, and \$9.50 will be this week's price. Country dressed hogs are rather scarce, and are bringing from \$8.50 to \$8.75.

MONTREAL'S LEADING HOTEL

Fire Destroys the Central Building of the Windsor.

A despatch from Montreal says: The historic Windsor Hotel, Montreal's leading hostelry, was badly damaged by fire on Friday night, Manager W. S. Weldon was seriously injured while helping to fight the flames at the outset of the fire, and the three hundred guests of the hotel had to seek other quarters.
The hotel building is constructed in the form of a quadrangle, with a central court. The fire resulted in the complete gutting of that section of the building two storeys in height, occupying the centre of the square on which the hotel stands, and which contained on the upper floor the dining-room, ladies' ordinary, and kitchen, and on the lower floor, bar-room, grill-room, and other public rooms. It was only the peculiar architecture of the building which saved the entire structure from destruction, heavy brick walls and fire-proof doors shutting off the remainder of the building from the burned portion. As a result, only a few of the guests' rooms were affected, and mostly by smoke and water.
The section of the building, however, containing the kitchen, dining-rooms, parlors and ladies' ordinary is a scene of destruction, and it will take many thousands of dollars to repair the ravages of the flames and the damage caused by water.
THE LARGE DINING-ROOM, one of the finest on the continent, with all its splendid decorations, which were renewed only a couple of years ago at a cost of \$20,000, is a complete wreck, the ceiling having fallen in, while the par-

lors, with all their beautiful furniture were also wrecked.
The fire started about 7.30 in the kitchen, being caused, it is supposed, by electric wiring. The flames spread quickly to the dining-room, where a number of guests were at dinner, and were compelled to make a hasty exit.
The guests did all in their power to fight the flames but without avail. In the meantime, when it was seen that the fire was likely to assume serious proportions a general alarm was rung, and the whole fire brigade was soon on the scene.
LOSS MAY REACH \$150,000.
The firemen, after a couple of hours hard work, succeeded in getting the fire under control, having confined it to the section already mentioned, the other portion of the hotel containing the guests' apartments being saved. The fire was attended by considerable excitement; at the time there were some 300 guests in the hotel, but they all showed decided presence of mind and many of them did all they could to cope with the flames. Hundreds of people gathered in the vicinity of the hotel to watch the fire. All the books and valuable were removed from the hotel safe to the Bank of Montreal.
It is very difficult to estimate the damage, it being variously estimated at \$100,000 to \$150,000. There is insurance on the building of \$750,000 distributed amongst local companies and with Lloyd's, England. There will be considerable loss of revenue for some time, as the hotel will have to be closed up temporarily to allow for the restoration of the burned portion.

CONFINEMENT OF CATTLE.
The last few years the policy of closely confining dairy cows during the winter, and even during the entire year, has grown in favor; upon the ledger and "milk check" this demonstration has found its proof. To the unwary and to the intensely practical dairyman these very tangible evidences are proofs enough; but to the far-sighted breeder the practice presents objections that seem to have a deeper importance than the casual observer may take notice of. The practical man in any line may work on with marked success though he be regardless and even ignorant of the deeply working fundamental principles that govern his occupation; yet his ignorance does not excuse him from facing abnormal conditions that offended nature may sooner or later impose upon his business as a result of his shortsightedness.
On impoverished farms are certain results of rash methods with nature. Soil that has been building for thousands of years cannot endure the depleting extravagances and unreasonable culture of the present and the past. Neither can the constitutional vitality of man and animals stand radically unnatural conditions without consequent degradation. One after another our great prisons are being condemned as veritable snarls of human life; this because men is constituted to breathe nature's pure air, not the contaminated vapors of absolute confinement.
THE COW QUESTION, then, is whether cattle may be subjected to entirely artificial conditions indef-

if one adapts his crops and methods to the number of acres, and even if it is rough and broken it may be made to produce a good deal toward a comfortable living if judiciously managed.
There are factories which grind up corn cobs into meal, evidently for the purpose of selling it to dealers for adulterating feeding stuffs. Another means of adulteration is to screen out light oats which have very little kernel within the hulls, and mix such low-grade oats with corn for grinding, the product being called ground corn and oats. Of course it is true to name, but unfortunately such a mixture is of little value.
CARE OF THE HORSE.
The farmer should remember that the stomach of the horse is small and hence should be careful to see that his animal have frequent drinks of good, pure water during the day. This is especially needful during the summer when the days are hot and dry. It is no easy for the horse to go from morning until noon or night than it is for a man, but we find many careless farmers compelling them to. It is not humane treatment and the horse is too faithful a servant to be denied such a small favor.

CONDENSED NEWS ITEMS

HAPPENINGS FROM ALL OVER THE GLOBE.
Telegraphic Briefs From Our Own and Other Countries of Recent Occurrence.
CANADA.
The Dominion surplus for the last year is \$12,129,472.
Nearly \$1,000,000 was spent in building in London last year.

LEADER OF THE OPPOSITION.

Mr. R. L. Borden promised that he and those that sat with him in Parliament would assist the Government in bringing in any regulations for the accomplishment of the objects mentioned by the Premier. Canada was specially interested because of her great forest areas, and because of her inland waterways, the efficiency of which depended on regulation of the forests. After denouncing the indiscriminate destruction of trees, Mr. Borden gave a European example of the value of forestry. Saxony has 420,000 acres of forests in rough, mountainous country. In 50 years she has received \$200,000,000, and the forests are better than they were 50 years ago. Canada has 400,000,000 acres of forest. Mr. Borden declared for continuity in forest operations. State aid could be rendered in two ways, by education and by direct control by State regulation.

WILL SELECT THE FITTEST

Immigration Next Season Will be More Judicious.

An Ottawa despatch says: Lord Strathcona, who was in Ottawa discussing immigration matters with Sir Wilfrid Laurier and Hon. Frank Oliver, has returned to Montreal, and sails again for England on Saturday. Speaking on the probable immigration from Britain next year, his Lordship observed that we are sure to receive a very large number of the class of Britishers best suited to become successful Canadian settlers. So many are anxious to come that Canada can well afford to select only those who are likely to get on well in a new country, and this, he says, is the idea which the Canadian immigration agents in the United Kingdom endeavor to keep in view.

LOAN OF FIFTY MILLIONS.

French Bankers Have Come to Assistance of Russia.

A Paris despatch says: It is stated in well-informed quarters, though it has not yet become officially announced, that the negotiations between M. Kokovtsov, the former Russian Minister of Finance, and the French bankers, have resulted in the latter agreeing to advance to the Russian Government \$50,000,000 at 5½ per cent. interest, plus 2 per cent. commission. The State railroads are offered as a guarantee for the money advanced, which is to be reimbursed from the proceeds of the proposed new loan should the latter be floated within a year.

HOUSES OF REFUGE.

Class of Persons Who May be Committed to These Institutions.

- (1.) Any two of her Majesty's Justices of the Peace or of the Inspectors appointed as aforesaid, may by writing under their hands and seals, commit to the house of industry or of refuge to be employed and governed according to the rules and regulations, and orders of the house:
 1. All poor and indigent persons who are incapable of supporting themselves.
 2. All persons without means of maintaining themselves and able of body to work, and who refuse or neglect to do so.
 3. All persons leading a lewd, dissolute, and vagrant life, and exercising no ordinary calling or lawful business sufficient to gain or procure an honest living.
 4. And all such as spend their time and property in public houses to the neglect of any lawful calling, and
 5. Idiots.

The above is taken from the Ontario Municipal Act.

A Hamilton woman has sued a Niagara Falls broker for \$1,000 damages because he kissed her.

ETAOIN ETAOIN
Laborites are counted upon to form a considerable third party in the new British House of Commons.

Eggs—Fair business is passing at 24½¢ to 25¢ for selected and 20¢ to 21¢ for Montreal limed and No. 2 candled.

Provisions—Straight lots brought from \$6.75 to \$7; abattoir dressed hogs have been correspondingly advanced, and \$9.50 will be this week's price. Country dressed hogs are rather scarce, and are bringing from \$8.50 to \$8.75.

BUFFALO MARKETS.

Buffalo, Jan. 16.—Flour—Steady. Wheat—Spring, dull; No. 1 Northern, 92½¢; Winter, offerings light; No. 2 hard Winter, 87½¢ asked. Corn—Steady; No. 2 yellow, 48½¢; No. 2 corn, 48¢; Oats—Dull; No. 2 white, 36½¢; No. 2 mixed, 34½¢. Barley—Firm; Western, in store, 47 to 50¢.

NEW YORK WHEAT MARKETS.

New York, Jan. 16.—Wheat—Spot barely steady; No. 2 red, 90½¢ elevator; No. 2 red, 95¢ f.o.b. afloat; No. 1 Northern, Duluth, 95¢ f.o.b. afloat.

CATTLE MARKET.

Toronto, Jan. 16.—There was but a very limited offering of export cattle, though several buyers were looking out for good loads if they could have got them. One or two loads sold at \$4.40 to \$4.65, but these were not finished exporters.

Butchers—Extra choice and picked cattle firm at \$4.25 to \$4.40, with not enough to supply the demand. Medium to good butchers' cattle were firm at \$3.85 to \$4. Good butcher cows firm at \$3 to \$3.50.

Stockers—Market steady at about \$3.10 to \$3.40 for good stock. Fair demand. Lambs—Market very firm and 10¢ higher.

Hogs—Market very strong and 15¢ higher.

CAUGHT AFTER A LONG CHASE.

English Forger, Who Came to Canada, Taken in Minneapolis.

A despatch from Minneapolis says: After a chase, which extended from Quebec, Canada, to the Dakotas, George Ernest Sising, of Nottingham, Eng., was arrested here on Wednesday evening, charged with forgery and embezzlement. The complainant is William Bugley, a lace manufacturer in Nottingham. Sising's alleged defalcations are said to amount to a large sum, but the specific charge is that of forging a cheque for \$525. Sising is alleged to have fled from England in 1904, with his wife. He went to Quebec, but, learning that his whereabouts were known, he left Canada. He lived in different Eastern cities and four months ago came to Minneapolis.

BLOWN HIGH IN THE AIR.

The Terrible Fate of August Olsen at Hawk Lake.

A Winnipeg despatch says: A Swede named August Olsen met a horrible fate at Peterson's camp, Hawk Lake last Sunday evening. He was employed as foreman, and had fixed a blasting shot of dynamite, but the fuse failed to work properly, and it hung fire. Olsen went to investigate, and the explosion occurred just as he approached it. The unfortunate man was blown 150 feet into the air, and his mangled body was picked up with the leg, skull and jaw fractured. It is unknown why blasting operations were in progress on Sunday evening.

MAY SUCCEED DR. HARPER.

Principal of McGill Mentioned for Head of Chicago University.

A despatch from Montreal says: Principal Peterson, of McGill University, is mentioned as a likely successor to the late Dr. Harper as president of the University of Chicago. Dr. Peterson was a close personal friend of the great Chicago educationist, and some months ago the latter paid a visit to Montreal as Dr. Peterson's guest. When asked on Thursday if the report that he would succeed Dr. Harper was correct, Dr. Peterson said: "I have no statement to give out in the matter."

being condemned as veritable snares of human life; this because men is constituted to breathe nature's pure air, not the contaminated vapors of absolute confinement.

THE COW QUESTION.

then, is whether cattle may be subjected to entirely artificial conditions indefinitely and still preserve a health that is above suspicion. Not a few renders will recall the humid and violated atmosphere that they have encountered upon opening the doors of a well-filled cow stable on a winter morning. To the closely confined cow this is often the constant condition.

The recent prevalence of bovine tuberculosis is attributed by many to close confinement. All the well-defined cases of this disease that have come under the observation of the writer confirm this theory. Last summer the writer attended the slaughter of eighteen animals from three different barns in which the cows were housed to an extreme. These animals were subjected to the tuberculosis test and every cow showed tuberculosis in a more or less marked degree. Excessive confinement, of course, cannot create the germs, but provides the ideal conditions for its dissemination from a diseased member of the herd.

The best official herd test of Holstein-Friesian cows made in Ohio for several years was of six cows that spent the entire day in a barnyard and were stabled only at night. This test was conducted during the coldest weather of February, but the cows went out every day. The owner of these cows is a strong believer in this practice, and although his barns are in a large city, he never shuts the cows in except nights and bad weather.

It should be kept prominently in mind that the fresh-air cow is the vigorous cow, and the one that can transmit to her calf a constitution fit to carry with success and to perpetuate those estimable qualities and characteristics that the zealous enthusiast sometimes seeks to stamp in his herd where health and vigor of body are neglected.

HEIFERS YIELD RICHER MILK.

The production of milk and butter fat by dairy cows under normal conditions increases with each year up to the fifth and sixth years, when the cow is at her best. The length of time she will maintain her maximum production depends on her constitutional strength and the care with which she is fed and handled. A good dairy cow should not show any marked falling off until after ten years of age many excellent records have been made by cows older than this. The quality of the milk production by heifers is somewhat better than that of milk of older cows for we find a decrease of one-tenth to two-tenths of one per cent. in the average fat content for each year till the cows have reached full age. It is caused by the increase in the weight of the cows with advancing age at any rate there appears to be a parallelism between the two sets of figures for the same cows.

Young animals use a portion of their food for the formation of body tissue, and it is expected, therefore, that heifers will require a larger portion of nutrients for the production of a unit of milk or butter fat than do older cows. After a certain age has been reached, on the average about seven years of age, the food required for the production of a unit of milk or butter fat again increases as regards dry matter, and the digestible components of the food. A good milk cow of exceptional strength, kept under favorable conditions, whose digestive system has not been impaired by over-feeding and crowding for high records, should continue to be a profitable producer till her twelfth year, although the economy of her production is apt to be somewhat reduced before this age is reached.

FARM NOTES.

Carriages should be kept in a dry, airy place. There should be a moderate amount of light, otherwise the colors will be affected. Windows should be shaded to prevent direct rays of sun striking the vehicle.

Fifty acres make a good farm, and with much less land than this a very successful business may be carried on

Other Countries of Recent Occurrence.

The British Columbia salmon pack for 1905 will be about 1,820,000 cases, the best year in the history of the business except 1901.

Wm. MacKenzie in Ottawa said by June 1st trains would be running from Toronto to Parry Sound on the James Bay line.

A new 20-mile loop is being surveyed by C.P.R. engineers at Field, B. C., to overcome the heavy grade. It will cost \$1,200,000.

Sir Wilfrid Laurier has been invited to Erie, Pa., to attend a banquet of the Chamber of Commerce, at whatever date is convenient for him.

The number of homestead entries at the Battleford office for the month of December was 309. The total number of entries for the year 1905 was 5,198.

An advance in prices of all kinds of lumber is expected in British Columbia. Shingles are likely to go back to the old price of \$1.85 a raise of fifteen cents.

H. Nichol, of Brandon, Man., has sent a car of Best Life wheat and one of American Banner oats to Northrup King & Co., the large seedmen of Minneapolis. All this grain is being used for seed.

J. J. Hoffman, of Pittsburg, representing an American syndicate, is leasing gold mining claims on Michipicoten Island, making arrangements for power, and will erect a fifty-stamp mill in the spring.

An expert in the lumber business writing for the Victoria Colonist, reckons that 900,000,000 feet will be British Columbia's timber output this year. He advises care on the part of both the Government and capitalists, as the timber resources of the province are not good beyond fifty years with the present demands upon them. Ontario's lumber cut for 1906 is also estimated to be 900,000,000 feet.

GREAT BRITAIN.

Liberal politicians in Great Britain are confident of a controlling majority without Irish help.

William Cunard, son of Samuel Cunard, one of the founders of the Cunard Line, is dead in London.

The King has dissolved Parliament and summoned the new Parliament to meet at Westminster Feb. 12.

UNITED STATES.

A league has been incorporated in New York State to promote the commercial and financial development of the negroes of the United States.

Santa Cruz, Cal., Jan. 9.—Southern Pacific engineers excavating for the new Coast Line Railway have unearthed a huge mound of sea walrus tusks. The ivory is in fine preservation, some of the tusks being from two to three feet long and from nine to twelve inches through. The petrified remains of a mastodons were found in the hill.

Ayer's

Ayer's Cherry Pectoral
quiets tickling throats, hack-
ing coughs, pain in the lungs.
It relieves congestion, sub-

Cherry Pectoral

duces inflammation. It heals,
strengthens. Your doctor will
explain this to you. He knows
all about this cough medicine.

"We have used Ayer's Cherry Pectoral in
our family for 25 years for throat and lung
troubles, and we think no medicine equals it."

The late premier, Mr. Balfour, would
not desert Mr. Chamberlain and his
party deserted him. The ex-colonial
secretary is the ablest public debater
in England, but he cannot command
the people by his forensic power.

He has been the prince of change.
As a radical he was a man among men
for many a day. As a liberal he was
close to Mr. Gladstone in the early
struggles and triumphs of that party.

The home rule scheme of the great
commoner drove Chamberlain into op-
position, and as a unionist he became
the ally of the Duke of Devonshire and

fects powerfully the working class and
the employers in all industrial circles.
In addition there is the redress which
the dissenters desire.

These consolidations of the liberal
party, aided by the desertions of the
conservatives on the trade question,
account for the upheavals which have
so far taken place in the elections.
The home rule issue in the meantime is
wholly obscured.

WHAT OTHER PAPERS SAY.

Ottawa Citizen.

something seriously wrong when an
imminent election finds it in a state of
"angelic calm."

Toronto News.

I will not buy a single vote,

Said Mr. McIntyre.

And Pense replied in fervent tones,
That, too, is my desire.

Dear Kingston, let us shake your hand,
Of you the world will talk,
Because reluctant voters will
Hereafter have to walk.

Exchange.

Reeves, the Toronto plumber, whose
determined resistance to the combine
resulted in the exposure of its prac-
tices and the prosecution of the mem-
bers has had to leave the city as his
business was ruined. That is a poor
recompense for having been instrumen-
tal in saving the citizens thousands of
dollars by his action.

Kingston News.

The number of those coming before
the registration tribunal this year are
fewer than on former occasions. The
chief reason for this is to be found in
the compact not to spend money illeg-
ally in the campaign. Thence the man-
hood suffrage people are not paid to
register, the ward heelers are not paid
to bring them, and vehicles are not
hired in which to give them free rides
to the places where registration is done.
This so far is a gain for purity. For
those who have to be paid to go and
register their names would have to be
paid also to vote.

Toronto Globe.

Mr. Whitney's descent to the spoils
system and the approval of the office-
seeking element shows that there is
but one cure for the insidious poison
introduced into the public life of the
Province. Conservatives are as deeply
interested in reform as Liberals, and
those who are not office-seekers, but
office-payers, must vote for a better
state of affairs.

RICHMOND MINUTES.

The Council elect met at Selby. The
members elect present were Messrs. Z.
A. Grooms, Reeve, and Councillors
Fred Sexsmith, Charles Anderson,
Erastus Sills and Alfred McCutcheon.
The Reeve presiding. The minutes
of the last meeting of the old Council
for 1905 were read and confirmed.

Communications read from the
Hospital for sick Children, Toronto,
asking aid. Laid on the table.

From the General Hospital, Kingston
asking aid. Laid on the table.

From the National Sanitarium As-
sociation in Muskoka asking aid.
Laid on the table.

Moved by Chas. Anderson, seconded
by Alf McCutcheon that the above
Hospitals receive the sum of \$5.00
each. Carried.

A communication from the County
Clerk, re commutation of Statute labor

General Wade constructed military
roads in the highlands of Scotland. An
obelisk was constructed to commemo-
rate his achievements on which was
inscribed the following "bull," intend-
ed to distinguish between natural
tracks and made roads:

Had you seen these roads before they
were made,
You would lift up your hands and bless
General Wade.

Difference and Distinction.

Most people are afraid to be differ-
ent. Some people are different for the
express purpose of showing that they
are not afraid. And then there are a
few who are big enough not to care
whether they are different or not. They
are the ones that win out, but nine
times out of ten they do things in the
ordinary way.

In Her Own Coin.

Mamma—You naughty boy! What
do you mean by saying "Don't bother
me now" when I asked you how you
got your clothes soiled? Tommy—That
is what you always say when I ask you
something you don't know how to an-
swer.

Right In Line.

"If there is anything I like," said he
to his wife, "it is a woman who knows
enough to be a good listener," whereat
the servant girl at the keyhole could
not repress a smile of satisfaction.

It requires as much reflection and
wisdom to know what is not to be put
into a sermon as what is.—Cecil.

THE HOW AND WHY OF IT.

"Fruit-a-tives" are the parts
of the fruit that do you good.
Apples, Oranges, Figs and
Prunes are pressed—the juices
separated from the tough,
woody fibre—and concentra-
ted. Then—(and this is the
secret of "Fruit-a-tives")—
one more atom of bitter prin-
ciple from the orange peels is
forced into the concentrated
fruit juices. By this process
—one of the most remarkable
achievements of the age—the
juices are made stronger, and
many times more active medi-
cinally. Finest tonics and
internal antiseptics are added,
and the whole evaporated and
pressed into tablets. "Fruit-
a-tives" are the greatest tonic,
laxative and blood purifying
medicine ever discovered.

50c. a box.

NERVOUS DEBILITY CURED

Excesses and indiscretions are the cause of more
sorrow and suffering than all other diseases combined.
We see the victims of vicious habits on every hand;
the pallid, plumped face, dark circled eyes, stooping
form, stunted development, bashful, melancholic
countenance and timid bearing, proclaim to all the
world his folly and lead to blight his existence. Our
treatment positively cures all weak men by overcoming
and removing the effects of former indiscretions and
excesses. It stops all losses and drains and quickly
restores the patient to that nature intended—a healthy
and happy man with physical, mental and nerve pow-
ers complete.

For over 25 years Drs. K. & K. have treated with
the greatest success all diseases of men and women.
If you have any such disease that is a worry and
a menace to your health consult old established physi-
cians who do not have to experiment on you.

We guarantee to cure Nervous Debility, Blood
Diseases, Stricture, Venereal, Kidney and Bladder
Diseases. Consultation Free. If unable to call, write
for a Question Blank for Home Treatment.

DRS. KENNEDY & KERGAN, 148 Shelby Street,
Detroit, Mich.

WHY HE LIKES THE TORONTO STAR.

"Do you know," said a prominent mer-
chant the other day. "I like The Toronto
Star better than any other paper I have
ever read. It not only prints all the news
every day, but it serves it up in an attrac-
tive, readable style. There is nothing
heavy or dyspeptic about it."

"Then, its different departments are
fine. I always read its market
page. Its quotations are always complete
and accurate, and it has lots of information
that I can get nowhere else. It's the best
market page I know. My wife likes the
women's pages and she's all the time read-
ing things she sees in them. She thinks
Madge Merton's page every Saturday is es-
pecially fine—sensible, womanly and cheer-
ful. My boy Jack says the sporting page
just suits him. He says there isn't a paper
in Toronto can touch it on hockey and
lacrosse and baseball news."

"In politics I don't always agree with
The Star, but I will say this, that I never
yet saw an editorial that was not a fair
presentation of the case."

Another great thing about The Toronto
Star is its cheapness. You can buy it and
the paper you are now reading for one year
for \$1.75. This for the same edition of The
Star for which the people in Toronto and
the nearby towns pay \$3.00 a year. The

Albert College Belleville, ONT.

Business School founded 1877.
Practical and thorough. Five complete
courses. Many graduates occupying important
places as book-keepers and shorthand re-
porters.

\$37.00 pays board, room and tuition, electric
light, use of gymnasium and baths, all but books
laundry, etc., for 10 weeks—longer time at
same rate. Special reduction to ministers, or to
two or more entering at same time from same
place. A specialist in book-keeping, who is
also an expert penman, and a specialist in
shorthand in constant attendance. The teach-
ers in the literary department also assist in the
work. The high character of the College is a
guarantee of thoroughness. New Commercial
Hall one of the finest in Ontario.

position, and as a unionist he became the ally of the Duke of Devonshire and with him the supporter of Mr. Balfour in the Unionist government.

Mr. Chamberlain has been for some time taking his stand as a protectionist. He became what his old friends regarded as a "visionary" for sometime before he left the government. Mr. Balfour may have been impressed by the ex-colonial secretary's arguments but he was for a while non-committal.

Friends of the ex-premier say that he must have realized all along that the taxation of foodstuffs would be a most unpopular proposal. Yet it is remarkable that he discussed it at all, and that in his criticisms of others he said enough to disturb the nation and isolate himself from the party.

The defeat of Mr. Balfour on Monday does not end his public career. He will get another seat. The incident only shows how quickly public sentiment changes. Some years ago he was the idol of the people. To-day he is a castaway. And all because he preached an apparent heresy.

The success of the liberal party is the result of a revulsion of the people against the taxation theory. This af-

"SAVED MY LIFE"

—That's what a prominent druggist said of Scott's Emulsion a short time ago. As a rule we don't use or refer to testimonials in addressing the public, but the above remark and similar expressions are made so often in connection with Scott's Emulsion that they are worthy of occasional note. From infancy to old age Scott's Emulsion offers a reliable means of remedying improper and weak development, restoring lost flesh and vitality, and repairing waste. The action of Scott's Emulsion is no more of a secret than the composition of the Emulsion itself. What it does it does through nourishment—the kind of nourishment that cannot be obtained in ordinary food. No system is too weak or delicate to retain Scott's Emulsion and gather good from it.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

If You Would Seek a Cure in Life's Worries and Cares, Read the Story Recorded Here of Mr. Bryce Allan, of Jarvis, Ont.

Believe me, I am fully as gratified to tell you of my recovery with Psychine as you are to hear of it. Last fall I became weak, run down and nervous through overwork and worry. Was unfit for work, had no appetite, and felt as if I had lost all interest in life. I contracted a series of colds from changing winter weather, and gradually my lungs became affected. I tried remedy after remedy, and a number of doctors prescribed for me, but got no relief. I began using Psychine. After two months' treatment I regained my health and strength. I am sound as a bell to-day, and give Psychine all the credit.

SAVED!

What a wonderful word to those who, for days perhaps, have been adrift on the wide sea.

How eagerly every sunrise they have scanned the horizon in the hope of some friendly sail.

At last the morning dawns when their hopes are realized. There is the gallant ship! The shout and wave but their parched throats can scarce utter a sound.

Will she sight them? Yes, look! she alters her course and now in a few moments all their suffering will be at an end.

And to you also comes the glad morn.

For months, even years perhaps, you have been firmly held in the grip of some disease.

How eagerly you have sought relief but all in vain and now you are almost in despair.

Yet for you there is HOPE.

The light of knowledge has revealed PSYCHINE, a sure cure for all Throat and Lung troubles.

Pneumonia, Pleurisy, La Grippe, Bronchitis, Consumption, Lassitude, Night-sweats and all Wasting Diseases can be effectually cured by this wonderful tonic.

Anne Boleyn at the Block.

Of the execution of Anne Boleyn Martin Humie, the author of "The Wives of Henry VIII.," says:

Anne herself knelt in a distraught way, as if to pray, but really gazed around her in a mute appeal from one pitiless face to another. The headsmen, taking compassion upon her, assured her that he would not strike until she gave the signal. "You will have to take this cut off," said the poor woman, and one of the ladies who attended her did so and partially bound her eyes with a handkerchief, but Anne still imagined that her head was in the way and kept her hand upon her hair, straining her eyes and ears toward the steps, where from the headsmen's words she expected the sword to be handed to him. While she was thus kneeling erect in suspense the sword which was hidden in the straw behind her was dextrously seized by the French executioner, who, swinging the heavy blade around, in an instant cut through the erect, slender neck, and the head of Anne Boleyn jerked from the shoulders and rolled upon the cloth that covered the platform.

A BOSTON LANDMARK

HISTORY OF A FAMOUS OLD ELM DESTROYED BY THE WIND.

This Celebrated Tree, Believed to Have Existed Before the Settlement of the City, Was Blown Down in the Great Storm of 1876.

Feb. 15, 1876, was a sad day for local historians in Boston, for the newspapers announced the next day that at about 7 o'clock the previous evening the old elm on Boston Common had been destroyed by a great storm which swept over the city at that time. So many eulogies, both oral and written, were delivered on this most ancient of Boston's landmarks, and it was realized that a connecting link with the remote past was gone forever.

It is not known when the tree began to grow, but an old Boston tradition was that the wife of Thomas Hancock, the eminent merchant, who was Lydia Henchman before her marriage, claimed that her grandfather, Ezekiah Henchman, planted the tree when he was a boy. This would have made the tree just 200 years old at the time of its destruction.

It is probable that some of the many persons on record as being publicly executed on Boston Common looked on the fair world for the last time when standing beneath its branches, for it was one of the largest trees, if not the largest, in the town, and it stood on its outskirts, and also in 1722 it must have been a prominent object in Boston, for Bonner's map of the town, published in that year, shows it as a feature.

In 1825 the first recorded measurement of the old elm showed its dimensions to be as follows: Height, 65 feet; circumference, 21 feet 8 inches at 2 feet 6 inches from the ground, and the extreme diameter of the branches was 86 feet. At this time it was said of the tree that "this pride of our Common is pronounced by judges to be as handsome in form as it is large in size and venerable in age, and it may be worth the remark, notwithstanding all the buffeting it has received from storms and hurricanes for more than a century, its original beauty and symmetry have not been impaired, although it has at times lost many of its branches."

The tree was accurately measured by the city engineer of Boston in 1855, and it was found that it was considerably larger than in 1825, its height being figured at seventy-five feet. This showed that it was still growing in its extreme old age.

The first serious damage the tree received was in 1832, when the largest of its limbs was so rent asunder that three branches rested on the ground, but at much cost and labor they were replaced in their former positions and held together by iron rods and bolts. The great gale in June, 1860, injured the tree to such an extent that its former symmetry was destroyed, and at this time the cavity in the trunk was filled with several loads of material. On one of the branches which were torn off at the time 100 rings were counted, which indicated the great age of the tree.

The opening of the centennial year of the republic, 1876, found the tree alive, but decrepit, and it would probably have been decorated on Evacuation day and the Fourth of July, but, as stated at the beginning of this article, Feb. 15 saw its destruction.

The old elm fell at 7:17 o'clock in the evening, its trunk pointing toward the

natural reservoirs beyond, but the water is held back at the ebb until it breaks over the obstruction in an irresistible torrent. Most curious of all is the waterfall at Canoe passage, where the island of Vancouver approaches the British Columbia mainland. Here the flood tide from the gulf of Georgia, to the southward, is dammed back at a narrow cleft between two islands until it pours over in a boiling cascade eighteen feet high, with perhaps double the volume of the Rhine. At the turn of the tide, however, the waters from the north rush back into the gulf, producing a cascade of equal height and volume. This salt water fall actually flows both ways.

The Cattle Shooting Habit.

The irate farmer who orders the city sportsman off his "lands" is always incomprehensible to the man with the gun. His stories of damage to his cattle are unbelievable, but there seems to be some reason for the rural objection to city gunners. "To know how widespread the cattle shooting habit is," said a government meat inspector, "one should take up a position beside an inspector at a packing house and note how many cattle are flayed revealing a charge of bird shot in their bodies. Some are peppered on one side only, others on both sides. I don't know whether the cases are all accidental or whether the hunters shoot the cattle full of bird shot just for fun, but mighty few, either native or range cattle, reach the packing houses without carrying souvenirs of some glorious hunting trip."

A Malleious Will.

Persons wishing to register in their last wills and testaments their feelings regarding their natural heirs may take as a model the following crisp effort of an Englishman, William Hall: "I give to that vile wretch, Samuel Hall, who I admitted of the temple many years since, but he sold his gown, and in seven years I could never get him to church but once, and twice he assaulted me, and at the time he had certainly killed me if by God's providence I had not by a maldservant been thrown against a great fire, the sum of 10 shillings, to be paid him every Monday upon request, and I wish that the first food he takes after my death will choke him."

Lincoln's Integrity.

No man ever believed in his calling more thoroughly than Lincoln, and he had no patience with the much mouthed charge that honesty was not compatible with its practice.

"Let no young man choosing the law for a calling yield to that popular belief," he wrote. "Resolve to be honest, at all events. If, in your judgment, you cannot be an honest lawyer, resolve to be honest without being a lawyer. Choose some other occupation rather than one in the choosing of which you do, in advance, consent to be a knave."—Frederick Trevor Hill in Century.

Pencillog on Zinc.

An ordinary pencil mark on zinc is in a measure indelible. The writer saw recently a zinc label on which a name had been written with an ordinary lead pencil thirty years ago, and after a little of the oxide had been rubbed off the name was as legible as if it was just written. For permanency, where no illegibility is desired, nothing can be more durable.—Exchange.

Odd Marriage Ceremony.

Polynesia is probably the only place in the world where the marriage feast takes place without the presence of the bridegroom. For some unexplained reason the young man is "sent into the bush" when negotiations are opened with the family of his bride, and he remains there during the subsequent festivities. It is only when the guests have departed and the girl is left alone with his parents that messengers are dispatched for him.

A Scotch "Bull."

Admires on Poetry.

When I feel inclined to read poetry, I take down my dictionary. The poetry of words is quite as beautiful as that of sentences. The author may arrange the gems effectively, but their shape and luster have been given by the attrition of ages. Bring me the finest simile from the whole range of imaginative writing, and I will show you a single word which conveys a more profound, a more accurate and a more eloquent analogy.—"Autocrat of the Breakfast Table."

RHEUMATISM FLIES

IN ONE TO THREE DAYS

WHAT A "HEAVEN BEGUN BELOW" IT WOULD BE TO MANY A WEARY SUFFERER FROM RHEUMATISM, NEURALGIA AND ALL THE KINDRED AILMENTS, IF FAITH WOULD TAKE HOLD OF AND USE SO RADICAL A CURE AS THE GREAT

South American Rheumatic Cure

Why, its very nature makes it the most natural and easy cure that human intuition and diligence have discovered. Its wonderful power is in its simplicity; its effectiveness is in its going right to the seat of the trouble, dispelling the causes that "bode evil," give pain, stiffen joints, distort limbs, twist muscles, and when it reaches vital spots, oftentimes cause death. South American Rheumatic Cure is as harmless as milk. One of its marvels is the rapidity with which it effects a cure and the testimony of the thousands who have "thrown away their crutches" and climbed from the valley of suffering to the mountain top of health would fill a book.

Don't be incredulous. Encouragement comes with the first dose no matter of how long standing.

ALL DRUGGISTS AND MEDICINE DEALERS HAVE IT.

SOUTH AMERICAN NERVEINE for all stomach and nerve troubles. SOUTH AMERICAN KIDNEY CURE is a wonder worker. South American Kidney Cure gives relief in six hours in all kidney troubles.

Sold by F. L. Hooper.

Indispensable in Winter.

There's a need in every home for

evening, its trunk pointing toward the Park Street church, and the force of the fall shattered the trunk, while the branches were scattered in every direction. The melancholy news spread like wildfire through the city, and soon, despite the storm, the fallen monarch was surrounded by relic hunters. Armed with saws, hatchets and knives, they quickly detached pieces of the branches to preserve as souvenirs. Persons were seen in the theaters laden with boughs, and it was a common sight that evening to see men in the streets carrying limbs several feet in length and as large around as a stove-pipe. Much of the tree was made into veneer, and one book at least of local history has on its back cover a large veneer from the tree, bearing on its face a lifelike engraving of the same.

So passed the old elm, and Boston mourned for its passing.

Dr. Jerome V. C. Smith, mayor of the city in 1874, showed his interest in the old elm by having the tree carefully pruned and cleaned, and he caused to be placed around it an ornamental iron fence, octagonal in shape. On the entrance gate was attached an oval tablet bearing the following inscription:

THE OLD ELM.

This tree has been standing here for an unknown period. It is believed to have existed before the settlement of Boston, being full grown in 1722; exhibited marks of old age in 1792 and was nearly destroyed by a storm in 1832. Protected by an iron inclosure in 1854.

J. V. C. SMITH, Mayor.

Soon after the falling of the old elm a young tree of the same species was planted in the center of the inclosure, and today it has attained a large and sturdy growth. Coming generations of Bostonians may be familiar with a second old elm on Boston Common, but it will always be the first old elm which witnessed, very possibly, the first settlement of Puritan Boston in 1630.

As Good as His Word.

Green—I thought you said that fellow Skinem was as good as his word? Brown—That's what I said. Green—Well, he lied to me about a business transaction. Brown—But I didn't say his word was any good.

A man is always nearest to his good when he is at home and furthest from it when away.—Holland.

A Lack of Competition.

The old squire was narrating his experiences with county fairs. "You never had much to do with managing them, perhaps," he said. "Well, I have had a great deal. It takes a lot of head work, I can tell you, to think up popular features outside of the big steers, the fat hogs, the mammoth squashes, the poultry, the preserves, the lace tidies and the agricultural horse trots to draw the crowd.

"I remember one year," he proceeded, "when we got everybody's interest excited by announcing a prize of a gold headed cane for the homeliest man in the county and a silk dress pattern for the homeliest woman. After a spirited competition the cane was awarded to Colonel Van Jessup, the landlord of the Van Jessup hotel."

"Yes, I know him," interrupted one of the listeners, "and I've seen the cane. Who got the silk dress for being the homeliest woman?"

"Nobody. There weren't any entries."

Salt Water Falls.

There are a good many salt cataracts in existence. They may be found in Norway, southern Chile and British Columbia, where narrow fiords, or arms of the sea, are obstructed by barriers of rock. The rising tide flows over and filters through such into the great

She—I can prove logically and mathematically that women are worth more than men. He—I'd like to see you do it, my dear. She—Isn't a miss as good as a mile? He—So they say. She—And doesn't it take a whole lot of men to make a league?

Little Difference.

"Really," said the X ray operator to the surgeon, "there is only a grammatical distinction between our professions."

"Do you think so?" said the surgeon. "Certainly. I see bones, and you saw bones."

The Modern War.

Villain—If I should kiss you, I suppose you'd go and tell your mother. Modern Shepherdess—No; I should go and tell my lawyer.

Prescription by a Rival.

Florence—I should like to do something that would make him miserable for life. Mabel—Then why don't you marry him?

The Garibaldi.

*The Garibaldi are a very ancient Ligurian family. The first who used the name would seem to have been Garibaldi, duke of Bavaria, A. D. 584. From him descended Grimaldus, king of Lombardy, A. D. 673. His son was Garibaldus. Then the name disappears, but it is early found among the nobles of Genoa, and at the institution of the Liber Aureus, in 1528, its members are recorded as of the ancient nobility. From 1528 to 1751 the successive generations of the Garibaldi are recorded in the "Libro d'Oro," and the last name but one there entered is Joseph Garibaldi, born 1792, probably an ancestor of the dictator. In 1685 Jeannetta Garibaldi was one of the four senators who accompanied the doge of Genoa to Versailles after Louis XIV. had nearly destroyed Genova la Superba by bombs to apologize to the ruthless tyrant.—Notes and Queries.

Under Many Flags.

Possibly no possession has changed nationality so frequently as the island of Santa Cruz, in the Danish West Indies. Originally the land belonged to Spain, and it was taken from Spain to be under the joint rule of England and Holland. After awhile the flag of Holland was taken down, and the English flag alone floated, only to give way to Spain again. The Knights of Malta were the next possessors, and from them it passed to a company of adventurers, who lost it to France, which sold to a Danish company, the land finally coming into the possession of the Danish government. England again took possession in 1801, and eight years later it passed to the Danish government again. Eventually it will probably become a part of the United States, two bargains having been arranged, but never completed.

Coxey's Army.

Coxey's army started from Coxey's home in eastern Ohio in the spring of 1894 to carry, as Coxey said, a "petition in boots" to congress for relief from the hard times then prevailing. On arriving at Washington it was denied access to congress, and those of the pilgrims who disregarded the order to "keep off the grass" of the capitol grounds were sent to jail. Coxey himself was condemned to a term in jail. The "army" at last crossed the Potomac and settled down in a sort of hobo camp on the Virginia side. There it was allowed to remain for several months until complaints from Washington induced the governor of Virginia to break up the camp and disperse the campers.

There's a need in every home for

GRAY'S SYRUP OF RED SPRUCE GUM

A few doses, at the first sign of a cold, will allay all throat irritation—take away hoarseness—check the inflammation—strengthen the lungs—ward off the cough. All the healing, soothing, curative properties of Canadian Spruce Gum—combined with aromatics. Pleasant to take. 25 cts. bottle.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

PROMINENT CANADIAN OWES LIFE TO PE-RU-NA.

Suffered Ten Years— Lost 100 Pounds in Flesh.

Mr. J. N. Latreille, the well known grocer and liquor dealer, of Montreal, Can., has been one of the leading business men of that city for thirty years. He writes as follows:

"I had catarrh of the head, throat and stomach for about ten years, and for the past two years had been growing worse."

"I felt exhausted and weak, and coughed continually. When in health my weight was 200 pounds, but I lost 100 pounds in a year. Catarrh had made me almost blind and deaf. I felt discouraged."

"Finally I tried Peruna, took three bottles, and now I must say that my health is much improved, and have gotten rid almost entirely of the effects of that dreaded disease."

Nickle plated tea and coffee pots, trays
etc. at MADOLE & WILSON.

SELBY

At present the bay is not safe for skating.

The supply of coal is nearly exhausted, but there is a good supply of groceries and provisions, so we can hold the fort for some time yet.

Some of the farmers were ploughing on New Year's day, the ground being entirely free from frost.

R. and G. Henderson have returned from a trip to Port Perry.

Samuel Brown, an old resident of the island, passed away, December 28th. Cap. T. Snider is here from Cleveland Ohio, to spend the winter.

W. Reid intends selling his farm and moving to the west in the spring with his family.

W. J. Fleming, agent for Deering Harvesting company, was here for a few days last week.

Mr. Wilson is visiting at W. Mont-ray's.

Fancy Dishes Given Away.

If you buy your groceries from us. We give coupons on dishes free. Call and see them at **GREY LION GROCERY.**

STRATHCONA

John Boyer's son, Cecil, is improving, though he is not out of danger. He has had an attack of pleuro pneumonia. Mr. Boyer came home Saturday from Point Ann, where he is employed.

C. D. Hamm received word that his brother-in-law, Robert Brisco, of Napanee, had died suddenly.

Mrs. Seal, of Gananoque, with her son, is visiting her sister, Mrs. Finley.

Mrs. R. L. Lott, who has been with her mother-in-law, Mrs. L. Lott, returned to her home at Owen Sound. A few friends gathered the evening before her departure to say good-bye and spend the evening.

James Kelly is in poor health.

R. Sweet has moved his family to Point Ann.

Sidney Scott, of Mink's Bridge is dangerously ill.

A. Granger and son Harry and family are preparing to go out west about February 1st.

W. Wilson his large farm here and is going to the Canadian North-West.

Many of the descendants of the people who settled here are gone entirely.

Mrs. George Haycock is still in poor health.

Heating and Sanitary Plumbing.
MADOLE & WILSON.

LAPUM'S WEST.

We are sorry to have to report that Mrs. Z. Stover, who has been confined to the house for several days through illness, is not improving as fast as we would wish.

Mr. and Mrs. A. Davison were the guests of Mr. G. C. Davy on Monday evening.

Mr. and Mrs. A. Sagar were visiting at Mr. John Simpkin's on Monday.

Walter Bush spent several days last week visiting his brother Cyrus, at Thompsonville.

Jas Huff has had several bees this week, drawing bailed hay to Yarker.

Large numbers from here are attending the Quaker Medicine Company's Concerts nightly at Yarker, and report them first-class.

Mrs. B. Reese has been receiving this week.

Carko Magnetic Razors.

No honing, no grinding, always ready for use. Gentlemen who shave will find this an easy razor to keep in order. Every one guaranteed, no pay until you are satisfied. Ask for booklet on shaving, free.

BOYLE & SON, Agents.

Causes of Shipwreck.

"As a representative of one of the insurance underwriters I have taken part in the investigations of more than 400 shipwrecks," said a former sea captain. "The causes of wrecks are drink, fog, neglect to use the sounding lead and unknown currents."

"The most dangerous waters are off the east coast of England, Cape Ushant and Cape Finistere. In the past the shifting of the cargo caused a good many wrecks, but the adoption of feed pipes has changed all that. Cargoes liable to shift consist of wheat, iron ore, coal and so on. Great feed pipes filled with part of such cargoes now run down into the hold, and if the cargo shifts at all the pipes automatically pour more cargo into the space that has been made vacant."

"Off a wild part of the South American coast a four master loaded with high heeled French shoes was once wrecked. The native Indians stole the shoes, but couldn't wear them. They used them instead for boxing gloves, giving each other terrific taps with the French heels."

Beats Horse Show Driving.

A western man was telling some stories of daring driving, some realistic and some hyperbolic. "There is a story," he said, "of One Eyed Pete McCoy. If this story is true, the four-in-hand drivers of the east are only practicing a decayed and degenerate form of coaching. One Eyed Pete drove a Dakota stagecoach that made a circuit of Deadwood, Carbonate, Spearfish and Bear Gulch. He tore into Carbonate one day on his usual dead run. Like an avalanche, the coach clattered up to the hotel door. There suddenly it stopped, and one of the horses fell stone dead."

"A very sudden death," said a bystander.

"Sudden? Not at all," said One Eyed Pete. "That there hoss died at the top of the hill, nine mile back, sir, but I wa'n't goin' to let him down till I got to the reg'lar stoppin' place."

The Chinchilla.

Chinchilla is a beautiful soft gray fur. It is not the most durable of furs, and, because of the difficulty of getting the perfect skin, it cannot be said to be among the least expensive. A muff and stole of the real chinchilla cost easily \$1,000 or so. The tiny chinchilla itself, not more than twelve inches long, with a plump little body on short, stout legs, thrives only in the tropics. The little beasts have to be killed with the utmost precaution not to injure their fur, that grows on a skin nearly as tender and soft as a web of silk. A perfect skin not larger than a small pocket handkerchief is a revelation in fur growth. The texture of every hair is finer than floss silk, the length of it nearly an inch and the coloring about that of the soft, undyed marabou feathers.

Magic Figures.

"The most remarkable arrangement of numbers that I know of," said a local business college man who takes a delight in solving curious problems and digging up mathematical oddities, "is the combination of the six figures 142,857. Multiply this number by 2, and the answer is 285,714; by 3, and the answer is 428,571; by 4, and the answer is 571,428; by 5, and the answer is 714,285; by 6, and the answer is 857,142. Each answer contains exactly the same digits as the original sum, and, to cap the climax, multiply the number by 7, and up comes the answer 999,999. Try it and see if it is not so."

"I wish"—Miranda said, then stopped, sighing. She was so little used to

Vapo-Resolene
Established 1879.

Whooping Cough, Croup, Bronchitis
Cough, Grip, Asthma, Diphtheria

Creosolene is a boon to Asthmatics

Creosolene is the standard remedy for all the ailments of the air passages. It is a powerful expectorant, and because the air passages are so tender, it soothes the inflamed surface, and gives every breath, giving relief to the sufferer. Those of a consumptive nature, or those who have chronic bronchitis, find Creosolene a most valuable remedy in all the conditions of the air passages.

HALL'S VEGETABLE SICILIAN Hair Renewer

Perhaps you like your gray hair; then keep it. Perhaps not; then remember—Hall's Hair Renewer always restores color to gray hair. Stops falling hair, also.

If your druggist cannot supply you, send \$1.00 to H. P. HALL & CO., London, N. B.

DR. HENNEQUIN'S INFANT TABLETS

"Please hurry along Hennequin's Infant Tablets, as we cannot get along without them."
M. B. PARKS,
Keene, Ont.

"I believe Hennequin's Infant Tablets to be the best medicine for babies teething and troubled with worms. They should be tried by all mothers. They are just lovely."
MRS. GEO. A. SMITH,
Hayworth, Quebec.

"After 14 years' experience in treating infants in my home, we have found Hennequin's Infant Tablets superior to any other remedy we have tried."
W. C. WEIR, Pastor Baptist Church,
Carleton Place.

They solve the problem, and where used produce healthy children, placing them in a condition of attaining the highest conception of perfect manhood and womanhood. Hennequin's Infant Tablets are based on scientific facts, and is the only Dr. Hennequin preparation offered to the public. Positively no drug taste—perfectly safe. The genuine Tablet is stamped with the letter "H." Beware of imitations. Price 25c per package, 5 packages for \$1—postpaid to any address. Send us \$1 for 5 boxes and if, after using part or all of one box, you wish your dollar back, you can have it by mailing us the remaining four boxes. We cannot be responsible for money unless sent by P. O. Order, Money Order, or Registered Letter.

099,999. Try it and see if it is not so."

A Rare Coin.

When Louisiana seceded, Jan. 26, 1861, the new government seized the United States mint at New Orleans and struck \$254,820 in double eagles and \$1,101,316.50 in silver half dollars, using the United States dies for 1861. The bullion was exhausted in May, 1861, when the coinage ceased and the United States dies were destroyed. A Confederate States die was then made, to be used for silver half dollars, but it was not fit for use in coining press, the relief being too high. Four half dollars were struck with it on a screw press, and these comprise the entire coinage of the Confederate States.

What Eddie Was Reading.

A New England father who believes that children should be nourished on good literature as well as on good food has always read the English classics aloud to his only son, Eddie, now six years old.

A friend of the family, knowing of this practice, recently asked Eddie what he was reading.

"A Wavering novel," was his reply.

Her Regret.

Marjorie had been given some hard peppermint candies, and after holding one in her mouth for a few minutes she ran to her mother and cried, "Oh, mother, I swallowed that candy!"

"Never mind," said her mother; "it will not hurt you."

"Yes, I know," said Marjorie, "but I lost the use of it."

Plenty of Talk.

"You say that public official had nothing to say?" said the editor.

"Yes," answered the self-confident reporter, "but he talked three-quarters of an hour before I discovered it."

Meekness.

Meekness is imperfect if it be not both active and passive, leading us to subdue our own passions and resentments as well as to bear patiently the passions and resentments of others.—Foster.

Life is the jailer, death the angel sent to draw the unwilling bolts and set us free.—Lowell.

A peculiarity concerning the use of snuff in Iceland may be of interest. The snuff is made into bars after the manner of plug tobacco and is sold in that shape to the natives, nearly all of whom are addicted to its use and prefer it thus prepared. The Iclander allows the nail on the right hand thumb to grow long for the purpose and when using the snuff scratches it off the bar with his nail on the back of his left hand and applies it to his nose.

Whence Come Microbes.

A writer in Le Figaro of Paris (Dr. Ox) at the close of a long article on the origin of microbes declares that the bacillus of consumption originally came from blades of rye, wheat and corn and that the human lung is its adopted abode, where it would, perish were it not replenished. That rare atmospheres are beneficial to consumptives is not because they are thin, but because rye, wheat, corn, etc., are not grown there.

Defusing His Criticism.

"I've been to see Bludgerly's latest painting, and it's a perfect dabb. And yet you said it bordered on the sublime."

"That's the way it struck me, old man. It is included in one of the most magnificent frames I ever saw!"

"I wish"—Miranda said, then stopped, sighing. She was so little used to having her wishes come true.

Miranda loved color and light and music. Somewhere in her pedigree there must have been a strain of tropic blood, else how account for her desires any more than for her silky black hair, her liquid black eyes, her fine olive skin touched with scarlet? Her dancing as well was wholly untaught, unfined save by the sweep of the wind, the lulling patter of raindrops on the cottage roof. She danced only when she thought herself alone. Her grandfather, the minister, thought dancing of any sort a deadly sin.

He had a heart kind and true, this bent, white-haired old gentleman, and truly loved his one grandchild. It was his creed, not himself, which forced him to deny her the things her youth craved. He did not understand her any more than he had understood his wife, her grandmother, who had died, leaving behind a baby girl that grew up the feminine counterpart of its father.

It was a queer, a piteous jest of fate that gave her, a woman born for the missionary cause, such a piece of quicksilver as Miranda for a daughter. How the girl came by the quicksilver except through the grandmother was a puzzle of heredity. Her father was a missionary, meek in all things except regarding his chosen work. There he had a lion's heart, a Spartan's endurance. Thus Miranda had been left behind when her parents went to the far east. That was ten years back—so long ago they were little more to her now than memories.

Miranda picked up her mother's latest letter. The paper was thin, the writing fine and crabbed, but she was able to read an account of the dancing girls in one of the heathen temples. After the third reading she shut her eyes. Her mother had dwelt feelingly upon the horror, the impety of it all, but somehow there had crept between the lines enough of the east to bewitch the reader. She seemed to see it all—the crowd, the lights, the wreaths of smoking incense, the figures swaying in time and tune. And as she thus saw mentally there came to her a longing not to be resisted to dance, dance, dance, the night away.

It was evening. Her grandfather was away at a special service in his mission chapel. She had been left behind to finish some slight household tasks. Half a mile down the street the Brixton fancy ball was in full blast. She had a card to it—one she had not dared to display. Now, insanely, she made up her mind to go—notwithstanding her formal regrets. She would not go as Miranda Acton—rather as a dancing girl from a world unknown.

Her mother had sent home a complete outfit to be sold at the Twelfth Night St. Barnabas fair. With shaking hands she huddled herself into it, then looked at herself in the glass. The effect startled her, but it convinced her there must be further disguise. She

FIT'S CURE

We have a book we want everybody to read, and which costs nothing to obtain. It is the free descriptive booklet, telling all about the most up-to-date publication in the world. It describes the magazine that is being read every two weeks by more than

ONE MILLION PEOPLE.

The book of knowledge—the knowledge of to-day. It concerns the life of the present—its ceaseless activities, its far-reaching commerce, its mighty industries. Its scope is all-embracing.

How to Acquire Knowledge.

There are several ways of acquiring that all-round knowledge which leads to success, but the least expensive and the surest is by a routine of self-education. Evening schools and like systems are excellent in their way, but they do not often fit in with the individual hours of leisure.

A system, to be capable of universal application, must be one which can be freely used at any time. Everyone has hours in a day which can be devoted to study, odd hours which never seem somehow to suit other people's convenience.

A System of Home Education.

This system is probably the best. At least the student can seize precious minutes which would otherwise be wholly wasted. It is the way we fill our minutes which counts. Moreover, the individual can choose his own subjects and select the special means of culture which best suit his requirements.

Of all books of instruction for home tuition the splendidly compiled series of authoritative works known as the HARMSWORTH SELF-EDUCATOR is laid out on a plan most calculated to be of real assistance. The subjects are treated in an eminently practical way by the greatest authorities.

caught up her water colors, gave herself a dusky complexion, carmine cheeks and heavy black lashes. She stained her arms, her ankles, her bare throat.

By the time it was done the clock was striking 10. In half an hour her grandfather would be home. For a minute she hesitated, then, almost before she knew it, she had gossamer over her sandals, and, well wrapped in her long mackintosh, was out in the street.

Presently she found herself in the Brixtons' library. She had crushed through a great multitude of figures nearly as much out of the common as

dropped a frightened courtesy to stately Mme. Brixton, who had stared at her, then smiled a kindly welcome, and let her slip away in the crowd.

The band was playing. In the room beyond all sorts and conditions of folks whirled madly about. Miranda glanced at them and shrank back. They were dancing two and two—she could only dance alone—and dance she must. The stealing music said so beyond peradventure. The library was empty. Half unconsciously she began to foot it over the polished floor, weaving back and forth, bending, swaying, balancing upon one foot, arms up, arms down or extended as though in entreaty

me take you away—to the city. It is the place for such as you. Here life will be a burden to you and those around you. There you may be happy and famous and rich."

"Let's get out of this," Brixton said, opening a locked door that led to his father's office and drawing the minister and Landon within it. Miranda followed them, moving like one in a dream. There were low, earnest words, whose import she did not catch, then somehow she was whisked off to the parsonage.

She did not sleep that night. Next

him.

Why, he could not understand. Tom Brixton might possibly have enlightened him. It was Tom who kept Miranda in touch with what went on in the little brown cottage, and when he said simply "Come!" she knew something of what to expect.

But not all. No fancy could paint for her the mother face, wan and full of mother longing, or show the father, thin and bowed, with yet something of soldier fire in his faded eyes. Grandfather Carter was pitifully aged. The good man had lived so sparsely he was almost bloodless.

Miranda came in to them, not a

Presently she found herself in the Brixton's library. She had crushed through a great multitude of figures nearly as much out of the common as her own. She remembered, too, having

UNSEEN DANGER IS ON OUR TRACK

From the time of our birth till we lie down for the last time.

The best defense from the dangers of disease is vigor of body and activity of the natural functions.

The kind of assistance is important. It must not be stimulation for that gives but temporary effect, and the reaction is more than depressing. *Take a tonic*—one that will re-establish normal digestion and assimilation

and prove a reconstructive rather than a promoter of waste. This will give nature a fair chance to put in motion normal work of repair and tissue building.

Such a tonic was grown in Nature's Laboratory, hidden in the ground and brought thence forty years ago by Dr. R. V. Pierce, who has made the treatment of lingering diseases his life-long study and care.

He uses glyceric extracts instead of alcoholic ones, exactly proportioned and combined by processes of his own invention, first used in his private practice and now given out freely to the world in his "Golden Medical Discovery," which is composed of Golden Seal root, Queen's root, Stone root, Black Cherry bark, Blood-root and Mandrake root.

Mrs. A. T. Jones, of 220 Hayes Street, San Francisco, Cal., writes: "As a child I was delicate, and great care was taken of me because some of my relatives had died of consumption, although my father and mother were healthy. I grew up with only the ordinary diseases of all children, but about two years ago I contracted a severe cold, which would not yield to such home-treatment as was handy. Doctors were tried, but after three months of this treatment I was only worse. Then I was advised to try Dr. Pierce's Golden Medical Discovery, and am glad to say that three bottles not only cured me of the cold and cough, but made me feel better than I ever had before. I will always have a bottle of this medicine in the house."

These tiny, sugar-coated antiphlogous granules regulate and invigorate Stomach, Liver and Bowels. Do not forget the "pill habit," but cure constipation. One or two each day for a laxative and regulator, three or four for an active cathartic. Once tried always in favor. Put up in vials; always fresh and reliable.

"Let the GOLD DUST TWINS do your work"

The Dog and The Shadow

You remember the fable of the dog who dropped a real bone for its shadow which he saw in the water. "Bear in mind that all is not Gold Dust that glitters under the name of washing powder. Don't accept a shadowy substitute; get the real

Gold Dust Washing Powder

with the Gold Dust Twins on the package."

OTHER GENERAL USES FOR GOLD DUST: Scrubbing floor, washing clothes and dishes, cleaning wood-work, a safe silverware and tinware, removing dirt, wax, cleaning bath room, pipes, etc., and making the finest soil of p.

hair unconsciously she began to foot it over the polished floor, weaving back and forth, bending, swaying, balancing upon one foot, arms up, arms down or extended as though in entreaty.

On, on, on, she bent and swayed, now stamping one tiny foot, now pirouetting with untaught grace, unconscious that two pairs of eyes watched her from the ambush of heavy curtains swung across a deep window seat. They were masculine eyes—Tom Brixton and his city friend, just back from globe trotting, had found harbor there. They gazed spellbound at Miranda, then breathlessly at each other.

"It is a miracle," Tom whispered at last, "one that shows how blood will tell. I know our dancer. She's old Parson Carter's granddaughter, the prettiest girl in the county. Let's go out and take possession of her. We understand, but if the others saw—my! There would be a kettle of fish!"

"Be still! It is sacrilege to think of stopping her." Landon, the city friend, said, breathing hard, "and it would be worse sacrilege to let her stay here. Can't you see her, dancing on a floor of men's hearts?"

Tom broke from his hold with a little uneasy laugh.

At the sound Miranda stopped, panic stricken, blushing so deeply her rouge showed pale. "You—you'll help me get away—back home—I—I ad to come," she panted.

Tom took her hand kindly and put his arm half about her. Then in through the door came the old minister in his rusty black coat, the picture of stern, yet benignant, amaze until he caught sight of his granddaughter. Then a wave of wrath swept him into speech.

"Miranda, I came to pluck you a brand from the burning—but, oh, you wait! You have made it certain you will burn for this in everlasting fires."

He swung upon his heel, but turned back, saying dully, "I shall be waiting when you choose to come—home."

Miranda sprang toward him, but Landon restrained her. "You will only make things worse," he said. "Listen! Trya Brixton will vouch for me—that I mean you no harm in what I say. Let

those import she did not catch, then somehow she was whisked off to the parsonage.

She did not sleep that night. Next morning she was on a train speeding cityward, wondering if she ever should see her native town again.

Miranda must have been born under a specially lucky star, for she was permitted to come back seven years later to the succor of those she had left behind. Her parents had come home, all their strength and use sapped by the cruel east, to rest, they said; to die, said those about them.

Parson Carter was in little better case. New men, methods, measures had crowded him from the place he loved so well. Now, for two years past Miranda's bounty had maintained him. He knew the source of it, although he never mentioned her name. She was no mere dancer, but an actress who had conquered her place in the world. Landon had lived up to his word—he had made her rich and famous, albeit he had been unable to make her love

soldier fire in his faded eyes. Grandfather Carter was pitifully aged. The good man had lived so sparsely he was almost bloodless.

Miranda came in to them, not a creature of silk and lace, but in the same stuff frock she had worn upon her outgoing. As she looked from one to another her heart rose in her throat. Instinctively she ran and caught her mother in her arms, kneeling to lay her head upon the thin breast and sob out, "I am never going away again—if you will let me stay."

"No, she isn't going, whatever you say," Tom interposed. He was a common sense person and knew things were getting too tense. "I've been waiting for her long enough—all of seven years. Now I mean to have her, whether or not it's by your leave."

"Take her, although she is not ours to give. We were the deserters," Mrs. Acton said, while the two ministers laid their clasped hands upon Miranda's head, saying with choked voices, but in a happy key: "Amen! Amen!"

THE TURN OF LIFE

A Time When Women Are Susceptible to Many Dread Diseases—Intelligent Women Prepare for It. Two Relate their Experience.

The "change of life" is the most critical period of a woman's existence, and the anxiety felt by women as it draws near is not without reason.

Every woman who neglects the care of her health at this time invites disease and pain.

When her system is in a deranged condition, or she is predisposed to apoplexy, or congestion of any organ, the tendency is at this period likely to become active—and with a host of nervous irritations, make life a burden. At this time, also, cancers and tumors are more liable to form and begin their destructive work.

Such warning symptoms as sense of suffocation, hot flashes, headaches backaches, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and inquietude, and dizziness, are promptly heeded by intelligent women who are approaching the period in life when woman's great change may be expected.

Lydia E. Pinkham's Vegetable Compound was prepared to meet the needs of woman's system at this trying period of her life. It invigorates and strengthens the female organism and builds up the weakened nervous system.

For special advice regarding this important period women are invited to write to Mrs. Pinkham at Lynn, Mass., and it will be furnished absolutely free.

Read what Lydia E. Pinkham's Compound did for Mrs. Powless and Mrs. Mann:

Dear Mrs. Pinkham:— "In my opinion there is no medicine made for women which can compare with Lydia E. Pinkham's Vegetable Compound, and you have no firmer friend in the Dominion than I am. At the time of change of life I suffered until I was nearly crazy, and was not fit to live with. I was so irritable, irrational and nervous that I was a torment to myself and others. I surely thought that I would lose my reason before I got through, when fortunately an old friend recommended your Vegetable Compound. I took it for five months and then off and on until the critical

period had passed, and it restored me to perfect health. My advice to suffering women is to try your Vegetable Compound, and they will not be disappointed."—Mrs. E. Powless, Des Moines, Ont.

Another Woman's Case.

Dear Mrs. Pinkham:— "After many splendid health to Lydia E. Pinkham's Vegetable Compound, I am very pleased to write and tell you my experience with it. I am the mother of three children grown to womanhood, and have safely passed the change of life, and feel as young and as strong as I did twenty years ago, and I know that this is all due to your woman's friend, Lydia E. Pinkham's Vegetable Compound. I used it before my children were born, and it greatly eased my nature and saved me much pain during the change of life. I took it, off and on, for four years, and had but little trouble and sickness that most women have to endure."—Mrs. James K. Mann, 806 Bathurst Street, Toronto, Canada.

What Lydia E. Pinkham's Vegetable Compound did for Mrs. Powless and Mrs. Mann, it will do for any woman at this time of life.

It has conquered pain, restored health, and prolonged life in cases that baffled physicians.

Lydia E. Pinkham's Vegetable Compound Succeeds Where Others Fail.

Mrs. E. Powless

DOES RELIGION PAY

The Profit of Piety Can Never Be Expressed in Cash.

Doth Job fear God for naught?—Job 1, 9.

That was the question which, in this striking drama was asked by man's great adversary. It was a most natural one from the satanic point of view, where selfish gain is the only admissible explanation of any action, where the sole question is, will it pay? and where personal advantage is the only known standard of ethics. It is not strange that the ledger view of life looks on religion as a possibly profitable business venture, a side line to be carried for what there is in it.

The accusation in the question is true enough to-day, but it only persists because of the truth in it. The Christian soldier who lives for the loot keeps alive the sneer at religion. A man's testimony in prayer meeting is often only an economical method of advertising his sugar or his dry goods. Many a man is serving God with an eye single to the good of his trade, while to others piety is but a professional pull. To yet others religion is a performance to be regarded as one of the penalties paid to social convention.

More dangerous because more subtle is the error of those who look on pious practices as means of placating the wrath of the deity, who hope to buy passports to heaven by prayer meeting pretences on earth.

ACTS OF WORSHIP

are to them things devoid of delight which they dare not forego for fear of future pains. If heaven could be earned this way they would certainly deserve it.

But the hypocrites deceive no one. Their pretences are too palatable. They alone are satisfied with themselves. Piety for profit alone is almost its own sufficient punishment. Who can help pitying the masqueraders who toil so hard to produce no impression. Neither heaven nor earth takes any stock of them. Their mummery has no more to do with religion than charity balls have to do with beneficence. It neither pays as business nor as religion.

In spite of all pretenders, who are after all relatively few in number, religion is a reality in the life of man and the question, does religion pay? deserves a fair answer. Life has no place for that which does not pay. Neither superstition nor sentiment can sanction the

waste of life on useless ends. Taking the soul's infinite standard of values all things must come to the test of their service, the profit to mankind.

A man serves God for the satisfaction secured; not for self-satisfaction, but because deep within him he feels his need of the divine, of one who can satisfy his thirst for good, who can surpass his highest aspirations, who can constantly tone up his life and lead him to things better than himself.

Friendship is not without its fruits; yet the true friend does not figure on them. He who unselfishly seeks another soul, who delights in his service, and counts all sacrifice as joy, finds rewards such as the cunning of selfishness could never extract. So is it with the service of the Most High.

THE SOUL OF MAN

seeks after the soul of all; religion is service for this supreme friend; worship the communion with him, work the doing of things that please him who shall measure the profit of such love or what shall a man give in exchange for its joy and peace?

The soul's need of God, the need of the sources of our lives for the source of all life, the need of the inner spirit of man for touch with the great spirit of all is as real, as definite, and as steadily assertive as the need of the body for food. There are men so busy making money that they think they have no time even to eat; but their folly is as wisdom compared to that of those who think it does not pay to take time to feed the inner life, the eternal man.

Nor can a man estimate the profit of religion by his own soul possessions alone. Wherever even two or three lift up their eyes and hearts to nobler things the whole race is raised. The worship of the things that are worthy makes the whole world more worthy. The profit of one man's faith becomes a common possession, and the most godless share the benefits of the godly life.

The daily search for God is the tuning of the whole life closer to the music of the infinite; the harmony, the health, the salvation of the world depends on its coming into complete accord with that which rules at its heart. This, then, is the eternal, individual, and universal profit of piety, that it causes all things more and more perfectly to work together for the good of all.

THE S. S. LESSON

INTERNATIONAL LESSON,
Jan. 21.

Lesson III. The Boy Jesus. Golden Text, Luke 2:52.

LESSON WORD STUDIES.

Note.—These Word Studies are based on the text of the Revised Version.

Jesus a "Son of the Law."—At the age of thirteen every Jewish boy became himself responsible for his observance of the law, in which from earliest childhood he had been trained by his parents, the mother being responsible for the child's education till his fifth year and the father supposedly from that time on till thirteen. The learning of the law was an essential part of every boy's early training. Finally, on his son's thirteenth birthday the father was relieved from further responsibility, which he commemorated by pronouncing the following words: "Blessed be he who hath made me free from the burden of my son's sins." On the succeeding Sabbath the son accompanied the father to the synagogue, and was presented with his

was catechetical, the pupils being encouraged to ask questions and answer those propounded by the instructors. Jesus was not the only pupil.

48. Thy father and I.—The home training of the boy Jesus had been wisely reticent, his mother having not as yet revealed to him the profound secret of his life. That the consciousness of this peculiar relation to God had nevertheless already entered the mind of the youth is evident from his significant reply to his mother's anxious inquiry.

49. I must be in my father's house.—Literally, in the things of my Father, hence the translation of the King James' Version, "about my Father's business," is also permissible. Note the emphasis on the personal pronoun my. Throughout the course of his entire ministry Jesus never fails clearly to distinguish between his own relation to the Father and the relation of others to the same Father. Thus to Mary at the empty tomb he says, "Go unto my brethren, and say to them, I ascend unto my Father and your Father, and my God and your God," indicating a difference as well as a likeness between his relationship to the Father and theirs. Compare also the wording of the intercessory prayer in John 17, "Father, . . . I came forth from thee, and they believed that

AN ARCTIC MISSIONARY

CHERRYMAN BACK IN ENGLAND FROM
NORTHERN STATION.

Dependent Altogether on Stores From
England—First Church of
Sealskin.

The Rev. E. J. Peck, who has returned to England from his arctic missionary work in the Arctic regions for 30 years, gives a vivid account of life among the Eskimos.

His mission station is one of the most lonely and inaccessible in the world. The headquarters are on the south shore of Cumberland Sound, at Blacklead Island, a little spot two miles long and 700 yards broad, round which it is possible to walk in a couple of hours.

"There are no trees and vegetation, except moss and very light grass, and no fuel," Mr. Peck says. "It seems like THE LAST PLACE ON EARTH."

"There is no food in the country except seal, and for all our stores we have to be dependent upon what we take out from England. Our only communication with the outside world is by means of a trading ship, which, especially chartered, visits us once a year."

"Our little settlement consists of a church, a hospital and two dwelling houses—one for the two traders and one for my colleague and myself. These are, of course, all of the rudest description, being fashioned out of materials shipped from home."

"Our earliest church was made of seal-skins, but had to be replaced by a wooden structure, as it was devoured by the dogs. The scene from Blacklead is the most desolate one imaginable, nothing but snow and ice being visible in any direction."

"The most trying time we have known was last winter, when the usual relief ship

FAILED TO REACH US.

It came to within 15 miles of our station, and was within range of our glasses, and yet it was not until ten months afterward that she reached Blacklead."

"For 14 days we watched her struggling amid the ice-barriers, and, despite the most gallant attempts to afford us the needed relief, she was eventually driven back."

"We suffered considerably from cold, as our new supply of coal was on board the missing vessel, and we had to bury our houses in snow to keep out the cold."

"The Eskimos were not the only sufferers from want of food, for one night in January a pack of hungry wolves surrounded our house and attacked the dogs, eventually escaping into the darkness. Afterward they devoured one another."

ROBS HERSELF IN SLEEP

..OMAN WHO DRESSES NIGHTLY IN
MEN'S CLOTHING.

Forgets it in the Morning—Discovery
Made by Servant Put to Watch
by Police.

A psychological puzzle has been discovered at Lillie, France, in the person of an old woman, who at midnight dresses as a man, with a burglar's kit, robs herself, then reattires in a dressing gown, and replaces the goods she has taken.

She is Mile. Godron, a rich old maid, who returned recently from Lourdes, saying she had been cured of an incurable disease. A week ago she went to the police, and said she had been robbed of 5,000 in bank notes. The police made careful enquiries, and as the result they persuaded Mile. Godron to engage a new maid. This maid was a private detective in the pay of the police, and she watched Mile. Godron

HEALTH

HYDROPHOBIA.

Few accidents are more terrifying to the sufferer than to be bitten by a dog supposed to be mad, and there are few conditions in which prompt and intelligent action on the part of the bystanders is more desirable.

Although nearly all warm-blooded animals are susceptible to rabies, it is most commonly seen in dogs. There are two forms, the "furious" and the "dumb." In the furious type, after a period of melancholy or depression, the animal becomes restless and irritable, with a tendency to run away and snap at everything in sight, finally becoming subdued and sullen, and dying of paralysis and exhaustion. In dumb rabies the stage of irritability is absent. The dog prowls about in a listless way with his head down and lower jaw dropped. At the same time there is a difficulty in swallowing.

It is often impossible to tell from a dog's actions whether it is rabid or not; but if instead of killing the animal as quickly as possible, as is often unwisely done, the owner capture it and keep it for a few days under lock and key, the question answers itself. A rabid dog always dies in from four to eight days, so that if the animal recovers the bitten persons may be sure that they are not going to develop hydrophobia.

In any suspicious case the wound should immediately be squeezed under hot water, and if deep, be incised freely, so that cauterization with either a hot iron or with strong nitric acid (not with lunar caustic) may be thoroughly done. At the same time the dog should be kept under observation, or if already killed, the head and neck should be packed in ice and preserved for medical examination.

Even if it seems certain that the animal was rabid the patient should not despair, for it is estimated that only fifteen per cent. of those bitten by rabid animals actually develop the disease, and if the Pasteur preventive inoculations are promptly begun recovery is almost certain.

The popular dread of rabies is out of all proportion to the relative frequency of the disease, and the length to which it may go is shown by the instances in which people have developed, and even died, of false hydrophobia, a nervous condition due to fright, and simulating to some extent the real malady.—Youth's Companion.

WHAT THE HAIR NEEDS.

The hair accompanies, but does not cause grayness. It is, like grayness, the result of certain nervous disturbances with and, unlike it, can be corrected by artificial means. Oil, glycerin, and petroleum are the three lubricating substances which are best for the purpose. A good mixture is olive oil and an equal quantity of liquid vaseline with one-eighth part of rectified spirits containing a few drops of tincture of myrrh and glycerin added.

This oil mixture rubbed into the roots of the hair is beneficial to a certain extent to the nervousness which is the cause of grayness. It is not understood generally that the color of the hair, and to some extent the complexion, is dependent upon the condition of the nervous system. The nervous disturbances which give rise to such pain as persistent neuralgia are the same that later cause the hair to change in color. It often is noticed that patches of whiteness appear in the hair in spots where pain has been located.

The person with nervous, excitable, or artistic temperament usually is inclined to early whitening of the hair, while grayness often appears to be entirely retarded when relief from mental worry has set in.

On grown people the irregular growth of the eyebrows may be lessened by systematic brushing. Vaseline or lanolin should be rubbed in thoroughly, and the brows should be brushed and carefully

training. Finally, on his son's thirteenth birthday the father was relieved from further responsibility, which he commemorated by pronouncing the following words: "Blessed be he who hath made me free from the burden of my son's sins." On the succeeding Sabbath the son accompanied the father to the synagogue, and was presented with his own phylacteries, which the son thenceforth wore at the recital of his daily devotions. By means of this formality the boy was initiated into the visible membership of the Jewish church and was called "a son of the law." As such he must henceforth attend the annual religious feasts at Jerusalem. In actual practice this legal age, was anticipated sometimes by one and sometimes by two years. At this age (twelve) Jesus had now arrived, and in company with his parents he makes the pilgrimage from Nazareth to Jerusalem for the first time. How much this visit to the temple meant to him is suggested to the thoughtful student by a careful reading of our lesson narrative.

Verse 40. On the eighth day the infant Jesus had in all due conformity to the law been circumcised. "And when the days of their purification were fulfilled, they brought him up to Jerusalem, to present him on to the Lord," and here in the courts of the temple the aged Simeon and Anna had greeted and blessed the babe as the Lord's Christ, Messiah. Simeon's song of thanksgiving and prophecy is recorded in verses 29-32 of this same chapter. After recording the most important events connected with and immediately succeeding the birth of Jesus the evangelist devotes to the long period of infancy and early childhood but the single sentence contained in this verse. To some the record at this point has seemed bare and defective, but the maturer judgment of a cultured mind recognizes in its simplicity and naturalness a mark of superiority and of trustworthiness.

Waxed strong.—Gained strength by degrees in the natural process of growth and development.

Filled.—Literally, becoming full, that is also by degrees.

Grace of God—God's special favor and blessing.

41. Went every Year to Jerusalem.—By the law of Moses all males were commanded to be in attendance at the three feasts of Passover, Pentecost and Tabernacles, at Jerusalem (comp. Exod. 23, 17; Deut. 16, 16). This custom, however, was not at this time extensively observed, and it had come rather to be a mark of piety and devotion to go up even once a year as did Joseph and Mary. The fact that Mary accompanied her husband is an added indication of her deep piety, since women were not required by law to attend.

The feast of the passover.—This feast commemorated the sparing of the first-born in the Jewish camp in Egypt, and the subsequent flight and deliverance of the nation from Egyptian bondage (comp. Exod. 12). The passover proper, which fell on the fourteenth of Nisan, was followed by the Feast of Unleavened Bread which lasted seven days, from the fifteenth to the twenty-first of Nisan. The two feasts were in reality one, and the names came to be used interchangeably (comp. Exod. 12 and 13, Lev. 23, and Deut. 16).

43. Fulfilled the days.—Including the seven days of the Feast of Unleavened Bread, having tarried till the end of the festive week.

44. The company.—The travelling company, or caravan, consisting of neighbors and friends from Nazareth, in this company men, women, and older children would form separate groups during the actual progress of each day's journey.

A day's journey.—Hardly more than from six to eight miles would be covered on the first day, a large majority of the company travelling on foot.

46. After three days.—Three days after they had first left Jerusalem, on the first day after their second arrival in the city.

The teachers.—Learned rabbis who imparted instruction in the law in the courts of the temple. Three rooms or apartments of the temple were set apart for members of the Sanhedrin in which to receive their pupils. The instruction

empty tomb he says, "Go unto my brethren, and say to them, I ascend unto my Father and your Father, and my God and your God," indicating a difference as well as a likeness between his relationship to the Father and theirs. Compare also the wording of the intercessory prayer in John 17, "Father, . . . I came forth from thee, and they believed that thou didst send me. . . . They are not of the world, even as I am not of the world. . . . I made known unto them thy name."

51. Subject unto them.—In filial obedience, the rendering of which was a part of his great lifework, that he might in all things become our example.

52. Stature.—Or age.

Favor.—Or grace (comp. note on verse 46, above).

ENGLISHMAN HELD AS SPY.

Was Arrested By Russians and Flogged Every Morning.

Joseph Ernest Geddes, a British merchant at Hong Kong, arrived at Grimsby from Hamburg, and went to London to petition the Foreign Office relative to his arrest by the Russians as an alleged spy in Manchuria, charged with selling plans of Port Arthur to the Japanese.

He states that having obtained permission to trade in Manchuria, he left Tien-Tsin in December, 1904, and upon reaching Mukden he was arrested, although Port Arthur was a place he never visited. His papers were torn up, and his clothing was cut up in search for any incriminating documents, the only reply of his remonstrances being, "Oh, you British are all the same. You would help the Japanese."

Lightly clad, he was placed in a small room, preparatory to being shot the next morning. Ten days passed, and each day he was told that the next would be his last. He managed to write several letters to Gen. Kuropatkin, asking for an explanation, but no reply came.

At the end of ten days he was put under escort to the military prison at Harbin. There he remained for six months. Then Mr. Geddes was placed among a gang of forty criminals, the lot being hustled into the prison wagon, with three soldiers watching each man. Their destination, he learned, was Irkutsk, in Siberia. From that period up to the time he reached Warsaw the horrible journey amid the snow included halting at fifteen prisons en route.

At Warsaw, though suffering from exposure, he was placed in a small room devoid of furniture, and without sufficient warmth. Each morning an official came in, and giving him half a dozen lashes with his belt, said:—"Confess you are a spy." He refused, and the whipping eventually ceased.

Ultimately, Mr. Geddes was set free, but no apology was offered him.

BARBARITY IN INDIA.

English Subjects Tortured and Murdered by Wild Tribesmen.

A Government Blue Book has been issued here, giving particulars of a gruesome outrage which is to be avenged by a British column of 200 Burmah Military Police and one gun now on its way to the scene of the occurrence under Capt. Kirke and Lieutenants Waterfield and Macdonald. The culprits are the wild tribesmen of the Chin Hills, which lie immediately beyond the administrative border of the eastern portion of British Burmah.

Last April three Lungno villagers were enticed to visit Wellaung, a village in the unadministered tracts, to sell saffron, and were seized and bound. They were "shot" at for three days with arrows, which were not allowed to penetrate too deep into the flesh, and ultimately were killed and their bodies decapitated.

One of them, before being put to death, had the ends of his fingers and toes cut off, and was forced to drink his own blood.

"They say that fringes are not much worn now, but I'm hanged if I believe it!" muttered Penhless, as he glanced at the bottoms of his trousers.

saying she had been cured of an incurable disease. A week ago she went to the police, and said she had been robbed of 5,000 in bank notes. The police made careful enquiries, and as the result they persuaded Mlle. Godron to engage a new maid. This maid was a private detective in the pay of the police, and she watched Mlle. Godron.

NIGHT AND DAY.

She soon discovered that her mistress was a confirmed somnambulist. She usually retired at 10, and fell asleep immediately. At midnight she rose and and produced from a box a man's clothes, in which she dresses herself.

She next tied a crepe mask over her face, pulled a rough cap tightly on her head, took a jimmy and other burglar's tools from a drawer, and stowing a revolver in her hip pocket, stole quietly out of the room.

The first night she took the silver off the dining-room sideboard, pushed it into a bag which she slung across her shoulders and stole back to her bedroom. She then undressed, put on a dressing gown, and carried the silver back to the dining-room, piece by piece.

Another night she let herself out by the door, broke in through the drawing-room window, opened a writing desk with a skeleton key and abstracted some money, replacing it as before.

DIGS UP TREASURE.

On a third night she stole into her cook's bedroom, rifled her pockets, and again returned the money.

At the end of a week the burglarious routine was varied. Mlle. Godron dressed as usual, but went to an out-house and took a spade. She then proceeded some distance down the garden, and began to dig, ultimately unearthing a small box. This contained the lost \$5,000, about which she had complained to the police.

Mlle. Godron cannot be persuaded to believe that she does all these things in her sleep, and is much agitated to know how she obtained possession of the burglar's clothes and kit.

PEASANT A MIRACLE WORKER.

Many Said to Have Been Cured by Him of Ills.

Making the blind to see, the deaf to hear, and many other marvelous cures effected by the laying on of hands are attributed to a man named Saltzmann, who has acquired an extraordinary reputation throughout Brittany as a worker of miracles.

How much of his reputation is due to Breton credulity and how much to his own powers is difficult to say; but hundreds of persons are flocking to him to be cured.

He has been staying for the last fortnight at Huelgoat, where he is credited with over 200 cures. The only condition to success is faith in his powers. He even claims that he can cure from a distance and that a letter written to him with faith will bring restoration of health.

A case is recorded of a miner whose sight was destroyed by an explosion. Two days after he placed himself under Saltzmann's care he is alleged to have recovered his sight sufficiently to find his way about without assistance and to distinguish colors.

A disabled wrist, the result of a bicycle fall, touched by him, became strong and the pain and stiffness vanished.

THE PESSIMIST'S PRIVILEGE.

We used to blame our earthly lot Because the weather was too hot; And now our complaints we will unfold, Because the weather's beastly cold. So let us smile and be of cheer! There's cause to kick throughout the year.

First Young Doctor (to second ditto): "Halloo, old man, what's the matter? You're looking very glum." "No wonder," was the reply. "I'm attending that wealthy Mr. Golding, you know, and I've sent him the wrong medicine." "Indeed! Is it a serious blunder?" "Very serious. The medicine I've sent him will cure him in two days."

to early whitening of the hair, while grayness often appears to be entirely retarded when relief from mental worry has set in.

On grown people the irregular growth of the eyebrows may be lessened by systematic brushing. Vaseline or lanolin should be rubbed in thoroughly, and the brows should be brushed and carefully trained down with a soft brush.

As a general thing the most that can be done to make a luxurious growth for the hair is done for it in childhood. It never should be allowed to outgrow its strength and to exhaust the energies of the follicles at its roots without being properly clipped and pruned. This also is true of the eyelids, which can be so improved by constant and systematic clipping even more than the hair itself. The eyebrows also are susceptible to improvement by the same process, although their pruning is advisable only if the growth promises to be too light, and then it should be done by a professional.

BE GENTLE WHEN YOU BLOW YOUR NOSE.

Medical experts are calling the attention of the public to the importance of performing the nose blowing operation in a scientific and hygienic manner. First one nostril and then the other should be blown without undue violence.

Doctors state that the two nasal passages should never be closed at the same time. If they are obstructed, as in the case of a cold, the back of the throat is filled with compressed air, and this, together with the discharge and the microbes which it contains, may be driven through the eustachian tube into the middle ear and lead to serious results.

A great authority on the subject used to forbid his patients to blow their noses when suffering from a cold. This course is hardly one which will commend itself to these in the habit of catching colds. The best advice would seem to be that when it is necessary to blow the nose the blowing should be done gently.

VALUE OF CHARCOAL.

The value of charcoal is manifold. It is one of the greatest purifiers of water that we have. Water or any substance allowed to percolate through it will be freed of all animal organisms or foreign particles. It is one of the best sweeteners of the breath. Add a little ginger to it, and it becomes a splendid thing for the stomach after a hearty meal. Cleanse the teeth with it, for it takes away fungus growth that many tooth powders fail to touch. It is also a great reliever of pain caused by a burn. In a commercial way charcoal has a thousand and one uses, but these are a few of the more important household uses it can be put to successfully.

TO CURE EARACHE.

Take a lemon and cut it in half, take out the seeds place the half against the ear, and cover it thoroughly with hot flannels when going to bed. Repeat for two or three nights.

Husband (impatiently): "If the fool-killer would strike this town he would find plenty of work to do." Wife: "Is there such a person, dear?" Husband: "Of course there is." Wife (with anxiety): "Well, I do hope, John, that you will be very careful."

"It has come to my ears," remarked Miss De Playne, "that you said my face would make a man climb a fence." "Yes, that's what I said," replied the diplomatic one; "but, of course, I meant if he happened to be on the other side of the fence."

She: "If you could have one wish, what would it be?" He: "It would be that—that—oh! If I only dared to tell you what it would be!" She: "Well, go on. Why do you suppose I brought up the wishing subject?"

Uncle Charles: "I don't know as you will thank me for interfering, Ellen, but they tell me this Mr. Cashman you are going to marry is utterly worthless." Ellen: "Why, Uncle Charles?" Uncle Charles: "Not in a pecuniary sense, you know—he's got money enough—but from an intellectual point of view." Ellen: "Oh, Uncle Charles, you don't know what a turn you gave me!"

Strange Case of Man Who Traveled 6,000 Miles.

A curious case of lapse of memory has just been revealed at Sydney, Australia, on the arrival from the northern districts of New South Wales recently of an American, whose remembrance was of Los Angeles, Cal. The American's story is vouched for by two Sydney doctors who have investigated the circumstances.

The mysterious traveler left Parahoe, in California, a few days before Easter, intending to join his wife and family at Los Angeles. He remembers arriving there, but has no recollection of what happened afterward.

He awoke to find himself lying under a tree in the Australian bush, and was immensely astonished at seeing around him many unknown forms of vegetation. He noticed that his hands were hard and rough, though he had never consciously done a day's hard work.

A bullock driver passed him shortly after his awakening, and he at once inquired the way to Los Angeles. The man stared in astonishment, and answered that Hill End was the name of the nearest township.

The man without a memory thereupon asked the date, and was told that it was late in October and that he was in New South Wales. He worked his way to Sydney, a distance of some hundreds of miles, and is now trying to obtain employment there to get money to return to his family.

He is in total ignorance as to their whereabouts and as to his own doings during the six months between April and October.

YOUNG FOLKS

A QUESTION.

I.

Little Lucy Locket
She hadn't any pocket—
No place to carry anything at all;
While Lucy's brother Benny
He has so very many,
In which to put his marbles top or ball,
That when he's in a hurry
'Tis sometimes quite a worry
To find the one he wants among them
all.

II.

Now why should Lucy Locket
Not have a little pocket—
A handy little pocket in her dress?
And why should brother Benny,
Who doesn't need so many,
Be favored with a dozen, more or less?
The reason, if you know it,
Be kind enough to show it,
For really 'tis a puzzle, I confess!

CRAZY PICTURES.

"Never mind if it does rain. Mamma always thinks of something extra nice for rainy days," said Harold.

"I have thought of something now," said mamma. "Get some pieces of smooth brown paper for Frankie and little Helen and some of that pretty green cardboard for Esther and Mabel, and you and Leon may use your scrap-books. I will pick out some old magazines, and Leon may get some paste. Esther you may take the cloth off the dining table, and spread out some newspapers. I am going to show you how to make crazy pictures."

The children ran to collect the things, and mamma sent Harold for both pairs of scissors and the shears, and Esther for some empty boxes and covers to lay the parts of pictures in.

"Now," said mamma, giving the things round to the different ones as she spoke, "you may cut the brown paper into sheets about six by eight inches; you may cut the cardboard the same size."

"Now all of you little ones may cut out the pictures of everything in the advertisement pages that is alive, but don't try to cut them close to the picture."

Fashion Notes.

THE SEPARATE BLOUSE.

still claims the centre of the stage, and upon it all the smart and clever ideas that a horde of designers can conceive are lavished. Of course, there are a few leading features that are common to all of them, and those are the supremacy of the short sleeve, the closer fit at the waistline and above it, the liking for the so-called Dutch neck—by those who can afford to wear it—and the fad for extremely high, close but transparent collars where the Dutch neck is not accepted. And all sorts of extravagances in the handwork and trimmings are lavished upon those blouses. Such are the leading characteristics of the newest and best models.

While the lingerie blouse, of lingerie materials, is high in favor, its supremacy is by no means uncontested. The lingerie blouse of batiste, sheer linen, or mull is, after all, only a washable blouse, fit for morning or luncheon wear only. But so great is the charm of this simple, but expensive, mode, that all sorts of sheer silken, and even woolen fabrics are brought into play, and fashioned exactly after their cotton or linen prototypes.

Some, there are, who advocate a boned and fitted lining—seemingly oblivious to the fact that there is, or should be, a sort of impression of easy going and comfort about such frocks or blouses. Once that they are tightly strained and stitched over a fitted lining, half, if not, indeed, all of their charm is gone; and they degenerate into a half and half affair, something that is neither the one thing nor the other; and not at all desirable from any point of view.

The best of such possessions boast only of a double chiffon lining, a slip of chiffon cloth as it is termed this side of the ocean. In rare cases there may be a slip of China silk to wear beneath the sheer lingerie blouse, but what with our heated houses, and the immense vogue of fur-lined coats this winter, there is hardly any necessity for this latter item.

THE CHIFFON SLIP

is like the indispensable dress shield, supposed to be a part of the blouse, to accompany it to the laundry, and to remain in service just as long as does the blouse itself.

The yoke is once more restored to favor; but it is very far indeed from being the yoke that it once was. All sorts of devices are in favor to cover up the fact that it is a yoke, and separate motifs are applied; tiny bias folds fagoted together after all sorts of intricate patterns, several varying laces interwoven, and conjunctions of all three devices are by no means uncommon in later designs.

The shoulder must be broad. But on the other hand there is not supposed to be that drooping line that characterized the blouse of a season or two ago, when girls who would normally wear a 34 size took to wearing 38 and even 40 in order to have the extreme droop to the shoulder line that the fashions of the early Victorian period made so popular. To-day, it is the broad and mannish outline that is the aim of the smart girl; and the sleeve, while moderate enough as to size, is expected to carry out this broad line from the shoulder. Some of the best makers are putting little loops of collar bone (just that same silk covered featherbone that one tacks into collars and occasionally into cuffs to sustain the shape without slipping or crumpling), into the top of the sleeve. The two ends are fastened into the shoulder seam, or rather into the sleeve seam, each end tacked an inch and a half, or two inches either side of the shoulder, and the loop or half loop so formed is as flexible as could well be imagined and yet sustain the sleeve to just exactly the right angle. A simple device, surely, but

NONE MORE EFFECTIVE.

And in all of the blouses, the cotton, linen, silk, or satin, it is the half sleeve that is the correct display. Of course, for wear with a plain tailor-made costume, one intended for shopping and walking purposes, the plain full sleeve still maintains, with a more or less fanciful cuff at the wrist. But apart

THE BIGGEST ELEVATORS.

Handling Canada's Enormous Wheat Crop.

I am at the nozzle of a great grain funnel at the end of the hopper down which Canada's wheat is pouring into the boats of Lake Superior, writes Frank G. Carpenter from Port Arthur, Ont., to the Chicago Record-Herald. The crop amounted to more than a hundred million bushels, and during the season a steady stream of golden grain has rolled into Port Arthur. Here and at the sister city of Fort William, four miles away, are some of the mightiest elevators of the world. These are now packed almost to bursting, and are closed up for the winter to await the opening of navigation in April or May.

Port Arthur and Fort William are the Duluth and Superior City of the Canadian northwest. They promise to have an equal business with those American grain ports, and at the same time to take the place of St. Paul and Minneapolis in connection with the vast region now opening up above the international boundary. Both have excellent harbors. Port Arthur is situated right in Thunder Bay, and Fort William is four miles away, a little back from the bay, at the mouth of the Kaministiquia River.

The cities are on the north side of Lake Superior, two or three hundred miles from Duluth, and within about four hundred miles of Winnipeg, the Chicago of Western Canada. At both towns is plenty of water for the biggest of the lake steamers, and a great caravan of boats is moving back and forth between them and the east during eight months of the year. The ports already have connection with the west by the Canadian Northern, and the Grand Trunk Pacific is now building a branch which will connect with its main line and thus bring another river of wheat to this point. By these roads Port Arthur and Fort William have access to every part of the wheat belt, and the traffic which will grow up in consequence will make this one of the commercial centres of Canada in the future.

PORTS HAVE GREAT FUTURE.

At least that is what the Port Arthurites and Fort Williamites claim, and they claim it so enthusiastically that I believe them. I like the towns. They are full of the spirit of the breezy West. You can feel it in the air. The moment I landed on Thunder Bay the cold, calculating wet blanket of the moneyed East fell from my shoulders, and I seemed to stand strong and free in a land with a future.

This region is more like the United States than eastern Canada. It is full of twentieth century progress. The towns are made up of young men, with red blood in their veins. The people look at the future through the right end of the opera glass, and most of them have microscopes in front of the lenses. Every one is building air castles—not in Spain, but upon Lake Superior—and, although he acknowledges that he was not yet gotten beyond the foundations, he can, in his mind's eye see thirty-story skyscrapers far surpassing the cities of the present. Port Arthur has 6,000 population, and Fort William 1,000 more. Nevertheless their citizens rather sneer at Montreal and Winnipeg, and think that when joined together they will be the great middle city of the Canada of the future.

Said F. B. Allen to me last night, as he put his thumbs in the armholes of his vest and threw out his chest:

"The Canada of the future will have three big cities. One may possibly be Montreal, but I rather think it will be situated on the Atlantic Ocean east of that point. The second may be Vancouver, but I rather think it will be Port Simpson, at the terminus of the Grand Trunk Pacific, and the third will certainly be at Port Arthur, for this is the natural situation set aside for a great metropolis by the Almighty. Nature has put the resources here, and given us the combination of water power

furnaces here. We are cutting down our taxes, and we believe that these institutions will eventually pay all the expenses of running the municipality. We own a power plant in addition, and we can furnish power at low rates."

"But does it not cost the consumers more to have the lights and telephones managed by the town?"

"No. Our street car fare for a nine-mile ride is 5 cents. I use twenty-one lights in my house, and I can keep them burning all day and all night for \$3.70 a month. Our telephones are so low that we are crowding the Bell company out."

I find the same conditions as to municipal ownership prevail at Fort William. Mr. Trautman, the editor of the Times-Journal, tells me that that city has invested less than half a million dollars in its light, waterworks and telephone plants, and that it could today sell its franchise for a million.

Said he: "We have now 600 telephones and are practically crowding the private telephone company out of existence. We charge a dollar a month per telephone in residences and two dollars a month in business houses. At this rate we made a profit of a thousand dollars last year, after paying our interest and sinking fund. We expect to lower the rates in the future, and in two years from now we shall be furnishing residence telephones at 50 cents a month and business houses at \$1 a month. We are paying our 'hello' girls twice as much as is paid by the Bell company for the same service."

During my stay here I have gone through the wheat elevators. They are among the largest of the world, and that of the Canadian Northern at Port Arthur is equalled by no elevator on earth. This elevator is built right out in the lake. It consists of two mighty barn-like sky-scrappers, with a great forest of herculean grain tanks between them. The skyscrapers contain machinery and some storage tanks. The forest is made up of mighty cylinders of tiles bound together with steel, each of which will hold 23,000 bushels of wheat. There are a hundred and sixty such towers, and in addition other tanks made by the interstices among them. The great tank forest covers several acres, and it rises to the height of an eight-story house, each tank being twenty-one feet in diameter, or the width of an average parlor.

HUGE ELEVATORS FOR WHEAT.

The elevator altogether will hold 7,000,000 bushels of wheat which is enough to supply a city of a million and a half—Philadelphia, for instance—with flour the year round. It cost \$1,500,000 to build, and it can, I am told, handle wheat as rapidly as any elevator on the great lakes.

The wheat comes in cars, each of which holds about a thousand bushels. It is carried in bulk and is dumped from the cars into the basements of the great buildings at the sides of the tanks. From here it is carried to the top of the elevator by endless buckets travelling at the rate of 650 a minute, or more than two every second. These buckets hold almost a bushel, and there is a continuous stream of wheat running from the cars to the top of the elevator. There it falls into tanks, which automatically weigh it, and it is then carried on by means of wide belts into these storage towers.

The wheat is not touched by hand from the time it leaves the cars until it gets into the hold of the vessel. The machinery is so arranged that by pressing a button or moving a lever a stream of wheat can be carried to any part of the granary. It flows just like water, save that the belts will conduct the stream uphill or down at the will of the managers. These belts are about forty inches wide, and each will carry wheat

the parts of pictures in.
"Now," said mamma, giving the things round to the different ones as she spoke, "you may cut the brown paper into sheets about six by eight inches; you may cut the cardboard the same size."

"Now all of you little ones may cut out the pictures of everything in the advertisement pages that is alive, but don't try to cut them close to the picture; let the older ones do that. Harold may punch the sheets on one end, so they can be tied together to make a book when they are done. You could make a book at first, but if you spoil a page it looks badly to cut it out, so I like sheets best."

Then mamma cut out several pictures quickly, and cut off their heads and arms and legs, putting the heads into one box, the arms into another, the legs into a third, and the bodies into a fourth. Sometimes she left the arms with the body, as it would spoil some of the bodies to have them cut off.

As soon as all the children had pictures enough to cut so there were quite a number in each box, mamma gave a body to each child, and then while one was picking out a pair of legs, another was choosing arms, and another a head. As soon as anyone had a picture ready he pasted it on his sheet or book, and a crazy-looking set of pictures they were!

The little children's were the funniest, for sometimes they placed feet where hands should be, and they made the body turn one way and the head another. Sometimes a girl had a dog's head, or a man had the body of a child and the skirts of a woman. One boy drawing a sled had the legs of an ostrich.

They were all surprised when Maggie came to set the table for luncheon. "Let's send these pictures to the Children's Hospital," said Mabel, "and they will make the children there laugh, too."

OLD-TIME BUTLER IS OUT.

Male Servants in England Replaced by Women.

"Women are fast replacing men as servants in the houses of the wealthy," is the opinion of Miss Nora Beresford, who has a large clientele among the servants and employers of the West-end of London. "Men servants have had their day. Housemaids and parlormaid still are required, but chefs, butlers and men servants generally are becoming to an increasing extent luxuries of the past."

Nor is Miss Beresford's experience exceptional. The old idea of an "establishment" no longer obtains in the modern smart set, who prefer the irresponsible life of flats and hotels to the care of a large house of servants.

The proprietress of one of the oldest established registers in London, whose principal business is to provide recruits for the servants' halls of aristocracy, tells the same story of smaller establishments.

"I have on my books numbers of men servants of irreproachable character and with records of continuous service," she stated, "who, though they have occupied responsible positions in houses of noblemen, are ready to take anything that offers, knowing the outlook for the man servant out of employment is about as bad as can be. Entertaining in the hotels and restaurants has killed the prospects of the upper class servant."

"A generation ago the men servants in large houses invariably brought up their children to follow in their own footsteps, but now the girls are going into the post-office and the boys are being trained as chauffeurs."

Many society women, according to reports at the registry offices, have engaged a smart parlor maid to take the place of the old-time butler, with excellent results. Keeping down expenses is one of the main reasons for the change, the sleeping accommodation for the men servants proving a considerable tax on a small but highly rented town house, while there also is the question of taxation, which falls on those who employ men servants.

May: "Is he a man you can trust?"
Bess: "Oh, yes! Papa says he owes everybody!"

NONE MORE EFFECTIVE.

And in all of the blouses, the cotton, linen, silk, or satin, it is the half sleeve that is the correct display. Of course, for wear with a plain tailor-made costume, one intended for shopping and walking purposes, the plain full sleeve still maintains, with a more or less fanciful cuff at the wrist. But apart from this the half sleeve practically has the field to itself.

The three-piece costume is the leading feature of many of the fashionable tailors and dressmakers. A coat and skirt in cloth, velvet or velveteen will have a little blouse in silk or chiffon or lace—or more often dainty and deft combinations of all three, matching the costume as to color, but totally different in all else.

On those there are all sorts of trimmings and trimming schemes lavished; shirrings after odd and original lines, tuckings, strappings, insertions of many characters. Ribbons are a perfect treasure trove to the designer, and braids are finding a thousand and one novel uses daily. One does not often connect braids and chiffon; and yet one of the most satisfactory models introduced this winter makes lavish use of an artificial silk braid upon a chiffon blouse that is worn with a chiffon velvet coat and skirt of the same shade. It is a mode, however, that must be most cleverly handled, else the result were deplorable in the extreme.

THE SHIRT-WAIST SUIT

goes triumphantly upon its way, borrowing ideas from pretty nearly everything under the sun. That there are shirt-waist suits and shirt-waist suits has been brought home vividly to the girl who has ever attempted to shop for them. One dainty gown in pale blue, ruffled with what seems miles of yellowish Valenciennes, yards and yards of bias fagoted bands, and tuckings so fine that they seem the work of fairy fingers, is scheduled as a shirt-waist suit and the modest price of \$250 demanded for the privilege of possession. Right next to it in the same show-room is a dainty little affair in raspberry red henriette with the same yellowish Valenciennes and clever touches of a rich Jacqueminot red velvet upon the blouse only. For this just half the sum is asked; and for its neighbor, a MacGregor plaid serge—one of those soft and somewhat indefinite plaids in dark blues and greys with a thread of gold gleaming at far intervals—still a further reduction of 50 per cent. is scheduled. But they are all of them shirt-waist suits!

Already the best shops are showing the most exquisitely fine things in lingerie gowns and shirt-waist suits for Southern wear; and although to the great masses of women the price makes them prohibitive, still their charm is potent. Five years ago even the wealthiest among us would have thought five times were paying a couple of hundred dollars for a lingerie blouse, and twice that for a morning frock; yet today such prices are the rule rather than the exception. Extravagant indeed it may seem and yet there are more workers in the shops than ever before, the wages paid are better, and there seems to be a decided uplifting to the class of work as well as to the class of workers.

NOT SURE OF ONE OF THE TWO...

A district visitor once went to see an old Scotch woman who was dying. Noticing that her talk was all about herself and the minister, he said:

"Well, really, Jeannie, I believe you think there will be nobody in Heaven but yourself and the minister."

"Ah, weel," said the old woman, "an' I'm no' see sure about the minister."

TAKING HER AT HER WORD.

"Ethel, you naughty child," scolded her mamma, "what have you been doing to make Charley cry so?"

"I've only been sharing my cod-liver oil with him, mamma," replied Ethel; "you said it was so nice."

Young Bride: "Why, Herbert, do you call this little pigeonhole a shoe cupboard?"
"My love, that will hold a hundred pairs of shoes of the size you wear."
"Well, perhaps you are right. It's neat and handy, anyway."

situation on the Atlantic Ocean east of that point. The second may be Vancouver, but I rather think it will be Port Simpson, at the terminus of the Grand Trunk Pacific, and the third will certainly be at Port Arthur, for this is the natural situation set aside for a great metropolis by the Almighty. Nature has put the resources here, and given us the combination of water power, railroads and the great lakes. We are at the very neck of things, and there is no possibility for any place to compete with us. We can get coal by water at the lowest freight rate, and we have mountains of iron in the Antikokan Range near by. MacKenzie & Mann are already putting up blast furnaces which will make a hundred tons of pig iron a day, and we shall eventually be a great industrial centre. We already have one of the largest sawmills in the lake, and there is plenty of lumber within easy reach.

"We have 150,000 available horse power in the rivers and falls near by. At the Kakabeka Falls, which are now developing, the water drops 180 feet, and it will produce, it is said, 160,000 horse power. A plant is now being put in which will develop 30,000, and 10,000 of this will be ready for delivery next June. Some of your big thrashing machine companies have already bought land and will build factories here. Well-known plow people of Moline have recently been looking over the ground, and we expect in time to make here the agricultural machinery and farming tools of the great West. We recently had a representative of the United States Steel Trust investigating our possibilities. It wants a plant in Canada, where it can manufacture and save high duties entailed by our protective tariff."

RIVALS FOR GRAIN TRADE.

Port William and Port Arthur are rivals. Port Arthur was built first. It was started by the Canadian Pacific Railroad, but shortly after its birth, the baby town decided to tax that great corporation. This made the railway people angry, and it is said that Mr. Van Horne, now Sir William Van Horne, decided to spank the infant Port Arthur by making Port William his leke terminus. He thereupon took away the railway shops to Port William, saying that he would yet see the grass grow in the streets of Port Arthur. For a time the grass did grow, but then the Canadian Northern came in, and now Port Arthur has the traffic of both roads, although the chief business of the Canadian Pacific is done at Port William.

Port William has the Canadian Pacific elevators, with a capacity of something like 13,000,000 bushels. Port Arthur has the Canadian Northern elevator, which will hold 7,000,000 bushels, and the two towns are now running neck and neck as to enter improvements. They are both enterprising. Both are building up rapidly, and they will eventually come together. They are already united by a street car line, and the land between them has been divided up into town lots, although for farming purposes it would hardly be worth 10 cents an acre.

Both Port Arthur and Port William believe in municipal ownership. They manage their own electric lights, telephones and waterworks. Port Arthur owns the street car line which supplies the transportation facilities of both cities, and the fare from one to the other, a distance of four miles, is only a few cents. The car line was put in when Mr. Van Horne moved the shops to Port William, in order to keep the employees who lived at Port Arthur there, and the electric light system was instituted by the city because the town wanted lights and no one else would supply the money. As it is, Port Arthur has now about \$400,000 invested in municipal enterprises, and it is making 8 per cent. on all it has spent. The actual profits last year were almost \$25,000. The total cost of running the town was \$100,000, so that the telephones, street cars, electric lights and waterworks paid altogether just one-fourth of the taxes.

MUNICIPAL OWNERSHIP.

I talked with a councillor. He said: "Our assessment this year will be about 20 mills, but this includes the rate we pay on a bonus of \$225,000 which we save for the establishment of a plant."

it gets into the hold of the vessel. The machinery is so arranged that by pressing a button or moving a lever a stream of wheat can be carried to any part of the granary. It flows just like water, save that the belts will conduct the stream uphill or down at the will of the managers. These belts are about forty inches wide, and each will carry wheat at the rate of 16,000 bushels per hour.

The tanks are so arranged that by the opening of a valve the wheat flows right into the vessel's hold. This work is done so cheaply that it costs only a fraction of a cent to take a bushel of wheat from the car to the boats, and for 5 cents a bushel can be carried a thousand miles and more down the lake and put into the hold of one of the ocean steamers which take it to Europe. The wheat is stored for the first fifteen days for three-quarters of a cent a bushel, an equal charge being made for each month thereafter.

OUTSTRIP UNITED STATES.

Indeed, Canada is fast building up what will be the best elevator system on this continent. The most of her machinery is new, and in that she surpasses the older elevators of the United States. The Canadian Northern elevator at Port Arthur can unload five hundred cars, or over half a million bushels of wheat, in one hour. It can ship out 200,000 bushels in one hour, and it has ten scales in each of its buildings, each of which will weigh forty-three tons at one time.

The Canadian Pacific Railway elevators at Port William have a total capacity of 13,500,000 bushels. There are five of them, represented by the first letters of the alphabet, and some of them are each more than an acre in area. In elevator B, 87,000 bushels of wheat were recently loaded in one hour, and a train of wheat is unloaded every twenty minutes during the season. I timed them as they unloaded a car and it took just seven and a half minutes. That car contained 1,600 bushels of wheat, enough at twenty-five bushels per acre to form the total crop of sixty-four acres. Nevertheless, in less than eight minutes it was all in the tanks.

These elevators at Lake Superior are only the end of a great system which extends throughout Canada's new wheat belt. There are more than twelve hundred small elevators now scattered along the railroads in that part of the Dominion, giving every farmer a short haul to the market. These elevators have altogether a capacity of 28,000,000 bushels. They represent an investment of \$55,000,000, and many of them are owned by American capitalists. A single company will have a long string of such granaries, and it will either buy the wheat direct from the farmer, or will store it for him, or handle it on commission.

DEATH REVEALS SECRET.

Retired Stewardess of Ocean Liner Possessed Fortune.

Death has revealed a remarkable secret, preserved with strictest inviolability during her lifetime by Mrs. Mary Martin, a former stewardess employed in the service of the P. and O. Steamship Company, who died at sea while on her way home from Bombay on board the mail steamer Egypt, which has just reached London from India.

It appears that Mrs. Martin, who was a widow, joined the Egypt as a passenger. Nothing about her was known, except that she had been for many years a stewardess, and that her husband, when living, was employed in the Bombay dockyard. When her body had been committed to the sea her effects were overhauled with a view of discovering the names of her relatives.

The search failed in this direction, but in a cash-box concealed among clothes in a cabin trunk was found documentary proof that the dead woman had to her credit in a well-known London bank the sum of \$50,000.

About \$150 in gold was discovered in a bag which Mrs. Martin was accustomed to wear around her neck while asleep, and the jewelry found stowed away has been valued at several hundred dollars.

THE WINNIPEG OF TO-DAY

THE GATEWAY TO CANADA'S GREAT WHEAT BELT.

An American Writes a Glowing Account of the Young Giant of the West.

Stand with me on the top of the Union Bank Building, Winnipeg's new skyscraper, and take a look at the city, writes Mr. Frank G. Carpenter in the Chicago Record Herald. You had best pull your fur cap down over your ears and button your coonskin coat tightly about you, for the wind is blowing a gale. The air is nipping, but the sky is bright, and there is so much ozone that we seem to be breathing champagne. Have you ever felt so much alive before?

We are in the wild and furry Northwest, in its biggest town, and on the top of its highest building. Were it not so cold that Winnipegger who stands beside us as guide would ask us if it were not like heaven. We are sure of one thing, the atmosphere by no means savors of the other place down below.

Take a look over the city. It stretches out on all sides for miles. The new shingle roofs shine brightly under the winter sun, and we can almost feel the paint of the suburban additions. Winnipeg is a grower. Even now, in the winter, the sound of the hammer is heard all day long, and buildings are still going up by the hundreds. The town prides itself on its newness, and indeed much of it is just built. Over there at the north are miles of new houses. At the south buildings are going up on the plains, and right below us, in the heart of the city, the business blocks have risen from the ground since last summer. Winnipeg erected \$11,000,000 worth of buildings last year. It built about \$9,000,000 worth the year before, and \$5,000,000 worth in 1903. All through the past five years it has been jumping, and it is now leaping ahead like an Australian kangaroo. In 1900 the new buildings numbered 48, and in 1904 there were erected more than 2,000.

CITY IS GROWING RAPIDLY.

Turn about and look up Portage avenue. That street was practically without buildings four years ago. It has now millions of dollars worth of new business blocks, some of which would be a credit to any of our cities of twice this size.

Look at that department store. It is the largest in the West. It is as big as Wanamaker's establishment in New York, and it now has six stores. It was built only last year, but the demands of the trade are such that three stores more will be added next spring.

Turn about and look down Main street. There at the end is the new Canadian Pacific depot, hotel and railway offices fast approaching completion. Those buildings alone will cost as much as \$2,000,000, and farther up the street are to be the great terminals of the Grand Trunk and the Canadian Northern, which will cost \$3,000,000 more.

"Yes, sir," says the Winnipegger at my side, "that shows you how we are growing. About five years ago we began to build for all time and eternity. Before that we had not realized that Winnipeg was bound to be the greatest city of the North, and our houses were put up for the time. Most of them were without cellars, and they had flimsy foundations. Since then we have raised them and made excavations, and we are now building as substantially as any town on the continent. Five years ago we had about 50,000 people. Now we have 100,000, and we are just on the edge of our beginning. The city will grow more next year than ever before, and within ten years, and probably sooner, we shall equal Minneapolis and St. Paul combined."

"Look at those wholesale buildings," he continues. "Did you ever see anything like it? Most of them started as

It was the first business part of Winnipeg, being a King's highway, and it still contains the best business properties. Real estate along it has gone up like a shot within the past five years, and it is said now to be fully as high as in Minneapolis or Toronto. Storerooms rent for from \$1,500 to \$2,500 a year, and you can buy a business front for less money in Montreal than right here.

"Notice the banks! Winnipeg is one of the financial centres of Canada. It has thirteen bank buildings, the most of them branches of the great banks of Canada. They do a big business, and they will compare in their appointments with almost any banks of our country. The clearings last week were about \$10,000,000. This is just double what they were in the same week one year ago and three times as much as they were three years before.

But we fly along up the street in our automobile. The hand of the veteran Winnipegger, Fred Henbach, is on the lever, and we are going like mad. He takes us on toward the river, past the Hudson Bay Company stores and offices, by Lord Strathcona's big apartment house, and then turns to the right, and we fly past the Manitoba Club and on into the principal residence section. The streets are still wide, but they wind this way and that along the Assiniboine River. Boulevards have been laid out on both sides of the stream in such a way that every residence has a back yard running down to the water. There are miles of fine houses in this part of Winnipeg, and other miles have been laid out farther on. Nearly all the houses are new, and the largest and best of them seem to have sprung up, like the palace of Aladdin, in the space of a night. The chief building materials are white brick and a cream-colored stone which is found near by. The city, in fact, is a white city, and under the bright sunshine, which the Winnipeggers say exists here for thirteen months or more every year, it looks as neat as a pin.

Leaving the boulevards we ride through street after street of brand new cottages, the homes of the well-to-do and poorer classes of the city. We see, strange to say, no signs of "To Let" and very few "For Sale." Winnipeg has almost no tenement buildings, and so far as I have seen no two-story flats. Indeed, it is almost impossible to rent a dwelling at a reasonable rate, and nearly every family is forced to own its house.

GREAT RAILROAD YARDS.

In North Winnipeg, beyond the overhead bridge, which crosses the railroad track, hundreds of neat one and two-story cottages are now going up, and they are occupied or sold as fast as they are built.

Standing on the bridge over the tracks we are in the centre of the largest railroad yard of the world belonging to a single trunk line. At least the Winnipeggers say so. There are 110 miles of track covering acres about us, and at this time they are filled with cars carrying the wheat to the great elevators at Fort William and Port Arthur, in order that it may be taken down the lakes as soon as navigation opens. During the season a wheat train goes out of this yard every hour of the day and night, and altogether a half-million bushels of wheat leave here for Fort William every twenty-four hours. Five bushels of wheat will make all the flour a man eats the year around, so that, every day, enough wheat goes over these tracks to feed 100,000 men for one year.

I like these Winnipeggers. They are so pushing, strenuous, enthusiastic and happy. They claim their city has the best climate on earth, and they would not exchange the biting winds of the prairie for the kissing zephyrs of New York, Boston or Washington. They prepare for the season. Just now every Winnipegger, who can afford it, has on a gray overcoat made of coon skins. The fur is long, and it stands out like bristles. This doubles the size of the wearer. It makes him look at least a foot broader, and, as it is long, at least six inches taller. He adds to his height by a fur cap which can be pulled down over the ears. This makes him still taller.

BALL AT SANDRINGHAM

HIS MAJESTY THE KING IS FOND OF DANCING.

Enjoyable Royal Dances Are Given At His Favorite Home in Norfolk.

"The young Prince," wrote a New York Herald reporter forty-five years ago when describing a ball given in His Royal Highness's honor at Halifax, Nova Scotia, "is a capital waltzer and a very entertaining partner. He rests his partner frequently and fills up the interval with cheerful conversation and remarks about the company"; and there is living to-day in Newfoundland, Canada, and the States many a buxom, elderly lady—grandmothers, most of them—whose proudest memory is of the hour when her waist, then slim enough, was encircled by the arm of the handsome young Prince who is our Sovereign to-day.

King Edward's days as a waltzer are practically over, and he is now resigned to the passive role of an interested looker-on; but he still retains all his old love of a dance, and is seldom happier than when he sees his neighbors, servants, and tenants thoroughly enjoying themselves "on the light fantastic toe." It is only a week or two since he gave a ball at Balmoral to his servants, tenants, and gillies, and a right merry evening they had in the genial presence of their Royal host.

THE SCENE OF THE DANCE

was the castle ballroom, with its draperies of Royal Stuart tartan and its heads of stags shot by various members of the Royal Family. When the King, in the company of the Duke and Duchess of Connaught and their children, had taken his seat, the clansmen filed into the ballroom, and, after marching several times round it to the inspiring strains of four pipers, they danced a Highland reel, while His Majesty himself took part in the next dance, a set of Edinburgh quadrilles.

In Norfolk, more than at Balmoral even, King Edward can escape from the state and ceremonial of his high position and can play the part of a country gentleman, beloved alike by his neighbors, his tenants, and servants, to all of whom he can offer a gracious and informal hospitality. For many years the King has signalized his residence among his Norfolk friends by giving three balls—one to the great people of the country, another to his tenants and the local gentry and professional people, and the third to his servants; and it is difficult to say which ball is more eagerly looked forward to or more thoroughly enjoyed.

At one time these dances were given in the entrance-hall, but these quarters were found too cramped for the hundreds of dancers, and the King, in order that his guests might have ample room for their girations, had a wing especially built, containing

A SPACIOUS BALLOOM

with a suite of smaller rooms adjoining. The ballroom is strikingly handsome, with its rich and tasteful decoration, its walls adorned with trophies brought from India, and its magnificent marble fireplace. At one end is the musicians' gallery, facing, at the other end of the room, an enormous bay-window, while the floor of oak, with its marvellous smoothness and high polish, is, as a certain young Norfolk lady declared, "too glorious for anything."

The advent of one of the King's dances at Sandringham is a time of great excitement and delightful anticipation throughout Norfolk, for the King's invitations are scattered with a lavish hand from one end of his favorite county to the other, and on the night of the ball there is not a bed to be had "for love or money" in Lynn. Through the long avenue leading to the gates of Sandringham House, hung with countless colored

BRITAIN'S NEW PREMIER

SIR HENRY CAMPBELL-BANNERMAN'S RECORD.

He is Entitled on Services to the Prominent Position He Now Holds.

In spite of his somewhat pronounced Liberalism, his adherence to Home Rule, and the countenance which extended during the South African war to the pro-Boer section of his party, Sir Henry Campbell-Bannerman has never been unpopular among the Conservatives at Westminster, says a writer in the London Standard. (Con.) His cheery manner, his genuine kindness, and a considerable fund of dry humor, which occasionally, though too rarely, shows itself in his public speeches, make him a pleasant companion. He is moreover, a hospitable man, and an excellent judge of cookery. Without any pretensions to learning or wide reading, he is a well-informed, clever conversationalist, and versed in the light literature of France as well as of England.

HIS ADVANCEMENT.

From the beginning of his career in Parliament he was marked out for advancement, though his warmest friends could scarcely have predicted that he would become Prime Minister, or even leader, of the House of Commons. He seemed destined, rather to figure among the highly-esteemed but distinctly second-rate politicians whose claims to Cabinet rank are recognized on condition that, when the time comes for younger men to press forward, they will uncomplainingly retire—either with or without a peerage. Twice he served as Financial Secretary to the War Office (1871-4 and 1880-2). From 1882 to 1884 he was Secretary to the Admiralty, and in the latter year he consented, at a troublesome period, to become Chief Secretary for Ireland. In all these offices—even in the last—he acquired a reputation for tact, businesslike capacity, and a certain amount of Parliamentary address.

THE CORDITE VOTE.

It was natural that when Mr. Gladstone formed his new Ministry in 1886 an important department should be entrusted to a loyal and capable follower. Sir Henry was Secretary of State for War for a few months in 1886, and again from 1892 to 1895. On both occasions he won the good opinion of the permanent staff. Certainly he is not one of those administrators who make themselves disliked by restless energy and reforming zeal. It was, perhaps, the reluctance of Mr. Gladstone's and Lord Rosebery's Governments to spend money on the army estimates that led to the famous exposure as to the cordite and to their defeat in the issue of Commons. There is no doubt that when they went out the military stores had been allowed to sink to a dangerously low quantity.

AFTER THE SPEAKERSHIP.

It should be mentioned that, so far from Sir Henry having anticipated ten years ago that he would reach his present exalted position, he was anxious on the retirement of Mr. Speaker Peel, to succeed him in the chair, and it was only at the earnest intercession of his colleagues, who were already unwilling to face any of the dilemmas of reconstruction, that he gave up what was then his highest ambition. It was, perhaps by way of compensation for this considerable act of self-sacrifice that he was created G. C. B.

The withdrawal of Lord Rosebery from the leadership of the party, and the subsequent retirement of Sir William Harcourt and Mr. John Morley from active work in the House of Commons, left the field clear for Sir Henry. Undoubtedly he has worked hard for his party, and is entitled on his services, to the high reward now bestowed upon

St. Paul combined." "Look at those wholesale buildings," he continues. "Did you ever see anything like it? Most of them started as two and three-story structures, and the business has grown so that they have had to be pushed up to six. This is one of the great markets of western North America, and the biggest market north of your boundary. If you had a pair of long-distance glasses, which would enable you to look from the Atlantic to the Pacific, you could see that there is nothing in the West that can approach Winnipeg, and your eye would travel eastward as far as Toronto before any city of this class could be seen."

AT EDGE OF BIG WHEAT BELT.

"If you could look up and down the great West with an X-ray attachment which would enable you to pierce through the snow down in the soil, you would know that you are at the eastern end of the greatest wheat country on earth. Away out there are 250,000,000 acres of land which will grow bread with little more than scratching the ground. We have cultivated as yet but a few garden patches here and there over it, and our crop last year was about 100,000,000 bushels. When it is all under cultivation it will yield food to a billion. We shall then need John Bull. Yes, we shall even fill Uncle Sam's stomach and the crop will go through Winnipeg."

"Don't you think it is getting a little cold?" at this point I timidly said.

"Well, perhaps so," was the reply, but when I begin talking about Winnipeg I grow so warm that I could stand naked on the north pole and not feel uncomfortable."

Thereupon we turned again to look at the city.

Winnipeg lies on a plain at the eastern edge of the wheat belt. The country about it is flat. The Red River of the North winds its way through the city, and here flows in and joins the Assiniboine. The houses of the city are spread out like those of St. Petersburg, and, like Washington, it has magnificent distances. The main streets are 132 feet wide, and they stretch on and out into the country. Every residence has a yard about it, and nearly all have gardens and trees. Even the dwellings of the laborers stand alone. They have windows on all sides, and in most cases the windows are double, to withstand the cold. The business blocks, as in all new cities, are ragged. The sky line goes up and down like the teeth of a battered saw, now and then a building rising high over the others. The skyscrapers are just beginning to come. The Union Bank, from which I make this description, is the first, but there will be others next year, and in time the place will look much like an American metropolis.

The biggest land companies were started with United States capital and some of the railroad land grants are handled by them. In the meantime there has been a large influx of population from eastern Canada, together with some from Great Britain. The most of the life blood of the city, however, is American and Canadian, and the two flow along together in one harmonious stream. Both seem to have implicit faith in the future of the city, and, indeed, the indications are that their faith is well founded.

"But let us go down and have a cup of beef tea," said the Winnipegger, "and we shall then take a ride through the city in an automobile."

Beef tea is more common than whisky as a winter drink here. It is served at all the saloons and hotels, and one can have it on tap. Indeed, it takes the place of soda water from December till May.

Having finished our tea, we rode through the main street of the city. This was one of the old Indian trails, which ran north and south, following the course of the Red River, past the Hudson Bay fort which was once stationed here. Portage avenue, which we saw from the roof, cuts it almost at right angles. It is also part of an old Indian trail, which extended from here a thousand miles westward to Edmonton, a town now reached by three great railroad systems.

REAL ESTATE GOES UP.

Main street has many old buildings.

It makes him look at least a foot broader, and, as it is long, at least six inches taller. He adds to his height by a fur cap which can be pulled down over the ears. This makes him still bigger. Indeed, the town just now is peopled with furry giants, who are breathing out smoke, for the frost congeals the air from their nostrils, so that it rises like the vapor of an incipient volcano. The women here also dress in furs. Their cheeks are blushing under Jack Frost's amorous kisses, and the ozone of the atmosphere paints their eyes bright. They look too sweet to be the wives and daughters of the giants beside them, but we doubt not the fact when they begin to talk about great Winnipeg.

GATEWAY OF NEW CANADA.

Winnipeg is at the gateway of the New Canada. The tens of thousands of immigrants who are now arriving come through here, and one sees on the streets natives from every region of Christendom. There are Germans, Austrians, Greeks, Swedes and Norwegians, many of them dressed in the costumes of the land from which they have come. Now and then one sees an Englishman, and it is hard to throw a stone without striking an American. At the same time, the most of the population is made up of Anglo-Saxon Canadians, and altogether they look not unlike those to be seen in St. Paul or Chicago.

On one side of the Red River, reached by a bridge, is the town of St. Boniface, where there are several thousand French Canadians, and there are also Russians, Jews, Italians and Syrians.

Some distance from here, on the shore of Lake Winnipeg, is a colony of Icelanders, many of whom have moved into the city. Some of them are lawyers, others are teachers, and not a few have intermarried with the Canadians.

These Icelanders were among the first of the western Canadian immigrants. They were brought here years ago when it was thought that none but those accustomed to the cold of the arctic zone could withstand the weather. The Dominion Government sent commissioners to Iceland, and they brought back a colony of 15,000 or 20,000 souls, and shipped them out to Lake Winnipeg. The Icelanders settled on its banks, and for a time made most of their living by fishing, much of their catch being through holes in the ice in the winter. They are now well scattered over the country. Many of the girls have gone into service and not a few are waiters at the hotels. These people are orderly. They take to education and religion, the largest Icelandic church in the world being in Winnipeg.

There are also many Russians here, and a Russian church. The Catholic population is large. The French Canadians all belonging to that denomination. There is a Trappist monastery outside the city, and a Trappist nunnery. Almost every denomination of Protestants has its meeting-houses, the Jews have a synagogue, the Salvation Army is waging its warfare against dissipation and sin, and the Y.M.C.A. has its own building and is doing excellent work. Indeed, the whole city worships the Lord under one religion or another. It is a God-fearing, order-loving, Sabbath-observing and church-going municipality. It is so good that there are no Sunday newspapers. The street cars are not allowed to run on the Sabbath, and the only public places open are the hotels and the churches.

BIG GUNS ON NEW CRUISERS.

The armored cruisers which are being built at Clydebank, Fairfield and Elswick for the British Government will be the most powerfully armed in the world. They will each carry four 12-inch and ten 9.2-inch guns. It may be doubted whether such a gun power can be accommodated on a displacement of, say, 16,000 tons, but the recent development of the battleship goes to show that it is quite possible. It is a great achievement for Sir Philip Watts to give an armored cruiser with the Lord Nelson's armament on a displacement of less than that of the battleship.

the other, and on the night of the ball there is not a bed to be had "for love or money" in Lynn. Through the long avenue leading to the gates of Sandringham House, hung with countless colored lanterns, the procession of carriages bringing His Majesty's guests seems endless, and before ten o'clock hundreds of guests are thronging the approach to the ballroom, including some of the prettiest girls to be found between Land's End and John o' Groat's. At the signal which announces the approach of their Majesties a hush comes over the laughing, chattering crowd; they fall back and form an avenue through which the King and Queen, with the members of the house-party, file in informal procession, their Majesties bowing and smiling gracious greetings as they advance, while from the gallery come the strains of

THE NATIONAL ANTHEM.

The ball opens in stately form with a quadrille in which only the royal personages and the most important of their guests take part, to the admiration, and no doubt envy, of the hundreds of on-lookers, who are quite content to have such a splendid opportunity of seeing these great people disport themselves at such close quarters. When the quadrille is over the Queen takes her seat in the alcove facing the musicians, where for the remainder of the evening she chats brightly with her friends as she watches the dancers, and invites one after another of her courtly guests to her side for a friendly conversation.

And now the real fun begins; dance follows dance in quick succession, faces grow flushed with exercise and happiness, and hundreds of feet keep merry pace with the music from the gallery. At one o'clock supper is served at small, dainty tables among the towering palms and ferns in the conservatory, while footmen, gorgeous in Royal liveries, dance attendance on the hungry guests. Then follow more dances, the fun growing unrestrained in the Highland schottische, while the King, though not dancing, beams encouragement and geniality everywhere—until at length he retires with the Queen, and the happy, tired crowd disperse to their hotels and homes.

ONE OF "SIX HUNDRED."

Death of Another Survivor of the Immortal Brigade.

The death took place recently of Sergeant-Major J. I. Nunnerley, of the 17th Lancers ("Death or Glory Boys"), at his residence, Inkerman Lodge, Greethy Hill, Ormskirk. Deceased, who was one of the "six hundred," was in his 75th year, and has been in failing health for some time. He was born at Wilderspool, and was the seventh son of Richard Nunnerley, who died in 1870 at the age of 80 years.

In 1854 he was ordered by the regiment to the Crimea, where he took part in the most famous battles, including Balaklava. Alma, McKenzie's Farm, the bulging of Balaklava fort and harbor, the Balaklava charge, Inkerman, Tchernaya River, and the whole of the siege and taking of Sebastopol.

In his description of the charge of the Light Brigade, the late sergeant-major said he was in the first line of the right squadron of his regiment. He saw Captain Nolan ride up to Lord Cardigan, and after giving his lordship the order, proceeded to Captain Morris, then commanding the 17th Lancers, to whom he said, "Now, Morris, for a bit of fun." Scarcely had he uttered the words when he was shot. They had not proceeded far before the men in the left division of the sergeant-major's squadron were nearly all cut down, and Mr. Nunnerley was not without his hair-breadth escapes, for he was within a few yards of the Russian guns when his horse was shot under him and he fell on its head. He performed many daring feats whilst on foot, and ultimately caught a horse belonging to the 18th Hussars, which he mounted and then joined his regiment.

The largest room in the world is the room for self-improvement.

nam Harcourt and Mr. John Morley from active work in the House of Commons, left the field clear for Sir Henry. Undoubtedly he has worked hard for his party, and is entitled on his services, to the high reward now bestowed upon him. Whether his leadership can be permanent, or whether it will be advantageous, even during a brief period, for his party, are questions that we need not now discuss. Nor will we go over what we regard as his very compromising and unfortunate record as to South African affairs.

RELATIONS WITH ROSEBERY.

Probably it was no fault of his that he was forced into rivalry with Lord Rosebery, who, after withdrawing, broke up the party—so the Radical group contend—by founding the school of Liberal Imperialists and setting up a definite organization, the Liberal League, which, in regard to foreign affairs and also as to Ireland, pursued a policy which was not the policy of either of the left wing of the party or of its accepted leader. These, again, are points that need not be discussed on this occasion. The quarrel which had seemed to be appeased before Sir Henry's speech at Stirling and Lord Rosebery's reply at Bodmin had not died away—it only slumbered. And it is said that Sir Henry, though he has paid generous tributes to Lord Rosebery's great abilities, did not altogether relish his recent reference to him as an "old friend." Personally, we believe there was no animosity. But the difference in their points of view in regard to all Imperial questions is absolutely fundamental.

SPEAKS FROM NOTES.

When Sir Henry chooses to make an effort he can deliver a forcible and humorous speech. But he indulges at times in an excessive use of gesture, and the effect of his utterances is much diminished by the fact that they are, as a rule, read word for word from a paper. It is a habit which he must abandon if he wishes to attain any success as leader of the House of Commons.

HIGH-TONED THIEVES.

Discovery of a Remarkable Gang in Paris, France.

A gang of fifteen burglars, who lived in great luxury in a house in its own grounds in St. Maur, Paris, France, has been captured by the police. They owned three motor cars, victorials, trroughmans, buggies and a couple of smart American trolleys. The furnishings of the house were most elaborate, through erring slightly on the side of ornate. The cuisine was admirable, an accomplished chef being kept at a large salary. The wines were irreproachable.

Everything in the house was the proceeds of robberies, and besides the articles in use, enormous quantities of stolen property were packed away. An adjoining building was also used for the stolen articles.

Nearly \$50,000 worth of property has already been found, and the examination of the place is not nearly concluded.

The thieves went out on their foraging expeditions in their motor cars, which they used to convey back the stolen goods. Their specialty was stealing from parcel delivery vans and pantheleons and in removing the furniture from houses into which new tenants had not yet entered.

Their leaders were an ex-police sergeant and a barrister, who had been convicted of malpractice.

One leader was caught entering his motor car, is accomplices dashed off in another car, but they were followed by a policeman on a motor cycle, who traced them to St. Manr. He brought a strong force of police, who surrounded the place and captured the entire gang.

NOT ON THE PLATFORM.

"Gents," said the trolley car conductor, "you mustn't stand on the back platform. Yer breakin' the rules." "Some of 'em ain't," piped up the little man; "they're standin' on my feet."

A FEW RICH BACHELORS

MILLIONAIRES WHO ARE LOOKING FOR WIVES.

Between Them They Are Worth Two Hundred and Fifty Million Dollars.

It has recently been proposed that those members of Uncle Sam's millionaire family who persistently remain bachelors shall be taxed at the rate of 3 per cent. on their annual incomes, and should this proposition become law then more than one American would at the present time be paying \$125,000 a year to the State, says London Tit-Bits. But as no such tax is ever likely to be imposed in the "Land of the Free," the millionaire and multi-millionaire bachelors continue to laugh at those matrimonially inclined, young (and elderly) ladies who seek to lure them to the altar. There is, indeed, many a millionaire in the States to-day who is looking for the right kind of a wife, and who is quite willing and even desirous to marry her just as soon as she comes along.

First of all there is James Hazen Hyde, who is reported to be worth \$25000,000, and who has openly declared that he has still to meet the girl with the power to make his heart beat above the normal. Mr. Hyde, as everyone knows, was vice-president of the Equitable Life Insurance Society, but recently resigned owing to "unpleasantness" with the board. He is only twenty-nine years of age.

TALL, DARK, AND HANDSOME,

and no nearer taking a wife to-day than he was ten years ago. He is devoted to French literature, and last winter gave a princely entertainment in honor of Mme. Gabrielle Rejane which was computed to have cost \$100,000. He has all his clothes made in Paris, and has so much adopted the French customs and fashions that he is constantly being taken for a Parisian. Recently he was created a Chevalier of the Legion of Honor, and he is prouder of this distinction than of all his millions put together. Indeed, so infatuated is he with everything French that it is generally believed he will eventually choose a wife from the country he so openly admires.

Then there is Mr. Marcellus Hartley Dodge, who is reputed to equal Mr. Hyde in point of wealth, although he is six years his junior. Mr. Dodge only recently graduated from Columbia University to take over the business of his grandfather—a wholesale house dealing in sporting goods. Mr. Dodge is a hard worker and gets down to his office every morning before eight and never leaves his desk until the clock has struck the hour of six. He is a splendid boxer, and fond of all sorts of outdoor sport, though his pursuit of these pleasures has lately been somewhat sacrificed to the more fascinating pastime of doubling his millions. He is quite fancy free, and there is, therefore, an open field. He has one extravagance only, and that is in the matter of dress. He never grudges the paying of his tailor's bills, and so it is more than likely that the girl he eventually marries will have a free hand

IN THE MATTER OF FROCKS.

Another thing on which Mr. Dodge spends freely, is books, and he is believed to have one of the finest libraries in New York. He has declared on more than one occasion that he is by no means averse to matrimony, and when the right girl comes along he will gladly lead her to the altar.

Mr. Robert Walton Goellet, though a very handsome man, is not so well gilded as Mr. Dodge; in fact, by the side of some of his acquaintances he might be said to be almost on the verge of poverty, being possessed of no more than a paltry \$10,000,000. But Robert has "expectations," and when his mother dies, which he hopes will not be until he is an old man, he will come in for another \$30,000,000, which ought to put him front on his feet. He is generally

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way.

To appreciate the simplicity and ease of washing with Sunlight Soap in the Sunlight way you should follow directions.

After rubbing on the soap, roll up each piece, immerse in the water, and go away.

Sunlight Soap

will do its work in thirty to sixty minutes. Your clothes will be cleaner and whiter than if washed in the old-fashioned way with boiler and hard rubbing. Equally good with hard or soft water.

Lever Brothers Limited, Toronto

TO CHECK TUBERCULOSIS FROM BONNIE SCOTLAND CANADA'S SEA HARVEST

FRENCH EXPERIMENTS TO RENDER CATTLE IMMUNE.

Dr. Behring's Vaccine Being Tested on Animals With Good Results.

Details are being published in Paris of the experiments at Melun with the bovine vaccine of Prof. Behring, writes the Paris correspondent of the London Standard. At the recent Congress of Tuberculosis, Prof. Behring said that he believed himself able to cure tuberculosis in animals, and that he hoped it would not be long before he could cure it in human beings. There seems to be a great deal of confusion as to whether or not the experiments at Melun confirm Prof. Behring's statement. So far the experiments had to do with rendering cattle immune from tuberculosis, not with curing those which are already affected. A vaccine was used, not a serum.

TESTED ON CATTLE.

The work was done by M. Vallee Professor of the Veterinary School of Alfort. In a statement to the Matin, M. Vallee says that the effect of the vaccine lasts about two years. As the life of cattle averages about six years, it would be necessary to vaccinate them two or three times during their life. But, of course, it is possible that the period of influence has been over-estimated, just as in South Africa it was found that the effects of inoculation against enteric fever did not last so long as was at first supposed. If cattle could be rendered immune, the gain to French agriculture alone, as Professor Vallee pointed out, would be enormous. The loss through the death of tubercular animals in France is about £1,200,000 every year. Then there is the danger of human beings through tubercular milk. In the dairies which supply Paris, about 45 per cent. of the cows are said to be tubercular. Even the milk given out by the Assistance Publique is not in any way guaranteed.

IMMUNITY IS PROVED.

The bovine vaccine is composed of human bacilli, and is dangerous to handle. Through a slight wound it could convey the disease into the human body. It is now said that M. Roux, the director of the Pasteur Institute, and M. Vallee have discovered a vaccine composed of bacilli taken from horses, which is harmless to human beings, and that it is as effectual as that of Professor Behring, and lasts quite as long in its effects. Forty cows were experimented on at Melun. Some vaccinated and others not vaccinated were placed in contact with cows suffering from tuber-

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What Is Going on in the Highlands and Lowlands of Auld Scotia.

Mr. James Young, Sheriff Clerk Deputy, Lanark, is dead.

Mr. George Amos, of Hamilton, a Crimean veteran, has died.

A new police office is to be built at Dalmar at a cost of £2,000.

The Rev. J. W. Shannon, Hawick, has been elected minister of Gilmore Place U. F. church, Edinburgh.

Brevet-Major J. E. Ignatius Master-son, V.C., has been appointed recruiting staff officer at Glasgow.

One of the oldest agriculturists in Wigtownshire, Mr. Alexander Stewart, has passed away at the age of 86.

Mrs. Mason, late of Mill of Cammie, Strachan, near Banchoy, has died in Aberdeen at the age of 99 years. Deceased was a native of Strachan.

General satisfaction is felt in Dumfries at the honor which has been conferred on the burghs by the elevation of Sir Robert Reid to the Woolsack.

Mr. Andrew Dougall, who was long manager and secretary of the Highland Railway Company, has died at his London residence. Mr. Dougall resigned office just ten years ago.

Inverness proposes to fix a voluntary assessment of 4d. per £1 on houses of a rentable value of £10 and upwards in order to provide funds to oppose the northern railway combine.

The finest Scotch fir in the country is one which was planted in 1700 to commemorate the Union of the Crowns. It stands in the grounds of old Auchendrane, has a girth of 10 feet 3 1/4 inches, a height of 87 feet, and is still flourishing.

In the annual report of the Scottish Rifle Association pleasure is expressed that the increasing enthusiasm for rifle shooting should have produced a total entry of 3,800 for last year's competitions. Africa sent seven of these, Canada four, New Zealand two, and India one.

The Rev. D. J. Macdonald, Killeen, has attained his semi-jubilee as an ordained minister. Kintyre Presbytery extended their congratulations, and Mr. Macdonald's former assistants resident in Scotland, fourteen in number, are presenting him with a tangible token of their esteem.

Aberdeen students have decided to raise a bill of suspension in the recent conviction of a student for throwing a bag of pease meal and breaking a window in a tramcar in Union street. The students are determined to leave no

THE SALMON FISHERY OF BRITISH COLUMBIA

Fish by the Million in the Rivers -- Business of Catching the Fish.

While we are congratulating ourselves upon the size of the western harvest, we must not forget that Canada's wealth is not drawn exclusively from the soil. The sea gives us a mighty contribution to our support. It is through the cod, the lobster, the mackerel and the salmon that we derive the larger degree of profit. The yield from the fisheries, however, varies according to the run of fish, and especially in this case as regards salmon.

THE MULTIFARIOUS SOCKEYES.

One year in every four years the rivers of British Columbia are crowded with the luscious "sockeyes." For three years the visitors are few, but on the fourth the rush is so tremendous as to be unbelievable by those who have not witnessed it. The phenomenon is one of the curiosities of natural history.

It is a marvelous instinct—that which impels the fish to move away and to return to the spot which they have left, four years after their emigration. Last year was the year of the great salmon run. From July 1, when fishing commenced, until the beginning of September, the activity at the river mouths and in the canneries was unprecedented and the yield was enormous. Of canned salmon the supply will be very great. The business of catching the fish and of doing them down is one of the most interesting of the western operations. In catching some six thousand men are employed. The fishermen sail out to the mouth of the Fraser in what we should call mackinaws, and spread their nets, some of them of great length, across the likely routes. These nets are of the proper size to catch by the gill the larger fish, and to let the smaller pass through on their journey up the river. When the net is hauled up it is a mass of shining, wriggling creatures, all of them good, fat healthy salmon.

AT THE CANNERY.

The scene at the cannery is one of marked activity. As the fish arrive they are cast at once upon the wharf, and are passed to the fish handlers—Chinamen—who behead and clean them. Then they move on to the next process, in which they are cut to the proper size to fill a can. When thus treated the empty cans, in procession, move along a bench, and the workmen deposit a section of a salmon in each one as it passes. The filled cans glide to the next process, the laying on of covers by

poverty, being possessed of no more than a paltry \$10,000,000. But Robert has "expectations," and when his mother dies, which he hopes will not be until he is an old man, he will come in for another \$30,000,000, which ought to put him firmly on his feet. He is generally credited with never having done a day's work in his life, and is said to be imbued with a strong determination to uphold his reputation. Mr. Golet is not yet thirty.

Among the older bachelor millionaires Mr. Augustus Heinze figures prominently, for he is known to be worth \$30,000,000, with the probability of doubling that amount in ten years. Mr. Heinze is a fine-looking man, clean-shaven, over six feet in height, and possessed of perfect health. Some years ago, when he acknowledged to being worth \$10,000,000, a kind friend said he ought to retire, but Mr. Heinze, with a horrified expression, exclaimed, "Why, I've made up my mind to become rich, and how can I do it if I stop now?" Of course, such an argument was unanswerable. Mr. Heinze is

NOT AN AMERICAN.

but a German, and has made most of his money in copper. He was once offered \$15,000,000 for one of his mines, which he declined, declaring that he would not accept double that sum for it. He takes a great interest in politics and athletics, but says he hasn't the time just at present to think of getting married.

Mr. James Henry Smith and Mr. Eugene Higgins are alike in two particulars—they are both worth \$50,000,000, and they are both bachelors. Mr. Smith is fifty years of age and has spent most of his half century in New York. He has seldom been seen to smile and talks but rarely. Indeed, so averse is he to helping the conversation along that he is generally known as "Silent Jim," a name which rather pleases him. "Any fool can talk," he is reported to have said when taxed with his lack of conversational power, "but it takes a wise man to hold his tongue," from which it will be inferred that Mr. Smith is something of a philosopher. Five years ago Mr. Smith was only worth \$1,000,000, which he had made entirely by his own efforts, but soon after accomplishing this his considerate uncle died and left him the bulk of \$50,000,000, which, of course, rather improved

HIS FINANCIAL STANDING.

Mr. Smith is something of a connoisseur, and possesses a magnificent collection of works of art.

Mr. Higgins, who is Mr. Smith's equal in wealth, is thirteen years his junior, and therefore somewhat more popular with the fair sex. Though a bachelor he has no intention of remaining so for the rest of his natural life, but confesses that at present he finds more pleasure in yachting than in hunting for a wife. He owns one of the most magnificent steam yachts afloat—the Varuna—and when aboard he is almost as despot as the German Emperor. He has a set of rules which are as stringent as those on a battleship, and any one of his guests who infringes them usually looks in vain for a second invitation. He is by no means "close," but spends his money freely and gives lavish entertainments to his friends. All things considered, Mr. Higgins possesses most of the attributes necessary to make his wife perfectly happy.

SHORT-SIGHTED ANIMALS.

So far as naturalists have been able to ascertain, there is no such thing as short-sight among animals in a state of nature. In the case, however, of domestic animals and wild ones I confine myself, short-sight is by no means unknown. Many people who have kept dogs and cats will remember instances of pets which were unable to distinguish friends from strangers at a short distance. Horses, too, frequently suffer from short-sight and other derangements of the vision, and this kind of thing is sometimes met with in the case of cattle. The diseases of the eye which frequently affect wild animals in captivity are to be chiefly attributed to the narrow space in which they are confined. The eyes are never exercised upon distant objects, and therefore lose the powers which use of this kind calls forth.

which is harmless to human beings, and that it as effectual as that of Professor Behring, and lasts quite as long in its effects. Forty cows were experimented on at Melun. Some vaccinated and others not vaccinated were placed in contact with cows suffering from tuberculosis. In every case the vaccinated cows remained immune, but the others took the disease. Further experiments were made by injecting the disease into vaccinated and non-vaccinated animals. The non-vaccinated animals died in about thirty days. Some of the vaccinated animals, all of which had remained unharmed, were killed, and the autopsy showed that there was no lesion.

RESULTS OBTAINED.

It was these autopsies that a great number of men of science attended a few days ago. A representative of the Liberte has been told at the Pasteur Institute that it was hoped that a means of making human beings immune from tuberculosis would be discovered very soon. Although, as I have said, the experiments, in spite of a great many false reports here, are not with a serum such as that of which Professor Behring spoke at the Congress, it is felt that they are opening up most important ground from every point of view.

PERPETUAL MOTION.

Patents Granted Cranks in England for Unworkable Schemes.

Perpetual-motion cranks have a free field in England. Though the United States Government has long refused to issue patents on ideas involving perpetual-motion principles, England still continues to grant licenses to all comers willing to pay for patent papers. Even as late as last year perpetual-motion inventions were patented, while in 1901, thirteen perpetual-motion machines testified that certain persons have faith in the possibility of the scheme. Some of these inventors were men of serious minds—not cranks, or lunatics—and much of their time, and considerable of their money, have gone in developing their pet theories.

One of the most recent devices—if made to work—would simply revolutionize the automobile and motor-cycle business, doing away with petrol, electricity and other sources of energy. In a word, the idea is this: The weight of the rider on the saddle of a motor cycle, or, in fact, of anyone on the seat of a motor-car, drives water into a hollow bar, which, in turn, forces the water onto turbines placed in the gearing. When the wheels of the motor go round, they pump the water back into the hollow bar—and there you have perpetual motion in a nutshell, or rather, in a hollow bar. A cycle built on this principle could easily go around the world without stopping, once the initial impetus of sitting down was given, declares the inventor. So confident is he in the feasibility of his machine that he has provided a brake to stop the motor when necessary. Left to itself it would—in principle, at least, "run on forever," like the brook.

Certain inventors propose to use the weight of railway carriages to compress sufficient air to drive them; while another plan on the same lines is to make cycle tires in such a way that the air in them will drive a motor, while the motor drives the cycle.

A number of English patents has recently been issued on the water-wheel and pump idea, which is extremely simple: A wheel with buckets is started from a tank, and as it goes around it pumps water back into the tank—and once started, the thing goes on forever.

The power of magnetism is used in several modern perpetual-motion schemes, and electricity, steam, gravity, heat, light and other physical forces are combined in highly ingenious pieces of mechanism, which look to the man on the street, extremely plausible. With radium staring science in the face and apparently upsetting both the atomic theory and the law of the conservation of energy, it looks as if the perpetual motorists were going to have a show all to themselves. Disappointed candidates for patents at Washington have only to go to England to be given a hearing, if not a patent—or, perhaps, both.

presenting him with a tangible token of their esteem.

Aberdeen students have decided to raise a bill of suspension in the recent conviction of a student for throwing a bag of peas and breaking a window in a tramcar in Union street. The students are determined to leave no stone unturned in order to conserve their valued privilege of making themselves an occasional nuisance.

Greenock Harbor Trust have made a claim against the Glasgow and South-Western Railway for £20,000 in connection with the purchase by the company of ground at Inch Green, Greenock, belonging to the Harbor Trust and the acquisition of ground by the Trust from the railway company. The matter has been awaiting settlement for twenty years.

Lord Strathcona, Glencor, has purchased for Mr. MacAlpine Downie, of about twenty-five miles, marching there with the estates of Sir John Stirling Maxwell, M. P., Sir N. Menzies, Lord Strathcona third hrdl r hrdl Lord Bradalbane, and several others. It is one of the finest grouse and deer preserves in the Highlands.

Ayrshire has just lost, by the death of Captain John Marr, one of its most prominent seafaring figures. The captain was born at Troon, in 1841, the son of one of the leading captains of the day, and at the early age of eleven went to sea with his father. After sailing for various owners, he joined the City Line in 1876, and for a quarter of a century was a valued servant of that firm. For many years he commanded the City of Bombay, and about fifteen years ago with this vessel broke the then existing "tea" record from India to this country, carrying the largest tea cargo that had up to that date been brought from Calcutta to London.

DAY OF REST FOR DOCTORS.

A Novel Scheme to Be Tried in a German City.

The closing of shops and offices throughout Sunday, which was enacted in Germany about fifteen years ago, met with general approbation. Certain classes who do not come under the law, such as pharmaceutical chemists, recently arranged for a partial closing for rest on Sunday by a voluntary agreement, and the medical profession is now joining in the movement.

At a meeting of the Frankfurt Medical Society a member pointed out that a majority of general practitioners scarcely ever had an opportunity of taking a trip to the country with their families on Sunday for fear of losing their patients. He therefore proposed that the city be mapped out into seventeen districts corresponding to the police divisions. The doctors in each district could then arrange to remain at home in turn on Sunday and attend to urgent cases. It was also proposed that the names of the medical men on Sunday duty be published in the local papers on Saturday and that they also be left in the district police stations.

In addition to this the scheme provides that one specialist of every branch will be home on Sunday for the whole town.

The practitioners on Sunday duty will be under obligation to give immediate notice to the usual medical attendant of a family of which they have been called and to refrain absolutely from any kind of after-treatment. The society unanimously agreed to the proposition and decided to introduce the scheme at Frankfurt on Jan. 14.

The Landlady—"Will you have coffee, tea or cocoa, Mr. Slopay?" Mr. Slopay—"Anything you like to call it, ma'am."

Mrs. G—"I never have any trouble with baby. I've only to sing to him and he goes off to sleep at once." Mrs. P. (gushingly)—"What a knowing child!"

Mabel (studying her lesson)—"Papa, what is the definition of volubility?" Mabel's Father—"My child, volubility is a distinguishing feature of your mother when, on account of urgent business affairs, I don't happen to reach home until after two o'clock in the morning."

Then they move on to the next process, in which they are cut to the proper size to fill a can. When thus treated the empty cans, in procession, move along a bench, and the workmen deposit a section of a salmon in each one as it passes. The filled cans glide to the next process, the laying on of covers by machine. Automatically, the can travels toward the soldering table. Then it tilts on to its side, and the cover runs through a steam of solder. This seals the fish hermetically. Boiling follows, and when the cans are cool the fish is ready for the market. A salmon can be carried through all the processes from the wharf to the canned article, in about five minutes. During the season 40 canneries work night and day.

VALUE OF THE INDUSTRY.

The value of the industry changes with the run. In some years the cash yield is not very great. In others it is large. In 1893 the canned salmon exported was worth \$870,378. There came a big salmon run in 1897, and the figures for that year reached \$3,430,000. Then there was a drop to an annual product of a million or less. In 1891 the big run again occurred, and the result was an export trade of \$5,012,000. For the succeeding years the catch has been small. But in 1905 is the quadrennial immigration of salmon, and large figures are looked for. Nature has hitherto attended to the supply of the fish. The growing catch, however, has rather frustrated the efforts in that direction. As a consequence, our Fishery Department has taken up the problem, and for seven years fish hatcheries have been in operation on the Fraser River.

SALMON HATCHERIES.

The hatcheries are protected by dams approached by a weir. Here, a month ago, a strange scene was witnessed. The surface of the water below the weirs was disturbed by the fins and backs of thousands and thousands of sockeyes waiting the chance to pass through to the spawning grounds. On one day when the gates of a weir were opened the salmon pushed into the reserved waters at the rate of 360 a minute by actual count. The rule of the hatchery is that the salmon shall be induced to spawn in waters that are protected from fish that feed upon the fry. Here the young salmon are kept until they have reached a fair size, when they pass out by millions—20,000,000 is the figure for this year—to the sea to fatten, and to be turned either to the spawning grounds or to the canneries. It would seem that the salmon business has been brought to a science. The care that is taken to preserve it and to multiply the fish ought to make it a lasting industry, adding continually to the wealth of the country.

DIPHTHERIA TRACED TO CATS.

Much-Petted Animal likely to be Vehicle Disease.

The apparently harmless domestic cat is a source of great danger, according to the London Lancet, for two cases of diphtheria have practically been traced to children kissing and petting these animals.

The bacteriologist for the Burgh of Govan is responsible for this latest medical scare. He has issued an interesting report on the result of his investigation into the possibility of the infection of diphtheria being carried by the lower animals, especially cats.

Two cats were taken to the laboratory, where their throats were examined. Micro-organisms from the throat were cultivated on artificial media away from the body and were found to correspond in every respect to those of the human subject.

In case the animal had been in the habit of sleeping in the same bed as the patient; and in the other the child had been carrying it in her arms and kissing it, as children frequently do with domestic pets.

As both cats had been ailing before the children became affected, infection is quite likely to have been carried in this way, and it is perfectly reasonable to suppose that similar instances of undetected, or unrecognized attacks of disease among the lower animals have materially contributed to the prevalence of diphtheria.

JANUARY SHIRT SALE

SALE

If you want real Bargains in Shoes come to our **JANUARY SALE**. There are many 'snaps here for Men, Women and Children. Don't forget the sale of The J. D. King Samples there are still dozens of pairs to choose from. The tag attached to each shoe tells the price.

This is a genuine Shoe Sale of new Shoes all bought within the past year.

A public meeting is called by Mayor Lowry for Thursday evening next, January 25th, in the town hall to discuss the advisability of operating a ferry across Hay Bay. This is a matter of vital interest to our town, and a good representative meeting is requested.

OBITUARY.

AMELIA TOBEY

Beloved wife of Mr. F. W. Smith, passed away very suddenly on Wednesday afternoon. Deceased had been in poor health for a number of years and though her family knew that she would in all probability pass from them without warning, nevertheless death was a severe shock, but to deceased it must be a relief from her years of untold suffering which she bore with true Christian fortitude. Deceased leaves besides her husband, one son Mr. Harry Smith, to mourn the loss of a beloved wife and mother. The funeral will take place this afternoon.

ROBERT M. BRISCO.

It came as a shock to the citizens of Napanee, on Friday evening last when it was learned that Mr. Robt. Brisco had suddenly passed away early in the evening. Deceased was in his usual health was in Smith's grocery transacting some business, when without a moment's warning he fell and became unconscious. Assistance was at hand and deceased was taken to his home, where he expired in about an hour. The cause of his death being Bright's disease. Mr. Brisco was well-known all over the county being a life-long resident of the Township of Ernestown, until moving to Napanee a few years ago. Deceased's many warm friends in Napanee will miss him sorely his never failing good nature and genial ways having endeared him to a large circle of acquaintances. The

A Different Dye.

It used to be: one dye for silk, another for wool, yet another for cotton.

DY-O-LA is a different dye. The same package colors anything in cloth. Gives exquisite shades that the sun won't dim.

With the exception of green and purple, Dy-O-La does not stain the hands or boiler.

For doubling the usefulness of drapes, gowns and things, no dye is so easy so satisfactory, so economical as Dy-O-La.

Mrs. W. Oblesman, Ellisboro, Sash., writes:—
"Dy-O-La colors mixed goods better than any dye I ever tried."

At your druggist's 10c. Send 2 cent stamp to The Johnson-Richardson Co., Limited, Montreal, Can., for color-card—dye exactly as you'd do it at home.

PERSONALS

Mr. Garnet Tulloch returned to Ashland, Wis. on Tuesday.

Mr. Ira Brisco arrived home from Mexico on Thursday.

Miss M. J. Ross went to Toronto on Thursday.

Miss Oronyatekha and Mr. Johnson, Forester's Island, were guests of Mr. and Mrs. R. J. Dickinson, on Thursday.

Miss Ilene Slaven, Deseronto, left on Thursday to spend a month in Montreal.

Dr. Oronyatekhu, Toronto, was in town on Thursday.

Mrs. W. H. Boyle entertained a number of her friends on Tuesday eve. Mr. and Mrs. Fred Maybee, and child, Marmora, are the guests of his parents, Mr. and Mrs. Maybee.

Mr. John Sullivan, Oswego, spent a few days this week the guest of Mr. and Mrs. Will Bowen.

Miss Addie Wilson, spent Saturday and Sunday in Deseronto the guest of Miss Lulu Archer.

Mr. J. H. Allison, Conway, was a caller at our office on Monday.

Mrs. Arthur Fellows left on Thursday for Toronto.

The engagement is announced of Miss Edith Hardy, youngest daughter of Mr. J. C. Hardy, to Mr. W. H. Turnbull, Toronto.

Mr. Benson Moore, Elm Brooh, Prince Edward, was in Napanee a couple of days this week.

Mr. M. Shannon, Centerville, was a caller at our office on Thursday.

Mr. Stephen Bennett, jr., sold his brick house and about two acres of land near Napanee, on the Kingston road to Mr. James McTaggart, of Morven.

Mr. John Soby, sr., has purchased the house occupied by Mrs. E. M. Bartlett, from Mrs. Dr. Cook, Toronto.

Mr. Charles Gainsou, of Trenton, attended the Poultry Show on Wednesday in Napanee.

Mr. G. L. Mair is the guest of his daughter, Mrs. D. A. McMillan, Finch.

Rev. Emsley, left on Thursday to spend a few days in Montreal.

Mr. W. S. Herrington, of Napanee, made a trip to Kingston last Friday.

Mrs. A. E. Webb and two boys of Toronto, are spending a week at her father's home, Rev. A. MacDonald's Napanee.

Mr. S. C. Warner, Denver, Colo., arrived in Napanee on Thursday.

Mrs. J. E. Eakins, of Toronto, Mrs. A. E. Lang, of Toronto, and Mr. Wm. A. Warner, of Trenton, are in attendance at the bedside of their mother, Mrs. Sidney Warner, John street, Napanee.

Mr. John N. Hudgins, Selby, was a caller at our office on Thursday.

Mrs. Fred Wilson, Deseronto, spent this week in town the guest of Mrs. John Wilson.

MRS. C. H. WARTMAN, Pres.

EJ COATES, Sec.

Quietly Married.

A quiet wedding took place on Monday evening at the Western parsonage, when Mr. Chas. A. Walters was united in marriage to Miss Stella Wagar eldest daughter of Mr. Ephraim Wagar, South Napanee. The ceremony was performed by Rev. J. Reid in the presence of a few of the relatives of the contracting parties. On the way to church the wedding party met with a slight mishap, the carriage in which they were riding being overturned while coming down the hill in South Napanee. No one was seriously injured however.

Committed Suicide.

On Sunday afternoon Charles Wagar, a farmer living near Mink's Bridge committed suicide by shooting himself. He left the house after dinner and proceeded to the barn where he procured a shot gun and placed the muzzle of the gun to his throat and with the aid of a stick knocked at the trigger until it went off. The charge entered the windpipe and head, killing him instantly. The deceased had been in poor health for some months and very despondent, which, no doubt, was the cause of the rash act. Last fall he bought the farm where he was living, from Thomas Pybus. His relatives live at Enterprise and in that neighborhood. A widow, one son, living in Ottawa, and two daughters, at home, are heartbroken over the terrible act of their father.

Winter Sports.

THE COXALL CO.

years ago. Deceased's many warm friends in Napanee will miss him sorely his never failing good nature and genial ways having endeared him to a large circle of acquaintances. The funeral took place to S. Mary Magdalene's church, on Monday afternoon, the church being crowded with friends from Napanee and surrounding country, who came to pay their last respects to the dead, and extend their condolences to the grief stricken family.

REV. JOHN G. HOOPER.

The many friends in Napanee and vicinity, of Rev. John G. Hooper, were surprised to hear of his death at Heathcote, Huron County on Saturday. Deceased was a son the late Felix Hooper and studied law in Kingston, before entering the ministry. His mother Mrs. Hooper and sister Mrs. U. M. Wilson resides here. The remains were brought to Napanee on Monday and the funeral took place on Tuesday from S. Mary Magdalene's church, the clergy of the diocese furnishing the pall bearers. Last winter deceased spent some weeks visiting his mother and conducted services in S. Mary Magdalene church.

Dr. Albert Rockwell brother of Mr. B. S. Rockwell Napanee, passed peacefully away at Portland, Oregon, on Monday, January 8th, 1906. Deceased was a son of the late Ashel Rockwell and a graduate of Queen's University, Kingston. Deceased leaves a wife, son and two daughters to mourn his loss.

Thomas Cameron, a well-known resident of Richmond, died at the residence of his son-in-law, George Robinson, Violet, Tuesday morning, after but a few weeks illness. Deceased was fifty-nine years of age and leaves three daughters. The funeral will take place Wednesday, to the Newburgh vault. Interment will be later in the Hinch family plot.

caller at our office on Thursday.

Mrs. Fred Wilson, Deseronto, spent this week in town the guest of Mrs. John Wilson.

Mr. Will Grange, of Napanee, attended court in Toronto last Thursday.

Miss Ida B. Close, Chambers, who went to London, Eng., last summer to visit her brother, is now on the continent. She spent Christmas with her brother at "The Hague" and remained a week. She will go from there to Belgium.

Mr. Robt. Metzler, Odessa, was a caller at our office on Friday.

Mr. Harry Pringle of Winnipeg, Man., is renewing acquaintances in town.

Saturday Callers; W. C. Asseltine, Redmond, W. Bicknell, Camden East, Alex. McNeil Selby, Jas. Windover, Forest Mills, Miss Ayleworth, Sharpe's Corner, Amos Dennison, Westplain.

Mr. Jethro Card returned this week from Indian Head, Assa.

Mrs. Geo. Bateman, of Deseronto spent the week in town.

Mr. and Mrs. J. C. Howe, of Athens, are visiting at Mr. O. E. Howe's, Richmond.

Mr. W. A. Smith, Deseronto, caller at our office on Wednesday.

Mr. and Mrs. William Conger returned this week from Watertown after spending the summer there.

T. E. Merritt, recently appointed general superintendent of the branches of the Merchants Bank of Canada, has reached Montreal, from New York, and has taken up his new duties.

Mr. and Mrs. John F. Fralick and son, Whitney, Chicago, left for New York city to spend a couple of weeks. John goes to attend the annual meeting of the N.M. Sheffield Special Advertising Agency of which he is Vice-President. Mr. Fralick is an old Napanee boy.

It is with sadness that we have to report that Mrs. Sidney Warner, John street, is still in a very weak condition as a result of the paralytic stroke which she suffered on Thursday evening, January 11th, as she was entering the Town Hall to attend the M. E. church concert. Mrs. Warner's children are all with her and her only living brother, Mr. Charles E. Clark, of Ernestown, has been here this week. Although she has remained speechless since the sad occasion, she appears to recognise her friends. We express the universal sentiment in hoping that Mrs. Warner will rapidly recover and soon be able to again greet her friends.

DEATHS.

BRISCO—At Napanee, on Friday, January 12th 1906, Robert M. Brisco, aged 62 years 7 months.

CRANSTON—At Adolphustown, on Sunday, Jan. 14th 1906, Adl Cranston, aged 24 years.

SMITH—At Napanee, on Wednesday, Jan. 17th 1906, A. Amelia Tobey, beloved wife of F. W. Smith.

CAMERON—At Ernestown, on Monday, Jan. 15th 1906, Thomas Cameron, aged 59 years.

WAGAR—At North Fredericksburgh, on Sunday, Jan. 14th 1906, Chas. M. Wagar, aged 55 years.

STARR—At Victoria, in Northumberland County, on Sunday, Jan. 14 1906, the infant daughter of Charles Starr, aged 3 months. The funeral took place on Tuesday to Roblin cemetery.

What Other People Say.

"The spectacles I purchased from you are giving me perfect satisfaction." This is the testimony of those who have tested the ability of the expert optician in charge of our new optical department. Our method of correcting impaired vision is the only reliable one. When others fail come to us. You eyes tested free of charge. The Medical Hall—Fred L. Hooper.

PUBLIC AUCTION SALE AT THE CHEAPSIDE STORE

The Balance of the Armitage Stock, by Mr. E. S. LAPUM, commencing on Saturday at 10 a.m. and continuing all day until 9 p.m. Sale continued on Tuesday, commencing at 2 p.m. Continued on Thursday, commencing at 10 a.m., and continuing all day.

To the Public generally this is the FINAL SALE, and as quite an assortment of goods remain, we want you to come. Every preparation is being made to have everything in order for the Final Sale.

To Jobbers and Merchants in the surrounding district this is an opportunity and will be a paying investment.

The Balance of Stock consists of Ladies' Jackets, Skirts, Children's Jackets, Ready-to-wear Hats, Feathers, Plumes, Flowers, Chiffons, Ospreys, Ribbons, Straw Braids, Silk Velvets, Laces, Children's Hats, Baby Bonnets, Dress Goods, Dress Trimmings, Beaver Cloths, Skirtings, Window Shades, Cottonades, Collars, Belts, Summer Hose, etc., etc. As it is necessary to vacate the premises, the above decision is final.

No Goods exchanged or returnable. Bring lots of small change.

COME ONE! COME ALL!

— TO THE —

PUBLIC AUCTION SALE

Commencing on Saturday, at 10 a.m.

EVERYTHING MUST BE SOLD.

REMEMBER THE PLACE — CHEAPSIDE.

ANNUAL COUNTY CONVENTION.

The nineteenth annual S. S. Convention of Lennox County S. S. Association was held in the Western Methodist church, Monday and Tuesday the 22nd and 23rd inst. The first session was held on Monday evening and was well attended. Opening exercises led by Rev. J. R. Real. The President Mr. I. B. Hudgins took the chair and made some timely remarks; and then called upon Mr. S. Gibson, who gave a short and spirited address. A fine trio was well rendered by Misses Light and Dennison and Mr. Nichol. The general Secretary, Mr. I. A. Jackson, B. A., then addressed the meeting; he gave a strong and convincing address on "The moral influence S. S. and the pressing need of Teacher Training." The session closed satisfied that Mr. Jackson is the right man in the right place.

MORNING SESSION

Opening services led by Rev. W. Down. The president then delivered his annual address, which was full of encouragement for S. S. Workers in the county. The nominating committee was next appointed. Mr. Jackson then conducted a Round Table Talk on S. S. management which was full of information. A number S. S. presented cheering reports of the year's work.

AFTERNOON SESSION.

Mrs. M. S. Madole opened the session and addressed words of welcome to the convention. The Secretary Mr. J. Gordon then presented his annual report, from which it appeared that out of 50 S. S. corresponded with, 38 reported but only 33 contributed to the County fund. Out of \$65.00 due Provincial fund only \$61.75 received. Balance due from schools still to report \$3.25. Rev. R. A. Whattam gave an address on "The best way to study the Bible with the Scholars." This address was helpful in every sense. Mr. Jackson on "How to Teach the Lesson took "The Boyhood of Jesus" and considered the life of the normal boy in the Home, School and Community, showing the influence of each upon his future life. He showed us how to teach in very deed. Mrs. Wm. Valleur's paper on "Who should attend the Sunday School was fine and should be published.

REPORT OF NOMINATING COMMITTEE.

Pres.—Mrs. M. S. Madole, Napanee, Vs. Pres.—Mrs. Symington, Napanee, Mrs. D. Rose, Tamworth, Mr. T. A. Dunwoody, Newburgh, Mr. S. Gilmour Tamworth.

Sect.—Rev. W. Down, Napanee, Treasurer.—Mr. C. W. Neville, Newburgh. Executive—All S. S. Superintendent and Pastors in County.

Visitors—Ernestown, Messrs. Valleur, Lake and Garrison; Adolphustown—Mrs. Carr; South Fredericksburg; Mr. J. O. Fretts; North Fredericksburg—Rev. W. Down; Napanee Mr. S. Gibson; Richmond—Mr. I. B. Hudgins; Camden—Messrs. Dunwoody and Nesbitt; Tamworth—Mrs. S. Rose.

EVENING SESSION.

Opening exercises led by president. The Pres. Elect. was then introduced and gave a stirring address. The general secretary conducted the question drawer and answered some vital question to the satisfaction of all. Rev. W. Down followed with "How to Make the County Convention a success." This address was voted by all

The Final Days of the Great White Goods Sale

Five fast selling days remain in our old year, as we finish Stock-taking January 31st. As a sale leaves more or less odd lots and broken numbers, we find a few remain and must go before January 31st. Ladies' Skirts, Gowns, Corset Covers, Remnants of Embroideries and Laces, also Ribbons, Dress Goods, Silks, and Cotton goods generally. Come on Friday and continue coming until January 31st, as above are all marked at special sale prices.

February 1st ushers us into a new era in our business career, with larger stocks, comfortable and commodious shopping facilities, quick service, and every consideration to the buying public, on strictly up-to-date business principles,

Saturday Special in the Staple Department.

250 yards Wrapperette, in colors of red, pink, sky, navy and royal blue, small, neat figures and stripes, suitable for Children's Dresses and Ladies' Waists and some for Quilting. Sold in the regular way at 10c. yard, Saturday, 10 a.m., **6½c. yard.**

LADIES' AND CHILDREN'S COATS AT HALF PRICE.

The balance of our entire stock of Ladies' and Children's Coats with mostly every size represented, all this season's goods, with new sleeve, etc. For perfect style and fit come to Madill's.

THE FUR DEPARTMENT.

In preference to carrying any Furs over to next season, our decision is cut prices notwithstanding the advance in prices of Furs. Next season the prices will be higher. We advise you, buy now, as the balance of our high grade Furs are going at greatly reduced prices.

LADIES' BELTS—an item of note and a saving of from 25 to 50 per cent.—about 75 in all, principally Black Louisienne and Taffetta, several styles, mostly all 1906 patterns. This an item for Saturday.

Odd Lots of Ladies' Gowns, Corset Covers and Skirts, the balance to clear previous to inventory at Wholesale Prices.

GREY LION HARDWARE.

HASTINGS IRON ORE IS MADE INTO STEEL

T. W. Gibson, Provincial Director of Mines, has in his possession two interesting curiosities sent to him by Mr. J. W. Evans, a mining engineer of Deseronto. They are two small samples of steel made from iron ores which have been disregarded by ordinary iron smelters on account of their inadaptability to the ordinary smelting processes. Mr. Evans used the electric furnace and accomplished the process in fifteen minutes.

One sample was made from the titanium ore of the Horton Mine of Hastings county, and the other from the Coe Hill Mine in the same district. This is the first steel made from these ores in Canada, and if the expenses of the process can be reduced to a profitable basis it may mean the commercial utilization of these hitherto valueless ores.

ODESSA.

On Wednesday evening, January 17 a large number of popular young ladies and gentlemen met at the public library for the purpose of joining with others from the neighboring vicinities for a surprise party at the home of Mr. and Mrs. Austin Fraser. The very happy crowd were warmly received and entertained by their hosts.

Frederick Montgomery is visiting at "Hemlock Grove."

Charles Timmerman is still visiting friends here.

R. Clark is home again for a few days. H. M. Davy, organizer, C. O. C. F., leaves for his appointed work in the west this week.

Mr. and Mrs. P. A. Maber, who have been away since Christmas, are expected back in a few days.

Miss Ada Allen left on Friday to visit friends at Lowville, N. Y.

Miss Lillie Lee, graduate of Kingston Business College, has accepted a position in Toronto.

There was no service at St. Alban's on Sunday evening, as Rev. Mr. Dibb conducted services in St. Paul's, Kingston.

Camp meeting is to be held here by the Free Methodist church, on the north side of Byron Derbyshire's farm near the village. Meetings to begin about the middle of June.

Mr. and Mrs. S. J. Sproule entertained a large number of their friends on Wednesday evening. All report an excellent time.

Those intending to build will do well to see us. We can supply you with almost everything you need at right prices.

MADOLE & WILSON.

LAPUM.

Snow has entirely disappeared and we are having spring weather at time of writing. Farmers have not started seeding yet however.

Mrs. Hendon has returned to her home in Watertown, N.Y., after spending the past month visiting her sister, Mrs. I. Davy.

Miss Lottie Brown, Wilton is visiting her uncle, Stanley Brown this week.

Mrs. M. Fralick of Napanee was visiting several days this week at G. C. Davy's.

Mr. and Mrs. C. Bush, Camden East and Miss Ella M. Smith were calling on friends here on Sunday.

We are pleased to see Carrie Brown out again after a severe attack of La Grippe.

Mr. H. Bush who has been on the sick list is improving.

There was a good turnout at the service in the schoolhouse on Wednesday evening.

W. Lapum entertained on Friday evening at a small party. An enjoyable time was spent until a late hour.

B. OUTWATER,
Collector.

NOTICE OF MEETING.

The County Council of Lennox and Addington will meet at the Council Chambers, in the Court House, Napanee, on

Tuesday, 30th Jan. 1906
at 2 o'clock p.m.

All accounts must be in the hands of the undersigned, not later than Wednesday 31st Jan., 1906, in order that they may be considered.

W. G. WILSON,
County Clerk.
Dated Jan. 10th, 1906.

service in the schoolhouse on Wednesday evening.

W. Lapum entertained on Friday evening at a small party. An enjoyable time was spent until a late hour. Sperry Rikley, one of our popular young bachelors, had the good luck to get the blue plush couch given away on Saturday night at Yarker, by Dr. James Carson, at the close of his medicine show.

Miss Gretta Asselstine, has become a boarder at Mrs. Clara Lapum's.

A number from here are attending the Hornerite meetings at Yarker, in connection with the opening of their new church.

John Reid, Elginburg, accompanied by his sister, Mrs. Michael Love, were last week guests of their sister, Mrs. James Huff.

Sanford Lemon and wife, Kepler, are spending a week here with Mr. and Mrs. John Simpson.

Arnold Brown and Allen Reid attended a quadrille party at Camden East on Thursday.

M. Peters and wife, Thorpe, with Mrs. Emily Simpkins: Mr. and Mrs. B. Rose and Edwin Bell, with Mr. and Mrs. Stanley Brown; Col. Clyde and wife, Odessa; Mr. and Mrs. William Pringle, with Mr. and Mrs. Wesley Brown.

Departing from the Rule.

It is not our custom to advertise a patent medicine; but so many of our customers, who have been suffering with asthma have received so much benefit from Taft's Asthmaleine, that we have no hesitancy in recommending it. Trial size 30 cents. Regular size \$1.50 at The Medical Hall—Fred L. Hooper.

HOLLEFORD.

The snow has all disappeared and the roads are in a bad condition.

Mr. J. Carslake has sold his farm stock and in ends moving in the near future to Portsmouth, Ont. We greatly regret the departure of the family and wish them every success in their new undertaking.

There is some talk of work beginning at the Feld-spar mines soon. Mr. Chisholm made a business trip through here last week.

Visitors: Mrs. Jennie Curran and children at Mrs. Geo. Babcock.

Miss Gardiner with her sister.

Mrs. D. Freeman. Miss Storms at Jas. Walker, Miss Walker spent Sunday at home, Mr. Buck, and sister Hattie, and Miss Ackroyd at Geo. Smith's. Ernest Richmond at J. D. Redmond.

A boy has come to stay at Mr S. Davy's

Just In.

Fresh maple syrup 30c qt, maple sugar, 10c a cake also table syrup in all size pails from 10c up

GREY LION GROCERY.

COLEBROOKE

N. Wartelsky has returned from visiting friends in Montreal for the past week. Edward Purcell and bride have returned from Toronto.

Mrs. Purcell is now spending a few days with her parents at Selby.

Mrs. Wella Brown entertained a small party of children on the 22nd, in honor of little Miss Mildred's birthday.

Last Wednesday evening, the members of the Ladies' Aid Society, entertained their husbands with an oyster supper, at the home of Mr and Mrs F Warner. The men showed their appreciation by a hearty vote of thanks to the ladies for the enjoyable evening and also to Mr. and Mrs. Warner for throwing open their spacious house for the occasion.

We are offering heating stoves horse blankets and mitts at greatly reduced prices.

MADOLE & WILSON.

Reid.

Mr. James Walters, merchant tailor. Napanee—Goods valued at \$2.00, for best and best dressed pair Chicks. Open to the County of Lennox and Addington—R. H. McGuiness.

Gas Mantles, lamps and chimneys, brass bracks, pendants, &c.

MADOLE & WILSON.

WIPE OUT COUNTY COUNCILS.

Amherstburg, Jan. 22.—Mr. John Auld, M. P. P., believes that the County Councils can be dispensed with. About the only business transacted by the County Councils, he says, is equalization of assessments, and in numerous counties special commissions have had to be appointed to do this work. He believes that the entire business done by County Councils could be done by and as well by the different municipal Councils in each county, and the taxpayer be relieved of the expense of the present body. He will advocate this at next session.

Canadian and American Coal Oil.

MADOLE & WILSON.

LEGISLATURE MEETS FEB. 15th.

The Legislature has been summoned to meet on Thursday, February 1st. This announcement was made by Premier Whitney yesterday evening at the close of a Cabinet meeting. The proclamation calling the House will be issued at once, and the notices to the members are already speeding to their destinations. His Honor the Lieutenant-Governor will of course open the Legislature with the usual formalities, and at the usual hour, 3 o'clock in the afternoon. A special number of The Ontario Gazette will be issued to-day with the official proclamation.

When It Is True.

There are many phrases familiar to most of us, that are sometimes not quite true; but the following one "when you get it at Hooper's it's good" is always true. The Medical Hall—Fred L. Hooper.

After you have tried hot springs, sulphur baths, patent medicines, electricity etc. bring your case to the Supreme Court of rheumatism—Tuck's Rheumatic Bone Oil. This is a powerful, penetrating oil which as its name implies acts directly on the bone or joint—the lodging seat of rheumatism. If you are troubled with rheumatism, sciatica, lame back or kindred troubles and have not been able to get anything to help you don't get discouraged and make up your mind that nothing can cure you until you have tried Tuck's Rheumatic Bone Oil. It has cured hundreds of cases just as bad as yours, H. S. Brown, of Merrickville Ontario, writes as follows:—

Dear Sirs—I am free from rheumatism to-day because I used Tuck's Bone Oil. I had rheumatism in my hands and feet and thought at one time my life was going to be ruined by it. I consulted a doctor and tried various remedies, but while some of them that I took internally made me feel better for a time none of them took the pain away. After I had suffered for six months or more, doctoring all the time I was advised one day to try Tuck's Rheumatic Bone Oil. I did and I never can be thankful enough to the man who told me to get it. I had not used a bottle until I was better and before the second one was done my joints were loosened up, the pain was gone and I was well. Tuck's Bone Oil did it. That was six years ago and I have not been bothered since.

H. S. Brown, Merrickville.

For all inflammation arising not only from rheumatism but from colds, croup, bronchitis, quinsy, &c. Tuck's Bone Oil is a sure and speedy cure. Sold by all medicine dealers at 50c. a bottle or sent by mail prepaid by The Tuck Bone Oil Co. Limited, Smith's Falls, Ontario.

are you going to do then? Mail—Nothing, ma'am. The fortune teller tells me I'm going to marry money.

THE PEACE OF PERFECTION

Those Who Are Content With Themselves Are to Be Pified.

"They go from strength to strength."—Ps. lxxxiv., 7.

The difference between man and the dust lies in his heaven-born passion for progress, the desire to push on, to grow, to improve, to enlarge his life, his knowledge, and his power. All life is growth and any form of decay is death. In the right life aspiration lasts as long as respiration. He is already dead who is satisfied, in whom there stirs no passion for better, ampler things. That which yesterday seemed to the soul a palace, which is to-day its house, would to-morrow prove its prison.

Man was made to grow. All our past story tells us that. Read in the rocks or in the written page it is the same record of toil, pain, battle, weariness, and sorrow, victory, and brief joy—all but waves in the great tide that moves humanity on. Out of the depths have we come, and no man any longer blushes at our lowly beginnings, rather do we rejoice at the strides made thus far. Neither dares any reverent one to predict how far we may go. All we know is that in us burns the eternal cloud by day and fire by night that leads on from Egypt's dull content through deserts of glowing promise.

The story of each life is like a miniature of the story of all life. There is the same helpless beginning, the same increasing passion for larger life, the same growing discontent with things achieved.

TO LIVE IS TO STRIVE,

to achieve and be dissatisfied, to become better and often seem to be worse. The struggle to cast out old evil and to live fairer, sweeter, stronger, and more worth while lives goes on in all.

Of all the objects of our pity none deserves it more than those who are content with themselves. No matter what growth a man may make in character, what progress toward perfection, it will never afford him satisfaction. The search for the peace of perfection can end only in disappointment. To the soul there is no perfection. To find its goal would be to die. When a man boasts of having reached the height of his ambition you will find he never contemplated any eminence greater than a beer keg.

Either one gets better every day or he

gets worse. He needs to feel the greatest alarm who thinks he has come to the place where he can stand still. Measure your progress by your discontent with self. The fact that our ideals seem farther off than ever before may but indicate how greatly the horizon has widened. True, there is a danger that we shall be content with our discontent, that we shall say, My apparent imperfection but proves my real progress. A man must measure himself not alone by his distance from the goal but by his steady strivings to reach it.

And, after all, the natural life has little time for any self-measurements. Some get no exercise save in climbing on and off the scales and standing under their spiritual measuring rods. They wonder why they do not grow. Not by inspection does the soul increase. Nor by repeated reviews of footprints long past.

OF YESTERDAY'S FAILURES

and mistakes. A man ought to move so fast that the old tracks are soon out of sight. The things that are set before and not the things left behind must determine the things that are to be.

If life is a race, it is not run before spectators; there are no grand stands here. The course winds amongst the commonplace duties of the day. He runs best who thinks least of the running and most of doing the work of that moment in the best and noblest way. In each effort, in each fight against content with sloth, with self, with mediocrity, lies the strength-giving struggle. Soul health comes through service. The doing of good is the best defense against the evil. Strength comes and evil is overcome by the good that is undertaken.

Weariness in the fight, and feyung naught is gained, still press on. Life's value lies not in its victories so much as in its strife. It is this long, bitter, oft disappointing battle that is making the man of you. The warrior's reward is not in some medal at the end—it is in muscle gained, in keener vision, stronger arm, larger heart, uplifted head, thoughts that look beyond the stars and catch glimpses of the glory to be, in burning desire for yet harder toil, sterner conflicts, nobler prizes.

the law (Exod. 28. 4; Lev. 44. 8. 9; 15. 5, 8, 10, 13, 16, 21, 22, 27; 16. 26, 28; 17. 15, etc.)—Gould.

Repentance—The Greek word means literally a change of mind, especially such as comes from an afterthought. Thus to reconsider one's action, and to turn from a life of sin to one of righteousness and holiness, is to repent.

5. All the country of Judaea, and all they of Jerusalem—A hyperbolic expression, just as if we should read in a city paper that the whole city had turned out to see or hear the President.

6. Clothed with camel's hair—Clothes made of coarse cloth woven from camel's hair.

A leathern girdle—Compare the description of Elijah's raiment: "He was a hairy man, and girt with a girdle of leather about his loins" (2 Kings 1. 8).

Locusts and wild honey—Several species of locusts furnished food for the common people of Palestine, especially in times of famine. By wild honey is meant the honey of the wild bee stored in hollow tree trunks and in caves and crevices in the rocks. The Greek word seems also to have designated the sap of certain trees.

Latchet—The strip of leather that fastened a sandal or shoe. The English word comes from O. F. *lasc*, or *lacet*, "noose," from which comes also the noun "lace," any kind of cord holding together parts of a garment or shoe.

8. In the Holy Spirit—Or, "with the Holy Spirit."

KING AND THE KAISER

THE QUARREL BETWEEN THEM GROWS IN BITTERNESS.

Began Before Edward Became King, and Has Now Extended From Personal to Political Affairs.

Personal enmity existing between the King of England and the German Emperor has become a serious factor in international affairs, writes Curtis Brown from London. They are fierce combatants in the arena of the world's politics. The uncle, Edward VII., regards the nephew, William II., with anger mingled with scorn, and the younger monarch's resentment against his mother's brother is still more intense.

Herein lies the true cause of the present bitter feeling between Great Britain and the Fatherland. That this feeling should result in hostilities seems incredible, but I was told yesterday by a high official in the English Government that Lord Lansdowne, who until recently, was foreign secretary, had referred in private to war with Germany as "the one danger," and the same informant declared that Lieutenant General Sir John French, who is British Commander-in-chief in everything but title, is convinced that a conflict is inevitable.

The cause of this remarkable tension between the two foremost monarchs of the world is even more personal than political. The original cause of the dispute must be sought in the remarkable difference in the characters of the two royal personages. King Edward is a cool, cynical, experienced and practical man of the world. During more than three decades of manhood in which he was free and as unfettered as Prince of Wales he traveled about the world and mixed with all sorts of conditions of men, so that he gained an intimate knowledge of humanity and close acquaintance with the manner in which practical affairs of commerce, diplomacy and other professions and occupations are conducted. His vastly varied experience gave him a clear insight into character and supplied him with a cool judgment, which rarely fails. King Edward is essentially a realist.

The German Emperor, on the other hand, is a visionary idealist. Brought up within the narrow confines of the Prussian court, he ascended the throne before he had time to acquire a practical knowledge of the ways of the world, so that in spite of his keen interest in all branches of human activity he has remained an impractical theorist. He is quick-tempered and enthusiastic, and has committed many serious mistakes of policy through his impetuous temperament. In brief, the two monarchs are personally as far removed from one another as the two poles.

KING EDWARD ANTI-GERMAN.

A long series of personal bickerings has fomented and increased the original mutual antipathy between the two men. King Edward's personal grudge against Germany and Germans was originally due to the fierce and unscrupulous hostility which his sister, the late Empress Frederick, experienced in her adopted country. The late Empress Frederick was an exceptional woman of high ideals and noble principles, and she exercised her influence against the pernicious policy of political reaction favored by the German court. On this account she was violently attacked by Bismarck and many other prominent Germans. During all the years of her residence in Germany up to the time of her death abuse and insults and indignities of all sorts were heaped upon her.

The Kaiser, although he never failed in filial duty to his mother, nevertheless, regarded her political views with intense aversion, and undoubtedly sympathized in the innermost depths of his mind with the opposition directed against her political influence over German affairs. King Edward, who was a most affectionate brother, fiercely resented the cruel and unchivalrous hostility which his sister experienced.

was a pale brunette, slight and graceful, and apparently not much more than twenty-five years of age. The somewhat severe oval of her face was relieved by a bright pair of black eyes that seemed to grow larger as she sang. One hand rested gently on the shoulder of the girl at the piano, and with this she seemed to keep time, pressing gently on the shoulder of the performer to stimulate her zeal. And that hand was perfect.

Presently the song was finished. Then followed a few moments of general conversation, during which—after embracing the girl pianist, who immediately left the room—the songstress walked to the window.

She leaned out as if to breathe the fresh air, and her profile was sharply relieved against the bright light behind her, in which the others formed a group around the fine-looking old gentleman, who seemed to have something of importance to communicate to them.

The beautiful lady leaned from the window, gently fanning herself, as she looked now at the sky, now at the dark landscape. The young man concealed in the tree imagined he could distinguish her gentle breathing above the sound of the fan; and leaning eagerly forward for a better view, he caused the leaves to rustle slightly.

He felt the full awkwardness of his position, but could not judge whether or not he was visible to her; but under the danger of her fixed regard he passed the most painful moment of his life.

She turned into the room and said, in a calm voice, a few words, which brought three or four of her friends to the window, and among them the old gentleman with the violin.

The moment was a trying one. The young man could do nothing but lie still in his leafy retreat—silent and immovable as a statue. The conduct of those at the window went far to reassure him, for their eyes wandered over the gloom with evident uncertainty, convincing him he was but suspected—not discovered. But they exchanged animated observations, to which he lent an attentive ear. Suddenly a strong voice, which he recognized as belonging to the old gentleman, rose over all in the pleasing order:

"Loose the dog!"

This was quite sufficient for the adventurous young man. He was not a coward; he would not have budged an inch before an enraged tiger; but he would have traveled a hundred miles on foot to avoid the mere shadow of ridicule. Profiting by the warning and a moment when he seemed unobserved he slid from the tree, jumped into the next field, and entered a piece of the woods at a point somewhat farther down than where he had scaled the fence. This done, he resumed his walk with the assured tread of a man who has a right to be there.

He had gone but a few steps when he heard behind him the wild barking of a dog, which proved his retreat had been a most opportune one.

Some of the farmers he had noticed as he had passed before, were still standing at their doors. Stopping before one of them he asked:

"My friend, to whom does that large house below there, facing the other road, belong?"

"You probably know as well as I," replied the man, stolidly.

"Had I known, I should scarcely have asked you," said the stranger.

The farmer did not deign farther reply. His wife stood near him; and the young man had remarked that in all classes of society women have more wit and good humor than their husbands, therefore he turned to her and said:

"You see, my good woman, I am a stranger here. To whom does that house belong? Probably to the Reverend Doctor Gray?"

"No, no," replied the woman. "Dr. Gray lives much farther on."

"Ah! Then who lives there?"

"Why, Judge Hiram Henderson, of course."

"Ah! Judge Henderson. But tell me, he does not live alone? There is a lady who sings—his wife?—his sister? Who is she?"

"Ah, that is his niece, Mrs. Stanley—Agnes, who—"

"Ah, thank you, thank you, my good

THE S. S. LESSON

INTERNATIONAL LESSON,

JAN. 28.

LESSON WORD STUDIES.

Note.—These Word Studies are based on the text of the Revised Version.

John Mark, and His Life Sketch of Jesus.—To our second Gospel has been given, not the Hebrew name of its author, which was John, but his Roman surname, which was Mark. "John whose surname was Mark" (Acts 12. 12) was an attendant of Barnabas and Saul on their first missionary journey, and just preceding (Acts 12. 25; 13. 5), and a little later a source of contention between his superiors (Acts 15. 27-39), because of his having left them before the completion of their first missionary tour, on which he had started with them as their attendant (Acts 13. 13). But in the Epistle to the Colossians he again appears as the companion of Paul (Col. 4. 10), and is mentioned also in Tim. 4. 11, and in Phil. 24. Peter also, in his second epistle, speaks of Mark, calling him his son in the faith (1 Pet. 5. 13), and it is to the home of Mark's mother in Jerusalem, where a company of disciples was gathered in prayer for his deliverance, that Peter hastened upon being miraculously released from prison (Acts 12. 12).

is mentioned also in Tim. 4. 11, and in Phil. 24. Peter also, in his second epistle, speaks of Mark, calling him his son in the faith (1 Pet. 5. 13), and it is to the home of Mark's mother in Jerusalem, where a company of disciples was gathered in prayer for his deliverance, that Peter hastened upon being miraculously set free from prison (Acts 12. 12).

Mark's gospel is distinguished from those of Matthew and Luke by its brevity. On him the life of Jesus seems to have made the impression of a "swift march of important events toward a tragic end." Omitting all mention of the birth and childhood of Jesus, and touching but briefly on the events of resurrection morning, his life sketch of Jesus is devoted almost wholly to the period of his public ministry, "a brief and terse narrative of a three years' campaign."

That Mark wrote for Gentile rather than for Jewish readers is evident from the fact that he constantly explains Hebrew terms and customs. The fact that he refers to the destruction of Jerusalem as an event still in the future, though imminent, necessarily places the date of the composition of the gospel before A. D. 70. Tradition points to Rome as the place of its writing, and certain Latin words peculiar to this gospel give support to this tradition.

Verse 1. The beginning.—This verse seems to be intended as a title or heading of the paragraph in regard to the work of John the Baptist, whose announcement of the coming of one mightier than himself was the beginning of the gospel, of good news about Jesus Christ.

Of Jesus Christ.—Jesus is the personal name of our Lord. In Matt. 1. 21 its descriptive meaning is pointed out to be that of Saviour: "thou shalt call his name Jesus; for it is he that shall save his people from their sins." The word Christ is the official title of Jesus, and means literally, the anointed, or Messiah. The expression "the gospel of Jesus Christ" may mean either the glad tidings concerning Jesus Christ or those brought by him to the world.

2. In Isaiah the prophet.—The King James Version in its rendering "in the prophets" follows a small minority of the older manuscripts. The quotation which follows is really taken from two prophets, the first part being from Mal. 2. 1, and the second from Isaiah 40. 3.

Before thy face.—In the original passage from Malachi, Jehovah himself is speaking and says, "Behold I send my messenger, who shall prepare the way before me." He for whom the way is to be prepared is none other than God himself made flesh: "And the Word became flesh, and dwelt among us" (John 1. 14). In Matt. 11. 10 Jesus himself points out that in the coming of John the Baptist the prophecy of Malachi was fulfilled: "This is he of whom it is written, Behold, I send my messenger before thy face."

3. Make ye ready the way of the Lord, make his paths straight.—Public highways in the Orient are not ordinarily kept in good condition. When, however, a prince or other person of royal dignity desires to make a journey he sends announce the fact sufficiently in advance to give the inhabitants of the country through which the prince is to pass an opportunity to put the highway into condition for travel. In like manner, in a figurative sense, John the Baptist was to announce the coming of the Messiah, and for his coming people were to prepare themselves.

4. John came.—Verses 2 and 3 have been parenthetical; omitting this parenthetical reference to the prophecies, and joining this fourth verse to the first, the significance of our comment on verse 1 becomes apparent. "The beginning of the gospel of Jesus Christ, the Son of God," consisted, so far as Mark's narrative was concerned, in the coming of John the Baptist.

Baptized.—John's use of the baptismal rite was unique, and is to be carefully distinguished from Christian baptism, with which it was not identical. It was a baptism unto repentance, and signifies the inward purification of the person baptized. "It took up into a symbolical rite the figurative washings of such passages as Isa. 1. 16; 4. 4; Jer. 4. 14; Zech. 13. 1; Psa. 51. 2. Outwardly it had its counterpart in the Levitical washings of

at certain trees.

Latchet.—The strip of leather that fastened a sandal or shoe. The English word comes from O. F. las, or lacet, "noose," from which comes also the noun "lace," any kind of cord holding together parts of a garment or shoe.

8. In the Holy Spirit.—Or, "with the Holy Spirit."

9. Nazareth of Galilee.—The phrase "of Galilee" is one of the many little explanatory phrases found in Mark's gospel which indicate that the circle of readers for which the gospel was intended was Gentile and outside of Palestine.

10. Straightway.—A favorite word of the author, whose narrative might be appropriately called "the straightway gospel."

Rent asunder.—In the Greek the present participle is used, indicating present action, being rent asunder.

COST OF THE GREAT WAR

THE RUSSIAN BUDGET PLACES IT AT \$1,150,000,000.

Repatriation of Troops in Far East and Reduction of Army Will Cost \$52,500,000.

The Russian budget statement for 1906 shows that it will be necessary to raise \$240,500,000 by credit operations to balance the estimated receipts and expenditures. The latter include \$202,500,000 for the liquidation of the expenses of the Russo-Japanese war, the repatriation of the troops in the far east and the reduction of the army to a peace footing. For the first time the total cost of the war, \$1,150,000,000, is revealed. The credit operations to balance the budget include the recent authorization of \$200,000,000 in treasury bonds, \$75,000,000 of which have already been used to renew the Mendelssohn loan, and the credit, \$180,000,000, which former Finance Minister Kuskovskoff is now negotiating in Paris. The primary object of the latter, the proceeds of which will be retained in Paris, is understood by the Associated Press to be the maintenance of the stability of the rouble.

REVENUE AND EXPENDITURE.

The budget for 1906 estimates the ordinary revenue at \$1,013,929,387, and the ordinary expenditure at \$1,009,038,275. The extraordinary revenue is estimated at \$1,000,000, plus \$240,557,000, from impending credit operations, and the extraordinary expenditure at \$246,448,112. The total revenue and expenditure balance at \$1,255,486,387.

The extraordinary expenditure, in round numbers, includes: for the Russo-Japanese war, \$202,500,000; for the building of railroads, \$21,000,000; for the relief of sufferers from the bad harvest, \$10,000,000; in loans for the restoration of naphtha works, \$7,500,000.

In the budget statement it is announced that manifestoes will be issued, giving the nation the right to participate in the examination of future budgets.

The budget statement does not dodge the prevailing conditions in Russia. It is pointed out specifically that the receipts from nearly all sources have been scaled down, and that, moreover, it is stated that if the disorders in the interior do not cease there may be some branches of revenue on which it will be impossible to count.

RECEIPT PRECARIOUS.

The budget also deals frankly with the heavy drain on the gold reserve of the State bank balances abroad, which have fallen \$152,500,000 in the three months preceding January. During the last ten days of the year the gold reserve was reduced by \$30,500,000, while the issue of paper currency was increased by \$40,000,000. The increase of paper issued, the statement says, was made by the bank in an effort to come to the rescue of the business interests which were almost paralyzed, and had been refused loans by private banks, owing to the panicky conditions and to the reduction of the foreign credits of houses with connections abroad.

less, regarded her political views with intense aversion, and undoubtedly sympathized in the innermost depths of his mind with the opposition directed against her political influence over German affairs. King Edward, who was a most affectionate brother, fiercely resented the cruel and unchivalrous hostility which his sister experienced in Germany, and extended his anger against Germany and Germans to the present Emperor, perhaps unjustly.

The personal antipathy thus created and intensified during earlier years by many trivial causes of a personal nature, suddenly assumed formidable dimensions immediately after the death of Queen Victoria and King Edward's accession.

Between the late Queen and the German Emperor, who was, of course, her grandson, a particularly warm affection existed, and the Kaiser hastened to England as soon as it became evident that Victoria's end was approaching. That the Queen and the heir to the throne had many disagreements is well known, and it is declared at court that during her last hours Queen Victoria showed so much more regard for the Kaiser than she did for her eldest son that the nose of the Prince of Wales was put out of joint badly. This episode would have left its mark in any event, but Wilhelm II. promptly made matters worse by offering the new king friendly advice in the way in which he could best rule over his world-wide empire. The Kaiser, who is fifteen years younger than King Edward, considered that the dozen years of experience as a monarch which he had gained when Queen Victoria died gave him a right to instruct and advise his uncle how the British Empire should be ruled. King Edward keenly resented his Imperial nephew's patronage, and administered a snub to the Kaiser which left its sting for many years. That incident took place at the beginning of 1901, and the two monarchs did not meet again until King Edward visited Kiel in the summer of 1904.

CRITICAL KAISER.

Soon after King Edward's accession to the throne it came to his knowledge that the German Emperor had given utterance to all sorts of personal criticisms regarding his royal uncle's mode of life. The Kaiser, who is frequently all the other English visitors of distinction. King Edward, who had previously heard of the Kaiser's criticism of his friendship for Sir Thomas Lipton, naturally resented the slight on the famous yachtsman, so that the owner of the successive Shamrock has played quite an important part in the dispute between the two monarchs.

TALE-BEARERS BUSY.

One of the most potent causes in intensifying and prolonging the personal hostility between King Edward and Emperor Wilhelm has been the intercommunication of the unfriendly and malicious utterances which the one has made about the other. As often as the German Emperor has made a critical remark about his uncle Edward it has been made known to the latter with remarkable precision and rapidity. If the Kaiser uttered the remarks on Monday, King Edward generally had knowledge of the incident on Wednesday or Thursday. On the other hand, as often as King Edward responded to his nephew's criticisms by counter criticisms his utterances were likewise made known in Berlin within a day or two.

A number of persons were there assembled; two or three women of different ages, were seated at a table, working; a young man appeared to be writing; while several persons lounged on comfortable seats around the room. Near the piano was a group which chiefly attracted the attention of the young man. At the instrument was gravely seated a young girl of no more than twelve years; immediately behind her stood an old man, remarkable for the strong, good sense that shone in his honest face. He it was who played the violin. Seated near him was a man of about fifty, dressed in plain black, and wearing a huge pair of steel rimmed spectacles, who, with hand and foot, kept time to the music with apparent gusto.

Between them stood the singer. She

"Why, Judge Hiram Henderson, of course."

"Ah! Judge Henderson. But tell me, he does not live alone? There is a lady who sings—his wife?—his sister? Who is she?"

"Ah, that is his niece, Mrs. Stanley—Agnes, who—"

"Ah, thank you, thank you, my good woman. You have children? Buy them presents with this," and dropping a piece of money into her lap he walked rapidly away.

Returning home the road seemed less gloomy and far shorter than when he came. As he stode on, humming the air he had heard, the moon arose, the country looked more beautiful, and, in short, when he perceived at the end of the elm-arched avenue his own house, bathed in the white light, he found the spectacle rather enjoyable than otherwise. And when he had at last entered himself in his own room, he found great consolation in the reflection that there existed not very far away from him a young woman who possessed a charming face, a melodious voice, and a sweet name.

(To be Continued.)

MEN'S HATS IN CHURCH.

Their Care a Troublesome Question Awaiting Solution.

It is a matter of historical record that our forefathers in the seventeenth century wore their headgear at divine service and also at dinner, but it has remained for an English newspaper to testify that in its opinion gentlemen sometimes refrain from going to church because of their hats, says the London Hatters' Gazette.

A daily paper has recently suggested that the very irregular attendance of upper class males at church may be due to the respect with which they regard their headgear and the inadequate accommodation provided in sacred edifices for the safe bestowal of the cherished "topper."

The quote a Piccadilly hatter as saying, "I receive more hats to block on Monday morning than on any other day of the week, and judging from the observations I hear, I should say that the owners benefit very little by going to church. If they place their hats under the seats they are kicked by the occupants of the pews behind, ladies being almost as careless as mischievous boys in this respect. Then, if they deposit the hats on the seats, some one—probably the owner himself—is sure to sit upon them. Why can't every West End church have a cloak room where gentlemen can leave their hats? This suggestion has often been made. A small sum could be charged and devoted, let us say, to the clothing of the heathen in West Africa."

A West End vicar who was asked if this difficulty explained why men did not go to church gave an unsympathetic answer. "I cannot conceive," he said, "even in these artificial and finicking days, of a man who would avoid going to church out of consideration for his hat. At regular intervals male members of my congregation complain to me about this matter, and I invariably tell them to wear caps."

A verger at a neighboring church who offered as a remedy the suggestion that men should wear opera hats, told the amusing story of an experiment. "One gentleman always used to put his hat outside the door of his pew," he said; "others followed, until the whole aisle showed a row of silk hats. This was all right till one night an old gentleman who was short-sighted and infirm came late. He helped himself forward by resting his hand on each pew. In this way he kicked every hat into the aisle and 'dribbled' his way, so to speak, up to his seat."

The four-dial clock with Westminster chimes erected in the tower of the elementary school of the Nicholson Institute, Stornoway, to the order of the Rev. R. Nicholson, Kyles of Bute, and Mr. Kenneth Nicolson, Mississippi, U.S.A., the surviving brothers of the founder of the institute, were formally handed over to the School Board on the 7th inst.

HEALTH

TUBERCULOSIS IN CHILDHOOD.

The question of the relationship between human tuberculosis and the form encountered in cattle has not yet been decided, in spite of the zeal with which men of science all over the world are endeavoring to settle the matter. It appears, however, that Doctor Koch, the eminent discoverer of tubercle-bacillus which is the cause of the disease, spoke somewhat prematurely when, a year or two ago, he announced that there is no danger to the human race to be apprehended from infection through the medium of the meat or milk obtained from tuberculosis cattle. At least, this is the view of most American and English physicians, and a British appointed to study the facts has recently published a report to the same effect.

On the other hand, the observation has been made that tuberculosis is also prevalent in countries in which the cattle are healthy, or in which they are not kept to supply milk or meat for food, as in Iceland, Alaska and Japan.

Leaving these theoretical discussions out of the question, the facts remain that the two chief ways in which tuberculosis is acquired are by inhaling or by swallowing the germs, and that it is young children who are particularly susceptible to infection. Indeed, a noted German observer goes so far as to assert that every adult who manifests signs of the disease must have contracted it in infancy, the germs having remained dormant for years, until some accidental cause started them into activity.

Heredity is not supposed to play so great a part in the transmission of tuberculosis as was formerly believed. The theory now is that the children of consumptives are somewhat more likely than others to develop the disease, simply because they are so much exposed to infection from the germs continually thrown off by their sick parent.

It is therefore evident that the greatest possible precautions must be taken to safeguard infants and children from any possible contact with tubercle-bacilli either in their food or in their surroundings. The sale of milk or meat from diseased animals should be made impossible, and it is of the utmost importance to avoid artificial feeding for babies whenever possible.

Plenty of sunshine and fresh air, scrupulous cleanliness in all particulars, a firm stand against the kissing of children by any person except those of the immediate family, and vigilant watch over the milk and meat supplies are essential precautions in keeping the coming generation free from "the great white plague." — Youth's Companion.

HEALTH HINTS.

Apples should be eaten to stimulate the brain.

In cases of poison warm water with salt in large quantities forms a quick emetic.

A headache can often be relieved by rubbing the temples with a slice of lemon.

In extreme prostration, a small quantity of extract of meat in a glass of sherry or claret is a good restorative.

A simple remedy for insomnia is to dip a serviette or handkerchief in cold water, wring it out, and lay it across the eyes. Eating lettuce produces sleep.

A cup of cold water, with a teaspoonful of salt, taken upon rising in the morning, will act as an excellent tonic and is far less trying on the system than any drug.

Calcium, so important for children in the formation of bone, may be obtained by the eating of eggs, rice, rhubarb, whole wheat, and the drinking of milk.

An irritating cough is often caused by the uvula (the fleshy, conical body suspended from the palate over the back of the tongue) being enlarged. When this is the case, consult the doctor, as medicines and gargles only temporarily check the annoyance.

LEGAL POOR OF LONDON SWEEPED INTO THE OCEAN

ALMOST EIGHTY THOUSAND PEOPLE IN HER POORHOUSES.

While Many of Them Are Old, Thousands Are Young and Vigorous.

From a London Times article on the legal poor of London the following extracts are taken:

In dealing with the question of the legal poor of London this Christmas we have to record the dismal fact that the numbers in receipt of pauper relief in nearly every month of the past year have been greater than in any of the previous forty years comprised in the official statistics, with the exception of the period from 1867 to 1871, and that the ratio of paupers per 1,000 of the population in most months has been higher than in any year since 1874. The highest point reached was in February, when the ratepayers were maintaining as many as 129,529 persons, of whom 77,365 were in the workhouses and 52,164 on the out-relief lists. Of every 1,000 of the population 27 were paupers. The figures have fluctuated during the year, but all through they have remained very high, and until December was reached they showed considerable increases upon the large totals of 1904. Not only has there been

A REMARKABLE INCREASE

in the outdoor relief, but the rise in the numbers entering the workhouses, which has been a great feature of modern pauperism, has continued, and the details given below reveal the fact that in no year in the history of the poor law has the population of the workhouses been greater. The solution of the problem of how this growing and costly mass of permanent indoor pauperism is to be dealt with is becoming a very difficult one in many unions where the institutions are already accommodating more than their certified number; while the lavish distribution of out-relief is a question which requires immediate attention.

It is gratifying, however, to be able to state that this month the official returns record a decrease of pauperism compared with the corresponding period of 1904. The reduction began in the week ended December 2, and it has continued up to the 16th inst., the date of the last weekly return. There were then 127,072 persons in receipt of relief—77,622 in the workhouses, and 49,450 outside. This is a welcome reduction of 551 on the total for the corresponding week of last year.

Although the large majority of the inmates of the London Workhouses are old-age paupers—the latest official return, that for 1903, puts them at 48,000 over sixty years of age—there is a considerable sprinkling of the able-bodied. It is an unfortunate fact that these are on the increase. As many as 9,932 received relief last year, which was 994 more than the total for the previous year, and it is, indeed, the

HIGHEST NUMBER ON RECORD:

while the ratio per 1,000 of the population (2.1) is not exceeded in any previous year, although it was equalled in the years 1894-96. The outdoor relief lists contained 8,164 able-bodied, which was higher by 1,689 than the total for 1903-04, and greater than any previous number, the ratio per 1,000 inhabitants being 1.8, a rise of .4 on the preceding year.

It is a deplorable fact that the poor law establishments of London contain nearly 20,000 children. Of these 7,805 are being educated and trained in district or separate schools, 3,871 in cottage and other homes, 2,968 are in workhouses and infirmaries, 1,748 are in institutions belonging to the managers of the Metropolitan Asylums Board, 2,976 are in training and industrial homes, 180 are in institutions for the blind, deaf and dumb, epileptics, etc., and 125 in hospitals and convalescent homes for the sick. During last year the guardians of London had 37,747 children on the outdoor relief lists, and this Christmas there are 17,227 children under the age of

THE MARSHALL GROUP OF PACIFIC ISLANDS DESTROYED.

Work of a Hurricane, the News of Which Has Just Reached the Civilized World.

One of the worst hurricanes that have ever overwhelmed any of the Pacific islands struck the Marshall group on June 30th last. It was the same storm that did considerable damage to the eastern islands of the Caroline group farther west; but there the storm had partly spent its force, while some of the Marshall Islands were subjected to its utmost violence.

Some of the little islands were fairly blown or washed into the sea; all the sand covering the coral rock foundations being swept away both above and below the water surface; so that to-day sailing vessels may pass over spots where inhabited islands stood a few months ago. News from the Marshall group comes only about twice a year and the particulars of this calamity have only just been received.

These atolls are some 50 in number. They came under the German flag in 1885. They are long, narrow islands, rising above foundations of coral reef arranged in the form of circles or atolls, as they are called, the area within the atolls being occupied by lagoons with shallow depth of water. Some of the atolls are from 30 to 60 miles in diameter. Here and there the coral reef in which they stand sinks under the water surface so far as to permit the passage of small vessels into the lagoons. Every atoll has several of these passages.

THE LITTLE ISLANDS

are rarely over 350 feet wide and do not rise more than from seven to fifteen feet above the surface of the sea. The sides of the big ocean liners would tower high above them. They are sparsely populated with Kanakas, who are dying out; for they are succumbing rapidly to diseases which the whites have introduced.

The smaller, uninhabited islands, grow only a little scrub on the masses of sand which have been piled up above the reef in the course of centuries and form the only soil. It is astonishing to see the cocoa palm flourishing in this pure sand. The trees bear from 60 to 100 coconuts a year and are the sole wealth of the islands.

Within the memory of the natives the Marshall Islands had never been visited by such a hurricane before. High winds and the great waves that accompany them had sometimes done damage, but nothing comparable with that of the storm of June 30th last.

The storm first struck the islands of the eastern part of the group and here the greatest damage was done. The little Knox Island was entirely washed away. Where it stood are now seen only two or three small sandbanks surrounded by a few stumps of trees.

The mass of water rising as high as the crowns of the cocoa palms simply swept everything away. These waves driven by the wind were as resistless as the Johnstown flood.

Of the 60 natives living on the island 56 were borne off on the waves, crushed on the reef or drowned in the flood.

ONLY TWO BOYS ESCAPED.

with their lives. In the wild whirl of the waters they managed to get hold of the trunk of a breadfruit tree, to which they clung for 24 hours, until they were finally washed out on the shore of the Mill Atoll. They could not have survived such an ordeal if they had been cast away in colder latitude.

The hurricane struck the Mill Atoll at 8 a. m., bringing with it three great waves following one another at intervals of about three minutes. The third and highest wave towered above the crowns of the palm trees, around which the nuts grow, and literally swept everything before it. The three waves rose to a height of from 35 to 50 feet above the usual water level.

YOUNG FOLKS

ON BEING TEN.

I'm very nearly grown, you see;
Next birthday I'll be ten,
And I suppose that life will be,
Oh, very different then.
Though being nine's very nice,
And you do pleasant things,
I think at ten there will be twice
As many happenings

I know a girl who's ten and I
Have often heard her say
She does not have to ask, but goes
Just where she likes to play.
And when you're ten I think that you
May sometimes sit up late.
At nine, no matter what you do,
You go to bed at eight!

I think you give your toys away,
You feel so nearly grown;
You're very quiet at your play,
You go down town alone.
There's lots of things you do, I s'pose
That I don't even know.
Oh, dear, when anybody grows
It is so very slow.

But wouldn't it be very strange,
When I was truly ten,
If I should think I'd like to change
To nine years old again?
Of course it always seems to me
To be ten would be fine!
But do you think I'll ever be
Just homesick to be nine?

PEENY-WEE'S FLYING TRIP.

"At last the day has come," said Ma Robin to Pa Robin. "We've seen these children through the worst of it. They all came out of their shells in fine shape; you and I have pulled about forty dozen other one lower down. Then they got them full and happy; and the darlings have grown like weeds."

"Weeds can't compare," said Pa Robin. "I can fairly see their feathers sprouting. If we let 'em wait another day, some of 'em will spill out of that nest."

"Oh, dear. They mustn't do that. There's a villainous cat just waiting for a chance to grab them. I've had all I could do to deceive her into thinking our nest was in another tree."

"Well, they've got to learn to fly right away; that's plain. We must begin to-day."

"All right. You help, Pa, and we'll get them out on the limb. Come children."

"Me first," said Bob. "I was out of the shell half a day ahead of the others."

"Me next," said Pillo-Wip. "I can eat more worms than either of you."

Peeny-Wee didn't say anything. She waited until the others had scrambled out and then she just climbed onto the edge of the nest and sat there as if she loved home too well to leave it, or as if—well, I hate to say it—as if she hadn't the moral or the physical courage of her brothers.

Her parents called to her, but she only said: "Go on with the lesson. I'll watch a while."

So Pa and Ma Robin began and there was a great fluttering and flapping of wings. Bob and Pillo-Wip went at it in true business style, and before long they could fly from one branch to another one lower down. Then they got so they could rise to a higher perch, and all the time Peeny-Wee sat on the edge of the nest.

"Why don't you try, Peeny-Wee? Your brothers will beat you all hollow, and some day you'll fall off and the cat will get you."

"I'm getting the theory into my head first before I practice," said Peeny-Wee. "It's easy. You just spread your wings and flop them, and then off you go. That's all there is to it, Bob and Pillo-Wip make awful mistakes."

"But try, Peeny-Wee," urged Ma Robin.

"But try, Peeny-Wee," urged Pa Robin.

the formation of bone, may be obtained by the eating of eggs, rice, rhubarb, whole wheat, and the drinking of milk. An irritating cough is often caused by the uvula (the fleshy, conical body suspended from the palate over the back of the tongue) being enlarged. When this is the case, consult the doctor, as medicines and gargles only temporarily check the annoyance. After bad food, the next greater cause of disease is lack of exercise. Specific cases require specific treatment always, but it is safe to say that a walk of three miles each day in all weathers is the least amount upon which health can be maintained. Sugar makes heat, and also gives muscular energy. In times of great exertion, the rapidity with which it is assimilated gives sugar a great advantage over starchy foods. Sugar should be used sparingly by one who has a torpid liver, and not at all by one affected with diabetes.

REGULAR EXERCISE.

Diet and exercise will reduce your weight if you persist! Do you exercise until you perspire profusely? And do you abstain from all sweets, cereals, starch vegetables, butter, cheese, milk, and chocolate, also pork, veal, salmon and hearty soups? In general, avoid fatty, starchy, and sweet foods. Don't be discouraged. You will succeed unless there is some serious reason for your stoutness.

DANGERS OF MEAT.

Once a day is quite enough for the average woman who has reached the age of forty to eat meat. Most women eat far too much as they get on in years and as a result lose their complexions and their figure.

HAIR RESTORATIVE.

To two parts of the best olive oil add one of spirits of wine or of good rum; put them into a bottle and shake well to gether. With this anoint the head well morning and evening. For the first fortnight it should be carefully rubbed with a piece of flannel into the parts of the head most affected; after that time care must be taken not to injure the young hair by a too violent application of the restorative.

REFRESHING REST.

Five minutes' rest, lying down in a darkened room with closed eyes and thinking of nothing, will brighten up a woman who has been hard at it during the morning hours without a break. The muscles of the face relax, and the hard, set look which adds so many years to a woman's appearance will gradually fade away.

TROUBLESOME FEET.

If the feet are inclined to perspire unduly, bathe them occasionally with alcohol. This restful, besides. Choose easy, but not slouchy shoes for the house. The heels should be low, and you should force yourself to tread these firmly.

DEEP BREATHING.

No woman can have bright eyes, a beautiful skin, or an elastic step, if she does not supply her lungs with oxygen. She can do this by deep breathing. The indolent woman regains her lost energy when she learns how to breathe correctly. The sallow girl, with the dark circles around the eyes, discovers that with correct breathing the congested veins will yield to the stimulated circulation, the dark rings disappear, and the lustre reappear in the eyes.

When a man has nothing to do he always attends to it personally. We should never fully realize how great some people are if they didn't tell us. "Nice hotel you've got here," said the affable stranger. "I'm glad you like it, sir," said the landlord. "Do a good business?" "Oh, splendid!" "Make a large profit?" "Immense profit!" "I'm glad to hear it," said the stranger, pleasantly. A little later the landlord asked another of his guests, a commercial traveller, if he knew who the gentleman was. "Oh," replied the traveller, "he's the new income-tax assessor."

belonging to the managers of the Metropolitan Asylums Board, 2,976 are in training and industrial homes, 180 are in institutions for the blind, deaf and dumb, epileptics, etc., and 125 in hospitals and convalescent homes for the sick. During last year the guardians of London had 37,747 children on the outdoor relief lists, and this Christmas there are 17,227 children under the age of 16 receiving help, as against 18,000 in December, 1904.

ESCAPED JUST IN TIME

UNPLEASANT ADVENTURE OF LADY AND FIVE SAILORS.

Intended Victims of Cannibal Feast Escaped When All Was Ready.

Although the wreck of the American four-masted ship *Susquehanna* was reported, it is only now that details of what befell Mrs. Elwell, a passenger, and five of the crew, have reached London.

The *Susquehanna* was on its way from New Caledonia to Delaware. The voyage began pleasantly, but when near the Solomon Islands a severe storm arose. This continued for three days, when the *Susquehanna* was driven on a reef, within sight of one of the Solomon group, and the crew and passengers took to the boats.

The boat in which Mrs. Elwell was placed was manned by five sailors. It reached land. There a score of savages, armed and menacing in their manner, met the castaways, who were unarmed, except for one musket. Mrs. Elwell, however, greeted the natives with smiles and friendly gestures, and the attitude of the savages softened so that the party were conducted to one of the native huts and provided with food and water for two days.

Early on the third morning, however, there was a great outcry. The chief, who had been lying ill in the next hut to that in which Mrs. Elwell was accommodated, died. After an excited pow-wow, the savages laid this misfortune to the near presence of the visitor's FIRES LIT FOR THE FEAST.

They carried them off to a more distant hut, where they were placed under strong guard. Fires were lighted and preparations were made for a great orgy. Of its character Mrs. Elwell and the sailors could have no possible doubt, for on the way from the beach they had passed many bleached human skulls lying on the ground, while the natives all wore necklaces and wristlets of human bones.

The prisoners accordingly decided to make an effort to escape. The high spirit of Mrs. Elwell encouraged the sailors to desperate exertions, and as the attacking party came up by night towards the hut the castaways crawled, one by one, through a hole which had been dug on the other side, and made for the boat on the beach.

They reached the boat and pushed off, only half a dozen yards in front of the leader of the cannibal pursuers. For 19 hours, without food or water, they rowed about in the hope of being seen by a friendly trader.

Then they were picked up by the captain of the steamer *Aola*, and taken to San Christobal, where the captain and the remaining members of the crew of the *Susquehanna* were found.

The father of a young man who had been lately married had occasion to send a faithful but somewhat blunt old servant to his son's house, some miles distant, on business. On his return, anxious to hear the old man's opinion of the lady, he said: "Well, you saw the bride, Thomas?" "Yes, master, I saw the bride." "She's a wealthy lady, Thomas." "Yes, master, very wealthy. I suppose." "Well, and what's your opinion, Thomas?" "I think she's a right bonny lady to talk to, as well as being rich and clever; but, master," said the old man, confidentially, "if beauty's a sin she won't have that to answer for."

The hurricane struck the *Milli Atoll* at 8 a. m., bringing with it three great waves following one another at intervals of about three minutes. The third and highest wave towered above the crowns of the palm trees, around which the nuts grow, and literally swept everything before it. The three waves rose to a height of from 35 to 50 feet above the usual water level.

The whole southern coast of the atoll, consisting of inhabited islands, thickly strewn with palm growths, was swept clean of everything rising above the sand. Only two little spots were left above the waters, their immunity being due to the protection afforded by Knox Island, a little to the south. Seventy lives were lost on the *Milli Atoll*.

Fifty miles further north the *Arno Atoll* was greatly damaged and on the southeast side three-fourths of the land was washed away. Only eight lives were lost, however, this being due to the fact that the east side of the atoll is so narrow that most of the natives as the wind rose to hurricane force had time to reach the shallow lagoon within, where they remained immersed up to their necks until the storm subsided. The big waves spent their force upon the land and the natives in the lagoon ESCAPED THEIR VIOLENCE.

Several big waves swept over part of *Jaluit Atoll*, destroying the houses of the entire European population. The missionaries hurried with their pupils into the great warehouse of the *Jaluit Trading Company*; which, fortunately, was not moved from its firm foundation and all taking refuge there escaped unharmed.

Jaluit is the centre of the island trade. A number of sailing vessels at anchor in front of the reef were dashed on the rocks and wrecked. The steamer of the *Jaluit* company, moored with two big anchors, put on all steam to keep its head to the wind and thus escaped destruction.

The eastern islands of the *Jaluit Atoll* were almost wholly swept away down to the reef so that small vessels are now passing over the places where they stood. Seventy-three natives of this atoll lost their lives.

The western islands of the Marshall group were also damaged; but the loss was trifling as compared with that of the eastern atolls.

The atolls of this group were scattered over a large area so that some of them are hundreds of miles from their nearest neighbors. The result is that communications between them are infrequent.

An illustration of this is the fact that fears are expressed in the latest news from the Marshall Islands that Lelang Island, which scarcely rises above the water level and is inhabited only by one European and twenty natives, may have been destroyed by the storm. News as to their fate could not be obtained until the close of the year, as a ship from *Jaluit* visits the island only once in six months to carry provisions to the inhabitants and bring off the copra they have prepared.

SOUP FOR THE FIRING LINE.

Special Cart Is Being Introduced by Lord Kitchener.

The "Kitchener soup cart" is likely to become an important feature of the Indian Army. Its object is the provision of hot beef tea for soldiers on the march and in the firing line, and it is now being tested by order of Lord Kitchener in the command of Gen. R. A. P. Clements at Sirhind.

The cart has been adapted from a Russian pattern which was used in Manchuria. For men who lie exposed in trenches it will prove a great blessing, providing a welcome change in the cold tinned rations which frequently form their staple food.

On the march the soup boiler will simmer away, ready for the first long halt, and on resting for the day, a pint of beef tea will be ready at once, thus allowing the cooks ample time to prepare a full evening meal.

Lord Kitchener is experimenting with many forms of equipment and gear used by the belligerents in the Far Eastern campaign, including the Japanese ammunition carrier, the Austrian field telephone, and the German system of wireless telegraphy.

"I'm getting the theory into my head first before I practice," said Peeny-Wee. "It's easy. You just spread your wings and flop them, and then off you go. That's all there is to it. Bob and Pillo-Win make awful mistakes."

"But try, Peeny-Wee," urged Ma Robin.

"But try, Peeny-Wee," urged Pa Robin.

"All right. Here goes. Look out of my way."

Peeny-Wee suddenly spread her wings and away she went, like any real bird. But she hadn't planned where she would light; so she kept going—going—down—down—and before she knew it she found herself on a rosebush by the porch and a little girl cried out:

"Oh, see the dear little baby bird," and down the steps she ran to look at it.

Peeny-Wee did not mind, but Ma Robin did decidedly. Danger! Fly! Ma Robin fluttered and circled madly about in dreadful fear.

Peeny-Wee didn't see anything wrong with the rosebush, but she knew she must fly away if her mother said so. So she spread her wings and flew—straight on to the shoulder of a little girl.

And then, oh, how Ma Robin shrieked. It was awful to hear her.

"There's something wrong with this, too; but I don't know where to go next," said Peeny-Wee.

She flew again. This time she lit on the grass.

"The cat! the cat!" screamed Ma and Pa both at once. "Oh, you heedless Peeny-Wee!"

But the cat was off in the meadow, and before she came back Peeny-Wee had managed to scramble up again into the apple tree, where the nest was.

"Now, you sit there, and don't you stir again all day—not a feather!" said Pa Robin sternly.

"I didn't want to go in the first place," said Peeny-Wee. "You made me. You're all making a good deal of fuss. Oh, I wish I had a good worm!"

"Any way," she reflected as she sat watching the others: "I showed 'em I could fly all right."

CHINA LIKES BAD EGGS

In China eggs are considered a delicacy only when they are decidedly "ancient." They reach perfection when they have become almost completely green as the result of several years burial in chalk or sawdust. The price for such eggs rivals that given in this country for the choicest wines.

A man may owe something to himself, but the chances are he owes more to other people.

CANADA'S WHEAT BELT

WHERE IT IS, WHAT IT IS, AND HOW IT LOOKS.

Will Canada Feed the World?—The Peace River County—The New Granary.

I am writing at Edmonton, 400 miles north of the United States boundary, writes Frank G. Carpenter. I am on the frontier of the great wheat belt which the Canadians are opening up, and which promises to revolutionize the bread markets of the world. I have been travelling for three weeks through the grain lands, and am now, in a straight line, about as far northwest of Winnipeg as from New York to Chicago. Along that line there is wheat all the way. Lower Manitoba produced more than 40,000,000 bushels last year, and something like 100,000,000 bushels were harvested in Canada.

The size of Canada's new bread basket is hard to define. The area I have described has been thoroughly prospected. Wheat is actually raised in all parts of it, and I hear stories of great wheat lands beyond. Three hundred miles due north of Edmonton, on the Peace river, they are raising big crops, and flour mills are now grinding away at Fort Vermilion. They receive good prices on account of the high freight rates which prevail throughout the wilds of the Northwest, and the farmers are getting \$1.50 a bushel for their grain. Railroad engineers who have been surveying the extensions of the Canadian Northern and the Grand Trunk Pacific railroads, which are to be built from here across the Rockies, tell me that there is good land all the way from Edmonton to the foothills, a distance of several hundred miles, and that settlers have already begun to penetrate that region.

According to the best Canadian authorities, the wheat belt so far defined comprises a strip extending from east to west across the boundary of Western Minnesota, North Dakota and Montana.

MEASURING 800 OR 900 MILES,

and extending northward a distance equal to that between Philadelphia and Pittsburgh. The men who have lived here longest advance the most rosy views. They believe the new area has several hundred million acres, estimating it as equal to about eight states as big as Ohio, or six or seven of the size of Pennsylvania or New York. This does not include the vast region north of where I am writing.

This mighty farm is being opened up by the railroads. Between 2,000 and 3,000 miles of new tracks were constructed last year, and three great systems are now pushing their way through it. The old line of the Canadian Pacific goes across it not far above the international boundary, and that company is constructing new branches to the northward. It will build one line almost direct from Winnipeg to Edmonton. The Canadian Northern, which is but little known in the United States, has just completed a trunk line to Edmonton, and it has in addition a road reaching north to Prince Albert, which lies hundreds of miles east of here, on the Saskatchewan river. The Grand Trunk Pacific is building between Winnipeg and Edmonton, going through a rich wheat country some distance north of the two other lines, so that the whole land is humming with railroad possibilities.

My first trip across the wheat belt was on the Canadian Pacific. The country is all prairie and flat. In some places the lands are plain, in others rolling. Some of them are like Illinois and some like North Dakota. In Manitoba and the greater part of Saskatchewan you ride for miles through wheat fields with patches of prairie between. A little farther west you strike a region somewhat like Montana. It is, in fact, the extension of the Montana semi-arid country

cars in front of the train, filled with emigrants from Europe, and there are tourist sleepers containing farmers from the United States. Our route is through a new region. The track was laid two years ago, but all along it there are now plowed fields interspersed with unbroken prairie. The time is the autumn. The wheat has been harvested, and great straw stacks stand here and there over the plain. Much of the grain is still in the shock. It will be hauled direct to the threshing, the wheat going almost straight from the field to the markets.

Everywhere men are plowing. Notice the soil. It shines like black velvet under the sun. What mighty plows! Each is drawn by six horses, and long lines of them follow one another over the fields. Here and there, at long distances,

STEAM PLOWS MAY BE SEEN.

The threshing is still going on. We can see the smoke rising from the machines scattered over the landscape. The chaff flies out like smoke from the end of the stack. Every railroad station has long teams of wheat wagons. The beds of the wagons are filled to the top and the grain is unloaded at the station elevators. In some places the wagons drive up on platforms and unload direct into the cars.

The towns are new. And such towns! They look ragged, and most of the buildings seem to be knocked up with hatchet and saw. The average settlement consists of one street of irregular one and two-story buildings facing the railroad. A wheat elevator stands near the track and often the elevator and railroad station are the only buildings. The sound of the hammer and saw is everywhere heard. Nothing is old. You can smell the paint on the houses and the aroma of the pine-board walks which run along the street.

Now we are, again off in the country. Notice the straw stacks which run in long rows through that 100-acre field. Each has about ten furrows plowed around it within 100 feet of its edges and another ring of furrows outside, the strip between being burned over. The black circle is to ward off the fire god. There are frequent prairie fires which run through the stubble, and were it not for this fire-proof carpet the wheat stacks would burn. Those stacks are yet unthreshed. Each of them is a little gold mine which has only to be passed through the threshing machine swelter to be turned into bullion. Each contains hundreds of bushels of wheat, and the smallest of the stacks is worth \$200.

Speaking of fire, as nightfall approaches, the red flames are to be seen on each side of the railroad. They come from the stacks of the newly threshed straw, which are burnt on almost all these Canadian farms. In New York or Chicago such straw would bring \$5 or more per ton. Our farmers would save it for stock feed or fertilizer. Here it goes to waste, and the marks of its destruction are left in those great patches of black which we see everywhere as we ride through the country.

HOW RICH THE SOIL IS!

It is as fat as the valley of the Nile. In Manitoba, where the land has been used over and over for wheat, the crops are almost twice those of the United States. Our average falls lower and lower. It is now only about thirteen bushels to the acre, while the average in Canada is twenty bushels or more. Much of this new land produces 30 and 40 bushels, and here about Edmonton the farmers discuss 50 bushels as a possible winter wheat yield. A good average on the new lands well farmed would probably be 25 bushels per acre, or almost twice what we are getting in the United States.

While at Winnipeg I had a chat with Charles N. Bell, who is considered one of the best authorities on wheat raising in the Canadian Northwest. He is the secretary of the Winnipeg Board of Trade, and has held the position for years. He came to Manitoba when it was a wilderness and has travelled all over this region again and again. Said he:

"According to the threshers' returns our wheat crop of last year averaged

GAY TEXAS CATTLEMEN

EARL OF AYLESFORD'S RANCH PARTY NEAR BIG SPRINGS.

Cattle Raising Was a Secondary Consideration to This Young Nobleman.

"The experience of the members of the English aristocracy in the cattle business in the United States have left a fund of amusing anecdotes in the Southwest," said H. L. Carlin, who was an employee of the Texas and Pacific Railroad Company in western Texas in the early 80s, to a Guthrie correspondent of the Kansas City Star.

"I have a keen remembrance of the Earl of Aylesford, who bought a ranch near Big Springs, Tex., about 1884 or 1885. I was living at Big Springs and saw the Earl and his companions almost daily. His family name was Finch, and with him were his two brothers, Clem and Dan Finch, a rollicking blade known as Lord Harry Gordon and an Episcopal clergyman known as Bishop Bernard.

"Locally, the Earl was called 'Judge,' which he did not resent. He was reported to have an income of \$25,000 a year, and his expenditure indicated that his means were large. He bought a frame hotel at Big Springs, which he used exclusively for himself and party when they were not at his ranch. He once was owner of

A BIG SPRINGS SALOON

for one night. He paid \$6,000 for the establishment and presented it next morning to the man from whom he bought it. I never saw any members of his party pay for anything. They played pool and billiards frequently in a local resort, smoking the best cigars and taking their drinks regularly. At the close of their games the tickets were cashed by the Earl.

"The Earl and his friends were great sportsmen. In the field they often used .20 calibre guns for birds, shooting pin-fire shells imported from England. The Earl had hunted in all the big game countries of the world, and his collection of furs, skins and heads was of great value. His ranch house was filled with them. In cedar chests he kept photographs and mementos of his life abroad. His ranch house was burned by accident one night, and was destroyed with all its contents.

"I was invited once to join his party in a winter hunting trip, and during the expedition saw a surprising illustration of the bath loving Englishman. The weather was cold and I had arisen early, chilled to the marrow, and was shivering near the cook's fire, when Gordon crawled from his sleeping bag to dress. About fifty feet distant was a pool of water covered with a thin coating of ice. 'Bless me soul,' shouted Gordon, 'what a jolly chance for a bath,' and he plunged into the water, breaking the ice as he went and followed by the Earl and his brothers. The sight was excruciating to a warmth loving American, but the bodies of the Englishmen glowed pink and red.

IN THE FROSTY AIR.

"Despite his youth—he was about thirty-eight—the Earl was looked upon as an elderly man by his companions. He had gone the pace, and soon paid the penalty. When his physician called one morning the Earl, who had been in bed several days, asked that his pulse be taken. 'Well, Judge, I should say, that you have about fifteen minutes to live,' said the physician, after making his examination. 'If that be your opinion,' replied the Earl, without a tremor, 'give me a good, big farewell drink of American whiskey.' He emptied his glass, and with a long sigh turned on his side and was gone.

"The cablegram business at the little telegraph office of Big Springs for the next few days astonished the operators. The rate was \$1.10 a word, and the

FROM BONNIE SCOTLAND

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going on in the Highlands and Lowlands of Auld Scotia.

At Hawick a farm servant was observed to fall on the pavement, and the police, thinking he was drunk, gave him the frog's march to the police station. There it was found that the man was dead.

The County of Sutherland Association is issuing a magazine to bring the working inhabitants of the county more into touch with modern methods of life. The Duchess of Sutherland and Mr. Carnegie are contributors.

Arrangements are being made in different parts of Scotland and in England and in Wales for getting up a testimonial to Mr. Roderick MacLeod, the well-known vocalist, in consideration of his great services to Gaelic by his rendering of Gaelic songs.

Dundee Water Committee is prepared to give an augmentation supply of water to St. Andrews for 6d. per 1,000 gallons thereafter, the annual minimum payment to be £250, on condition that they lay a pipe along the Tay Bridge and between Wormit and St. Andrews, which will cost about, £13,000.

Craigie Works, Dundee, belonging to the estate of the late Mr. William Gibson, Jr., Dundee, were exposed for sale publicly. The establishment consists of a jute mill and factory, with ponds and warehouses, and was purchased at the upset price of £20,000 by Mr. J. K. Caird, manufacturer, Dundee.

A proposal is on foot for union between the North and East United Free churches in Kelso, the opportunity for such union having occurred through the resignation of the charge of the North church by the Rev. John Watson, M.A., who recently accepted a call to return to mission work at Amoy, China.

The engineering department of the Edinburgh University has just moved into new buildings, which have been equipped in the most modern manner. The cost has been defrayed by the University Court from the Carnegie grant. Part of the new laboratories consists of the old High school buildings at High School Yards.

The final meeting of the Hugh Miller Centenary Committee, formed three years ago, was held a few days ago. The institute erected in Cromarty as the result of the centenary movement was handed over to permanent trustees along with the endowments. Including Mr. Carnegie's gift the sum of £1,800 was raised by the committee.

Lieut.-General Sir Ian Hamilton, K.C.B., D.S.O., unveiled the memorial to the officers and the men of the Queen's Own Cameron Highlanders, who fell in the South African war, which has been placed in St. Giles' Cathedral, Edinburgh. A guard of honor of 50 men, with the regimental colors and the band of the regiment from Dublin took part in the ceremony.

The death took place on the 16th inst., of one of Glasgow's oldest medical practitioners, Dr. James Gray, who passed away at the age of 86. Dr. Gray, who was a member of the Faculty of Physicians and Surgeons in Glasgow, was born and brought up in the city of Perth, his father being manager of the Perth water-works. About ten years ago he practically retired from active business.

SENTENCE SERMONS.

Faith is foresight.

Charity for revenue is dead loss.

A merry health kills more microbes than any medicine.

Putting pleasure first is a sure way of postponing it.

There can be no reverence where there is no respect.

He who locks his tongue in locks a good deal of trouble out.

greater part of Saskatchewan you ride for miles through wheat fields with patches of prairie between. A little farther west you strike a region somewhat like Montana. It is, in fact, the extension of the Montana semi-arid country, and a part of what was once known as the great American desert. In the far West, this is devoted to grazing, but they have begun to raise winter wheat even on the dry lands, and their possibilities are not yet defined. A little farther westward, just before you reach the foothills of the Rockies, some

BIG IRRIGATION PROJECTS

are under way, and winter wheat is being raised at points both north and south.

Leaving the United States boundary and travelling northward, the land grows better. This is especially so at the west, where there are trees and patches of thicker scattered over the plains. The spring wheat region begins with the Red river valley in Manitoba and runs northwesterly in a great tongue or triangle, spreading as it goes.

I find much difference in the quality of the land. Some pieces are excellent, others are of a medium grade, and not a few decidedly poor. The country is covered with a network of streams. The mighty Saskatchewan, which compares in size with the Mississippi flows through the wheat belt from west to east emptying into Lake Winnipeg. And from there going on through other streams into Hudson's Bay.

I am now writing on the banks of the Saskatchewan. It is navigable for small boats for about 1,000 miles, and during the summer it is used largely by settlers. They come here to Edmonton on the railroad and float their effects down to the homesteads which they have picked out upon the banks. They use flatboats and rafts just as the pioneers did along the Ohio in our early days. I have before me maps which show what homesteads have been taken. The lands are pretty well absorbed on both sides of the river for a distance of 1,000 miles. Many little towns have sprung up. The same is true everywhere along the new railroads, there being something like 40 new towns on the Canadian Northern alone. Indeed, the whole wheat belt is peppered with homesteads, although not five per cent. of the good land has been occupied, and the greater part of it is yet unbroken.

These Canadians are enthusiasts. They look at things through eyes like those of Colonel Sellers, and they are expecting eventually to supply not only Canada and Great Britain, but also the United States and other countries with wheat. They say that the United States is growing so that it will consume all the grain it can raise, and that our wheat area is already defined. They think also that our wheat crop will grow less from year to year, while theirs must be multiplied by ten or twenty before it reaches its maximum. The world's wheat crop now averages something like

3,000,000,000 BUSHEL.

Indeed, it is often much less. Last year Canada raised 100,000,000 bushels on 4,000,000 or 5,000,000 acres. Among the lowest estimates of the wheat lands are those which put them at 10,000,000 acres. The land here produces almost one-third more than in the United States. It will average at least twenty bushels per acre, and this would mean a crop of 2,000,000,000 bushels if the wheat belt should all be cultivated. This is more than two-thirds of all the wheat now raised by man. Our crop of last year was only 684,000,000 bushels, and it was the second largest we have ever raised. I believe the acreage was something like 9,000,000. The average Canadian, however, will tell you that their possible wheat area is far more than 100,000,000 acres, and that Canada can let one-third of its wheat lands lie idle and still control the markets of the world.

But come with me and take a look at the mighty granary. We shall go on the Canadian Northern one of the new railroads. Our companions are young men, many of whom are land seekers and settlers. Some have money with them and others have their household effects on the way. There are colonist

years. He came to Manitoba when it was a wilderness and has travelled all over this region again and again. Said he:

"According to the threshers' returns our wheat crop of last year averaged about 24 bushels per acre, this average coming from more than 4,000,000 acres. Some of the crops were far more and some much less. We have all kinds of farmers, and many European immigrants do not get the best out of the soil."

"Is there much difference in the wheat land?" I asked.

"Yes, although they are generally good throughout. The settlers have taken up patches here and there over a large extent of territory, and nearly every farm is yielding from 25 to 30 bushels per acre. The wheat territory has thus been pretty well prospected and we know that most of the country is good."

"What is your possible wheat acreage, Mr. Bell?" I asked.

"It is greater than that of the United States. We have here something like 32,500 square miles of wheat lands in sight. Divide this by half, setting the balance aside for bad land and mixed farming propositions, and there is left 160,000 square miles. In round numbers it is 100,000,000 acres, and the probability is that we can raise 25 bushels of wheat to the acre. This gives us a crop of

2,500,000,000 BUSHEL.

which is considerably more than three times as much as the United States has ever produced. I do not say that Canada will reach that crop soon, but her wheat yield will steadily increase, and it will not be long before it will equal that of the United States."

"When was wheat first raised in the Northwest, Mr. Bell?" I asked.

"We were producing grain near Winnipeg long before your Western states and any existence," was the reply. "As far back as 1812 Lord Selkirk brought a colony to Manitoba, and that colony raised wheat. The settlers came in by Hudson's Bay, and worked their way down here. They were then so far from the markets that there was no demand outside their own wants, and it was only when the United States had developed its West that we began to farm in earnest. Even then we had to wait for the railroads, which were first built along in the '80's. To-day the lower part of Manitoba is one of the world's great granaries. It produced 1,000,000 bushels in 1886, 14,000,000 bushels ten years later, and in 1901 the crop was 50,000,000. A large part of last year's product came from this same region, but much of it was from the new fields which are being opened up farther west."

"What do you know of the wheat lands north of where the settlements now are?"

"They are undoubtedly extensive. Take the Peace river country, which lies north of Edmonton, extending to the Rocky Mountains. That river is big enough for steamboats. My son travelled eleven days upon it last winter, and found wheat growing at the very headwaters. The crops there are raised by the Indian missionaries and by the Indians themselves. My boy saw one Indian farm which yielded 3,000 bushels last year. That northern wheat is better than any other wheat known. The farther north you go the better the quality of grain, vegetables or fruit. East of the Peace river is a region of which we know comparatively nothing. Thousands of miles of it have never been trodden by white men, and no one can tell what it will or will not produce. Indeed, Canada is as yet an unprospected agricultural region. We know that we have a large part of the earth and the fulness thereof; but just how much remains to be seen."

TIME-LOCK TOBACCO BOXES.

To cure the craving for tobacco a time-lock for tobacco-boxes has been invented. The lock is set for a certain time, and refuses to open until the right moment. The cure is effected by gradually extending the intervals of abstinence.

and with a long sigh turned on his side and was gone.

"The cablegram business at the little telegraph office of Big Springs for the next few days astonished the operators. The rate was \$1.10 a word, and the cable was used as if the senders were writing letters. One of the first messages of condolence from England came from the Prince of Wales, now King Edward. The body of the Earl was taken home by all his retinue, and none of them ever returned. Incidentally, the physician found that the Earl's liver weighed fourteen pounds."

REASON FOR LOW BIRTH RATE.

Desire for Great Comfort, Not Poverty, the Principal Cause.

Dr. Arthur Newsholme, Medical Officer of Health of Brighton, England, and Dr. T. H. C. Stevenson, Assistant Medical Officer to the Education Committee of the London County Council, are taking the greatest interest in the subject of the declining birth rate. They have prepared a joint paper in which two main theses are advanced that the inhabitants of the United Kingdom and other civilized countries are markedly less fertile than was the cause but a few years ago, and that this state of affairs is due to other than natural causes.

"France," said the joint authors, "has anticipated the rest of the world, and has thus come near the consummation of its social felo-de-se. But it is only a question of decades, in the absence of a great change in the moral standpoint of the majority of the people, before other countries follow in the same direction, possibly even at the same pace. The outlook is gloomy, and we cannot look with confidence to the help which is likely to come either from preaching or medical teaching."

For the purpose of comparison the birth rate of Sweden is taken as the standard of all of the European countries. In that comparison the only country showing a stationary birth rate is Austria. Taking the countries as a whole, however, the joint authors conclude that there cannot be any direct relationship either in 1881 or in 1902-3 between the degree of national prosperity and the birth rate. Norway and Ireland, both relatively poor countries, have a high birth rate, but Bavaria and France which are relatively more prosperous, have one a high and the other a low birth rate. The authors conclude that it is by no means certain that children would be better reared because less numerous. With the decreasing birth rate in England and Wales there had been no reduction of infant mortality.

The whole field of collected facts seemed to lead to the conclusion that the decline of the birth rate was not due to increased poverty, but was associated with a general raising of the standard of comfort, and it was an expression of the determination of the people to secure this great comfort.

A PLEASANT AWAKENING.

The most curious story of modern fortune is that which relates to the late Colonel Harry McCalmont, says the St. James's Gazette. He was as poor as need be, though none the less happy for that. He went to the reading of his uncle's will hoping that perhaps the departed gentleman might have remembered him to the extent, say, of an old watch. True enough the lawyer read out the words. "To my nephew, Harry McCalmont I leave my watch and chain." The legatee was satisfied, and leaving back, he drowsed, lulled by the monotonous tones of the lawyer as he read through the long instrument. At the close he rose to go. "I congratulate you," said the solicitor. "I don't know why you should," said the other. "You are residuary legatee," remarked the lawyer. "You will have £4,000 annually for the first five years from this date, and afterwards you will inherit some seven millions sterling." We have all awakened hearing the same sort of story. But ours have been dreams; this was real.

Putting-pleasure first is a sure way of postponing it.

There can be no reverence where there is no respect.

He who locks his tongue in locks a good deal of trouble out.

The religion you can keep to yourself is not worth giving away.

A good many are trying to wash out the slums with teardrops.

Some winter is always sent to those who have a great work to do.

When a man boasts of his humility you can depend on his hypocrisy.

Sins that make you lose your head have the same effect on your heart.

Some men expect to unload their own sins by confessing those of others.

If criticism began where charity is said to it would seldom go any farther.

Heaven regards the heart that comes to the altar more than the gift it leaves there.

It will not do us much good in heaven to think of the things we had thought of doing here.

A DESERT RAILWAY.

Undoubtedly the distinction of being the most dreary railway journey in the world must be accorded to that portion of the Southern Pacific Railway which runs through Arizona and the lower part of Southern California. For a distance of nearly a thousand miles the country on either side of the track is practically a desert—flat, dreary, and totally uninteresting. Here and there patches of thorny "mesquite" brush alternate with vast stretches of grey and red sand and expanses of snow-white alkali. Other vegetation there is none. That portion of the line extending between Yuma and Carlton, a distance of 180 miles, runs through a wilderness of shifting sand, devoid of either animal or vegetable life, and absolutely uninhabitable. For ten months in the year the temperature seldom falls below 100 degrees, and often rises to 130 in the shade. The greater portion of the desert is between 500 and 800 feet below the level of the sea, and is, as might be expected, entirely destitute of fresh water.

THE FIRST IRON SHIP.

An iron boat built in 1777, on the river Fosse, in France. It was fifteen feet long, and made of sheet-iron. In 1815 Thomas Jevons launched a small iron boat on the Mersey. It was built by Joshua Horton, near Birmingham, and fitted up at Liverpool, and was the first iron boat that floated on salt water. The first iron steam vessel was built by the Horsley Company for the River Seine, and called Aaron Manby, after its projector. He took out a patent in France for iron steamships in 1820, and formed a society for the construction of such vessels. She was put together in London, and took a cargo of linseed and iron castings to Havre and Paris. If, however, a Dutch tradition is to be credited, the first iron vessel that ever floated was the famous Flying Dutchman herself. She was launched in 1657, and her fate was supposed to be a judgment on the impiety of those who violated the order of Nature by making iron float.

HOW TO AVOID "CHAPS."

Everybody knows that, generally speaking, the effect of cold is to contract, and that of heat to expand. This general law of Nature finds no exception in our bodies, and when any portion of the body gets cold the blood-vessels which traverse it contract, with the result that the flow of blood is diminished. Subsequent exposure to heat causes the blood-vessels to resume their former size, and, if anything, to slightly exceed it, owing to the reaction on the effects of the previous cold. The result of these different operations is very naturally to crack the surface of the skin, and form the unpleasant little wounds which we call "chaps." This annoyance may be prevented by exercising care not to expose the hands to the extremes of cold and heat. If the hands do get thoroughly chilled, care should be taken to see that they are warmed again as gradually as possible. Anything like putting them to a hot fire, and thus inducing a rapid change in their condition, cannot fail to induce "chaps."

ND INSURANCE IN BELGIUM

HOW THE GOVERNMENT CARES FOR THE POOR.

People Protected Against a Penniless Old Age — Thriftiness Encouraged.

Few people in this country are aware that the paternal Government of Belgium does a general life insurance business, issuing both straight life policies as well as term, or endowment, policies. It goes further and contracts to pay annuities to such of its citizens as desire them. This life insurance and annuity business is grafted upon the governmental postal savings bank system.

Under this singular financial system, the poorest individual in the little kingdom can secure a moderate life insurance policy or annuity by the payment of trifling annual premiums, or derive interest on his small deposits in the postal savings bank.

The system, paternal to an extreme was adopted to encourage national thrift, and has fully vindicated its purpose. There are few or no beggars in Belgium. It works smoothly and apparently is without a flaw. No corruption has developed in connection with the system, complex and peculiar as it is. It has been in practice upward of half a century. The balance sheet of the Belgian National Bank on December 31, 1903, the last report within reach, showed deposits to the credit of the three institutions of \$45,992,768, approximately, \$7 per head of the total population of Belgium. The aggregate is much greater now.

POSTAL SAVINGS SYSTEM.

The most important branch, of course, is the postal savings system, well worth a study. Every possible facility to make deposits is afforded the public. They are made in the post-offices and bank agencies as low as 20 cents. More than \$965 cannot be deposited in any period of two weeks without special authorization. The interest rate is fixed periodically by the Government. At the close of the year the interest is added to the principal and begins to draw interest itself.

Each depositor receives a bank book free of charge. Special adhesive deposit stamps are used, which are receipts for money paid in and are pasted in this bank book. In it also are entered calculations of interest and all other transactions between the postal savings bank and the depositor. These books are called in for the annual calculation of interest. To prevent individual extravagance depositors are prohibited from hypothecating these bank books without a special permit. After receiving his book the new depositor can have entries made at any post-office in the kingdom. Deposits may also be made by postage stamps up to \$1.93 per month. To encourage deposits by children, and the very poor postmen in the rural districts carry with them the facilities for the purpose.

To get a book the depositor signs an agreement that he understands the rules, and that he will accept no receipt for deposits except the adhesive stamp, etc. Withdrawals of funds may be made at any post-office on application within fifteen days after the last deposit. For withdrawing sums between \$96.50 and \$193, one month's notice must be given; for \$193 to \$579, two months and for sums above \$579, six months.

The management is a general council of twenty-four members and a president, a board of six directors, and a general manager. All are appointed by the king for six years.

HAPPY THOUGH LIVING

DR. WILLIAM OSLER'S COUNSELS AND IDEALS.

Extract From Newly Published Collection of Sayings of the Oxford Professor.

"How to be Happy Though Living," or "Rules in the Game of Life," are the titles under which the London Daily Mail gives some of the sayings and advice of Dr. William Osler recently collected by an admirer, and just published in book form as "Counsels and Ideals."

But the Mail falls into the common error of calling the Regius Professor of Medicine at Oxford an "American physician" in their brief review of his career, which they have yet to learn began at Toronto and continued at McGill for some twelve years before the doctor accepted the post at the Johns Hopkin, Baltimore.

SECRET OF LIFE.

This is the view of "Counsels and Ideals":—

"The 'secret of life,' as Dr. Osler has 'seen the game played' and 'tried to play it' himself, is offered with much confidence. So certain is his faith in his prescription that he declares it 'will make the stupid man bright, the bright man brilliant, and the brilliant student steady.' 'It is directly responsible for all advances in medicine during the past twenty-five centuries. It is the measure of success in everyday life.'"

"The master word is Work." And the methods and maxims by which this secret—"work"—is to be practised includes the following:

"Throw away in the first place all ambition beyond that of doing the day's work well."

"Take no thought for the morrow. Live neither in the past nor in the future, but let each day's work absorb your entire energies."

AVOID WORRY.

"Make the lesson of each case tell on your education. The value of experience is not in seeing much, but in seeing wisely."

"The secret of successful working lies in the systematic arrangement of what you have to do, and in the methodical performance of it."

"Much study is not only believed to be a weariness of the flesh, but also an active cause of ill-health of mind in all grades and phases. I deny that work, legitimate work, has anything to do with this. It is that foul fiend Worry who is responsible for the majority of cases. . . . There are a few cases of genuine overwork, but they are not common."

"By nature man is the incarnation of idleness, which quality alone amid the ruined remnants of Edenic characters remains in all its primitive intensity."

"Do not get too deeply absorbed to the exclusion of all outside interests. No matter what it is, have an outside hobby."

"How can you take the greatest possible advantage with the least possible strain? By cultivating system. . . . Faithfully followed day by day system may become at last engrained in the most shiftless nature."

Under the heading of "Cupid and Marriage," the compiler gathers some of Dr. Osler's views on the need of students and young doctors to guard against falling in love:—

"The mistress of your studies should be the heavenly Aphrodite. Give her your whole heart, and she will be your protectress and friend. If she finds you trifling and coquetting with her rival, the younger earthly Aphrodite, he will whistle you off."

"In plainer language, put your affections in cold storage for a few years, and you will then take them out ripened, perhaps a little mellow, but certainly less subject to those frequent changes which perplex so many young men. Only a grand passion an all-absorbing

JAP ARRAIGNS ENGLAND

COUNT HIROSAWA SAYS HER PERIOD OF DECLINE HAS BEGUN.

Religion and Patriotism, This Gentleman Declares, Are on the Wane.

"The anglo-Japanese alliance is a mark of England's decadence. The suggestion that Japanese troops might be required for the defence of the English Indian frontier, is a suggestion that could only come from a nation which knows that its period of decline has begun."

This startling sentence is taken from an article that has caused a profound sensation in England. It is written, not as might be expected, by an irreconcilable foe of England, but by a pronounced friend of England, a Japanese, Count K. Hirose.

He was educated in England, took his law degree at Cambridge with distinction and loves England as his second home.

Count Hirose was a Samurai. His father was Minister of the Interior, and he was the private secretary of Field Marshal Yamamoto, prime minister and general. His views have made Englishmen sit up and think over the conditions of their country as no article appearing in a London publication for years has done.

"I notice," said the Count, after an absence of eleven years, "a distinct and lamentable deterioration in the character, habits and actions of the English people. In the first place there is a failure to appreciate the situation."

THE DANGEROUS SITUATION.

Other countries are not blind, and Japan is certainly alive to the changes for the worse in the administration and character of the English.

"I notice a distinct decay in religion. Religion and patriotism seem to be in the wane in England. I do not speak of much hall patriotism, but of self-surrender, such as we know it in Japan and as the Germans know it. I think that this new worship of material things is partly due to American influence on English character. You have become more excitable and materialistic, and the intermarriage between some of your peers and the daughters of rich Americans has helped to de throne the old English spirit of simple faith in noble ideals."

"The Americanization of the English is dangerous. Americans may try all sorts of experiments without harm. There is plenty of room to expand. You in England have no room to expand, and the conditions do not exist here which would enable you to try experiments of a socialistic and visionary description."

"I cannot speak much about the navy, but I gather that there are survivals from early days which will impede its powers on the day of action. But on the army I can speak plainly. Your Boer war, and the failure to organize an efficient military force adequate to your needs have made a painful impression in Japan."

"In your parliament there are far too many men with axes to grind, who are bent on personal advantage. I allude to neither party in particular, but generally there is an indifference to the country which saddens me. What will be the result in ten, twenty or twenty-five years I do not know. It depends on Germany. The Kaiser is the only man in Europe who has appreciated the real danger to the nations of the west of

THE JAPANESE RENAISSANCE.

"It is quite possible that in ten years time Japan will be in a position to build a Chinese fleet and that by the time the anniversary of Waterloo has arrived we may be on the road to construct a hundred battleships for ourselves and China. You are ceasing to

\$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Sunlight Soap

is better than other soaps, but is best when used in the Sunlight way.

Sunlight Soap contains no injurious chemicals.

Sunlight Soap is pure soap, scientifically made. Every step in manufacture is watched by an expert chemist.

Sunlight Soap saves labor, and the wear of rubbing which common soaps require in washing fabrics.

Your money refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

Lever Brothers Limited, Toronto

Seeing Lawgivers Through the Atmosphere of Caricature.

"If you wish to be a hero-worshiper never make a pilgrimage to see your hero," says some one. According to a correspondent of the London Chronicle, the way to maintain one's respect for the dignity of Parliament is to keep away from the houses during the session. The experience of this representative of the press was not one that tended to increase his awe for the visible workings of the government. Entering the gallery, he contemplated for the first time the legislators whose busi-

and for sums above \$579, six months.

The management is a general council of twenty-four members and a president, a board of six directors, and a general manager. All are appointed by the kind for six years. The general manager is subject to dismissal, and may not be a member of either House of Parliament. The system is constantly growing in favor.

HOW ANNUITIES ARE PAID.

But the Belgian life annuity and life insurance adjuncts are something unique. Yet they are apparently successfully conducted to the entire satisfaction of King Leopold's subjects. There are no data, however, showing the extent of their operations. By the required payments in to the Government annuity fund persons can secure for themselves or the benefit of others life annuities that cannot be seized for debt, and moreover, secure the payment of the capital paid in for the annuity to the beneficiaries' heirs after death. Payments for annuities can be made at all post-offices, national bank agencies, and branches of the savings bank. The largest annuity paid by the Government on such deposits is \$231.60 per annum; the smallest one franc (19.3 cents). Annuities do not begin until the age of fifty, and are payable annually. Annuities to begin immediately on the payment of the necessary capital may be arranged for. It can be arranged so that the whole capital goes to the fund after death, which gives the annuitant a larger annuity. A person depositing \$193 at the age of twenty-five would receive annually after fifty \$88.30; if contracted to begin at fifty-five, \$56.90; at sixty, \$89.10; at sixty-five, \$149.80.

ALL KINDS OF INSURANCE.

In connection with this annuity fund is an insurance fund. Both straight life and the endowment policy may be contracted for. Endowments can be made payable at the end of ten, fifteen, twenty, or twenty-five years, or for a period ending at fifty-five, sixty, or sixty-five years of age. The contractor must be twenty-one, and the beneficiary at least twenty-one, and not over fifty-five. The largest sum to be paid any one person on a policy is \$1,000. A annual premium of \$19.30 from a person thirty-five years old leaves his heirs as follows: If contracted to pay until fifty-five, \$556.32; sixty, \$639.57; sixty-five, \$683.63. A person of thirty-five, paying annually \$19.20 for an endowment, receives at certain ages these sums: At fifty-five, \$418.26; at sixty, \$518.53; at sixty-five, \$605.86.

This is apparently simple, cheap and reliable insurance. There is doubtless a small profit accruing to the Government for doing the business, but it must be infinitesimal. It is palpably arranged in the interest of the policyholders, and not of the officials.

ALL OVER THE EARTH.

No animal is met with over so wide an area of the earth's surface as man. The creature which most nearly approaches him in this respect is the dog, which, in one form or another, is to be found everywhere except in the West Indies, Madagascar, and the Oceanic Islands. Even to these places dogs have been introduced by men who came from countries where they abounded. In making the above statement, the word "dog" is taken to be equivalent to the more scientific term of Canidæ, which genus includes not merely the domestic dogs of various races, but wolves, foxes, jackals, and wild dogs, which all belong to the same great family. There is, indeed, no doubt that our canine pets are descended from the same common ancestors as the wild creatures just mentioned. Rats and mice are found almost everywhere on the earth's surface except in the central portions of the African and Australian continents, and in the cold regions of the extreme North and South. Bats, too, are very widely distributed.

with which you are on.

"In plainer language, put your affections in cold storage for a few years, and you will then take them out ripened, perhaps a little mellow, but certainly less subject to those frequent changes which perplex so many young men. Only a grand passion, an all-absorbing devotion to the elder goddess, can save the man with a congenital tendency to philandering."

ILLS OF OVER-EATING.

Other striking warnings are of this kind:—

"More people are killed by over-eating and drinking than by the sword."

"Adults eat far too much; the physicians are beginning to recognize that early degeneration, particularly of the arteries of the kidneys, leading to Bright's disease, which were formerly attributed to alcohol, are due in large part to too much food."

"One of the first essentials in securing a good-natured equanimity is not to expect too much of the people among whom you dwell."

DOCTOR'S SELF-SACRIFICE.

French Scientist Died From Effect of X-Ray Experiment.

Dr. M. Radiguet died in Paris recently from the effects of experiments on himself with Röntgen rays in the interests of medical science.

For the past two years he devoted himself mainly to the study of the effects of the X-rays as curative agents, and he had repeatedly subjected himself to their influence.

Latterly he began to suffer intense pain in his limbs, and two of his fingers were amputated. This operation yielded no relief, and the doctor died after enduring months of agony.

His last utterance was an expression of fervent thankfulness that had been permitted to establish reliable evidence as to the effect of the Röntgen rays on the human organism. It is stated at the clinical department of the university that discoveries of an important character will be revealed from his papers and treatises.

ADDING TO EGYPT'S WEALTH.

The Egyptian has decided to begin the construction of the new barrage at Esneh, in Upper Egypt, and has given the contract to the firm of Messrs. John Aird & Company. The time allowed for the completion of the barrage is four years. The building of this barrage is an important irrigation undertaking, and will render large tracts of land capable of perennial irrigation, thus adding materially to the wealth of Egypt.

"It is quite possible that in ten years time Japan will be in a position to build a Chinese fleet and that by the time the anniversary of Waterloo has arrived we may be on the road to construct a hundred battleships for ourselves and China. You are ceasing to be a maritime people, and as England is forsaking her maritime habits, Germany is increasing and straining every nerve to build up over-sea trade and a strong navy. Your public school spirit and university spirit is very good, but the time has gone by when wars can be won by pluck and spirit alone. Collision with a first-class scientific power will probably be disastrous to England—far more so than your newspapers and politicians believe."

The Count concludes by expressing the opinion that the complete revision of the educational system, and the adoption of universal military training, with the introduction of democratic methods into the system of government whereby efficiency should be the sole test of employment by the state, were the only means in which England could be saved from collapse.

MINISTER OF MEDICINE.

British Medical Journal Says He Should be in Cabinet.

The British Medical Journal contains the following expression of dissatisfaction with the new Government:—

"Although the whole fabric of modern civilization rests upon the application of science to life, it contains no representative subject which so nearly touches the welfare of the people as public health, it contains no representative of medicine."

"This will be a very great disappointment to many who entertained some lingering hope that new men would mean new methods; the medical profession must thus begin over again its task of endeavoring to convince politicians of the necessity for legislation in respect of matters to which they have hitherto given little attention."

EAST LONDON PREACHER.

Rev. "Tom" Collins, well known in the East End of London as the costermonger's parson, is enormously popular with the people among whom he labors. Nothing pleases him better than to chat with a lot of working men on sporting matters, regarding which he is an expert writer. Sometimes on Sunday afternoons he addresses his hearers in his shirt sleeves, while the men sit and smoke comfortably. Indeed, Mr. Collins on occasions joins them in enjoying the weed.

away from the houses during the session. The experience of this representative of the press was not one that tended to increase his awe for the visible workings of the government. Entering the gallery, he contemplated for the first time the legislators whose business it is to make the laws and adjust the taxes.

Down below a man is droning something about a door somewhere in the building that opens that way when it should open this way. He is very precise and very dull. He flounders and fumbles, and treats many foolish little questions at great length. At last, impressed by a feeling that the scene was quite ludicrous, somehow,—I asked my neighbor—

"What is Balfour?"

"That," he replied.

Then it flashes before me I have seen it all in caricature. The caricature is the actual reality. My eyes follow his discreet finger, and find a pair of soles staring at me from the table on which the mace lies. Mr. Balfour does stick his feet on the table, and the Speaker does not ask him to behave. The picture might have jumped from the pages of a comic paper, and thereafter it was impossible to avoid seeing my lawgivers through the atmosphere of caricature.

The real interest of the members seems concentrated on keeping curious and schoolboy traditions. The blue stripe that marks the back of the coat is not in the House, and members are, tip-toeing the line and so on. One point seems to be to keep the silk hat on your head unless you are to go to sleep or to address the Speaker. The incoming members bow to the Speaker as they pass to their seats. Few Englishmen bow gracefully; none of these few has got into Parliament. Were I a Speaker, I would rise and throw the mace at a member who cut such a ridiculous figure as the British legislator bowing to the chair.

And all this time the question of the swing door goes on. It is a long and dismal proceeding when one reflects on the really important questions which might occur to six hundred odd gentlemen gathered for the purpose of doing something.

At last there is a division, and I watch the members going out and coming in again. And I wonder why a member should not be able to record his vote automatically; why he should spend his life in tramping through lobbies to give an opinion with his feet rather than with his head; why he should waste his time in making and listening to speeches which are either inaudible or uninteresting.

Now it is over. Three hundred and forty-seven gentlemen have spent a half-hour and between them have covered many miles to settle a question that I should leave with confidence to a kitchen maid.

LOST EYESIGHT

Through Coffee Drinking.

Some people question the statements that coffee hurts the delicate nerves of the body. Personal experience with thousands prove the general statement true and physicians have records of great numbers of cases that add to the testimony.

The following is from the Rockford, Ill., Register-Gazette:

Dr. William Langhorst of Aurora has been treating one of the queerest cases of lost eyesight ever in history. The patient is O. A. Leach, of Beach County, and in the last four months he has doctored with all of the specialists about the country and has at last returned home with the fact impressed in his mind that his case is incurable.

A portion of the optic nerve has been ruined, rendering his sight so limited

that he is unable to see anything before him, but he can see plainly anything at the side of him. There have been but few cases of this kind before and they have been caused by whiskey or tobacco. Leach has never used either, but has been a great coffee drinker and the specialists have decided that the case has been caused by this. Leach stated himself that for several years he had drunk three cups of coffee for breakfast, two at noon and one at night. According to the records of the specialists of this country this is the first case ever caused by the use of coffee.

The nerve is ruined beyond aid and his case is incurable. The fact that makes the case a queer one is that the sight forward has been lost and the side sight has been retained. According to the doctor's statement the young man will have to give up coffee or the rest of his sight will follow and the entire nerve be ruined.—Register-Gazette

Let it be remembered that the eyes may be attacked in one case and the stomach in the other, while in others it may be the kidneys, heart, bowels or general nervous prostration. The remedy is obvious and should be adopted before too late.

Quit coffee, if you show incipient disease.

It is easy if one can have well-bolled Postum Food Coffee to serve for the hot morning beverage. The withdrawal of the old kind of coffee that is doing the harm and the supply of the elements in the Postum which Nature uses to rebuild the broken down nerve cells, insures a quick return to the old joy of strength and health, and it's well worth while to be able again to "do things" and feel well. There's a reason for

THE BRITISH ELECTIONS

The elections in Great Britain have entered upon the last week, and there is every indication that the late Government has received the most crushing defeat in the history of modern British politics. The slaughter among Conservative ex-ministers emphasizes the completeness of the Liberal victory. The defeat of Mr. Balfour paved the way for many of his most prominent followers. Mr. Arnold-Forster is one of the outstanding figures, out side of Mr. Chamberlain, who will grace the front Opposition benches.

their places, cannot be condoned by the Toronto News.

"Wherever evidence can be adduced," it remarks, "to show that liberal partisans are abusing the good-nature of the Whitney government or playing the tyrant, censure and dismissal will be expected. No one objects to the dismissal of partizan and unfaithful officials, just as we believe the overwhelming sentiment of this country is uncompromisingly opposed to the dismissal of faithful and efficient public servants for purely party reasons. In this evil course the Whitney government has gone far, and as a consequence has lost some measure of the public confidence it possessed twelve months ago."

So the government has done wrong, has gone on an evil course. The statement is the more significant because the Mail, the chief advocate for the government has it that there is nothing it has done which can be objected to. It all depends upon the point of view from which the prospective is contemplated.

WHAT OTHER PAPERS SAY.

Toronto Globe.

It is short-sighted to talk of protection or free trade being dead. Free trade will never be dead so long as man demands his own, and protection will never be dead so long as man demands that which is his neighbor's.

Ridgetown Dominion.

Perhaps the constant citing of Sir Wilfrid by certain Ontario papers as the "French Premier" may strengthen the national feeling in Quebec. Our constant endeavor has been and is to combat such cries and help educate the people of this country to take a broader view of men and things. By the way, how about the "solid vote" of Nova Scotia and British Columbia, neither Province having an Opposition member; and let us bear in mind that the present Dominion Government has a working majority outside the members from the Province of Quebec.

Brockville Times.

There is a lamentable prevalence upon the public streets of profanity. It is not profanity which is provoked by anger or any untoward circumstance; it is deliberate and cold-blooded blasphemy, uttered in perfect disregard of those who may be passing by. It is entirely objectionable and indecent. If the offenders of their own accord have not the decency to consider the feelings of others, they should be compelled to by the law of the land.

The Why Ways of Dumas.

The well known Paris theater manager Doligny relates in his reminiscences an encounter he once had with the elder Dumas which furnishes an illustration of the novelist's whimsies. Doligny produced Dumas' drama, "Herni," with the rather peculiar stipulation that the author should receive one-third of the gross receipts when these exceeded 3,000 francs and nothing at all if they fell below that figure. Dumas, who was always hard up, came late one evening to get his share.

"Luck is against you again," said the manager. "You don't get anything tonight. Here is the account."

Dumas glanced at it and went away. In a few minutes he came back and said:

"Just look over the account again and then pay me 1,000 francs. The ticket that I just bought for 3 francs brings the total up to 3,000 francs and 50 centimes."

WHAT CAUSES HEADACHES?

Blood Poisoning, Always!

The blood is poisoned by retained tissue waste, due to defective action of the bowels, kidneys or skin. The tissue waste, or dead cells, circulating in the blood, irritates the nerves and brain, and headaches and neuralgia are bound to arise. Headache powders and opiates of any kind do harm, by aiding the retention of the blood poison in the system. To cure headaches, purify the blood by opening the bowels, and by stimulating the kidneys and skin to increased action.

Testimonial of Mr. Bert. Cornell, Taylorville, Ont.

Chronic Headaches Cured by Fruit-a-tives

To Fruit-a-tives Limited.

OTTAWA, ONT.

"I was a sufferer from fearful headaches for over two years, sometimes they were so bad I was unable to work for days at a time. I took all kinds of medicines, was treated by physicians, and yet the headaches persisted. A short time ago I was advised to try 'Fruit-a-tives' and I did so with, I must confess, very little faith, but after I had taken them for three days my headaches were easier and in

a week they left me. After I had taken a box of the tablets my headaches were quite cured. My appetite was also poor and my stomach was bad and now my appetite is splendid and my digestion is excellent. I have been taken in all three boxes of 'Fruit-a-tives' am exceedingly grateful to 'Fruit-a-tives' for curing me and I give this unsolicited testimonial with great pleasure.

(Sgd.) BERT. CORNELL.

"Fruit-a-tives" cure headaches and neuralgia because they purify the blood by their splendid action on the liver, kidneys, bowels and skin, and thus remove all poisonous material from the system.

With these eliminating organs all active and working as nature intends them to work, there can be no poisons in the blood, and there can be no headaches or neuralgia.

A week's treatment will PROVE how thoroughly and quickly "Fruit-a-tives" cure.

50c. a box or 6 boxes for \$2.50. Sent prepaid on receipt of price if your druggist does not handle them.

Manufactured by FRUIT-A-TIVES LIMITED, Ottawa.

K&K K&K K&K K&K K&K K&K/K&K

ARE YOU A PRISONER?

THOUSANDS of men are prisoners of disease as securely as though they were confined behind the bars. Many have forged their own chains by the vices of early youth, exposure to contagious diseases, or the excesses of manhood. They feel they are not the men they ought to be; they are weak, they are nervous, and vitality of manhood are lacking. Are you nervous and despondent? tired in the morning? have you to force yourself through the day's work? have you little ambition and energy? are you irritable and excitable? eyes sunken, depressed and haggard looking? memory poor and brain fagged? have you weak back with dreams and losses at night? deposit in urine? weak sexually?—you have

one of the outstanding figures, out side of Mr. Chamberlain, who will grace the front Opposition benches. The emphatic verdict of the people is explained in many ways but the real cause, it may be believed, was that the country was weary of the vacillating tactics of the late Government in record to its tariff policy, and desired to administer an emphatic rebuke. The overwhelming victory for free trade was due in part to that, and in part to the apathy and demoralization in the forces led by Mr. Balfour. The Conservatives are to-day in much the same predicament as were the Liberals at the last elections. The crushing reverse proved the salvation of the Liberals, who in the year of opposition united their forces in some sort of effective cohesion to meet the electorate. Mr. Balfour or Mr. Chamberlain will, when the House meets, find himself at the head of a disunited and beaten company of followers facing a Government most strongly entrenched. It is a trial in leadership that even Mr. Chamberlain may shy at.

GOVERNMENT "EVIL COURSE."
The dismissal of some government officials, became some objects wanted

things the total up to 3,000 francs and 50 centimes."

Titles In Italy.
There is an old Venetian adage which says, "Conte che non conta non conta niente" ("A count who doesn't count [money] doesn't count for anything"). And this cynical proposition represents fairly well the sentiment of the modern Italian. In that country the general feeling toward the titled aristocracy is of utter indifference. The lesser sort of titles are regarded as almost valueless even by their possessors. "I have known," says a writer in the London Mail, "a case of a noble lord who followed the interesting occupation of a street scavenger. In a cafe in a certain Italian town I was habitually served by a waiter with the title of count and a name famous in Venetian history. And I am personally acquainted with a lord of ancient lineage whose title descended from a father engaged in the vocation of railway porter. In general the aristocracy of Italy are miserably poor."

Sport In Morocco.
"There are few pastimes known to the people of Morocco that are not connected with religion," writes a traveler. "Children play football of a kind, and leapfrog and practice wrestling and fencing. They also pursue rabbits with curved sticks and throw these with extraordinary skill. Some few experts claim to be able to kill partridges with the same simple weapon. The great game of the adult Moor is the label-harood, or powder play. This exercise is taken on horseback, and to see a body of Moorish horsemen come down at the charge with guns high above their heads to a given spot, where they fire their weapons and then pull their horses up on to their haunches, is a sight that will never be forgotten even by those who have seen cavalry maneuvers in Europe. Moors are very proud of their horsemanship and with reason."

Nature Teaches Inventors.
"We get our hints from nature," the inventor said. "Take, for instance, the hollow pillar, which is stronger than the solid one. The wheat straw showed us the superior strength of the hollow pillar. Solid, the wheat straw would be unable to support its head of grain. Where did man get his idea for carriage springs? From the hoofs of the horse, which, like the springs derived from them, are made from parallel plates. Scissors we got from the jaws of the tortoise, which are natural scissors. Chisels from the squirrel, who carries them in his mouth; adzes from the hippopotamus, whose ivory is adzed in the best design; the plane from the bear's jaws; the trip hammer from the woodpecker."

Hardening Steel.
In hardening, bright steel should not be exposed naked to a fire or flame. It may with advantage be placed in a covered box containing bone dust or animal charcoal in some other form, or another plan is to smear soap all over the article to be hardened. Water or oil is the medium generally selected for plunging the article in to cool it. Petroleum is recommended if extra hardness is desired. Either mercury or salt water will give great hardness, but the steel is rendered brittle. Oil is the best medium for hardening steel if toughness is required.

Called His Bluff.
"I see," he said, "that coal has gone up again."
"Has it?" she replied.
"And they're raising rents," he continued.
"Well," she exclaimed, faring up, "if you wish to..."

Ken or say so. I always have to have people beat about the bush in a case of this kind."

Another Reformer.
Stella—So you are really going to marry old Milliums. I had no idea you were mercenary. Maude—I'm not. I am going to marry him to reform him. Stella—Reform him! I didn't know he had any bad habits. Maude—Yes, he has one. His friends say he is miserly.

Encouraging.
He (just accepted)—You say you were never engaged before? She—Yes, He—How is that? I thought all women always had three or four engagements. She (guilelessly)—Well, I presume I shall too. You see, this is the first chance I have had.

Too Much For Him.
Breezy—Why did you resign from the Don't Worry club? Easy—I discovered that the way the rest of them got out of worrying was by telling all their troubles to me.

All Settled.
Mistress—Going to leave, are you? Tired of working for a living? What are you going to do then? Maid—Nothing, ma'am. The fortune teller tells me I'm going to marry money.

STATE OF OHIO, CITY OF TOLEDO, Lucas County.
Frank J. Cheney makes oath that he is senior partner of the firm of F. J. "A Great Tonic"

"PSYCHINE" is a wonderful tonic. It contains medicinal elements not found in any of the patent medicines. "PSYCHINE" is a regular practicing physician's formula. A tonic for weak people, for men of business worries, for the tired mother, the pale, languid girl. Young girls just budding into womanhood; elderly people who feel that weakness due to old age find it a remedy they cannot do without. It restores vitality, creates rich, new blood, removes all impurities, strengthens the nerves. If you need a trial ask druggist for "PSYCHINE."

Doctors as Empire Builders.
The East India company in their attempts to make headway in India were financially indebted in various stages of their progress to humble practitioners in medicine. It was in consequence of a cure effected on the favorite daughter of one of the Mogul emperors that they had first been allowed a footing in Bengal.

Later still, in the year 1715, a medical man named Hamilton, as a reward for curing the reigning emperor of an illness, obtained for the company a grant of three villages near Madras, a permission to purchase thirty-seven townships in Bengal and the privilege of introducing and conveying their merchandise from Calcutta through Bengal without duty or search.
The footing thus gained and the accompanying patronage and encouragement enabled the East India company to make such progress as to cut out all foreign rivals. So England, through the company, gradually obtained full sway over India.—London Mail.

Modern Greek Fire.

"Marine torches" are the direct descendants of the Greek fire of the ancients, though the modern torch is used for defense rather than offense and prevents the surprise of a fleet through the silent approach of an enemy.
It consists of an aluminium cylinder used as a projectile. On being fired from a gun it produces no result until it falls into the sea. In its interior it contains stores of calcium phosphide and calcium carbide. The former produces phosphuretted hydrogen on contact with water, which ignites spontaneously and also ignites the acetylene gas liberated from the carbide through the action of the water. Enough of the chemicals is contained to last for ten hours, and a few of these torches thrown to the points of the compass from which attack might be expected would leave the defenders in obscurity, while not permitting the enemy to approach.

The Great Amazon River.

In South as in North America nature does her work on the grand scale, and one of her noblest achievements is the Amazon river. Rising in the Andes, it flows across the continent and discharges into the Atlantic ocean at the equator. The vastness of the area which it drains, amounting to 2,368,000 square miles, will be evident when it

THE above picture of the man and fish is the trademark of Scott's Emulsion, and is the synonym for strength and purity. It is sold in almost all the civilized countries of the globe.
If the cod fish became extinct it would be a world-wide calamity, because the oil that comes from its liver surpasses all other fats in nourishing and life-giving properties. Thirty years ago the proprietors of Scott's Emulsion found a way of preparing cod liver oil so that everyone can take it and get the full value of the oil without the objectionable taste. Scott's Emulsion is the best thing in the world for weak, backward children, thin, delicate people, and all conditions of wasting and lost strength.

Send for free sample.
SCOTT & BOWNE, CHEMISTS
TORONTO, ONT.
50c. and \$1.00. All druggists.

is borne in mind that this is more than the area of Russia in Europe and Austria-Hungary. It has a length of nearly 4,000 miles, is navigable for 2,300 miles from the sea and is fed by numerous streams, which in any other country would be ranked as great rivers. In the wet season, which lasts for about eight months, its width varies from five miles to 400. No wonder the Amazon has been called a gigantic reservoir rather than a river.

Strange Taste in Eating.

Many strange dishes were eaten by Dean Buckland, the English clergyman and geologist. At his dinner parties, which were attended by leaders of science and literature, the menus were often of a most eccentric character. On one occasion pickled horse tongue was greatly relished by the guests until they were told what they had eaten. Alligator was served up as a rare delicacy and puppies occasionally and mice frequently. At other times hedgehogs, tortoises, potted ostrich and sometimes rats, frogs and snails were prepared for the delectation of favored guests. Henry Labouchere said that the dean swallowed the mummified remains of the heart of Louis XIV. of France.

The First Lesson of an Arab Boy.

The very first lesson which an Arab baby learns when he begins to talk is to keep facts to himself. It does not sound very friendly put in that way, but it saves a deal of trouble. Foreigners do not understand Arabs. They ask them pointed questions and receive peculiar answers. They construe the answers to please themselves and come away to tell the world that the Arabs are a nation of liars. They are not a nation of liars. Perhaps if they should tell the foreigners to mind their own affairs and let them and theirs alone the foreigners would understand them better.—Exchange.

Ox Bones.

Ox bones have a considerable value. The four feet of an ordinary ox will make a pint of neat's foot oil. The thigh bone is the most valuable, being useful for cutting into toothbrush handles. The fore leg bones are made into collar buttons and parasol handles. The water in which the bones are boiled is reduced to glue, while the dust which comes from sawing the bones is turned into food for cattle and poultry.

Qualified.

"What! You marry my daughter," thundered old Roxley—"you, a mere clerk!"

"No, sir," replied young Hunter, "not a clerk, but a gentleman now. I resigned my job the moment your daughter accepted me."

Hardly.

Hicks—I understand somebody has discovered that there's alcohol in root beer. Wicks—Yes, but there's no fear of any old whisky drinker adopting it for a substitute.

Pawning a Bank Book.

The pawning of the wedding ring has become a pathetic commonplace to those who are familiar with police court and coroner's court stories or with the private petitions for help of the deserving and undeserving poor. But we confess that with the Westminster magistrate we have never heard before of pawning bank books. Yet on expert pawnbroker's evidence elicited by police inquiry it is found that this is not at all an unusual practice. In the vast majority of cases it would seem to be a simpler matter to draw on the bank account rather than borrow on the strength of it from the pawnshop. But one of the unfortunate

Saucers for cups were introduced in the latter part of the eighteenth century and at first were greatly ridiculed, the persons who employed them being said not to be able to drink without having two cups.

Two Different Matters.

"I cannot understand, sir, why you permit your daughter to sue me for breach of promise. You remember that you were bitterly opposed to our engagement because I wasn't good enough for her and would disgrace the family."

"Young man, that was sentiment; this is business."

Selecting Judges.

Dr. Franklin thought that judges ought to be appointed by lawyers, for, added the shrewd man, in Scotland, where this practice prevails, they always select the ablest member of the profession in order to get rid of him and share his practice among themselves.

A Pointer.

Two thieves were breaking into a door when the master of the house, hearing them, looked out of the window and said: "Friends, come a little later. We are not yet in bed."—"Humor of Spain."

Dangerous Aphorism.

Bachelor—Talk is cheap. Benedict—For goodness sake, don't advertise it as a bargain while my wife is around.

To do what we can by our ballots and influence to secure good is to work with God.—Philipps Brooks.

The Congressional Library.

In its fine building the library of congress should be safe against destruction for many centuries. Fire has cost the world many of its greatest collections. It ruined the ancient Alexandrian library of the Ptolemies when the Christians sacked the temple of Serapis in the year 275. It cost the world thousands of ancient manuscripts that were stored in Constantinople when the Crusaders captured the city. Twice the library of congress has suffered by fire—first at the destruction of the capitol by the British in 1814 and again in 1851. In its present housing it is protected by every possible safeguard and directed in its development by the most expert of custodians. And with a sense of pride in which all Americans must share the nation has given to its foremost sculptors and artists the opportunity to enrich its walls with their works. It is a monument to American thought and learning, which must grow in value and significance with each year.

Too Curious.

One well known New York woman has discovered, like some others of her sex, that it does not pay to be too curious. One of the old family retainers is a Scotchman named William, who does not believe in glossing over the truth for the sake of sparing his listener's feelings. The woman in question, although possessed of considerable charm of manner, is not a beauty and knows it. Her husband, recently deceased, was a remarkably handsome man, and his wife was one of his sincerest admirers. One day when she was looking at her husband's picture on the mantel in the sitting room William was fussing around the grate, and in a moment of impulse she asked:

"William, what do you think made such a handsome man as Colonel S.

S. BOND & CO, - Odessa.

Odd Marriage Ceremony.

Polynesia is probably the only place in the world where the marriage feast takes place without the presence of the bridegroom. For some unexplained reason the young man is "sent into the bush" when negotiations are opened with the family of his bride, and he remains there during the subsequent festivities. It is only when the guests have departed and the girl is left alone with his parents that messengers are dispatched for him.

A Scotch "Bull."

Admonition on Poetry.

When I feel inclined to read poetry, I take down my dictionary. The poetry of words is quite as beautiful as that of sentences. The author may arrange the gems effectively, but their shape and luster have been given by the attrition of ages. Bring me the finest simile from the whole range of imaginative writing, and I will show you a single word which conveys a more profound, a more accurate and a more eloquent analogy.—"Autocrat of the Breakfast Table."

A FRIEND'S ADVICE

SAVED SUFFERING AND BROUGHT BACK HEALTH—DR. AGNEW'S GREAT HEART CURE AND CATARRHAL POWDER DEFY DISEASE AND NEVER FAIL IN THEIR MISSION OF HEALING

"I feel so thankful at the restored health of my daughter that if any use can be made of this I shall be pleased." This is what Mr. George Weeks, of Elora, Ont., says in giving his testimony to the wonderful curative qualities of Dr. Agnew's Cure for the Heart. Mr. Weeks' daughter was a great sufferer from heart disease and nervousness. She was unable to lie on her left side. She ran down in health and her recovery was a source of anxiety. Induced by friends, who had proved its worth, she obtained Dr. Agnew's Cure for the Heart and before one bottle had been taken was able to lie in any position she desired, and when two bottles had been taken, an absolute cure was pronounced. Yes, this great remedy is a cure for all ailments of the heart, stomach and nerves, and the instantaneous relief given by it has snatched thousands from death's jaws. Don't trifle a minute if you have the slightest evidence of heart disorders, such as palpitation, fluttering or uneasiness. This remedy will relieve such troubles immediately and will cure the stomach and nerves.

"When I know a thing is worthy of a recommendation I consider it my duty to tell of it." The Rev. James Murdoch, of Harrisburg, Pa., says this after having been cured of a very malignant form of catarrh by Dr. Agnew's Catarrhal Powders. What he can say of its healing powers thousands of others have said and can say of it. Don't neglect "only a little cold" in the head. It may lead to chronic catarrh. Dr. Agnew's Catarrhal Powder relieves in 10 minutes and is easily applied. Keep it near you if you are a "cold in the head" subject.

DR. AGNEW'S OINTMENT cures all skin troubles. DR. AGNEW'S PILLS—40 doses 10 cents.

Sold by F. L. Hooper.

Gray's Syrup

of

that this is not at all an unusual practice. In the vast majority of cases it would seem to be a simpler matter to draw on the bank account rather than borrow on the strength of it from the pawnshop. But one of the unfortunate possibilities of the practice is revealed in the particular case mentioned at Westminster. A picture frame maker, wishing to withdraw £3 from the bank, could not find his bank book and then learned that his wife had been putting the book in and out of pawn for eight years, having borrowed £7 10s. on it the first time, and of course she had been paying interest on her various transactions.—London Pall Mall Gazette.

Robinson Crusoe, Economist.

When the average boy spends the delighted hours of imaginative youth in devouring the pages of "Robinson Crusoe" he has, like most people of more mature years, no idea that he is perusing a work of profound philosophy written by one of the greatest political thinkers of the English speaking race.

Taken with a knowledge of the facts of the career of De Foe, "Robinson Crusoe" can properly be considered a story intended to illustrate the heavy burden of trouble placed upon any single individual isolated from his fellows and compelled to maintain his existence without their aid. The tale shows in an inimitable way how all civilized men are interdependent. Regarded from this point of view, the author of the most widely read work of fiction ever written becomes an object of particular interest to all thinkers upon politics.—William N. Hill, M. D., in Watson's Magazine.

To "Pound" Words.

When the reputation of punning is under discussion it is well to bear in mind that the very name of the jest confesses to a degree of atrocity. To "pun," according to the London Chronicle, is to "pound" words, to beat them into forced conditions, so the philologists believe. "He would pun thee into shivers with his fist," says Thersites in "Troilus and Cressida," meaning physical "pounding." "Pun" is not a slipshod development of "pound," but its original form, the Anglo-Saxon verb being "punian," and "pun" or "poun" having developed a final "d," just as "soun" became "sound" and as the illiterate turn "gown" into "gownd." Curiously enough, "pun" and "pound" have no connection with "punching" a man's head, which is simply "punishing," contracted, or with "punching" a ticket, which goes back to the Latin "pungere," to prick or puncture.

Sir Humphry Davy.

Sir Humphry Davy married a widow as peculiar as himself. His pet affliction was a lack of time. He was always in a hurry. He pretended that he had no leisure to dress himself, and when a change of linen became necessary he simply put one shirt over another until he was known to have on five or six shirts at a time. Of course he could not wear this amount of apparel without appreciably increasing his size, and his friends not in the secret were sometimes surprised to see him fall off in apparent weight twenty pounds in a day. His wife's great anxiety was to keep him "fit for company," but as he did not care a fig for company she had no easy task, and domestic discord was a common thing.

Ancient Cups.

The cups of the Assyrians closely resembled our saucers. Every nobleman and gentleman had his own cup and cup bearer, the latter of whom always accompanied him to a feast, carrying before him the cup of gold, silver, crystal or marble, which his master only used on state occasions.

in the sitting room William was fussing around the grate, and in a moment of impulse she asked:

"William, what do you think made such a handsome man as Colonel S. marry such a plain woman as me?"

William looked from the portrait to the speaker, meditated a second and answered:

"Must have been heaven's will, ma'am."

The African Drum.

The African drum appears in varied and often picturesque forms. The natives make drums out of shells, tree trunks or earthenware, covered with the skin of some wild animal or sometimes with India rubber. Of the original calabash drums there is probably only one specimen in Europe. Some of the drums are highly ornamented either by painting or carving. One specimen, indeed, has puzzled travelers, for there is depicted on it unmistakably a cross and also a head of European type. A drum found in upper Lualaba has a unique peculiarity in the way of a "sympathetic cord," formed by means of a small tube ingeniously inserted in the side of the instrument, which causes, when the drum is beaten, a vibration resembling that of the reed pipe.

A Plea For Soup.

A learned doctor, pleading for soup on every dinner table, says: "A person comes to dinner weary and hungry and needs first something to stimulate the secretions of the stomach. The first course, hot soup, does this by its action upon the nerves which control the blood vessels. Taking the soup slowly is an aid to digestion, and if not a favorite dish fish or oysters can be substituted, serving the same purpose. The joint or roast can then be taken with benefit to the system, and the game, vegetables and sweets should follow in their order, not necessarily in courses for the plain family dinner, however."

Mileage of the Blood.

The mileage of the blood circulation reveals some astounding facts in our personal history. Thus it has been calculated that, assuming the heart to beat 60 times a minute at ordinary heart pressure, the blood goes at the rate of 207 yards in the minute, or seven miles per hour, 168 miles per day and 6,320 miles per year. If a man of eighty-four years of age could have one single blood corpuscle floating in his blood all his life it would have traveled in that same time 5,150,808 miles.

Watch and See.

A well known horseman describes a fact in natural history which may not be generally known. It is that all four footed beasts in making the first movement in walking, running or any sort of forward motion always employ the left hind leg as a starter. Even a child if put down on all fours and bidden to advance in that position will make the first move with its left leg, its hands, at the time occupying the place of an animal's fore legs.

An Accomplished Fact.

"Grandma, may I take that piece of chocolate you left on the table? I will be so good."

"Yes, you may take it."

The little girl does not move.

"Why don't you go and get it?"

"Oh, grandma, dear, I ate it first!"

Something He Had Forgotten.

Small Boy—Mister, kin you change a ten dollar bill? Mister—No, sonny. That belongs strictly to my wife's share of the domestic duties. I might have been able to change one long ago, but I'm clean out o' practice now.

Gray's Syrup of Red Spruce Gum For Coughs and Colds.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Daily. All other trains run daily. Sundays excepted.

WALTER RATHBUN, President. H. B. SHERWOOD, Superintendent. D. A. VALLEAU, Asst. Superintendent.

"Sweetheart," he said, with brusque emotion, "the door of my heart can never be closed again with you outside. Won't you come in?"

Dreams.
A scientist explains some of the strange phenomena of dreams by saying that they are due to what he calls "hereditary memory." He takes the "falling through space" dream and points out that after suffering the mental agony of falling the sleeper escapes the shock of the actual stopping. The explanation is that the falling sensations have been transmitted from remote ancestors who were fortunate enough to save themselves after falling from great heights in treetops by clutching the branches. The molecular changes in the cerebral cells due to the shock of stopping could not be transmitted because victims falling to the bottom would be killed. In a similar manner by reverting to the habits of animals which existed centuries ago the same investigator finds an explanation for the mental state experienced by individuals in various dreams—the "pursuing monster" dream, the "reptile and vermin" dream, color dreams, suffocation dreams, flying dreams and the like.

Quack Medicines of Bygone Days.
Nearly everything in the animal kingdom was formerly used in the healing art. In the oldest medical book now known, composed in Heliopolis, where once Joseph served in the house of Potiphar, we find "means for increasing the growth of hair, prepared for Schesch, the mother of Teta, the king of upper and lower Egypt."

Dogs' teeth, overripe dates and asses' hoofs were carefully cooked in oil and then grated. As Teta lived before Cheops, this recipe for hair oil is older than the great pyramid at Gizeh and is supposed to date back more than 6,000 years. The heads of venomous serpents have held an important place in medicine. A strong broth made from them and mixed with salt and spices and 100 other remedies was employed under the name of theriac as a cure for every conceivable disease. Three drops of the blood of an angry cat gave relief to the epileptic.

Camp Tidbits.
The muskrat may be broiled over the hot embers, with sliced bacon so arranged that the drippings run over the musquash as it cooks, or it may be made into a stew with vegetables and pork, and in this case the longer it simmers under the fire the better will be the results. Only seasoned campers ever have an opportunity to feast on the delicious nose of a moose or know the delights of marrowbones of deer split and mixed with parched cornmeal and cooked all night, or dried venison pounded to fragments and cooked with rich bear's fat, musk turtle soup, porcupine steaks, with hell-benders as a side dish. And, although thousands of muskrats are killed and eaten every year in Maryland and Delaware, probably but few of my readers in the northern states will experiment with this rodent.—Outing.

Chinese Cooking Secrets.
"I once attended a mandarin's banquet in Peking," said an ex-consul, "and it was the most remarkable feast I ever sat down to. One course appeared to be plain hard boiled eggs. The eggs came on unadorned. Their shells were intact, and yet, when we broke into them, we found that they contained nuts and sweetmeats. Another course was whole oranges, with unbroken skins, yet inside the oranges were five

more evidence.
A Conjugal Tiff.
Husband—I see plainly you want to get up a quarrel. And in the street too! Wait at least till we are inside our own house. Wife—Impossible. I shall have cooled down before we get there.
Wanted to Find the Crumb.
Mamma—What are you tearing your hair to pieces for? Hattie—I'm looking for the crumb of comfort papa said was to be found in everything.
Man is the merriest of all the species of creation. Above and below him all are serious.—Addison.

The Game of the Sheep.
Among the gypsies of Bosnia there is a curious game called "the game of the sheep."
You know they skin a sheep or goat in the east by dragging the skin off whole over its head. This skin the Bosnians drip and grease most carefully. Then they tie up the four legs and the neck and blow it full of air, so that it looks like a very greasy, badly shaped sheep. This is thrown in the middle of a ring, and each man in turn jumps on it with bare feet until one succeeds in bursting it. The lucky one then gets a purse. Such a funny sight as it is to see them jump and sprawl, for of course if they do not strike it at just the right angle they slip on the greasy surface as if it were a toboggan slide and go sprawling.

Plates.
Individual plates for table use were unknown to the ancients, who held their meat in their hands or employed the flat wheaten cakes then made on which to hold their victuals. They are first mentioned in A. D. 600 as used by the luxurians on the continent, and in the sixth century they had come into common use both in England and on the continent. They were made of wood or some kind of earthenware, the former material being preferred because it did not dull the knives.

The Saturnalia.
The saturnalia was a midwinter feast of the Romans in honor of Saturn, beginning on Dec. 17. On this occasion great license was given to every one to do what he pleased, and even the slaves were permitted much liberty of speech and action. All work was suspended, the houses and temples were decorated, congratulations were exchanged and presents sent as with us at Christmas.

Better Be Careful.
A sporting paper recommends a certain way of avoiding the bites of a dog, however savage. All one has to do is to stand perfectly still and hold one's hand out. The dog, says the writer, will take the hand into his mouth, but will not bite it. But what guarantee have we that the dog knows this?—London Globe.

FIT'S CURED

If you, your friends or relatives suffer with Fits, Epilepsy, St. Vitus' Dance, or Falling Sickness, write for a trial bottle and valuable treatise on such diseases to THE LEIBIG CO., 179 King Street, W., Toronto, Canada. All druggists sell or can obtain for you

LEIBIG'S FIT CURE

KALADAR.

School opened on the ninth inst. a new teacher, Miss Edith Laidley, Ernestown Station.

Mr. Robt. Paul, Selby here on business.

A number from here attended the lecture at Flinton on Monday night. Mr. Walter Campney at Tweed on Wednesday.

The farmers are busy hauling heading bolts to the heading factory.

Mrs. Willam Berry who was so ill is improving slowly.

Mr. Henry Wood spent Tuesday at Tweed.

Miss Lillian Fleming spent last week at Northbrook.

Miss Mary Wood visiting at Mr. Alexander Forbes.

Nickle plated tea and coffee pots, trays &c. at MADOLE & WILSON.

CENTREVILLE.

The weather continues mild; wheels have again been brought into requisition. A light fall of snow would be welcome.

Anson Dennison is sawing wood for the farmers in this part, with his machine.

Our Glee Club lately organized, gave a concert in Croydon one evening last week.

Geo. McFarlane now under-going treatment in the Hospital Kingston is progressing favorably.

Our Municipal Council contemplate buying a piano for the new town hall.

Geo. Clancy has a gang of men engaged cutting and hauling timber for his barn.

Visitors: Mrs. N. Hinch, Camden East; Mr. and Mrs. W. D. Kenny and Miss S. J. Hinch, Kingston; Mr. W. Clarke, Violet.

Fancy Dishes Given Away.

If you buy your groceries from us. We give coupons on dishes free. Call and see them at GREY LION GROCERY.

CAMDEN EAST

The social held in Hinch's hall, Thursday week was a great success all round. The Ladies of St. Luke's congregation most kindly provided a good supper; excellent music was on hand and all enjoyed themselves thoroughly. There was splendid order and sharp at 12 o'clock proceedings terminated. Proceeds \$32.30.

The responses to the Epiphany appeal was as follows—Camden East, \$5.70; Yarker, \$17.46; Newburgh, \$4.22, total \$27.38

Heating and Sanitary Plumbing.

MADOLE & WILSON.

SHARBOT LAKE.

Merry was the peal of marriage bells on January 10th. when at the home of Mr. and Mrs. John McConnell, their daughter, Grace, was united in the bonds of holy wedlock to Signa Warwick, Dexter, N.Y. At five o'clock the bride, leaning upon the arm of her father, entered the parlor, and took her position under the beautiful arch, beside the groom, while Mrs. Archibald Irwin played the wedding march. The bride was supported by her sister, Miss Mable, while Ross Dodds acted the role of groomsman. Rev. Mr. McJones repeated the mystic words, which tied the life long knot. The bride was dressed in a brown travelling skirt, and white silk waist, while the bridesmaid was similarly attired. While only the immediate relatives were present at the marriage ceremony, and the sumptuous supper which immediately followed, early in the evening the bride's many friends and acquaintances began to arrive, and before nine o'clock the house was thronged with guests.

DON'T NEGLECT A COLD.

Neglected Colds Lead to Consumption.

MISS LILLIAN POWELL
Aurora
IND.

PE-RU-NA
CURES
COLDS
AND
COUGHS.

How Pretty Miss
Powell Was Re-
stored to Health
by Pe-ru-na.

Miss Lillian Powell, Aurora, Ind., writes:

"Last spring I caught a severe cold from getting my feet wet and being out in the rain, and in a day I had a most miserable cold, but I neglected it, thinking it would soon leave me. But it hung to me for two weeks, when I felt something must be done, as my condition was serious.

"I had heard so much about Peruna and in its praise that I bought a bottle and began taking it regularly. I was gratified to find that in a week the cold and cough was broken up, and three weeks' treatment completely restored my usual good health."—Lillian Powell.

Salt, the Civilizer.

The use of salt as a necessary supplement to diet has had much influence in shaping the civilization and exploration of the world. It is most probable that the oldest trade routes were created for the salt traffic, as salt and incense formed the chief necessities of the ancient days. This was certainly the case with the caravan routes in Libya and the Sahara, while the mines of north India were the center of a large trade before the time of Alexander.

Another interesting fact is that salt has played a considerable part in the

The boat was twenty-eight feet long and ten feet wide and carried fourteen persons.

It was not until four years later that we find any record of a passenger carriage driven by electricity on land, and in this case the inventor was Alexander Davidson of Edinburgh. The carriage was sixteen feet long by seven feet wide and was impelled for a mile and a half at the rate of four miles an hour on the Edinburgh and Glasgow railway.

Living's Stageshaft.

It chanced to me once, and only once, in a life of some faring by land and sea to ride on a Kurdish camel at early

How Consumption Develops.

Nine cases of consumption out of ten occur in this way:

A person catches cold. The cold is not properly cured, and another cold is caught.

This cold is dilly-dallied with, either by no treatment whatever or some treatment that is ineffectual, and the cold continues.

Then another cold is caught and a cough develops. Cough syrups are resorted to, but they give only temporary relief.

By and by the patient gets tired of taking medicines and cough syrups and gives up in despair.

The cold continues to develop and the cough grows worse.

Then the doctor is called in, only to discover that the patient is in the first stages of consumption.

It was just in this way that Miss Powell, of Aurora, Ind., became sick. She caught a cold, and not considering it serious, neglected it, thinking as many others do, that it would "wear off."

However, it clung to her tenaciously, and in two weeks she found her health in a serious condition.

Fortunately, Peruna had been brought to her notice, and she took a course of this remedy before it was too late.

In a week the cough and cold were broken, and a three weeks' treatment completely restored her to health.

This is what Peruna is doing all the while. Not a day, and probably not an hour passes in which some one does not have a similar experience with Peruna.

Cure the Slight Colds and Avoid Consumption.

The first step toward consumption is a cold. The next step is a failure to cure it promptly. The third step is the development of catarrh, which gradually becomes chronic. The fourth step, the catarrh begins to spread from the head to the throat, then to the bronchial tubes, and finally into the lungs. It is then consumption in the first stage.

At any time during the progress of catarrh, from the first onset of the cold to its final settlement in the lungs, Peruna can be relied upon to stop the disease. If you have taken a cold, buy Peruna without delay. One bottle in the beginning will do more good than a half dozen bottles after the catarrh has fastened itself on the lungs.

Thousands of Testimonials.

We have on file thousands of testimonials from people who have been cured of catarrh of the lungs by Peruna. We can give our readers only a slight glimpse of the vast array of unsolicited endorsements we are receiving every month. No other physician in the world has received such a volume of enthusiastic letters of thanks as Dr. Hartman for Peruna.

Ancient Remedies for Rheumatism.

The Rheumatism seems to be a modern and dangerous disease, but the ancients knew it and possessed remedies that might now be used advantageously. Galien recommended sneezing. A thus reported of a cupping instrument with great heat to the breast. Alexander believed in an oxymel of squilla. Alsbahravius made use of refrigerant draughts. Rhases put his trust in calefactives, such as cumin, pepper, rue and the like, in vinegar. Rogerius looked kindly on calefactives, attenuant and carminative medicines.

about at the marriage ceremony, and the sumptuous supper which immediately followed, early in the evening the bride's many friends and acquaintances began to arrive, and before nine o'clock the house was thronged with guests, and about sixty partook of the mid-night supper. The bride was the recipient of many beautiful and useful presents from her relatives and many friends, while from the groom she received a beautiful gold watch. Mr. and Mrs. Warwick left on Monday morning for their new home in Dexter. We all join in wishing them a happy and prosperous life.

The S. S. convention was held here on Wednesday and Thursday of this week. A good number of delegates and visitors attended, and the Methodist church was filled at each of the day sessions, and crowded at the evening. J. A. Jackson, general secretary for the province, gave two very practical addresses, and taught the lesson for Sunday, January 21st, as an illustration of "How to teach a lesson." Rev. Mr. Smart, Mountain Grove, Rev. Mr. James, Maberly, Rev. Messrs. Smith and Lawson, Sharbot Lake, gave very helpful addresses. The banner was again carried by Parham. The old officers were elected, with the exception of the treasurer, who is Mrs. Henry Rigney, Maberly, and the assistant secretary, who is Miss Eva Dodds, Sharbot Lake. The convention of 1907 will be held in the Methodist church, Maberly.

Notice.

We are getting a lot of new dishes to be given away for coupons to customers that buy here. Why not get some by dealing at R. J. Wales GREY LION GROCERY.

THE United States Government is face to face with the question whether the Panama Canal shall be constructed by laborers employed by the Government under official supervision or by contractors employing their own laborers under like oversight. The former plan is now in operation, but is an admitted failure.

Libya and the Sahara, while the mines of north India were the center of a large trade before the time of Alexander.

Another interesting fact is that salt has played a considerable part in the distribution of man. When it became absolutely necessary to him, as it did at an early stage of his development, he was forced to migrate to places where it could be obtained. This brought him to the seashore, where he gained his ideas of maritime commerce. Lastly, the preservative effects of salt on flesh food made long oceanic voyages possible and thus opened up the world to commerce and civilization.

How Cowards Were Punished.

Many of the devices by which military indifference to life has been matured and sustained are curious. In ancient Athens the public temples were closed to those who refused military service, who deserted their ranks or lost their bucklers, while a law constrained such offenders to sit for three days in the public forum dressed in the garments of women. Many a Spartan mother would stab her son who came back alive from a defeat, and such a man, if he escaped his mother, was debarr'd not only from public offices, but from marriage, exposed to the blows of all who chose to strike him, compelled to dress in mean clothing and to wear his beard negligently trimmed. In the same way a horse soldier who fled or lost his shield or received a wound in any save the front part of the body was by law prevented from ever afterward appearing in public.

The First Electric Train.

The earliest public trial of a passenger boat driven by an electric motor was that conducted by Professor Jacob of St. Petersburg in the year 1838, though for four years previously he had successfully experimented with electric traction in the privacy of his own grounds. The trial of Jacob's vessel took place on the Neva and was witnessed by a vast crowd of people.

hour on the Edinburgh and Glasgow railway.

Irving's Stagecraft.

It chanced to me once, and only once, in a life of some faring by land and sea to ride up a Kurdish gorge at early dawn, the sky still starry, as the charcoal burners had begun their work, and to see over all as the smoke rose a gray blue light, as of the depths, some touch of deep chilled enveloping air on gorge and mountain side, as though a sapphire had aged and grown gray and wan. Once only I saw this full never again. When in "Faust" the curtain rose on the Brocken I saw before me the same miracle of gray blue. "How did you," I asked once at supper, "who ride abroad so little and are so rarely on the mountain side, hit on this, the rarest of lights?" "Once," and he took up a small plate, "I saw in a gallery," and he named it, but I have forgotten, "a landscape by Durer the size of this plate, a mountain side in early morn in this same gray blue light. It gave me the light I wanted for the Brocken."—Talcott Williams in Atlantic.

The Diplomatic Druggist.

A certain druggist who does not like to answer night calls, especially as he has found by experience that he offends people who call him up at night by his displeased abrupt manner, has devised a scheme by which he does not have to get up and at the same time does not lose customers. In his own words he works it this way:

"I disconnect my bell so that it cannot ring. After waiting some time the person who wants to get in gives it up as a bad job and goes down the street to the next store. This man opens for him, but is naturally very much displeased, and, as I usually do, he shows that he is disgruntled and offends the customer. Early the next morning the customer calls at my store to inform me that my bell is out of order and tells me what a low opinion he has of the other druggist, whom he considers a very impolite man."

Posthumous Libel.

A correspondent of the London Times raises the point that, while a libel upon a dead man may form the subject of a criminal prosecution, yet there is no redress whatever for a libel by the dead upon the living. Thus a testator may so phrase his will as to libel a legatee and injure him to an extent far in excess of his legacy. The writer cites as an illustration the following bequest from an ardent teetotaler to a moderate drinker: "I give and bequeath to A. B. the sum of £50 upon condition that she signs the pledge." Such a condition inserted in a will, he believes, might do the lady legatee an amount of damage for which £50 would be but poor compensation, and he submits that in cases of posthumous libel the executors should be answerable in damages to the extent of the testator's estate.

Rings of Fungous Growth.

Before people studied nature to learn the truth and when they delighted in all sorts of fancies it was claimed that rings of fungous growths were caused by the dancing of fairies, by a thunderbolt entering the ground or by the work of moles. Various other equally absurd explanations have been given. Now we know that the first fungous plant growing from a spore takes from the soil under and near it all or most of the special food that the plant requires. Only the spores from this plant that fall just outside the exhausted soil will find good fungous food, and so the circle of successive growths widens because only the spores outside of the ring can find food.

How Icelanders Take Snuff.

Rhases put his trust in calafacets, such as cumia, pepper, rue and the like, in vinegar; Rogerius looked kindly on calafacets, attenuant and carminative medicines.

The "Giant" Bell.

Russia is famed for the manufacture of great bells. The "Giant," cast in Moscow in the sixteenth century, weighed nearly 320,000 pounds and required twenty-four men to ring it. In 1732 it fell, but its fragments were recast along with other metal into a bell which weighed 413,000 pounds, the metal of which alone is valued at \$300,000.

Proof of Democracy.

"Ma, teacher was tellin' us that we should all be on a equality in our schoolroom. Nobody should feel any better'n anybody else."

"That's right, George."

"Say, ma, can I go to school today without washin' my face? None of the rest of 'em washes theirs."

A Cut Artery.

A quick witted woman stopped the flow from a cut artery in the leg by putting the foot in three inches of flour in a large jar and packing flour to the top of the jar, beating the flour down with a piece of stove wood.

STOP, WOMAN!

AND CONSIDER
THE ALL-
IMPORTANT FACT

That in addressing Mrs. Pinkham you are confiding your private ills to a woman—a woman whose experience with women's diseases covers a great many years.

You can talk freely to a woman when it is revolting to relate your private troubles to a man—besides a man does not understand—simply because he is a man.

Many women

suffer in silence and drift along from bad to worse, knowing full well that they ought to have immediate assistance, but a natural modesty impels them to shrink from exposing themselves to the questions and probably examinations of even their family physician. It is unnecessary. Without money or price you can consult a woman whose knowledge from actual experience is great.

Mrs. Pinkham's Standing Invitation.

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. All letters are received, opened, read and answered by women only. A woman can freely talk of her private illness to a woman; thus has been established the eternal confidence between Mrs. Pinkham and the women of America which has never been broken. Out of the vast volume of experience which she has to draw from, it is more than possible that she has gained the very knowledge that will help your case. She asks nothing in return except your good will, and her advice has relieved thousands. Surely any woman, rich or poor, in any condition, if she does not take advantage of the generous offer of assistance.

If you are ill, don't hesitate to get a bottle of Lydia E. Pinkham's Compound at once, and send it to Mrs. Pinkham, Lynn, Mass., for special advice.

When a medicine has been so successful in restoring to health so many women, you cannot well say, without experience, "I do not believe it will help me."

"Let the GOLD DUST TWINS do your work"

"Your Servants, Madam!"

The Gold Dust Twins are always ready to work; they are certainly artists in the cleaning line. There's nothing cleanable which

Gold Dust Washing Powder

will not clean—and do it better, more quickly and more economically than anything else can. You are not serving your best interests if you're trying to keep house without GOLD DUST.

OTHER GENERAL USES FOR GOLD DUST: Scrubbing floors, washing clothes and dishes, cleaning wood-work, oil cloth, silverware and tinware, polishing brass work, cleansing bath room, pipes, etc., and making the finest soft soap.

Made by THE N. K. FAIRBANK COMPANY, Montreal, P. Q.—Makers of FAIRY SOAP.

GOLD DUST makes hard water soft

Given an Opportunity "SALADA!"

Ceylon Natural GREEN Tea will prove its superiority over all Japans.

HIGHEST AWARD ST. LOUIS, 1904.

RIVERS OF WINE TO FLOW

WEDDING OF KING ALFONSO TO BE MAGNIFICENT PAGEANT.

Elaborate Ceremony to Mark Conversion of the Future Queen of Spain.

The most scrupulous reserve is maintained in Spanish court circles concerning the arrangements for the marriage of King Alfonso and Princess Ena of Battenberg, but the following facts are from an authentic source.

As at present arranged, the formal announcement of the betrothal will be made either just before or when King Edward visits Madrid, and the wedding will probably take place during the traditional fete of San Isidoro.

The conversion of the princess to the Roman Catholic faith will be a ceremony of great solemnity. It will be held in the San Francisco Cathedral at Madrid, and will be presided over by

THE PRIMATE OF SPAIN.

the Cardinal Archbishop of Toledo. The nine archbishops and forty-six bishops of the kingdom will be summoned to attend. A rumor which was circulated that the Pope did not view the alliance with favor is groundless.

During the wedding festivities Madrid will be transformed into a gigantic garden of flowers. Roses and pinks will be brought by hundreds of wagonloads from Seville, Malaga, Valencia, Alicante and Murcia.

Grand processions in character will be organized by the students and women cigarreros, and the charming national dances will be performed by peasants from the provinces.

Streams of white and red wine will flow from the fountains of Madrid in lieu of water on the day of the wedding.

One of the most popular celebrations will be a monster bull fight, conducted with all the magnificence and panoply of ancient use.

MANY CHANGES

are being made at the palace to prepare the apartments for the King and his bride. At present the Queen-mother occupies the rooms she had during the regency and the King those he had during his minority, and considerable rearrangements will, of course, be made. The Princess Ena will have her private apartments on the first floor of the palace, where an army of workmen are engaged in making the necessary transformation.

Don Carlos, the widower of the late Princess of the Austrias, the elder sister of the King, lives, with his baby Prince, the heir-presumptive, in the palace, and will continue to do so until the King has a descendant of his own.

A Madrid jeweler is manufacturing a magnificent dinner service of solid silver to be used at the wedding banquet.

CHILDHOOD INDIGESTION.

Nothing is more common in childhood than indigestion. Nothing is more

PUTTING MOON TO WORK

SUPPLYING POWER FOR NUMBER- LESS FACTORIES.

A Number of Mills Are Now Operated —Bay of Fundy Has Immense Possibilities.

Put the moon to work. Why not? At this very minute the moon ought to be heating our houses. It ought to be illuminating our cities. It ought to be running all the machinery of our factories. It ought to be operating our railroads.

The moon by its attraction exerts an immense force. The amount of energy it employs, the effect of which is represented by the tides of the ocean is so vast as to be well-nigh incalculable.

USED IN MILLS.

Now, means have already been found by which some of this lunar influence can be utilized. In fact, the moon has been put to work in a small way on the coast of New England, where a number of saw-mills and flour-mills are operated by its energy. Such mills are set up in places where there is a tidal inlet, which can be conveniently dammed, and a reservoir is provided, into which the water flows of its own accord as the tide rises. On the fall of the tide the water, running out, causes a wheel to revolve and thus moves the machinery that grinds the grain or saws the lumber.

With such object-lessons in plain sight, it is extraordinary that some of our great inventors have not already tackled the problem of putting the moon to work on a large scale.

To accomplish this, it is necessary merely to expand the idea, and to build adequate reservoirs, supplemented by the necessary machinery, in places where great bodies of water can be handled. Such a place, it has been suggested, especially suitable for the purpose, is to be found at the extreme north-east corner of the United States, where a narrow arm of the sea, known as the Bay of Fundy, exhibits phenomenal conditions in relation to tides, an enormous body of water rising and falling through a vertical distance of twenty feet twice in twenty-four hours.

BAY OF FUNDY POWER.

The amount of power allowed to go to waste every twenty-four hours in the Bay of Fundy is almost inconceivable. A small fraction of it, such as might be utilized for the adoption of expedients entirely practicable and not costly, relatively speaking, would serve to run the machinery of all the factories on the Atlantic coast, to operate all the railroads, to propel all the tram-cars, to light all the cities, and to heat all the houses and business buildings. To accomplish these things, it would simply be necessary to convert the energy into electricity, which can be transmitted to a considerable distance.

HEALTH AND BEAUTY.

THE HEIR OF SANTLEIGH

OR THE STEWARD'S SON

CHAPTER XXX.

For days Norah scarcely left the earl's side. Paralysis does not always destroy life; it is sometimes satisfied with killing the brain, depriving its victim of the use of his limbs and rendering him helpless and expressionless as a child.

The earl had lived a life of extreme quietude and care for some years past, and it came to his assistance and kept death at bay; but he was speechless and almost helpless.

Gradually a slight improvement set in; they were able to prop him up with pillows, and it seemed to Norah that, though he could not speak, he understood what she said to him.

She noticed, with the improvement in his strength, a certain change in his manner—if indeed, anything so inexpressive could be called manner—toward her. She found that his dim eyes brightened slightly when she spoke to him, and often in the night watches, when she thought him asleep, she would find his eyes set on her fixedly, as if he were trying to remember or say something.

She would have loved her father with all a daughter's love from the first moment of her home-coming; indeed, she had loved him though he had done his best to freeze all tenderness within her; but now that he was thrown upon her care the treasures of love and tenderness in her heart welled out toward him, and she loved him as only a woman can love the being who is dependent upon her.

The nurse and doctor, who had looked upon her as just a fashionable and perhaps spoiled beauty, were inwardly astonished at her devotion, and the doctor declared that it was not he, but Lady Norah, who kept life going in the feeble, stricken frame.

Guildford Berton remained in the house, and, as of old, transacted all business for the earl.

Every now and then he paid a visit to the sickroom, and stood beside the bed murmuring words of comfort to the old man; and at such times the earl fixed his eyes upon him with a strange look which Norah could not interpret; but he never attempted to speak, and showed neither pleasure nor impatience at "his young friend's" visits.

Mr. Petherick had been sent for directly the improvement set in, and tried to awaken a gleam of intelligence in the old man, but failed. The earl looked at him with the same vacant, fixed stare, but displayed no recognition.

"This is very sad for you, my dear," said the old lawyer to Norah, his eyes blinking behind his glasses, as he looked at the lovely face so pale and patient, and recalled the young girl who came so brightly into the sitting-room of the Devonshire cottage. "I am afraid you will knock yourself up. They tell me that you scarcely take any rest."

"Oh, but I do, and this is not hard work sitting here."

"The hardest I can imagine for a young girl so fond of open air as you are," he said, shaking his head. "It is a great responsibility. I wish the young viscount were here," he added, gravely.

"Can he not be found?" asked Norah. She had heard a great deal of this nephew of the earl this

the earl and herself as a man could be, and yet—I She knew that he never entered the room but that a chill swept over her, that she could scarcely meet the glance of his dark, sombre eyes without showing the repugnance which his presence awoke in her.

Lady Ferndale was strongly in favor of the removal to the Court.

"London is the worst place in the world to be ill in, dear," she said; "and I'm thinking of yourself, too. You will be able to get out into the garden, and on the terrace. Oh, yes, let us take him back. Poor, poor old man! I used to laugh at his proud, haughty, King George airs; I wish he's let me laugh at him now!" And her eyes filled with tears; not so much for the earl as for her dear girl, as she called Norah.

Mr. Guildford Berton, as usual took charge of all the arrangements; got the invalid carriage, ordered the special train, had another invalid carriage in readiness at Santleigh station, and behaved, as Lady Ferndale said, as if he were the earl's son.

"Really, dear," she said to Norah, "Guildford Berton has behaved wonderfully, and he fills me with shame and remorse. Not one man in a thousand would have done it in a better manner. He makes no fuss over anything, however much trouble it may give him. I wonder he hasn't insisted upon sitting up with the earl!"

"He has, but that was my place, Lady Ferndale, and I could not resign it to any one, not even to Mr. Guildford Berton."

The change from Park Lane to the Court did the earl neither good nor harm; but as Norah stepped out on the balcony on the evening of their return she drew a deep breath of thankfulness and relief, and tried to persuade herself that it was because of her fondness for the grand old place that she was so glad to get back.

As she stood leaning on the stone rail, and looking sadly and wistfully across the velvet lawns to the woods over which the autumn mist was gathering in a thin, veil-like cloud, Guildford Berton came out and stood beside her.

"I have come to say good-night," he said.

"You—you are going home?" said Norah. "Will you not remain the night?" she added as cordially as she could.

"Thank you, no. I don't think I shall be needed; indeed, you will not allow me to help you. But if I should be, you will send a message to the cottage, will you not?"

"Yes, I will," responded Norah, and her tone was more genial than usual, for she could not help remembering all he had done for the earl and herself. "I should like to try and thank you, Mr. Berton."

"Please do not. I have done so little," "You have done a great deal—everything," put in Norah.

"So little compared with what I should have liked to have done!"

"When my father is well he will be able to thank you better than I can," said Norah.

"He cannot thank me half so well, even if I deserved or desired thanks. One word from you, Lady Norah, outweighs a world of gratitude, and would repay me for the sacrifice of my life."

Norah flushed. "I—I must go back now," she said.

"I should like to say good-night to the earl," he said.

The earl was sitting up, looking none the worse for his journey, which had

CHILDHOOD INDIGESTION.

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more weakening to the constitution, or more likely to pave the way to dangerous disease. Nothing is more easy to keep under control, for proper food and Baby's Own Tablets will cover the whole ground. Here is strong proof. Mrs. G. G. Irving, Trout Brook, Que., says: "My baby boy was troubled with chronic indigestion and was a constant sufferer. Nothing helped him until I tried Baby's Own Tablets, but these promptly cured him and he is now as healthy a little lad as you would care to see. I always keep the tablets in the house and they quickly cure all the troubles of childhood." Every mother should keep these Tablets on hand. They cure all the minor ailments of children, and their prompt administration when trouble comes may save a precious little life. They are guaranteed to contain no opiate or harmful drug. You can get Baby's Own Tablets from any druggist or by mail at 25 cents a box by writing the Dr. Williams' Medicine Co., Brockville, Ont.

Everything in life is an education. The experience we hate the worst yields the greatest amount of education.

The Flagging Energies Revived.—Constant application to business is a tax upon the energies, and if there be no relaxation, lassitude and depression are sure to intervene. These come from stomach troubles. The want of exercise brings on nervous irregularities, and the stomach ceases to assimilate food properly. In this condition Parmenter's Vegetable Pills will be found a recuperative of rare power, restoring the organs to healthful action, dispelling depression, and reviving the flagging energies.

The death took place at Aberfeldy of Dr. Munro, at his residence, Breadalban Villas. The doctor, who was in his 81st year was a native of Moness.

RHEUMATISM AND PARALYSIS.

Their complete home cure. Post free to readers of this paper. For limited period only.

A handsome illustrated treatise, giving full description of Rheumatism and Paralysis, with instructions for a complete home cure, describing the most successful treatment in the world, recommended by the Ministry and endorsed by medical men. This highly instructive book was written by W. H. Veno, a gentleman who has made a study of these diseases. The preface is by a graduate of the University of Wurtzburg. Send postal to-day and you will receive the book free by return.—Address, The Veno Drug Co., 24 King St., West, Toronto.

The examiner wished to get the school children to express moral reprobation of lazy people, and he led up to it by asking who were the persons who got all they could and did nothing in return. For some time there was silence; but at last a little girl who had obviously reasoned out the answer inductively from her own home experiences exclaimed, with a good deal of confidence, "Please, sir, it's the baby!"

electricity, which can be transmitted to a considerable distance.

HEALTH AND BEAUTY.

Come From Rich, Red Blood made by Dr. Williams' Pink Pills.

Beauty is more than skin deep—it is blood deep. There is no real beauty, no good health without rich, red blood. Every graceful curve, every sparkle of the eye, every rosy blush, comes from rich, red blood. Dr. Williams' Pink Pills are the greatest blood builder and beauty maker in the world. Every dose actually makes new, pure, rich blood. By making new blood Dr. Williams' Pink Pills sharpen the appetite, soothe the worried nerves, regulate the health. They banish paleness, clear the complexion, bring rosy cheeks and sparkling eyes. They give plenty of strong blood for all the delicate functions of womanhood. Miss Mary Jackson, Normandale, Ont., says: "For upwards of three years I suffered from anaemia. I grew so weak I could scarcely walk about the house. I had no color in my face, my lips and gums were bloodless, I suffered from headaches and dizziness, and fell away in weight until I weighed only 94 pounds. No treatment gave me the least benefit until I began the use of Dr. Williams' Pink Pills. Inside of a few weeks after beginning the pills I began to grow better, and they soon restored my health, and while using them I gained fourteen pounds in weight. I can strongly recommend Dr. Williams' Pink Pills to all pale and feeble girls."

There are thousands of pale anaemic girls and women throughout Canada who should follow the example of Miss Jackson and give Dr. Williams' Pink Pills a fair trial. Bright eyes, rosy cheeks and perfect health would soon follow. When you buy the pills look that the full name, "Dr. Williams' Pink Pills for Pale People," is printed on the wrapper around each box. Sold by medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 by writing the Dr. Williams' Medicine Co., Brockville, Ont.

"Father," said an inquiring youth, "when a hen sits on an egg for three weeks, and it don't hatch, is the egg spoiled?" "As an article of diet, my son, it is henceforth a failure; but for political purposes it has its uses."

You need not shed any tears if you will place "The D & L" Menthol Plaster on that lame back. Try and be convinced.

George—"Are you ready to live on my income, dear?" Maud—"Certainly, dearest, if—if—" George—"If what?" Maud—"If you can get another one for yourself." George—"Another?" Maud—"Yes; another income."

Time tries all things, and as Bickle's Anti-Consumptive Syrup has stood the test of years it now ranks as a leading specific in the treatment of all ailments of the throat and lungs. It will soften and subdue the most stubborn cough by relieving the irritation, and restore the affected organs to healthy conditions. Use will show its value. Try it and be convinced of its efficacy.

He: "I always say just what I think." She: "I have often wondered why you were so quiet!"

"What we want," remarked the man who comments on things, "is reform." "Yes," said the man who notices, "and after you get it you're always clamoring for the good old days."

Mrs. Styles—"I'd have you understand that I know a good many worse men than my husband." Mrs. Myles—"My dear, you must be more particular about picking your acquaintances."

Stella: "Mabel is a girl of ideas." Bella: "Yes. She put fly-papers under the sofa to catch her little brother!"

"So your first love threw you over? Do you think she ever regretted it?" "I'm beginning to think she did. I married immediately, and she never married at all!"

are," he said, shaking his head. "It is a great responsibility. I wish the young viscount were here," he added, gravely.

"Can he not be found?" asked Norah. She had heard a great deal of this nephew of the earl, this young man who would be the next earl—perhaps so soon!—and master of Santeleigh Court. "It seems so strange his keeping in hiding all this time. Surely he must see the account of papa's illness in the papers?"

"Yes, he would if he were in England," said Mr. Petherick, thoughtfully. "But I'm afraid he is not. You see, he is a most extraordinarily erratic young man, and unless he chooses to come forward and declare himself, I'm afraid we shall not find him."

At this moment Guildford Berton entered the room.

"You are speaking of the viscount?" he said, in a low voice. "Every effort is being made to find him, Mr. Petherick."

"Have you advertised in the newspapers?"

"Well, no. Not yet. I scarcely—you see, the earl may recover—I mean sufficiently to be conscious of what is going on, and I fancy—indeed, I am sure—that he would be extremely angry if we took that step."

Mr. Petherick shook his head.

"Besides," said Berton, "I am certain Lord Santeleigh is not in England, and unless we know to what part of the world he has betaken himself, we can scarcely advertise."

Mr. Petherick was still afraid of the earl, and he shrank from taking the responsibility of advertising such a public hue and cry.

"Perhaps we had better wait a little longer. That is an extremely sensible young man," he remarked to Norah as Berton left the room. "I don't think I ever met a clearer head for business, and he appears to have been very kind and attentive."

"Oh, yes," assented Norah, trying to put some warmth of gratitude into her tone, and failing. "Mr. Berton is the closest friend papa has, and has done everything since he has been ill."

"Very kind, very kind, indeed," murmured Mr. Petherick.

He went up and touched the thin white hand lying on the coverlid by way of farewell, and the earl looked at him, and from him to Norah.

"I—er—almost think his lordship is trying to speak to me. I feel certain he knows me. Do you wish to give me any instructions, my lord?" he asked, anxiously; but the earl stared at him vacantly as before, and Mr. Petherick, who remembered his client, a stalwart young man, coughed, and blew his nose, as is the fashion with men when they are nearly moved to tears. Standing there, looking at the wreck before him, he forgot the many slights and snubs he had endured at the hands of "the superfine earl," and recalled only the best side of his nature.

"A most just and upright man, the earl, your father, my dear," he said, with a suspicious falter in his pipey voice. "It distresses me more than I can say to see him in this condition."

And he went his way, as sadly regretful as if the earl had been the sweetest-tempered of men and the mildest of clients.

When a fortnight had passed Norah noticed a certain vague restlessness in the earl's glance.

"It is something he wants," she said to the doctor, with tears in her eyes. "And I cannot think what it is, though I try for hours at a time. Do you think he wants to get back to the Court?"

"It is possible," replied Sir Andrew. "At any rate, the change may do him no harm; indeed, it may benefit him. Try it, Lady Norah—that is, if you wish to."

Now, Norah did not wish to get back very much, though she could scarcely have told why. It certainly would seem as if it could matter very little to her whether she sat in a chair beside his bed in Park Lane or Santeleigh Court; she would not acknowledge to herself the true reason—that at Santeleigh Court she would not have to live in the same house with Mr. Guildford Berton.

He had been very kind, as devoted to

repay me for the sacrifice of my life."

Norah flushed. "I—I must go back now," she said.

"I should like to say good-night to the earl," he said.

The earl was sitting up, looking none the worse for his journey, which had been rendered as easy as gold—the great smoother of all things—could make it. He glanced from Guildford Berton to Norah and back again, and his lips twitched.

"He seems no worse," he said. "Indeed, I think the change has improved him."

"You are better, papa?"

The old man looked at her for a moment, then at the pale, sombre face beside her, and his lips twitched again.

"Do you think—sometimes I cannot help thinking—that there is something on his mind? Something that he wishes to tell me of you? He looks from one to the other of us so strangely."

Guildford Berton was silent for a moment. An idea startling in its audacity, flashed into his mind.

"Can you guess what it is?" Norah asked anxiously, forgetting in her eagerness that it was Guildford Berton she was addressing.

Still he remained silent, and Norah, struck by his silence, looked at him.

"You have some idea. Please tell me what it is. It may be something that he wants me to do for him. What is it?"

"Yes, I have an idea," he said. "But"—he paused—"I do not think I can tell you to-night."

SEED TIME

The experienced farmer has learned that some grains require far different soil than others; some crops need different handling than others. He knows that a great deal depends upon right planting at the right time, and that the soil must be kept enriched. No use of complaining in summer about a mistake made in the spring. Decide before the seed is planted.

The best time to remedy wasting conditions in the human body is before the evil is too deep rooted. At the first evidence of loss of flesh

Scott's Emulsion

should be taken immediately. There is nothing that will repair wasted tissue more quickly or replace lost flesh more abundantly than Scott's Emulsion. It nourishes and builds up the body when ordinary foods absolutely fail.

We will send you a sample free.

Be sure that this picture is on the form of a label is on the wrapper of every bottle of Emulsion you buy.

"Why not?" asked Norah.
"Not to-night," he said; "to-morrow, perhaps. No, Lady Norah, I—well, I have not the courage."

"Not the courage?" repeated Norah.
"No," he said. "If I told you my interpretation you would be angry; and I cannot afford that you should be angry with me."

"I do not understand. Why should I be angry, Mr. Berton?"

"Will you give me your promise that what I may say to you shall not make you angry with me?" he asked, in a low voice.

"I do not think you would say anything that would make me angry, Mr. Berton," she said, quietly.

"Then I will tell you. I have your promise, remember, Lady Norah! You ask me if I can interpret the expression which the earl's face wears when he looks from you to me. The answer bears reference—close reference to you."

"To me?" said Norah, mechanically.

"Yes," he said, looking at her from under his eyes. "Will you carry your mind back to the night of the earl's seizure?"

Norah inclined her head slightly.

"You will remember that I came in late, and went to the earl in the library. I went to consult him about some business matter, but I found him strangely averse to discussing it. He seemed to have something on his mind. I have no doubt that the presentiment of his coming illness was upon him, and it was only natural that he should be dwelling upon the subject nearest his heart—yourself."

Norah's hand went forth, and found the earl's and held it.

"He spoke of you, Lady Norah, of the joy and comfort your presence brought him, and then—he paused and hesitated, but it was too late to draw back, and with a covert glance at her he went on, smoothly, softly—"and then he spoke of myself."

He waited to see if she would speak, but Norah remained silent.

"The earl and I have been such close friends for so long, Lady Norah, and he was so quick to notice any change in the demeanor of those about him, that it was not surprising he should remark an alteration in my manner, though I have tried to hide it from him, from all. That night he asked me what it was that weighed upon my mind. I tried to evade the question, but he had discovered the truth, and he frankly charged me with it. Can you not guess its nature, Lady Norah?"

Norah shook her head.

"He had been watching me, it seems, and had caught a glimpse of my heart, though I thought that I had succeeded in hiding it. Lady Norah, the earl, your father, asked me as bluntly as his courtesy would permit, if the change he had observed in me had any reference to you—and I admitted it. I told him the truth. I confessed that I loved you, Lady Norah!"

Norah's hand closed tightly on the earl's and a shudder shook her. She could not have spoken to save her life, but simply sat, her eyes fixed upon him with wild incredulity and amazement.

"The confession was wrung from me; I could not have kept it back; but even as I made it I felt how hopeless was the love which I had fought against and had fondly trusted I had hidden from every one. I knew—I have never forgotten—the difference in our positions. I realize it now, this moment, as keenly as I have ever done. But there is no gulf too wide for love to bridge. I had set my heart upon one as far above me as the stars in the heavens. But, though one may despair of ever reaching the stars, one may love them and look up to them with longing eyes. You have been my star, Lady Norah, and I have worshipped. I worship you still. That was my confession, Lady Norah, and I expected to hear from the lips of the earl a denunciation of my audacity and—a dismissal. I waited patiently, as a criminal waits for the passing of the sentence which will consign him to lifelong misery. But it was not pronounced. The earl was not surprised. Remember that he had discovered my secret and read my heart. He was not surprised and—he was not angry. Heaven knows

"Go—go!" dropped from her lips.
"You—you will not hear me?" he said, hoarsely.

"I—I have heard you," she said, almost inaudibly.

"If—if he could but speak!" he murmured, sorrowfully.

She turned to her father, and caught at his arm, as if imploring him to recall his consent or deny it.

"Why should you hate me so? Is it—because I have come too late, because there is another?"

"You shall not speak another word to me!" she said with parted lips, her breath coming fast and furiously, her hands clinched tightly. "Even—even if all you said be true, it would make no difference. Take my answer, Mr. Berton. I—I—she caught her breath and spoke slowly, with a hauteur he had never seen her exhibit before—"I cannot marry you; and now, will you go, please?"

"Is that the last word between us? You choose to disregard his wish, you fling my love in my face! Do you think that I am the man to take such a dismissal quietly, patiently? You little know—" He pulled himself up, and bent toward her imploringly. "Ah, forgive me; I don't know what I am saying. My heart is torn and rent by your coldness, your disdain. Have pity on me, Norah—"

She moved forward slowly, painfully as it seemed, and her hand went toward the bell.

"Stay!" he said, abruptly. "I will go. But for God's sake, have some mercy! Do not let us part like—like this. If I cannot be what I would to you, at least do not take your friendship from me." His voice grew cooler and more composed. "Remember how much I suffer by your rejection, Lady Norah, and—let that plead for me. I have spoken wildly—madly; forget what I have said, and—and—let things be as they were between us."

Her hand dropped from the bell, and, cringing, like a whipped dog, he tried to take her hand to lift it to his lips, but Norah shrank back beyond his reach and pointed to the door.

"I—I will try and forget, for his sake, she said, with difficulty; "but go!"

Then, as he left the room, she fell forward, her head bowed upon her hands, and one word broke from her lips:

"Cyril!"

(To be continued.)

IT MUST BE WELL FOUNDED

STEADY GROWTH IN POPULARITY OF DODD'S KIDNEY PILLS.

Made by Cures Like That of Simon V. Landry—He Tells About it Himself.

River Bourgeois, Richmond Co., C. B. Jan. 15—(Special).—Among the many men in this part of Canada whom Dodd's Kidney Pills have relieved of aches and pains and weakness and made strong and able to do a good day's work is Mr. Simon V. Landry. Mr. Landry has numerous friends here who can vouch for the story he tells of his cure.

"I was bothered for over a year," he says, "with lame back, weak legs, palpitation of the heart, general weakness and shortness of breath; in fact I could not work and was a total wreck."

"I could not get anything to help me till I tried Dodd's Kidney Pills. But they did me good and no mistake. I used three boxes and I'm back at work again."

It is the cures that make Dodd's Kidney Pills so popular. Their popularity has grown steadily for thirteen years. It must be well founded.

Crabbe: "To-day for the first time, I was really delighted to hear my neighbor's piano going." Friend: "Some thing worth listening to, I suppose?" Crabbe: "I should say so. I heard the hire purchase men taking it away."

"Bought my Life for 35 Cents."—This was one man's way of putting it when he had been pronounced incurable from chronic dyspepsia. "It was a living death to me until I tried Dr. Von Stan's

tenze which will consign him to lifelong misery. But it was not pronounced. The earl was not surprised. Remember that he had discovered my secret and read my heart. He was not surprised and—he was not angry. Heaven knows how much above my poor deserts he esteems me! So much that, in place of condemnation and rebuke, he spoke—Heaven bless him!—he looked gratefully toward the wan, drawn face lying back on the pillows—"he spoke words of comfort and encouragement. Ah, Lady Norah, none but I and those dear to him can fully appreciate the nobility of his nature! It was I who shrank with unfeigned humility from confessing my love; it was he, the noble father, who, consenting to forget the difference in our rank, bade me hope."

Norah's gaze grew more full of horror. "Even more than that," he went on after a pause: "he was good enough to tell me, with all the frankness of a father, that he had seen my love for you, and that he would not only give his consent to my suit, but his countenance and generous approval! Lady Norah, it is with the sanction of your father, with the knowledge that I have his best wishes, that I kneel at your feet and avow my love!" and he dropped on one knee and held out his hand to her almost in the attitude of worship.

"I—I have surprised you, alarmed you! I should have prepared you, and yet—ah, Lady Norah, surely you cannot have been blind to the love I bear you. During all these months you must have seen how completely and entirely I have been your slave. There is no hour in which I have not thought of you; no moment in which I have not striven to find some way of proving myself less unworthy of you. Yes, though I have tried to crush the love out of my heart, and have told myself that there could be no hope, no gleam of hope for me, I could not succeed. Such love as I bear for you cannot be crushed; it is the life of a man's life; it abides with him unto death. I could no more help loving you than I could help breathing. Think, then, with what joy I heard that noble-hearted man tell me that I might plead with you, might lay my love and my life at your feet, and, if I could, win you for my wife! Lady Norah, it is not only I who speak and implore you to say 'Yes,' but the father who loves you and whom you love."

"It—it is false!" broke from her lips. "You doubt me! You disbelieve!" he murmured, sorrowfully. "You say that—that my father sanctioned, consented—" "More than sanctioned," he said, softly, pleadingly. "Must I tell you all? You force me. Lady Norah, it has long been his wish that you should be my wife!"

Heaven above knows whether the stricken man, whose presence Guildford Berton had disregarded as completely as if he had been already dead, heard and understood; but at that moment a sound like a faint moan broke from his shriveled lips, and, as Norah sprang up and turned to him with a cry, a shudder ran through Guildford Berton and his face blanched. But in a moment he had shaken off the dread which had seized upon him.

"You see, you hear! Ah, if he could speak—and would to Heaven he could!—he would bear me witness."

It was a fiendish stroke, and its very audacity made it successful.

Norah looked into the earl's face, working with a piteous effort to regain the power of speech, and she accepted Guildford Berton's interpretation. With a low cry of despair and horror she flung herself down, and hid her face upon the old man's hands, for he looked across her at Berton, his face still working, but with vacant, expressionless eyes.

"Norah, for Heaven's sake, for his sake, do not—do not treat me like this! What have I done—what am I—that you should shrink from me?" He stopped suddenly and started, for a voice, audible to his own ears only, seemed to whisper in ghastly tones, "Murderer!"

"Norah speak to me. Tell me that you forgive me, at least. Is it such an unpardonable crime to have loved you? Ah, how could I help it? I who lived in the sunshine of your presence—"

THE HOPELESS INSANE

FORMER HARVARD PROFESSOR ADVOCATES THEIR REMOVAL.

He Favors Killing Off of Those Hopelessly Diseased and Victims of Accidents.

Dr. Chas. Eliot Norton, of Cambridge, Mass., has joined forces with Miss Annie S. Hall, of Cincinnati, and with Mrs. Maud Ballington Booth in their campaign for the killing off of the hopelessly insane, hopelessly diseased and victims of accidents. His views are expressed in a letter written to Miss Hall and made public here.

Dr. Norton was formerly Professor of Literature at Harvard. He was a friend of Longfellow and Lowell, and with them made the famous translation of the "Divine Comedy." He heads his letter "An appeal to reason as well as compassion," addressed Miss Hall, and writes:—

"The principle that it is a duty to prolong every human life as long as possible, at whatever cost, has hitherto been generally accepted.

"Its main support has been the doctrine of the sacredness of human life.

"The doctrine and the practice have both been pressed too far. There is no ground to hold every human life as inviolably sacred, and to be preserved, no matter with what results to the individual, or to others. On the contrary there are cases to which every reasonable consideration urges that the end should be put. Setting aside all doubtful cases, no right thinking man would hesitate to give a dose of laudanum, sufficient to end the suffering and life together, to the victim of an accident from the torturing effects of which recovery was impossible, however, many hours of misery might be added to conscious life by stimulants or surgical operations.

"Nor should a reasonable man hesitate to hasten death in the case of a mortal disease such, for example, as cancer, when it has reached the stage of incessant severe pain and when the patient desires to die.

"The prolongation of life in such a case, by whatever means, is mere criminal cruelty.

"Or take another instance, that of an

UNCONSCIOUS POISONING.

How it Often Happens From Coffee.

"I had no idea," writes a Duluth man, "that it was the coffee I had been drinking all my life that was responsible for the headaches which were growing upon me, for the dyspepsia that no medicines would relieve, and for the acute nervousness which unfitted me not only for work but also for the most ordinary social functions.

"But at last the truth dawned upon me I forthwith bade the harmful beverage a prompt farewell, ordered in some Postum and began to use it. The good effects of the new food drink were apparent within a very few days. My headaches grew less frequent, and decreased in violence, my stomach grew strong and able to digest my food without distress of any kind, my nervousness has gone and I am able to enjoy life with my neighbors and sleep soundly o' nights. My physical strength and nerve power have increased so much that I can do double the work I used to do, and feel no undue fatigue afterwards.

"This improvement set in just as soon as the old coffee poison had so worked out of my system as to allow the food elements in the Postum to get a hold to build me up again. I cheerfully testify that it was Postum and Postum alone that did all this, for when I began to drink it I 'threw physic to the dogs.'" Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the famous little book "The Road to Wellville" in pkgs.

The Pall of Rheumatic Pains.—When a sufferer finds permanent relief in such a meritorious medicine as South American Rheumatic Cure, how glad he is to tell it. C. W. Mayhew, of Thameville, Ont., couldn't walk or feed himself for months—four years ago three bottles of this great remedy cured him—not a pain since—isn't that encouragement for rheumatic sufferers?—82

"What's that man yelling at?" asked the farmer of his boy. "Why," chuckled the boy, "he's yelling at the top of his voice."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

"Some men say," remarked the beautiful heiress, "that I have no heart." "Oh! that doesn't matter," replied the poor but willing youth; "I'll give you mine."

Nothing looks more ugly than to see a person whose hands are covered over with warts. Why have these disgusting growths on your person when a sure remover of all warts, corns, etc., can be found in Holloway's Corn Cure.

Heart Disease Relieved in 30 Minutes. Dr. Agnew's Cure for the Heart gives perfect relief in all cases of Organic or Sympathetic Heart Disease in 30 minutes and speedily affects a cure. It is a peerless remedy for Palpitation, Shortness of Breath, Smothering Spells, Pain in the Left Side, and all symptoms of a Diseased Heart. One dose convinces.—83

Mr. James Waugh, the veteran trainer, died at his residence, Meynell House, Newmarket, after a somewhat prolonged illness. Deceased was born at Jedburgh, in Scotland, and was 74 years of age.

Sleeplessness.—When the nerves are unstrung and the whole body given up to wretchedness, when the mind is filled with gloom and dismal forebodings, the result of derangement of the digestive organs, sleeplessness comes to add to the distress. If only the subject could sleep, there would be oblivion for a while and temporary relief. Parmelee's Vegetable Pills will not only induce sleep, but will act so beneficially that the subject will wake refreshed and restored to happiness.

The World says it is expected that Sir Robert Finlay, the Attorney-General, will be appointed a Lord of Appeal in the place of Lord Lindley, whose resignation is expected shortly.

Like little volcanoes of disease, the eruptions of eczema pour out discharges. Bad blood causes the trouble. The local remedy is Weaver's Cerase, and Weaver's Syrup will drive the poison from the blood.

THE MINISTER'S BOY'S WORK.

Mother—What! Fighting again? Such a black eye! If you'd only follow the lead of the minister's little boy—

Tommy—Aw, I did try ter foller his lead, but he led again wid his left, an' dat's where he biffed me.

NO RISK.

"I understand your life insurance company regarded you as an exceptionally good risk."

"No," answered the displeased policy holder; "I wasn't any risk. I was a sure thing."

THE WHOLE BILL.

"Did the Brownstones give boxes of wedding-cake to the guests?"

"They did more than that; they gave souvenir headaches with the punch."

No woman can hope to remain young forever—unless she's an actress.

"Do you know a positive cure for obesity?" "I do." "What is it?" "Worry."

The Squire: "Well, my boy, you see in a great hurry to get to your school to-day." Boy: "Yes, sir. Bill Jones going to git a licking this morning for playing truant, and I don't want to mix it."

hire purchase men taking it away."

"Bought my Life for 35 Cents."—This was one man's way of putting it when he had been pronounced incurable from chronic dyspepsia. "It was a living death to me until I tried Dr. Von Stan's Pineapple Tablets. Thanks to them to-day I am well, and I tell my friends I bought my life for 35 cents." 60 in a box.—80

A—"I visited my native place last week. Thought I would show my old schoolfellows how prosperous I had been since I left home." B—"Did they seem to appreciate your rise in the world?" A—"Well I should say so. Al most every man I met wanted to borrow a dollar."

A **Platter of Importance** to all those who are run down and debilitated is the fact that "Ferrovin" is the best tonic ever compounded. It gives strength and builds up the system.

Mr. Wm. Hilloak, Bellevue House Bonarbridge, died in his 87th year. Deceased was a native of Kirkcaldy, and a noted horticulturist.

"Man is Filled With Misery."—This is not true of all men. The well sound of lung, clear of eye, alert and buoyant with health, are not miserable, whatever may be their social condition. To be well is to be happy, and we can all be well by getting and keeping our bodies in a healthful state. Dr. Thomas' Electric Oil will help all to do this.

The Scottish Volunteer force want 360 officers to complete its establishment.

Dr. Gibson, Campbelltown, has completed 50 years' service as medical officer under the Parochial Board and Parish Council.

There is no such thing as a harmless cough. The trouble is for a while worse than a check. Allen's Lung Balsam cures the worst cough. It allays inflammation and clears the air passages.

Patient: "Do you extract teeth without pain?" Dentist: "Not always; I was pulling a tooth the other day and nearly sprained my wrist, and it feels so now yet."

What Makes you Despondent?—Has the stomach gone wrong? Have the nerve centres grown tired and listless? Are you threatened with nervous prostration? South American Nervine is Nature's corrector, makes the stomach rich gives a world of nerve force, keeps the circulation perfect. A regular constitution builder for rundown people. One lady says: "I owe my life to it."—84

On the occasion of her retirement from the Johnston school, Kirkcudbright, after 22 years' service Miss Anderson has been presented with a suitable testimonial from the teachers and scholars.

If your children moan and are restless during sleep, coupled, when awake, with a loss of appetite, pale countenance, picking of the nose, etc., you depend upon it that the primary cause of the trouble is worms. Mother Graves' Worm Exterminator effectually removes these pests, at once relieving the little sufferers.

At a meeting in Edinburgh a new society, to organize agriculture in Scotland, was formed under the name of the "Scottish Agricultural Organization Society." A committee with Sir John Blimour, Bart., of Montrave, as president, was also appointed.

Shiloh or Cure

If Shiloh's Consumption Cure fails to cure your Cold or Cough, you get back all you paid for it. You are sure of a Cure or the Cash.

If it wasn't a sure cure, this offer would not be made.

Can anything be fairer?

If you have a Cold, Cough, or any disease of the Throat, Lungs or Air Passages, try

FIRST NATIONAL CONVENTION

Russian Czar Will Introduce Constitutional Government.

DEMANDS BROAD ELECTION LAW.

A despatch from St. Petersburg says: The first national convention organization by a political party in the history of Russia, that of the Constitutional Democrats, opened here on Thursday. Two hundred and fifty delegates, representing sixty provincial organizations, were present. Under the chairmanship of M. Petrunkevitch, of Iver, the convention took up the discussion of the party's attitude towards the election to the National Assembly. Prof. Miliukoff, Editor Hessen and Prince Hakeffsky were the leading speakers. The two first named advocated participation in the Duma, but only so long as it was shown that the majority of the Duma sympathized with the principles of the party. Prof. Miliukoff declared that unless the results of the preliminary elections were favorable to the Constitutional Democrats, the latter should withdraw from the electoral colleges.

Editor Hessen said, in view of the gathering agrarian storm, unless the representatives in the Duma immediately instituted all the liberties demanded and passed a broad and simple election law, instead of the present "worthless" law, the "struggle must be recommenced along the old lines, and all the forces of society must be mobilized to war against the common enemy."

The delegates reported that the party had made good progress, but that the reactionary local authorities were interfering with the propaganda in various sections. Complaints concerning this interference, they said, had been made to Count Witte, but only slight satisfaction had been given.

CZAR'S FIRM DECISION.

The St. Petersburg correspondent of the London Times cables:—Although the present government's apparent determination to persist in a policy of reaction, taken in conjunction with the disastrous condition of the country's finances and the spectre of famine and unrelenting bitterness among all classes, does not encourage the hope of a peaceful development of the Russian crisis there, is, at least, one bright spot in the horizon. This ray of light is furnished by the persistent, unshakable determination of the Sovereign to introduce constitutional government. It was announced on Wednesday that the Emperor has ordered a council of Ministers to elaborate an amendment of the organic laws of the empire in conformity with the manifesto of October 30. Although the announcement is not official, I am satisfied that it certainly represents the intentions of Nicholas.

CARE IN MANUFACTURE

CHEESE AND BUTTER DISCUSSED BY WESTERN DAIRYMEN.

Valuable Pointers on Preparations of Canadian Products for the British Market.

At the Western Dairymen's Convention held at Ingersoll last week, Geo. H. Barr, chief instructor for Western Ontario, presented a report of the work conducted during the past season. The number of instructors in the district in 1905 was one greater than during the previous year. In the district there are

A GRAIN FAMINE.

Second reports from the famine districts are very alarming. Grain cannot be transported owing to the disorganization of the railway service. It is reported from Kieff that agrarian outrages have broken out afresh. Policemaster Rostoff on the Don has been indicted for not preventing a massacre of Jews.

ELECTORAL CAMPAIGN.

A despatch from St. Petersburg says: The holiday truce in Russian politics is over, and the new political parties are mustering their strength for Russia's first all-important electoral campaign. There will be a conference of leaders of the allied moderate parties from various parts of the empire here this week. This coalition, which embraces the party of law and order, the Octobrists and five lesser factions, has chosen the name of Constitutional Monarchists, and will nominate candidates in common. Though officially they are in favor of continuing the armed revolt, they have realized the necessity for securing representation in the coming National Assembly, and are concentrating their attention on securing a full registration from the Labor, professional and Socialistic organizations.

A LILLIPUTIAN REPUBLIC.

Following the example of their brothers on the mainland, the peasantry of even the tiniest province in the Baltic have instituted independent republics. One of these, the Islet Linnusit, probably the smallest State in the world, already boasts of a revolution and a second President, the citizens having risen and overthrown the first, the present Chief Magistrate, Janeenson, addressing them in proclamations as "My faithful subjects."

PLOT TO KILL DOUBASOFF.

A despatch from St. Petersburg says: The police of Moscow warned Vice-Admiral Doubasoff, Governor-General of Moscow, not to attend the ceremony of blessing the waters there because they had learned of a plot to kill him with bombs. He replied that if they knew of the plot they ought to know how to prevent its execution. He attended the ceremony and returned unharmed. It seems that the plot was genuine. A woman calling herself Princess Koslovskia and two or three others were arrested. Eight bombs and a quantity of arms and correspondence were found at Princess Koslovskia's residence. The papers seized indicated that the conspiracy was aimed at Governor Doubasoff.

55 were cream-gathering creameries; 49 used the Babcock test and 22 the oil-test churn. In the district there was an expenditure of \$18,210 on new creameries and improvements.

A feature of the meeting was an address by Prof. G. F. McKay, of Ames Agricultural College, Iowa, who stated that the production of dairy produce in the United States in 1905 was valued at \$700,000,000. Of this \$300,000,000 was represented in butter. The State of Iowa alone produced butter and eggs in quantities which made them of greater value than the combined gold output of the United States and Alaska.

After Prof. McKay addresses were delivered by J. A. Ruddy and J. A. McFeeters, of Owen Sound, dealing with some needs of the industry. Mr. Ruddy referred to the conditions in Europe, and pointed out that considerable loss resulted to the butter trade through

BISHOP IN HOT WATER.

Wrote a Letter Expatiating on Japanese Social Immorality.

A Tokio despatch says: There is intense feeling against William Awdry, the Anglican Bishop of South Tokio. He wrote a letter last autumn to the London Times, expatiating on Japanese social immorality. His letter attracted wide attention, and has evoked some strong replies from Baron Suyematsu, son-in-law of Marquis Ito, and former Minister of the Interior, now a resident of England, and others in that country, and Baron Kaneko, former Minister of Justice, here. The newspapers state that already they have created a strong sentiment in England that the Japanese are unworthy of being allies. Those who have replied to the letter stigmatize it as the act of a spy. Already the Bishop has received threatening letters, and fear of violence has induced his English and Japanese friends to form a special society for his protection. Fortunately, the Bishop is now away upon a mission to the Benin Islands.

DEAD BESIDE THE TRAIL.

The Mounted Police are Investigating the Case.

A despatch from Lloydminster, N. W. T., says: A case which is attracting the attention of the Mounted Police down the line will probably be investigated by Coroner Rush of Vegreville at the request of Inspector Strickland. According to the story which has reached the authorities, John Fletting and a brother left Lloydminster one afternoon about a month ago with a team of horses to drive to their claims, a few miles south. When they left they were intoxicated and plentifully supplied with whiskey. A few hours afterwards the brother, still intoxicated, arrived at the homestead of some Galicians, and asked them to go out and look for his brother John, who, he said, had got lost on the road somewhere. The Galicians went out and found John Fletting lying alongside the trail about two miles from the house, dead. They brought the body to the house and next day it was buried without the formality of a Coroner's inquest. Owing to reports since circulated, the police are investigating.

APPLE SHIPPERS FINED.

Were Guilty of Violation of Fruit Marks Act.

A Trenton, Ont., despatch says: Two cases of importance to fruit-growers and exporters are disposed of before Magistrate O'Rourke here on Thursday, when convictions for violation of section six of the Fruit Marks Act were registered against James Coyle and F. C. Morrow. The former contested the action and a fine of \$50 and costs or 30 days in jail was imposed. This was at the rate of \$1 per barrel, the Court finding that in the shipment complained of there were 50 barrels below the standard required in the Act. Mr. Morrow entered a plea of guilty and was let off with a fine of \$5 and costs. The inspectors pointed out that in Mr. Morrow's case they examined five barrels, and that subsequently he had given them a written admission that there were at least 40 barrels of apples marked XXX that were packed in the same quality of grade as the five examined by the inspectors and found to be below the standard.

WILL ERECT DAIRY SCHOOL.

Coming Session Will Include Grant in the Estimates.

A Toronto despatch says: It was announced on Friday at the Parliament Buildings that the petition of the Western Dairymen's Association that a building for scientific research work in dairying be erected at Guelph will be answered favorably. The Government has already decided to include in the estimates for 1906 an amount for such

LEADING MARKETS

BREADSTUFFS.

Toronto, Jan. 23.—Wheat—Ontario—No. 2 white, 79c; red, 78c to 79c; mixed, 78c; goose, 75c; spring, 74c to 75c, at outside points.

Wheat—Manitoba—No. 1 northern, 86½c; No. 2 northern, 84c; No. 3 northern, 82c. All-rail quotations, North Bay, are: No. 1 hard, 90c; No. 1 northern, 87½c.

Flour—Ontario—The market is firmer at \$3.10 to \$3.15 bid for export for 90 per cent. patents at outside points. One sale was reported at \$3.20. Manitoba—First patents easier, \$4.40 to \$4.50; second patents, \$4.20 to \$4.30.

Millfeed—Ontario bran in bags outside, \$17; shorts, \$18.

Oats—Firm at 35c to 36c, outside.

Barley—48c to 49c for No. 2, 43c to 45c for No. 3 extra and 42c to 43c for No. 3, outside.

Peas—Firm at 79c, outside.

Rye—70c, outside.

Buckwheat—Firm at 52½c to 53c, outside.

Corn—Canadian, 44½c, Chatham freights; American, No. 2 yellow, 51½c; No. 3 yellow, 51c; mixed, 50½c, Toronto freights.

COUNTRY PRODUCE.

Butter—Quotations are unchanged.

Creamery 24c to 25c

do solids 23c to 24c

Dairy lb. rolls, good to choice, 21c to 22c

do tubs 21c to 22c

do medium 19c to 20c

do inferior 18c to 20c

Cheese—Unchanged at 13c for large and 13½c for twins.

Eggs—New laid are offering at 24c to 25c, cold storage at 18c to 19c, and limed at 17c.

Poultry—Fat chickens, 10c to 11c, thin 7c to 8c; fat hens 7½c to 8½c, thin 6c to 7c; ducks 12c to 13c, thin 6c to 8c; geese 10c to 11c; turkeys 14c to 15c for choice small lots.

Dressed Hogs—The market is quotable higher at \$8.50 to \$8.75 per cwt. for car lots here.

Potatoes—Ontario, 65c to 75c per bag, on track here, 75c to 85c out of store; eastern, 70c to 8c on track and 80c to 90c out of store.

Baled Hay—\$8 per ton for No. 1 timothy, in car lots here, and \$6 for No. 2.

Baled Straw—Carlots on track here are quoted unchanged at \$6 per ton.

MONTREAL MARKETS.

Montreal, Jan. 17.—Grain—Although business is rather quiet on account of the unfavorable weather and other conditions, the local grain markets are very firm in tone.

Oats—No. 2 white, 40c; No. 3 white, 38½c to 39c, and No. 4 white, 38c.

Peas—79c f.o.b. per bushel.

Barley—Manitoba, No. 3, 47½c; No. 4, 45½c to 46c.

Corn—American mixed, 53c; No. 3 yellow, 53½c extra.

Flour—Manitoba spring wheat patents, \$4 to \$4.50; strong bakers', \$4.20; winter wheat patents, \$4.25 to \$4.50; straight rollers, \$4 to \$4.10; in bags, \$1.85 to \$1.95; extras, \$1.65 to \$1.75.

Millfeed—Manitoba bran in bags, \$18; shorts, \$20 per ton; Ontario bran in bulk, \$14.50 to \$15; shorts, \$20; milled mouille, \$21 to \$24; straight grain mouille, \$25 to \$27 per ton.

Rolls Oats—Per bag, \$2.40.

Cornmeal—\$1.45 to \$1.50 per bag.

Hay—No. 1, \$8.50 to \$9; No. 2, \$7.25 to \$7.50; clover, \$6 per ton in car lots.

Cheese—Holders are asking 13c to 13½c.

Butter—Choice creamery is selling in the local market at 23c to 23½c, and under grades at 22c to 22½c. Some fancy stock is bringing 23½c. Dairy butter is in good demand in 21c in tubs and 21c to 21½c for rolls.

Eggs—Selects quoted at from 23c to 24c, and limed at 18c to 19c. Strictly new laid are selling well at 24c.

Potatoes—In bags of 90 pounds, 65c to \$1.

Honey—White clover, in comb, 13c to

carried, presented a report of the work conducted during the past season. The number of instructors in the district in 1905 was one greater than during the previous year. In the district there are 21 cheese factories, and of these 171 were visited regularly; 500 patrons were visited by the instructors, and \$35,033 was expended in building new factories and making general improvements. Generally, the quality of milk delivered at the factories showed considerable improvement over the previous year. "Still," said the instructor, "there is a lot of over-ripe cream coming in, and a very regrettable feature is that in 1905 there were more cases of watering and skimming milk than in the previous year. This I consider a reflection on the farmers." The quality of the cheese produced was, on the whole, superior to anything ever turned out before, but a few dry hard cheeses were made during the hot summer months.

NEGLECT OF OPPORTUNITIES.

G. A. Putnam, Superintendent of Farmers' Institutes, in an address, dealt with some features of agricultural education. He drew attention to the fact that farmers in too many cases do not take advantage of the opportunities for education and benefit offered by Government and other institutions. Farmers' Institutes meetings and conventions in general were not patronized as they should be by the farmers. Those who needed the instruction most too often did not take the trouble to come out to the meetings.

Referring to the bacon industry, Mr. Putnam stated that several of the institute workers who have been in different sections of the province report that farmers are in many cases reducing their production of hogs owing to the unsettled condition of the bacon industry. Mr. Putnam pointed out that dairymen could not work their business to advantage unless hog production received its fair share of attention, and he urged upon the farmers the importance of maintaining both the supply of hogs and the desirable bacon type.

CHEESE IN ENGLAND.

Dealing with Canadian cheese in England, Prof. H. H. Dean, of the Ontario Agricultural College, gave an address based on his observations while in the Old Country last summer. Referring to the special features of the different English markets, Prof. Dean stated that, in his opinion, a heavy loss is being sustained by makers in Ontario producing a cheese too close in texture. The English market does not demand such cheese, and in producing it more acid must be developed, and more milk is required to make a pound of cheese, thus making it much more expensive to produce. Prof. Dean stated that early in the season English buyers expected to get Canadian cheese at a fairly low price, as the prospects were for a heavy production. The Canadian merchants and factory men, however, held out for good prices, and through their action the farmers of the country are to-day from \$5,000,000 to \$6,000,000 better off than they would have been had the merchants not acted as they did.

COOL CURING.

J. A. Ruddy, Dairy Commissioner for Canada, discussed the cheese situation, and drew attention to the fact that at present Canada supplies about 80 per cent. of the cheese imported to Great Britain. But the importation of cheese into Britain has not increased within the last few years, and in order that we may increase our shipments we must increase the demand by improving the quality of our products. Mr. Ruddy contended that the most efficient means of improving the quality of Canadian cheese, and thus increasing the demand, is in having it cured at a temperature not above 60 degrees.

POINTERS ON BUTTER MAKING.

George H. Barr presented the instructor's report. In Western Ontario there are now 71 creameries, as compared with 59 in 1904. Of the total number 53 last year were visited regularly by the instructors, 324 visits being made. Of the 71 creameries 1 received whole milk, 11 were conducted on the combination, and

12 others, or Owen Sound, dealing with some needs of the industry. Mr. Ruddy referred to the conditions in Europe, and pointed out that considerable loss resulted to the butter trade through mould on butter. Prof. F. S. Harrison, of the Ontario Agricultural College, Guelph, discussing this question, stated that moulds were encouraged by loose packing of butter and the use of green wood for boxes. He recommended that butter paper be dipped into formalin, as the best preventive measure against mould.

PRESIDENT CREELMAN.

Mr. George C. Creelman, President O.A.C., Guelph, gave an address largely of an entertaining character adapted to an audience where others than those directly connected with dairy work were represented. He expressed a hope that he would see the day when, as in the old land, one county would be noted for its sheep, another one for breed of cattle, another for another breed, so that buyers wanting a particular class of animal could go direct to the particular county and secure what they required. He approved of Premier Whitney's scheme to have agricultural high schools in various parts of the Province.

TENDERS CALLED SOON.

Contracts on Continental Will be Rushed.

An Ottawa despatch says: Within a few days the National Transcontinental Railway Commissioners will probably be calling for tenders for construction in portions of the Government section between Quebec and Winnipeg. Messrs. Morse, Wainwright and Wood, directors of the Grand Trunk Pacific, were in the city on Friday in conference with the National Transcontinental Railway Commissioners in connection with the construction work on the Government section, which the company is anxious should be rushed with all possible expedition from Winnipeg to Lake Superior Junction.

Another incentive to the early letting of contracts is that successful tenderers may be able to push supplies northward while the ice and snow affords facilities for transportation. The letting of all contracts will be subject to approval by the Governor-in-Council. Assurances were given by Mr. Parent and his colleagues that tenders would be asked within two or three weeks, and the work energetically pushed so that the line would be ready for traffic by August, 1907.

LARGE SLAUGHTER OF DEER.

Express Companies Carried 3,310 From Hunting Grounds.

A despatch from Toronto says: Returns from the express companies to Chief Game Warden Tinsley indicate that the slaughter of deer in the forests of the province during the last open season was larger than in former years. The companies carried 3,310 carcasses from the various shipping points in the hunting districts. This was 270 more than in the former season, but it does not represent more than a quarter of the game shot. Many hunters residing in the neighborhood kill their two deer to which they are entitled and do not need to send them to their homes by rail, but cart them away. A large number of moose were also exterminated. The express companies have carried 150 heads of these animals. Others remain yet to be sent.

ZERO IN PEKIN.

First Snowfall—Poor Suffering and Beggars Freezing.

A Pekin despatch says: The first snow of the winter fell here last night, and was followed by zero weather, the temperature being the lowest for years. The poor are suffering severely, and beggars are freezing. The jinricksha men are unsheltered.

building for scientific research work in dairying be erected at Guelph will be answered favorably. The Government has already decided to include in the estimates for 1906 an amount for such an institution at the Ontario Agricultural College. This will contain the most modern equipment for advanced study on the subject of dairying. In order to receive the best apparatus for the new laboratories the department has decided to send delegates to the United States to investigate similar institutions and factories there.

CANADIAN GRAIN.

More Carried by Vessels of the United States.

An Ottawa despatch says: During the period from Sept. 1st to the close of navigation, Dec. 12th, there were shipped from Port Arthur and Fort William of the crop of 1905 30,358,066 bushels of wheat, 396,291 bushels of oats, 280,904 bushels of barley, and 147,469 bushels of flax. Of the wheat 19,139,184 bushels was carried in Canadian and 11,218,882 bushels in American vessels, of which latter quantity 10,613,822 bushels went to Buffalo, 1,382,000 bushels to Port Huron and about half a million bushels to Erie, Pa.

During the corresponding period of 1904 only 2,724,135 bushels of Canadian wheat, out of a total of 17,116,281 bushels shipped, were forwarded by American ports.

WILL TRAVEL PARTLY INCOG.

No Elaborate Programme for Visit of Prince Arthur.

A despatch from Ottawa says: There is no elaborate programme in connection with the forthcoming visit to Canada of Prince Arthur of Connaught. The prince is quite a young man, and does not care for public functions. As much as possible, therefore, he will travel incognito across Canada. He and his companions are expected to reach Victoria on March 28th, and after spending a day there and at Vancouver, they will go on to Banff, for one day, Winnipeg one day, Toronto one day, Ottawa two or three days, Montreal and Quebec each a day, and then on to Halifax, whence they sail for England.

THE CANNON BURST.

Men Were Firing a Salute on New Year's Day.

A Dauphin, Man., despatch says: An Indian courier just arrived from Courtland Lake brings word of a bad accident which happened there on New Year's Day. At the Hudson's Bay post was an old cannon used for firing salutes on fête days. In discharging the gun on the day in question it exploded and badly injured Joseph Boulanger, H. B. Ficker, Captain Haight, John Seymour and the local school teacher. Boulanger suffered most from the explosion, but he is expected to recover.

THE MIKASA DOOMED.

Attempt to Pump Out Togo's Flagship a Failure.

A Tokio despatch says: An attempt was made on Wednesday to pump out the battleship Mikasa which caught fire at Sasebo Sept. 12th and sank after an explosion. The attempt was a failure, and it disclosed unexpected rents in her hull.

IMMIGRATION IS INCREASING.

Ten Thousand More Last Year Than During Last Season.

A despatch from Ottawa says: For the year ending December last there was an increase in immigration of 10,395, as compared with the year previous. The arrivals for the year 1905 were: British, 64,863; Continental, 35,331, and United States, 44,424, making a total of 144,618, as compared with 134,223 for 1904. The prospects are that the returns for 1906 will be greater than for the past year.

24c, and limited at 18c to 19c. Strictly new laid are selling well at 23c.

Potatoes—In bags of 90 pounds, 65c to \$1.

Honey—White clover, in comb, 13c to 14c per pound sections; extract, 8c to 9c; buckwheat, 6 1/2c to 7c.

Provisions—Heavy Canadian short cut pork, \$19 to \$20; light short cut, \$18 to \$19; American short cut, \$19; American cut clear fat back, \$19 to \$20; compound lard, 6 1/2c to 7c; Canadian pure lard, 10 1/2c to 11c; kettle rendered, 11 1/2c to 12c; ham, 12c to 13c, according to size; bacon, 13c to 14c; fresh killed abattoir dressed hogs, \$9.75 to \$10; country dressed, \$8.75 to \$9.50; alive, \$7.25 for mixed lots.

BUFFALO MARKETS.

Buffalo, Jan. 23.—Flour—Steady. Wheat—Nothing doing. Corn—Firm; No. 2 yellow, 48 to 48 1/2c; No. 2 corn, 48 1/2c. Oats—Unsettled; No. 2 white, 35 1/2 to 36c; No. 2 mixed, 34 1/2c.

NEW YORK MARKETS.

New York, Jan. 23.—Wheat—Spot easy; No. 2 red, 90 1/2c in elevator and 92 1/2c f.o.b. afloat; No. 1 northern Duluth, 97 1/2c f.o.b. afloat.

LIVE STOCK MARKET.

Toronto, Jan. 23.—The features of trading at the Western Cattle Market to-day were a further advance in hog prices and an easier feeling in butcher cattle.

Export Cattle—Quotations are unchanged. Choice are quoted at \$4.60 to \$5, good to medium at \$4 to \$4.50, others at \$3.75 to \$4, bulls at \$3.50 to \$4, and cows at \$2.75 to \$3.50.

Butcher Cattle—Picked lots \$4.20 to \$4.50, good to choice \$3.70 to \$4.20, fair to good \$3 to \$3.60, common \$2.50 to \$3, cows \$2 to \$2.75, bulls \$1.75 to \$2.25, and canners \$1.75 to \$2.50.

Stockers and Feeders—Short-keep feeders are quoted at \$3.60 to \$4, good feeders at \$3.40 to \$3.65, medium at \$2.50 to \$3.50, bulls at \$2 to \$2.75, good steckers run at \$2.80 to \$3.50, rough to common at \$2 to \$2.70, and bulls at \$1.75 to \$2.50.

Milch Cows—Quotations are unchanged at \$30 to \$60 each.

Calves—Quotations are unchanged at \$2 to \$12 each and 3 1/2c to 6 1/2c per lb.

Sheep and Lambs—Export ewes are quoted at \$4.50 to \$4.75 per cwt., and bucks and culls at \$3.50 to \$3.75. Grain-fed lambs, ewes and wethers, \$6.40 to \$6.65, and bucks at \$6 to \$6.25.

Hogs—The market continues firm and is quoted at an advance of 10c per cwt., at \$6.75 for selects and \$3.50 for lights and fats.

FAMINE IN NORTH JAPAN.

Nearly One Million Persons Known to be Suffering.

A Tokio despatch says: Conservatively compiled statistics, published in the newspapers, show there are 960,000 persons in North Japan who are famine-stricken. Undoubtedly the suffering is far greater than the Government is willing to advertise.

Premier Saionji has announced the adoption of the budget of the former Premier, Katsura. He urges Constitutionalists to give him their undivided support.

DERRICK FELL, MEN CRUSHE.

Avalanche of Rock and Timber Precipitated into Deep Cut.

A despatch from Keewatin, Ont., says: A serious accident occurred on Saturday at the new Keewatin flour mill being constructed by the Macdonald Engineering Company, of Chicago. A derrick, which was used for lifting rock from a raceway, forty feet in depth, broke, precipitating its load of rock and huge timbers into a cut in which twenty men were at work. The timbers fell, pinning one man to the earth. Three others were hit by falling rock. The injured men were at once conveyed to the Keewatin Hospital, where a Galician, name unknown, died. The others are lying at the point of death.

FLASHES FROM THE WIRE

The Very Latest Items From all Parts of the Globe.

CANADA.

Natural gas has been struck at Edmonton.

Carberry, Man., is prepared to instal a municipal electric light plant.

Contracts have been let for a \$250,000 Roman Catholic cathedral at St. Boniface.

Mr. F. H. Matthewson has been elected President of the Montreal Board of Trade.

Winnipeg hotelkeepers object to any exemption being granted to the new C.P.R. hotel.

It is reported that the date for the opening of the Legislature will be February 14.

The Department of Militia will provide for a force of little under 50,000 men this year.

The question of taxation of railways is being considered by the Provincial Government.

Brantford is endeavoring to establish some memorial of the fact that it is the home of the telephone.

The Provincial Treasury has received nearly \$12,000 from moneys collected as fines and estreated bail bonds.

The Grand Trunk Railway have purchased five acres of land in Belleville for station and yard improvements.

The Hamilton Board of Trade are advocating a scheme for a fine automobile road between that city and Toronto.

Mr. H. Asquith has stated that the British Liberal Ministry will give responsible government to the Transvaal.

The Inland Revenue Department will publish the results of an analysis of the leading patent medicines sold in Canada.

Five youths have been arrested in Winnipeg for systematically robbing the First Greek Church of its weekly offerings.

A census of the manufacturers of Canada will be taken by Archibald Blue, Census Commissioner, through the mails.

Murdock McKay of Big Harbor Island, Cape Breton, threshed six and a half barrels of oats in less than nine hours with a flail.

Diamonds valued at \$5,000, purchased in Toronto, were found on Banwell, the Crown Bank teller, when arrested in Kingston, Jamaica.

A Montreal barrister threatens to prosecute the Salvation Army for holding street services, which he claims constitute a public nuisance.

A Saskatchewan returning officer has been fined \$50 for his negligence in giving a voter a ballot without asking his name.

Camelot post-office, in Nipissing district, has been changed to Widdifield station, and Widdifield post-office has been closed.

It is considered probable that the Government will dispose of the present Toronto Asylum for the Insane and erect another near Toronto.

Residents along Long Pointe Bay have been conceded the privilege of fishing through the ice on payment of a nominal license fee of \$1.

C. P. R. officials have given every encouragement for the starting of a railroad branch of the Y. M. C. A. at Kenora, and, with \$1,250 already subscribed, the move will be successful.

A bill is to be introduced in the Manitoba Legislature to provide for the inspection by a Government official of all building and loan companies doing business in the Province.

A man's skeleton, in a well preserved suit and coffin, was found by workmen digging at the Welland Cordage Works. It is thought the coffin has been underground 40 years.

The Dominion Department of Agriculture announces that it is prepared to receive applications for space for Canadian exhibits at the New Zealand Fair at Christchurch, which begins in November.

A beet sugar factory will be built at

ON THE FARM

THE DRAFT HORSE.

The drafter is occupying a good deal of attention now-a-days. This is not strange. And he is likely to remain prominently in the public eye, because of the scarcity of his kind. The Twentieth Century Farmer in discussing the prospects, points out a few circumstances which make the outlook decidedly optimistic.

The market for good horses of all kinds has never been in a more healthy, encouraging condition for the breeder and horse handler than now. The evidence on all sides points to a demand equal to the supply of such horses as are required to carry on the necessary horse-power of the business and commercial affairs of trade in every day life. It is folly to think that the time is coming when horse-power will be dispensed with, because better and cheaper means of service can be substituted.

The horse is the safest, surest, most economical power to use in short hauls and local transfer merchandise that can be had. The immense demand for the changing and moving of merchandise and all lines of goods, in and about cities and to freight storage centres and long distance shipping depots is such that the horse and wagon cannot be dispensed with for a day. The big, sturdy, reliable draft horse accommodates himself to all kinds of conditions that are possible to come up in the line of labor, in which his lot is cast. It is very seldom he is disabled or required to go to the shop for repairs. He is not being outclassed and every year rendered valueless by some little improvement or patent gotten out that aids in operation and application of the power. He can be made serviceable when he ceases to be active as a drawer of heavy loads. His entire life is one of service and value to his owner.

The opening up of railroads and the building of transportation lines of various kinds only add to the demand for the draft horse. The more business in the commercial world the more horses it will require to carry on that part of labor that cannot be successfully handled by machinery. As time moves on as improvements come and go, the draft horse will become more and more a necessity, a fixture in the operation of trade.

At all the central markets of the country there are horse markets established, and they take equal prominence in quotations with those of other lines of live stock. The horse market is now is closely classified and graded as accurately as the cattle market, where only a few years ago there was no quotation no demand.

LIME IN FARMING.

Professor L. A. Vorhees says: It is not possible in every instance to indicate certainly whether liming is needed. It will be needed sooner or later on all light uplands where lime is not abundant, and where the soil has gotten into an acid condition from the residues of fertilizers or from humus.

It is needed on heavy clays that have become too adhesive, and on reclaimed swamp lands. It will help where a heavy sod is turned over where a large amount of vegetable matter is turned under. Where lime is cheap, it may for a time be used for the purpose of releasing potash in the soil.

Liming alone will enrich poor land. It may respond for a time, but will soon be exhausted of the materials on which lime can act. On any lands the keeping up of the humus content in the soil in connection with liming is important. The frequency of liming must be determined by circumstances. A single heavy dressing of lime may correct the undue plasticity of a clay and retain it all in a flocculated state for years when tilled

KILLED IN FIRE PANIC.

Tragedy in a Colored Church at Philadelphia.

A Philadelphia despatch says: Twenty people were trampled to death and 110 others seriously injured, a number of whom will die, during a panic on Sunday night in St. Paul's Negro Baptist Church, Eighth Street, below Girard Avenue. The panic was the result of a slight fire in the church, and was accompanied by the most horrible scenes. Men, women and children fought with a desperation that was mad-making, in an attempt to escape from the building.

Police and fire alarms brought engines, patrol wagons, and ambulances from a dozen police stations and hospitals. Dead and injured were carried away by the wagon load. Men, women and children are included in the list of the dead.

The most heartrending scenes attended the actions of those who have succeeded in escaping from the human rush of death. Wives, husbands, fathers, mothers, sisters, brothers, and children went into hysterics trying to learn what fate had befallen their kin.

Many of the injured are expected to die.

LIVED IN A CEDAR STUMP.

Scheme of a Chinese Leper to Retain Liberty.

A despatch from Vancouver says: Fearing the life in death at D'Arcy Island Lazaretto, Gulf of Georgia, a Chinese leper has been living for some time in the stump of an old cedar tree on the north arm road, just outside New Westminster limits. The Provincial Police discovered him in his forest abode on Wednesday. He had an umbrella over the top of the tree stump in order to keep out the rain, and except that his home was a little damp, he was quite comfortable. The man's mother and brother are known to have had leprosy, and this led the other Chinese to watch him. When signs of the disease appeared on him he fled from his companions lest they give him up to the police. After his capture the officers destroyed the stump, the blankets and other effects that the Chinaman had in his woodland residence, and he will be taken to the lazaretto shortly.

MINING LEASES GRANTED.

Sixty Locations Lapse for Default of Rental.

A Toronto despatch says: Another eighty mining leases have been cancelled by the Provincial Government, of the thousand or more for which this fate is promised. All these claims are being taken over by the Government because their holders have failed to pay the annual dues on the locations. Sixty of those mentioned in the Gazette last week are in the Rainy River District, ten in Thunder Bay District, and ten in Frontenac County. In many of these cases the default dates from 1894.

TO ERADICATE SMUT.

The Government of Saskatchewan Taking Action.

A Regina despatch says: The Agricultural Department of the new Government of Saskatchewan are inaugurating a vigorous policy to promote the interests of agriculture. One of the first acts is made in the effort to eradicate smut, and the Government are notifying all farmers that blue stone will be tested free of charge in order to assure that pure quality will be used in testing seed wheat. Dr. C. Carlton has been appointed bacteriologist of the department and will have charge of this work.

BABES PERISH IN FLAMES.

HOME.

PRESERVING IN WINTER.

Midwinter is not usually considered the proper season in which to put up fruits. Occasionally however, the most forehanded housekeeper will have some deficit in the preserve closet; this or that fruit crop was a failure or some member of the family was too ill for her to spare the time when the berries were at their best. Yet, though there are no more cherries nor the currant or quince jelly of which she is so fond, she may to-day turn her attention to the tropical and dried fruits now on the market and bring forth results which will please and satisfy all her family.

Orange Marmalade.—Drop any number of fine, juicy, seedless oranges into a bowl of cold water, let stand for half an hour, then scrub gently with a soft bristle brush. Discard the peel of every fifth orange. Wipe and cut each lengthwise into quarters, then with a sharp knife cut across in the thinnest of slices. Now weigh, and for each pound of cut fruit allow three-quarters of a pint of cold water. Stir together, cover and let stand in a cool place for 24 hours. Bring quickly to the boiling point (using an agate or porcelain-lined kettle) and simmer gently until the rinds are sufficiently tender to be easily pierced with a straw. Cool and again set aside for 24 hours. Weigh a second time and to each pound add one pound of granulated sugar. Boil slowly, but steadily, until the fruit rinds are transparent and the syrup is quite thick, then bottle and seal.

Lemon Marmalade.—Prepare and cook in the same way as orange marmalade, but allow 1½ pounds of sugar for each pound of cooked fruit and water. When slicing, put the pits in a small bowl, cover with a portion of the measured water and let stand. Next day press off the water, squeezing hard, and add it to the fruit.

Grape Fruit Marmalade.—Make in the same way as orange marmalade, using only half the fruit rind. Allow from one pound and a quarter to one pound and a half of sugar to the pound of cooked fruit and water according to the acidity of the fruit used.

Preserved Figs.—For this preserve use what are known as bag figs, which have not been pressed to the same extent as the layer figs. Pick them over, remove stems, wash and soak over night in just enough water to cover. Drain, weigh and allow three-quarters of a pound of sugar to one pound of fruit and one half of a cupful of water. Dissolve the sugar in the water and add the figs after steaming them over hot water for fifteen minutes. Simmer very gently until fairly transparent, but unbroken, skimming out as done. When all are cooked, boil down the syrup until rich and thick, add the figs, bring again to the boiling point, flavor very faintly with vanilla and bottle at once.

Branded Figs.—Prepare, steam and cook the fruit in syrup in the same manner as for preserving, allowing similar proportions. When quite transparent set aside until next day. Drain off the syrup and boil down until very thick, adding a piece of vanilla bean to flavor. Set aside until cold, remove the vanilla and add an equal quantity of the best French brandy. Arrange the figs in bottles, fill with the syrup and seal.

Sweet Pickled Prunes.—Pick over, wash and soak four pounds of large prunes for 24 hours, then steam for twenty minutes. Boil together for ten minutes two pounds of sugar, one pint of vinegar, one ounce each of whole cloves and stick cinnamon and one quarter of an ounce of ginger. Add the prunes, simmer very gently until tender, then can and seal. What are known as silver prunes are very good when prepared in this way.

Apricot Marmalade.—Select a fine grade of sun-dried fruit, pick over and wash, then soak in cold water for 24

It is thought the coffin has been under ground 40 years.

The Dominion Department of Agriculture announces that it is prepared to receive applications for space for Canadian exhibits at the New Zealand Fair at Christchurch, which begins in November.

A beet sugar factory will be built at Whitby by the Keystone Sugar Co. Their contract has been let for a \$150,000 building to a Detroit construction company, which is under heavy bonds to complete the work by next August.

GREAT BRITAIN.

There is talk in political circles of a combination of Irish members and Laborites in the new British Parliament.

UNITED STATES.

Ontario poultry men have taken many prizes at the Boston Poultry Show.

When President Roosevelt retires from office in 1903, it is said he will hunt for game in Central Africa.

J. Frank Seavey, Jr., engineer of the Bethlehem Steel Works, insisted on his family leaving him in St. Luke's Hospital, Allentown, Pa., just before he died of pneumonia.

GENERAL.

The body of Susanne Croppe, a landed proprietress at Aibbe, Liptau, Hungary, has been exhumed and \$25,000 was found in her coffin. The old lady's heir fled to America 12 years ago to escape military service and nothing has since been heard of him.

MURDERED HIS FAMILY.

The Crazy Man Then Set Fire to the House.

A despatch from Pembroke, New Hampshire, says: What the authorities consider as the most appalling tragedy ever recorded in New Hampshire was enacted in North Pembroke on Wednesday. Following the destruction of the farm buildings of Charles F. Ayer and the disappearance of seven members of Ayer's household on Wednesday afternoon, and the suicide of Ayer late in the afternoon at the home of his sister in the town of Chichester, six miles distant, the announcement was made by Thomas F. Clifford, County Solicitor of Merrimack county, that there was little doubt but that the seven persons had been murdered and the farm house set on fire.

The family consisted of Mrs. Lakeman, who was 63 years of age, and a widow; her son-in-law, Charles F. Ayer, his wife and their five children. The ages of the children ranged from 12 to 20 years. There were two boys and three girls.

The circumstances of the fire seem shrouded in mystery. The last sign of life noticed about the house was at 11 o'clock on Tuesday night, when a light was seen moving about. Mrs. Lakeman was not a feeble woman, and her relatives think it strange that she was unable to make her escape from the burning house. The fire was discovered by a neighbor, but its headway was then so great that nothing could be done to save the buildings and they burned very rapidly.

For a time it was thought that Ayer perished in the flames, but word was received that he had been found in the town of Chichester, six miles northeast of his home. He had shot himself twice in the head late Wednesday afternoon, one of the bullets passing through the right temple. It was said that shortly before the shooting Ayer had sold the team with which he drove from Pembroke.

UNHAPPY OUT OF PRISON.

A Man Imprisoned Fifty Years Rejects Liberty Offered Him.

An Agram, Hungary, despatch says: Ivan Palencsuk, who is 103 years old, was released from prison on Thursday after 50 years confinement. He protested fearfully against his release but in vain, and he immediately committed another crime in order to be re-imprisoned.

time can act. On any lands the keeping up of the humus content in the soil in connection with liming is important. The frequency of liming must be determined by circumstances. A single heavy dressing of lime may correct the undue plasticity of a clay and retain it all in a flocculated state for years when tilled judiciously, and afterwards light applications not too far apart will retain the desirable texture. For the correction of acidity one heavy application will last for years. The quantity will depend largely upon the frequency of application.

To correct a heavy clay, an acid soil, or in preparing rich, new land for intensive culture in vegetable production the first dressing may need to be heavy, and in some cases 100 or more bushels per acre of slacked lime might be advisable. In general, it is better to prove by actual test whether 100 or more bushels will give a better paying result than a lighter application, before giving the heavy application to a large area.

Lime does not retain its maximum efficiency a very long time, and it is washed from the soil by drainage or sinks into the subsoil. Hence light dressings at more frequent intervals are more likely to produce economical results than heavy applications at long intervals.

On soils in a good state of fertility, applications of 50 bushels or less once in six or ten years will maintain heavy lands in a good state of productiveness. On light soils, 25 bushels per acre will often show the maximum results, and hence on light soils very light applications more frequently repeated should be the rule.

SEASONABLE NOTES.

Have the stables light and have them well ventilated.

A steady gait will accomplish more in the course of a day than rushing for a spell and then resting.

From the time a colt is foaled each day should see some substantial gain made in its development.

Idle horses are to be fed accordingly. More sickness is caused by mistakes in feeding than from any other source.

Besides improving the appearance of the horse grooming stimulates the skin to action and provokes circulation of the blood.

Have your medicine chest in the stable with common remedies, to use when needed. This means preparation for emergency, but not continual dosing.

There is time now to take a little pains with the horses. Begin the colt's education by getting it used to the halter and bridle, and later to the harness.

Soundness is an essential feature in the make up of a driving or riding horse when placed upon the market.

As the value of a horse is regulated by the cost of keep this matter is worth considering when contemplating a purchase.

Don't keep the horses standing in their stalls for days at a time; give them exercise: either driving on the road or a run in the yard.

Don't forget the daily use of the curry comb and brush. It pays, and it is gratifying to have your horses look and feel well.

If water is given a short time before feeding it will pass off the stomach quickly and leave that organ free to deal with the food afterwards.

The practice of "breaking" colts belongs to past days. Now the colt is brought gradually to know what is required of him. He wears the bridle first and gets used to it, then he is gradually taught to lead. Then the girth, and later the harness are introduced in the same manner and when thoroughly acquainted with it, the young fellow may be introduced to another smart but steady horse and they will likely get on famously together.

RE-ARM DEFENCE FORTS.

Larger Guns Will be Mounted Along English Coast.

A despatch from London says: The War Department has decided to re-arm all the coast defence forts from the Thames to Plymouth with six and nine-inch guns, the present armament, 4.7 inch guns, being considered inadequate.

pure quality may be used in testing seed wheat. Dr. C. Carlton has been appointed bacteriologist of the department and will have charge of this work.

BABES PERISH IN FLAMES.

Explosion of Lamp Resulted in Disaster in Nelson, B. C.

A despatch from Nelson, B. C., says: Fire in the residence of Henri Bourgeois on Wednesday evening resulted in the death and burning of Bourgeois' two little boys, aged 15 and 4 months. The mother had stepped out across the road for a moment, leaving the children asleep.

BETTER SERVICE A CONDITION.

Renewal of Atlantic Mail Contract to the Allans to be Granted.

A despatch from Ottawa says: At Thursday's session of the Cabinet the report of the sub-committee appointed to deal with the application of the Allan Steamship Company for an extension of the Atlantic mail contract was taken up and dealt with. The report of the sub-committee recommended that the contract be extended for a term of five years from August next, conditional upon the company putting two more fast steamships upon the route by 1907, and otherwise improving the service. It is understood that the Cabinet agreed to the report, and that the five years' contract will be sanctioned by order-in-council, which will also empower the Government to grant a still further extension of five years in the event of certain stipulated conditions being fulfilled by the company.

PEPARING FOR WAR.

Castro Garrisoning Venezuelan Ports—Situation is Serious.

A despatch from Paris says: The Willemstad correspondent of the Temps says that after the diplomatic rupture between France and Venezuela and the expulsion of M. Taigny, the French Charge d'Affaires, President Castro threatened to fire on all French vessels arriving at La Guayra. The situation is excessively serious. Alarm prevails in Caracas, where the semi-official press is exciting the people against the French. President Castro is displaying great activity and is sending garrisons as well as ammunition to the ports.

ARVA CHURCH WRECKED.

Gas Tank Explosion Does Serious Damage.

A despatch from London, Ont., says: An explosion of a gas tank wrecked a portion of the Methodist church at Arva, a village five miles north of here, on Sunday. One man is reported to have been seriously injured. W. Westlake's left arm was fractured, the muscles of his leg torn, and his face and hands badly burned. The two went to the cellar to repair a leak in the gas tank, and took a stable lantern along. The leaking gas caught fire from the lantern flame.

To preserve the color of green beans and other vegetables while cooking, nearly all French cooks use a little carbonate of ammonia. The ammonia has no bad effects, as it evaporates while boiling, and only an infinitesimal amount is required—say, what you could lay on the point of a narrow penknife. This will lessen the odor of boiling cabbage.

Sometimes the fat that has been used a good many times for frying, and has not been strained, will get too discolored to use. Put in with it about six times as much hot water, boil for twenty minutes, and turn into a pan to get cold. When it rises to a solid cake on top put back into the frying kettle and add a couple of raw potatoes. When it has heated the impurities will gather on the potatoes.

cinnamon and one quarter of an ounce of ginger. Add the prunes, simmer very gently until tender, then can and seal. What are known as silver prunes are very good when prepared in this way.

Apricot Marmalade.—Select a fine grade of sun-dried fruit, pick over and wash, then soak in cold water for 24 hours. Drain, weigh, and for each pound allow three-quarters of a pound of sugar. To four pounds of fruit add the sugar and one scant cupful of water and cook slowly until reduced to a marmalade, stirring frequently.

Prune Marmalade.—Pick over, wash and soak 2½ pounds of prunes over night. Stew gently until tender, using just enough water to cover. Set aside until cool enough to handle; then remove the pits. Return to the fire with six large apples pared, cored and sliced, one half of a pound of sugar more if the apples are very sour) and the juice of two lemons and cook to a marmalade, stirring frequently that the mixture may be smooth. Can at once.

Raisin Jam.—Pare and slice a dozen large tart apples. Put over the fire with one cupful of sweet cider, five pounds of seeded raisins and one pound of sugar. Cook slowly, adding a little water from time to time to keep from burning. Stir frequently and when very soft press through a sieve. Return to the fire until boiling hot, then bottle and seal.

Carrot Jam.—Wash and scrape or pare large carrots, cut in inch pieces and weigh. To three pounds allow three pounds of sugar, six large lemons and two ounces of blanched almonds cut into strips. Steam the carrots until tender, then press through a sieve. Add the grated yellow rind and strained juice of the lemons, the sugar and shredded almonds and heat slowly. Simmer for twenty minutes, stirring very often, then put up in jars.

Spiced Pumpkin.—Pare and steam pumpkin until tender, then drain and press through a sieve. Measure and to each quart add the strained juice of two lemons and one pound of granulated sugar and cook slowly until almost as thick as marmalade. Add one-eighth of a teaspoonful each of mace, and cloves, and one half of a teaspoonful each of ginger and cinnamon and simmer for fifteen minutes longer.

Cranberry Conserve.—Pick over and wash sufficient cranberries to weigh five pounds, then chop coarsely. Put two pounds of seeded raisins through the food chopper, using the coarse knife. Thinly peel the rind from four large oranges, then take the pulp and juice of five. Boil the rind in water, changing several times until it is very tender and no longer bitter, then chop fine. Put the fruits and rind in a kettle, with five pounds of sugar, heat and simmer slowly until reduced to a jam, then can and seal.

CUES FOR THE COOK.

Turn mashed potatoes through the ricer into a hot baking dish, in as even a shape as possible. Dot with bits of butter, and set under the broiler until crisp and brown all through the top.

With a thin-bladed, sharp knife it is possible to separate the orange pulp from the membrane and yet keep it in shape. Cut down from the surface to the center at one side of a membrane inclosing a section of pulp; then cut down close to the pulp on the other side of the membrane; a third time cut down to the center close to the next membrane, and take out a section of pulp, which has been loosened, in one piece. Then cut down close to the other side of the membrane, taking out the pulp as before.

It is a pleasant change to bake croquettes. Make the same as for frying in deep fat. Make a sauce by putting two tablespoonfuls of butter into a frying pan, with one slice of onion, one of carrot, one clove, and a bay leaf. Cook all together until the butter begins to turn brown. Then add one tablespoonful of dry flour and stir until it turns dark brown. Draw away from the fire and add a large cup of stock or hot water. Season and cook for five minutes. Add a little of this to the bottom of a shallow cake pan and put in the croquettes. Baste with more sauce and put into a hot oven. Cook until brown, basting once or twice, and serve with the rest of the sauce poured around them.

THE **J. J. HAINES** SHOE HOUSES, Napanee, Belleville, and Trenton.

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market. When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best **ANTHRACITE COAL**. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE,
16th January, 1906.

WALL PAPER.

Our stock of 1906 Wall Papers is now practically complete. Only a few more lots to arrive.

We claim to have the

LARGEST STOCK

ever shown here. Our new season's stock comprises Grass Cloths, Burlaps, Tapestries, Silks, Velours, Foreign Pulp, and many other designs never before kept in stock here.

We have also an

Agency for the American Wall Paper Co.,

and can procure any of these beautiful goods in three days' time.

See our DESIGNS OF ROOMS from the

Social.

Under the auspices of the Ladies' Aid of the Western Methodist church will be held in the basement of the church, on Friday evening, Feb. 2nd. Refreshments and good programme. Admission 10 cents.

The Horticultural Society.

In a short time the Convention will select the flowers, seeds, or shrubs, for distribution next spring. All citizens interested in having nice lawns and flowers and beautifying the town should hand in their names and subscriptions to Miss Ham so that the list of stock may be made up and ordered.

Grand Concert.

Mr. Geo. Fox, the celebrated violinist, assisted by local talent will give a concert in Town Hall, Thursday eve, February 15th, under the auspices of the Epworth League of E. M. church. Mr. Fox is well known as a violinist and a rich treat is expected. Admission 25c.

Elocutionary Contest.

The third elocutionary contest for a silver medal will be held in the Town Hall, Thursday evening, February 1st, under the auspices of the Epworth League of the E. M. church. There are six contestants preparing for it and without doubt it will prove a close contest. All are welcome. Be sure to come, as these contests are keenly interesting and instructive. Silver Collection in aid of Piano Fund.

**MARKS BROS
Opera House,**

A Different Dye.

It used to be: one dye for silk, another for wool, yet another for cotton. **DY-O-LA** is a different dye.

The same package colors anything in cloth. Gives exquisite shades that the sun won't dim.

With the exception of green and purple, Dy-o-la does not stain the hands or boiler. For doubling the usefulness of drapes, gowns and things, no dye is so easy so satisfactory, so economical as Dy-o-la.

Mrs. W. Oblemen, Ellsboro, Sash., writes:—"Dy-o-la colors mixed goods better than any dye I ever tried."

At your druggist's 10c. Send 2 cent stamp to The Johnson-Richardson Co., Limited, Montreal, Can., for color-card—dyed exactly as you'd do it at home.

The regular meeting of the W.C.T.U. will be held Tuesday, January 30th, in the Western Methodist church parlor at 3 o'clock.

L. ANDERSON, Sec.

Young Men's Club.

"The British Constitution" by Mr. H. M. Deroche on Thursday evening next, Feb'y 1st, at 8 p. m. in the Young Men's Club Rooms. A cordial invitation is extended to the young men.

FRED E. WAGAR, LEO TRIMBLE, President. Sec'y.

Prize Winners.

F. Chinneck is still forging more to the top with his White Orpingtons. At Boston Show last week the same time as the Napanee Show he sent a couple of pullets over, winning 3rd and 4th prizes against the two largest and most successful breeders of Orpingtons in the States. There were seven prizes given. At the same time at home he was able to win two 1st and two 2nd prizes.

hood.

H. E. Smith

In Loving Memory of Mrs. Agnes Cook
Who died December 17th, 1905
Dear Aggie's toil and cares are over,
She is laid away to rest,
We hope to meet on the other shore
Where she is ever blest.
It was upon a Sabbath eve
She gently fell asleep.
How sad were those that she did leave
For her, their loss did weep.
When in the casket she was laid
A smile was on her face
We wish with us she could have stayed
There is none to fill her place.
Those dear to her are left behind
Sad is their aching hearts
It won't be long till they are joined
Where loved ones never part.
The one that is gone is so much missed
Long had she for us cared
The tired ones loved to assist
Their joys and sorrows shared.
There's many things she left behind,
On which we fix our eyes upon
They tend to put us all in mind
That one we loved is gone
Is all that now to us is left
She was a loving friend to all
Of that dear friend now are bereft,
—Con.

Classes meet every Tuesday at 4.45 p.m.

Odeon Male Quartette.

There is no form of vocal music
which gives greater pleasure than
really fine quartette singing, and this
has been evidenced by the most suc-
cessful tour which the Meister Glee
Singers of London, England, had last
season. There is coming to this town
on Thursday, February 1st at the
Napanee Opera House, one of America's
very finest quartettes, namely,
the Odeons, whose work is along simi-
lar lines. They are supported by a
most admirable reader and story teller
Miss Nettie Jackson, whose rendition
of Huckleberry Finn has become
famous. She is an artist of charming
appearance and has a most refreshing
individuality. A most admirable pro-
gramme may be looked for.

Choppingaxes, Cross Cut Saws, Axe
Handles, Buck Saws, H and Saws and
Blades.
BOYLE & SON.

On Wednesday a small smash up
occurred at the G.T.R. Station. The
way freight train shunted across the
main line and another train coming
along piled a number of cars across the
track. The Auxiliary cleared away the
wreck in a couple of hours.

The Messrs. Collier Brothers—
Samuel and Dorland—of Picton, have
purchased the old soap works building at
Napanee, now occupied by the W.
A. Rose, Co. They intend to convert
a portion of the premises into an evap-
orator. It is understood the consid-
eration is about \$2,000.—Picton Times.

THE TORONTO STAR'S WONDER- FUL GROWTH.

One cannot find in this country a
parallel for the remarkable progress of
The Toronto Daily Star during the last
five or six years. It is a fact perhaps
not yet fully appreciated that from
modest beginnings it has grown under
its present management until now it is
not only the most widely-read after-
noon paper in Ontario, but there is
only one morning paper in all Canada
that exceeds it in circulation.

There was a time when people
thought they had to get a morning
paper if they wanted all the news, but
that prejudice has given way to a con-
viction that to really get the news
while it's hot and crisp you must read
a live afternoon daily like The Toronto
Star. The great advances made in print-
ing machinery and telegraphy are large-
ly responsible for this. Once it took all
night to get the previous day's news
into print. That was the morning
paper's era. Now The Toronto Star
publishes all the news of all the world
up to within half an hour of the time
the edition is printed. On account of
the difference in time, its cable news
covers the event of the Old World un-
til a late hour every evening, so that
there is practically nothing fresh left
for the next morning's paper.
You can get The Toronto Star and
the paper you are now reading for one
year for \$1.75.

Satisfaction.

"Do you know that your attentions
weary me?"

"Do they, indeed? I was beginning
to feel that I had failed to make any
impression whatever."

Beware so long as you live of judg-
ing people by appearances.—La Fon-
taine

Consideration.

Jimson—Now, you wouldn't marry
me, would you? Miss Sears—Most cer-
tainly not. But why do you ask such a
question? Jimson—Just to decide a bet.

Let no man think lightly of good,
saying in his heart it will not benefit
me. Even by the falling of water drops
a water pot is filled.—Buddha.

The Ruling Passion Strong In Death.

The ruling passion of Edward I. of
England was undoubtedly the pursuit
of his ideal of uniting all the British
islands under one rule. His great ob-
stacle was Scotland, and the conquest
of Scotland, therefore, became a pas-
sion with him. Stronger than years, it
sent him to the head of the army when
he was fit only for a sick bed, and
when he was at last compelled to
yield he sought to make this passion
spur on his son by ordering that the
flesh should be boiled from his bones
and that his skeleton should be car-
ried at the head of the army and re-
main unburied till Scotland was con-
quered.

This is the most conspicuous instance
of "the ruling passion strong in death"
on record, though many others would
be worthy of quotation. William Pitt's
patriotism endured to his last gasp and
inspired his last utterance, as did Nel-
son's lifelong determination to secure
the command of the sea, while Napo-
leon's last dream was one of battle.

Peasant and Pigs.

A clever smuggling trick has been
played on a customs officer on the
Russo-German frontier. An innocent
looking peasant reported to the officer
a plot for getting a large number of
pigs across the frontier. The method,
he said, would be to drive across at in-
tervals of half an hour, 3, 6, 12 and 200
pigs, the smugglers arguing that if the
first three lots could be sent over there
would be no trouble with the 200.

The officer was naturally on the alert.
In accordance with the peasant's state-
ment three pigs were driven over, then
six, followed by twelve. All were al-
lowed to pass, and preparations were
made to receive the 200. But no more
pigs appeared, and the twenty-one ani-
mals admitted had in the meantime
been lodged in safety.—Berlin Cor.
London Mail.

Rudimentary Hind Limbs.

Snakes are not the only animals
which exhibit the possession of rudi-
mentary hind limbs. In the whale
tribe there is no evidence externally of
hind limbs. The fore limbs in them
are converted into the "flippers," or
swimming paddles. Yet when the skele-
ton is examined traces of a haunch
and attached rudimentary thigh bones
are found. There is developed in cer-
tain kinds of whales a bony piece rep-
resenting the haunch. The thigh bone
is distinct, but there is a mere rudi-
ment attached to it, representing the
shin bone or tibia of other animals.

Mr. Fred Bryers, of Toronto, was in Napanee, this week.

Mr. and Mrs. W. A. Warner and daughter, Kathleen, of Trenton were in Napanee over Sunday.

Mr. W. S. Herrington attended Court in Bath Friday last.

Miss Mary Burgess, of the Robinson Co. left on Wednesday to spend her holidays with her parents at Moscow.

There is very little change in the condition of Mrs. Sidney Warner, Napanee. She has been conscious all the week but unable to speak. Her physician has ordered strict quiet. Hope is expressed of her ultimate recovery.

The marriage is announced of Miss Beatrice Koubert, only daughter of Mr. Vincent Koubert, to Mr. McMullen, of St. Louis. The wedding will take next week.

Miss Hermine Connolly, Yarker, was in town on Thursday.

DEATHS

ALLISON—At Empey Hill, on Wednesday, January 24th, 1905, Benjamin J. Allison, aged 80 years.

SILLS—At North Fredericksburgh, on Saturday, January 20th, 1905, Elizabeth Sils, aged 85 years.

Both the weekly and the daily 'Witness' have reached a stable and well-recognized position in Canadian journalism, and all who admire a courageous, though sometimes discouraging, struggle for the right will be glad to believe the opinion of the 'Witness' about the future of Canada is applicable to itself, that 'there never was a time when its outlook was more buoyant and hopeful.' Its present well defined place as high-toned, independent newspaper, enterprising in the collection and dissemination of news, fearless in its denunciation of wrong and generous in its recognition of all that makes for righteousness.

Sleigh crooks all sizes and rollers for sleighs, steel all sizes for sleigh shoes and for sale at
GREY LION HARDWARE.

ANNUAL MEETING.

The Adjourned Meeting of the Napanee Cemetery Company will be held in the Council Chamber in the Town Hall, Napanee, on MONDAY, JANUARY 22nd, 1905 AT 2 P. M. for the transaction of general business and election of Officers.
F. W. SMITH, President.

French cruisers have sailed presumably for La Guaira, Venezuela.

Voters in all parts of Russia have manifested a profound disinclination to register, owing to the obstacles placed by the Government in the way of an electoral campaign.

Venezuela is garrisoning her ports, in anticipation of an open rupture with France, who in the meantime awaits the result of the presentation of Ambassador Jusserand at Washington.

At the Keewatin flour mills a derick used for hoisting rock from the raceway fell upon the men working beneath, killing one man and injuring three others seriously.

Belleville, Jan. 20.—The Baptists of this city at their annual business meeting last night decided to build a new church in place of their present house of worship, which was originally built for a roller skating rink.

A conference on the subject of Christian reunion has been arranged to be held in this city on February 7th. All the Anglican and Methodist clergy between here and Kingston are to be present.

St. Catharines, Jan. 22.—Yesterday was the mildest January day in the history of Niagara Peninsula. The official registration gave it sixty-seven in the shade, though many thermometers went as high as 71. Frogs have been heard croaking, and yesterday a gartersnake was killed on the outskirts of the city.

Hundreds of people spent Sunday afternoon on their verandahs.

Deseronto, Ont., Jan. 24.—The heavy westerly gales of yesterday swept the bay here completely clear of ice, this making about the fourth time the bay has been frozen and re-opened this season. As yet the ice has been only two or three inches thick, making driving on it between the Prince Edward and Fredericksburg shores impossible. In other years farmers of these counties have found a good market for their goods in Deseronto, whereas, this year, they are compelled to drive to Picton and Napanee. Old residents say that a like condition has not prevailed since 1876. Unless colder weather sets in it is feared there will be an ice famine here this coming summer.

Victoria, B. C., Jan. 23.—A great marine disaster has occurred near Camanah, the west coast of Vancouver Island. The steamer Valencia of San Francisco, a regular liner plying between points in California and Washington, Victoria and the north, and which was due in Victoria last night, was wrecked off Cape Beale, going ashore on a rocky and perilous place. The first news of the disaster reached Captain Gandin, Receiver of Wrecks, late this afternoon upon the arrival of nine of the survivors in a boat which succeeded in landing at the telegraph huts on the coast several miles from the scene of the disaster. The information obtainable from them as to the loss of life when the Valencia struck and the crew and passengers took to the boats of the vaguest sort. There were considerably over a hundred persons on board. Mr. Paterson, the lighthousekeeper at Cape Beale, wired that sixty persons had been drowned, and asked that assistance be rushed from Victoria at the earliest moment.

OR
AUCTION SALE.

EVERYBODY COME TO THE FINAL SALE AT THE STORE CHEAPSIDE

THE RENNIE BLOCK STORE.

With the great White Goods Sale and Stock-taking over we find lots of broken lines, odd sizes and remnants. Stock-taking reveals wonders—some lines overstocked some lines understocked. Overstock we must remove; understock, well—Replaced with the latest. As the new spring goods are coming to hand daily and it is necessary we should have the room, the surplus Stock, odd and broken lots must go.

SATURDAY A REMNANT AND ODD LOT DAY.

ANNUAL COUNTY CONVENTION

Council met on Tuesday afternoon, at 2 o'clock, the Clerk presiding. Members all present.

Moved by H. A. Baker, seconded by Jas. Bryden, that Mr. M. C. Bogart be elected Warden for the year 1906. Carried by a standing vote. The vote being.

Yeas—Baker, Bryden, Martin, Paul, Clyde, Woods, Hall,—7.

Nays—Creighton, Miller—2.

The Clerk duly declared Mr. Bogart elected. Mr. Baker conducted him to the chair, and His Honor Judge Madden administered the declaration of office, and congratulated the Warden elect.

The newly elected Warden thanked his fellow members for the honor they had conferred upon him, especially as he had been a member of the County Council for so short a time. He also thanked them on behalf of the division he had the honor to represent.

There was some important business to be transacted at this session of the Council. Our county roads would come up, and he trusted the subject would be treated in a broad and statesmanlike manner, and that this Council of 1906, would have the proud distinction of having put the new road system in force.

He referred in complimentary terms to the ability and geniality of his predecessor, Mr. W. A. Martin, who, through long experience in the Council, made him a hard man to follow in presiding over the board.

He trusted that the utmost harmony would prevail during the year, and that all would work for the best interests of the County.

Moved by Mr. Martin, seconded by Mr. Baker, that we resolve ourselves into a Committee of the Whole to select the standing committees. Carried.

Moved by Mr. Miller seconded by Mr. Creighton, that Messrs. Woods, Creighton, and Col. Clyde be a committee to strike the standing committees. Lost.

Moved by Mr. Martin, seconded by Mr. Hall, that the following be members of the Finance committee, Messrs. Baker, Hall, Bryden, Miller and Paul. Carried.

Moved by Mr. Baker, seconded by Mr. Bryden, that the County Property committee be composed of Messrs. Woods, Baker, Hall, Clyde and Creighton. Carried.

Moved by Mr. Bryden, seconded by Mr. Baker, that the following compose the Roads and Bridges committee, Messrs. Bogart, Martin, Creighton, Clyde and Woods. Carried.

Moved by Mr. Paul, seconded by Mr. Woods, that the following compose the Education and Printing committee, Messrs. Bryden, Bogart, Miller, Hall and Martin. Carried.

Moved by Mr. Woods, seconded by Mr. Paul, that the following be the committee on Legislation, Messrs. Paul, Hall, Martin, Bogart, Woods and Creighton. Carried.

On motion of Messrs. Martin and Paul, the Committee rose and reported, and the report was adopted.

On motion of Mr. Martin, seconded by Mr. Bryden, the Council adjourned for half an hour for the benefit of committees, in selecting their chairmen and secretaries. Carried.

Council resumed, and the following were reported for the various committees:

Finance—S. Paul, chairman; H. A. Baker, Secretary.

County Property—G. Woods, chairman; J. D. Creighton, Secretary.

Roads and Bridges—W. A. Martin, chairman; J. D. Creighton, Secretary.

Education and Printing—W. A. Martin, chairman; N. B. Miller, Secretary.

Legislation—J. W. Hall, chairman; W. A. Martin, Secretary.

Report adopted.

Moved by Mr. Creighton, seconded by Mr. Miller, that Mr. Allen Oliver be appointed a member of the Board of Audit for 1906.

Moved by Mr. Baker, seconded by Mr. Hall, that the matter be laid on the table for further consideration.

Mr. Martin claimed that the motions

With the great White Goods Sale and Stock-taking over we find lots of broken lines, odd sizes and remnants. Stock-taking reveals wonders—some lines overstocked some lines understocked. Overstock we must remove; understock, well—Replaced with the latest. As the new spring goods are coming to hand daily and it is necessary we should have the room, the surplus Stock, odd and broken lots must go.

SATURDAY A REMNANT AND ODD LOT DAY.

Yards and yards of Dress Goods, silks, muslins, prints, flannelettes, wrap-perettes, sheetings, cottons, etc., etc. All marked in plain figures, on two centre tables, Dry Goods Section.

IN THE SMALLWEAR SECTION.

Ladies' silk belts, collars and hose, belts in some cases, marked at 50 per cent off. Collars the remainder from our big sale. Hose worth regular 30 and 35c, a pair for 22c. pair. Sizes 8½, 9, 9½.

IN THE HOUSEFURNISHING AND CARPET SECTION.

Carpet ends, in Tapestry, Brussels, Wilton and Velvet, in lengths of from 5 to 22 yards each. As our new stock of High-class Carpets and Housefurnishings is arriving, and we require the necessary space, our policy is clear the remnant ends at big reductions, also short ends of Jap. mattings and odd pairs of lace curtains.

IN THE DRESS GOODS SECTION.

Tweeds, in skirt lengths, principally winter weight, dark serviceable colorings, very appropriate for children's dresses, ladies' skirts and suits, all clearing at big reductions.

IN THE READY-TO-WEAR SECTION.

Ladies' and children's coats at exactly half-price. Odd lines of whitewear, wrappers, kimono's, etc., at reduced prices.

IN THE STAPLE SECTION.

Odd lines of table napkins, towels, runners, shams, etc. at clearing prices.

The successful tenderer to be governed as to his duties by By-law No. 307 of the Town of Nanpess and amending by-laws and also to have care of the Town buildings as heretofore. All tenders to be sealed and addressed to the Clerk and marked "tenders for markets" and to be mailed or delivered to the clerk not later Monday, February 5th, 1906.
The lowest or any tenders not necessarily accepted.
Dated January 19th, 1906.
W. A. GRANGE,
Town Clerk.

EXECUTOR'S NOTICE TO CREDITORS.

In the Matter of the Estate of John Craig late of the Township of Camden, in the County of Lennox & Addington, Farmer, deceased. Notice is hereby given, pursuant to chapter 124, section 24, of the Revised Statutes of Ontario, 1897, and amending Acts, that all creditors and others having claims against the said John Craig, deceased, who died 11th January, A. D. 1906, are requested to send by post, prepaid, or deliver to the undersigned solicitors for the executors of the last will and testament of the said deceased, on or before the 15TH MARCH, A. D. 1906 full particulars and proofs of all claims (if any) which they have against the said estate and effects of the said deceased, together with their Christian and surnames, addresses and descriptions, and the nature of the security (if any) held by them.

And notice is hereby further given that after the said 15th day of March, 1906, the said executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which notice has been received as above required; and the executors will not be liable for the assets so distributed to any creditor thereof whose names shall not have been received prior to the time of such distribution.

HERRINGTON, WARNER & GRANGE,

GEO. E. DEROCHE

New County Court Judge of Hastings.

We are pleased to announce to our readers that Mr. George Edward Deroche, Barrister of Deseronto has been appointed by The Dominion Government Senior County Court Judge and Local Judge of the High Court for the County of Hastings in the place of the late Judge Thomas A. Lazier.

Mr. Deroche was born at Camden East on January 25th, 1860, but resided at Newburgh with his grandparents Mr. and Mrs. Paschal Deroche until about fifteen years ago when he commenced the study of the Law. He is the son of Edward A. Deroche and Clarissa Eakins, who have been dead several years. He is also a nephew of H. M. Deroche K.C. and W. P. Deroche Local Registrar of our town. He was educated at Newburgh High School and after teaching school for a few years Mr. Deroche began to study law with his uncle H. M. Deroche, K.C., and the present Judge Madden in 1890 and after a brilliant course at the Law School, Osgoode Hall, Toronto and with the Law Firm of Moss, Hoyle & Aylesworth, Toronto, he was called to the Bar in 1895, and at once opened an office in Deseronto where he has continued to practice ever since. Mr. Deroche has worked up a fine law business and has been solicitor for The Rathbun Company, Smelting works, Bank of Montreal and the Town of Deseronto for several years, giving general satisfaction to these large concerns. His business took him all over the Province and often to the United States. He has been a most active Liberal in politics and at the last general election for the House of Commons contested East Hastings in the Liberal interest but was defeated by Mr. W. B. Northrup, M. P., of Belleville. In the old Riding of East Hastings Mr. Deroche had a majority of the votes but was beaten by the back Township. He is a Methodist in religion and has been a church worker all his life, and only last week delivered a very able address at the Epworth League Convention held at Bowmanville and was warmly congratulated on his speech

MADOLE & WILSON.

Copenhagen, Jan. 30. — Frederick VIII. was proclaimed King of Denmark at noon to-day in Amalienborg Square in front of the palace. The ceremony lasted only a few minutes. The Premier, Mr. Christensen, appeared on the balcony of the palace and announced to the 50,000 persons assembled below the death of King Christian IX, and the succession of his eldest son, The Pretender called for cheers for King Frederick VIII.

The new ruler of Denmark joined the Premier on the balcony, and in a short speech declared that he would rule in accordance with the example set him by his father, and trusted that the same accord between the King and nation would continue as heretofore. His Majesty concluded with calling for cheers for the fatherland.

King Frederick received a warm-hearted greeting from the assembled crowd, whose cheers mingled enthusiastically with the national anthem.

Marmalade.

Just received a new lot of fruits such as the bitter marmalade oranges, Valencia, Navels and lemons for making genuine marmalade also a fresh line of French Plums, table and cooking figs, dates and table raisins. ATTN PRICES

Deputy Minister, at the Government inquiry.

Moorish officials have evidently ignored decisions of the Moroccan Conference re contraband, as they are receiving enormous bids for the post of captain of the port of Tangier, an unsalaried position.

The Legislation Committee of the City Council decided to memorialize the Legislature to place married women possessing the necessary qualification on the list of those entitled to vote for Mayor and Aldermen.

London England, capitalists represented by Cecil Ward, managing director of the Kamloops Irrigation Company, have secured control of half a million acres in Northern Alberta. They will colonize it.

An Anti-spitting by-law seems to be workable in Peterboro for the other day police magistrate Dunblin fined a young man \$5 for expectorating tobacco on the floor of the Opera House. His worship was very strong in his disapproval of such obnoxious conduct.

Those intending to build will do well to see us. We can supply you with almost everything you need at right prices.

MADOLE & WILSON.

The Sixth Annual meeting of the Canadian Association for the Prevention of Consumption and other forms of Tuberculosis will be held in the Railway Committee room of the House of Commons on the 28th of March next. The Honorable Senator Edwards will preside in the afternoon.

In the evening a public lecture will be delivered in the Lecture Hall of the Normal School by Dr. Arthur J. Richer of Montreal which will be illustrated with stereopticon plates showing the stages of Consumption and some of the appliances now in use to check and cure the disease. The chair will be taken in the evening by His Excellency, Earl Grey.

It is an old adage that "as the days lengthen the cold strengthens." Those who have been felicitating themselves on the mildness so far will keep this saying in mind, and restrain exuberant fancies of what may come in the next two months. But there are still tokens which favor the theory of a "mild winter" which the weather sharps predicted early in November. Latest advices from the north end of Lake Superior are the same as those from the Soo, "no ice as yet." Boats are still running out of Duluth and the expectation is that they will run all winter. It is very significant of local conditions that they will run all winter. It is very significant of local conditions that Master Robin is still with us. At a neighboring farm he is found regularly feeding with the chickens, while in southern Ontario the frogs were still croaking at Christmas.

London, Jan. 30th.—In a speech at Manchester Lord Roberts urged the inadequacy of the army for the defence of the empire, and repeated that its strength should be brought up to a million men, supplementing the regulars with auxiliary forces.

"Our colonies," he said, "are far ahead of the mother country in recognizing the necessity of personal service from every able-bodied man. There is little doubt that they will follow any lead we may give to build up a united unassailable empire."

Belleville Jan. 30.—Mrs. Ruth MacGashin, the thirty-one-year old wife of James MacGashin, disappeared from her home here on Saturday night, taking with her her two-year-old son and all her husband's savings, including three five-pound notes. It is feared she had done something rash, as on three different occasions she has attempted to drown herself, but was rescued. She left two sons, eight and six years old, with neighbors, and purchased a ticket for Trenton, afterward buying one for Toronto, and was seen getting on train No. 7 for the west. The family came out from England last summer, and the husband is employed as a machinist by the Mac Machine Co. Toronto and other police have been notified to be on the lookout.

the old Killing of East Hastings Mr. Deroche had a majority of the votes but was beaten by the back Township. He is a Methodist in religion and has been a church worker all his life, and only last week delivered a very able address at the Epworth League Convention held at Bowmanville and was warmly congratulated on his speech by Chancellor Burwash. We take great pleasure in congratulating Judge Deroche on his appointment and feel confident he will do honor to the Bench.

Gas Mantles, lamps and chimneys, brass bracks, pendants, &c.

MADOLE & WILSON.

Deseronto, Jan. 27.—A sad accident occurred here this afternoon. Ernest Jordan, a young lad twelve years of age, while skating on the bay in the vicinity of Deseronto was drowned. He skated into a water hole. The body was recovered.

Belleville, Ont., Jan. 27.—Morris Crofts, a commercial traveller, whose home is in Peterboro, and who is employed by a Peterboro firm, was arrested at Madoc, yesterday, by Constable Duffin, of this city, on a warrant charging him with fraudulently obtaining and attempting to negotiate notes to the value of \$400 belonging to J. C. Moore, of Queensboro. He was brought to the county jail here and afterwards released on bail to appear on February 5th. His employer went as bondsman.

Bread mixers, cake mixers, sold on trial. Greatest labor saving machines of the age. No kitchen complete without one.

BOYLE & SON.

Kingston Jan. 31.—While crossing Loughborough Lake yesterday afternoon for Battersea, the Kingston pacer, "Lord Russel," broke through the ice and was drowned, along with the driver Mr. Wm. Laird, veterinary student, of Wolfe Island. Mr. Laird left here at three o'clock yesterday afternoon with his brother-in-law, Mr. Colin Campbell, but the latter managed to escape.

"Lord Russel" was owned by Dr. G. W. Bell, V. S., Kingston, and was valued at \$1,000. He had a record of 2.19 2/5 was eleven years old and a full brother of Mand S. His mother was sired by Guy Wilkes.

The driver, Wm Laird was 38 years old and unmarried.

Canadian and American Coal Oil.

MADOLE & WILSON.

The great curative powers of this remarkable remedy is attracting much attention and everywhere it has been introduced it is winning its way among the people.

Tuck's Bone Oil. It is a powerful, penetrating oil which we believe has a larger percentage of cures of rheumatism to its credit than any other remedy ever offered for this dread disease. It acts directly on the bone—the lodging place of rheumatism dispels the poisonous acid from the joints to be carried out of the system in the natural way and by its splendid work has proved that the surest and quickest method of getting relief from the torturing pains of rheumatism, as well as the common sense way is by a direct attack on the affected part. For the small ills of life it is invaluable.

Mrs. W. H. Thomas of Lombardy, writes as follows:—I was subject to stiff neck. Suffered for years and have been as long as two weeks at a time not able to turn my head without turning my whole body. I doctor-ed and got relief only to have the trouble return again. In August last I had a severe attack and I tried Tuck's Rheumatic Bone Oil having been reading in the papers about how good it was for rheumatism &c. Three applications completely cured me and I have had no return of the trouble since I recommend Tuck's Bone Oil to everyone.

Mrs. W. H. Thomas, Lombardy, Ont.

For rheumatism, lame back, neuralgia, sprains, coughs, colds, quinsy, or bronchitis, in short for any and all kinds of inflammation there is nothing to equal Tuck's Bone Oil. A bottle should be on the shelf in every home. For sale by all medicine dealers at 50c a bottle or sent prepaid by the Tuck Bone Oil Co. Limited, Smith's Falls, Ontario.

THEY ARE DEGRADING

Little Sins Are Blemishes On Our Character.

Know ye that your sin shall overtake you.—Numbers xxxii., 23.

Reputation is the key to manhood. It leads us to a regard for the finer life in this beautiful, elusive and half-veiled world. "A good name is better than precious ointment," and so much of the union and kindness of social sweetness is built upon the innate desire to adjust self to a harmonized realization of the rights of our fellow men.

No solitary act can purchase a good name. The desire to be esteemed should be built upon stainlessness of thought, word and action. The sum total is character, which again is but a confirmation of righteousness. It is difficult to comprehend the philosophy of the moral order unless it be founded upon a righteous being, and so the fundamental conception of character lifts us above anarchy and above the breaking of the divine image in our souls.

We are not automatons, but souls endowed with liberty of choice between good and evil. On this depends all moral growth and soul development. Good, therefore, in any form is

THE GOAL OF HUMANITY.

But even if the spirit of goodness dwells in us, yet may we lessen His influence and unconsciously degrade our characters. As "dying flies spoil the sweetness of ointment," without rendering it totally unfit, so little failings may weaken the delicacy of our better selves without destroying our permanent virtue. Such heinous offences as profanity, drunkenness, theft or lewdness are so powerful as to overwhelm us with a terrifying sense of guilt. When these sins are committed there can be no misunderstanding of the consequences. The character is entirely besmirched. But when it is a question of slight blemishes or petty defects of Christian manhood the sensibility of the conscience does not always recognize the wound.

Like the termite that leaves the bark uninjured while it eats the heart of the

tree, so the guilt of little sins becomes a moral disintegration. If moral anarchy rioted in our souls, we should "put on the armor of light" instantly and fight; but because it is only moral confusion that reigns, we have an inclination to set ourselves aright. And at this time our frailties are working out their own punishment, for the moral system is inexorable. Soul life is no more stationary than physical life. Every thought, word or action makes for our uplifting or degrading as the processes go on and no neutrality is possible. The saddest of all deaths is the death of a soul in a body still strong and vigorous.

THE MISTAKE MADE

is in thinking that this life is one of fulfillment, that all process depends on our sagacity, that ultimate achievement depends on our own exertions, that the competition of energies compensates for the easy descent from lofty standards. But this life is not complete; we are simply a state of preparation. Life is a series of purifying processes. It is the expansion of soul culture based on divine ideals. Hence, in the present process of development, our burden of righteousness should be borne, the sorrows of abnegation endured, if we would come into final possession of eternal bliss. God never intended that our journey toward immortality should be a negative quantity—we should not cumber the ground if we are not fruit bearers. Let us then robe ourselves in the exalted attributes of divine character; let conscience, untroubled by little sins, be aroused through abounding grace to stand confessed blameless, harmless and without rebuke.

Love is stronger, safer and saner than law, because in it there is no compromise. Let love overshadow our every thought, word and action; let our sin be excess of divine love, and we shall then have no fear if it overtakes us.

THE S. S. LESSON

INTERNATIONAL LESSON,

FEB. 4.

Lesson V. The Temptation of Jesus.

Golden Text: Heb. 4. 15.

LESSON WORD STUDIES.

Note.—These Word Studies are based on the text of the Revised Version.

Verse 1. Then—Immediately after having been baptized by John in the Jordan.

Led up of the Spirit—The Spirit of God, the Holy Spirit. Mark uses the still stronger expression, "the Spirit driveth him forth" (Mark 1. 12).

The wilderness—Any portion of uncultivated and uninhabited land constituted a wilderness. The region here referred to was probably the eastern frontier of Judah, which in the time of Christ was a wild, nearly treeless district.

To be tempted—indicating definite purpose. God willed that his Son, so newly equipped for his great life mission by the descent of the Spirit upon him at the time of his baptism, should now meet his adversary, the tempter, face to face.

The devil—Literally, the false accuser, the slanderer. When used with the article, as in this case, referring, in the New Testament, only to Satan, the prince of demons, who reveals himself as the malignant enemy of God and of the Messiah. When used without the

recognize the improbability and incongruity of the situation implied. The other alternative of a literal interpretation, namely, that of an instantaneous and miraculous transportation, is altogether impossible when we ask whose miraculous power it was that was exercised. Certainly Jesus did not exercise his divine power to accompany Satan, nor can we imagine Satan as performing the miracle involved, and taking Jesus with him by force.

The holy city—Jerusalem the capital, the seat of Jehovah's holy temple, and hence in an especial sense the dwelling place of Jehovah himself.

Pinnacle—From the Latin "pinnaculum," a diminutive of "pinna" or "pena," a wing. The Greek word used means exactly the same thing. Here the reference is to one of the wings of the temple building overlooking the deep Kidron ravine.

6. It is written—A formula for appealing to the authority of the Scriptures. The quotation is from Psa. 91. 11, 12, but Satan misquotes by omitting a very important clause, "to keep thee in all thy ways," and thereby distorts the meaning of the passage quoted.

7. Again it is written—The "again" is emphatic. Jesus points out that one Scripture passage can be correctly understood only in the light of other passages. Our secret of defense against all distorted Scripture quotations is a profound knowledge of all Scripture in the unity of its interrelations.

Thou shalt not make trial of the Lord thy God—A quotation from Deut. 6. 16, "Ye shall not tempt Jehovah your God, as ye tempted him in Massah."

8. All the kingdoms of the world, and

HONEYMOONS IN PRISON

MARRIAGE AS AN ALTERNATIVE TO GOING TO JAIL.

Offers of Marriage Through Sympathy—Remarkable Wedding in Paris.

Whatever other charges may be brought against Cupid he certainly cannot be justly accused of snobbery, for he seems as much at home in a police-court as in a palace, and he is not a bit ashamed to ply his trade within work-house walls, says London Tit-Bits.

One of his recent feats was to link two lives in the unpromising environment of the South-Western Police Court. There a young woman was charged a few weeks ago, before Mr. de Grey, with deserting her child. The pathos of her position so strongly appealed to a young man who was present in court, and who had never set eyes on the girl before, that he offered to make her his wife, and the magistrate made Cupid's way smooth by ordering the prisoner's liberation on condition that she married her champion. To-day the two people thus strangely brought together are man and wife, with every prospect of a happy life together.

A very similar incident occurred some little time ago at the Rochester Police Court, when a widow, Mrs. M—, was charged with attempting to drown herself. The evidence made it clear that the prisoner was a most deserving woman, who had made a brave struggle against misfortune to maintain her young family, and that it was only when

DRIVEN TO DESPAIR

that she attempted to take her life. So impressed was a tender-hearted man in court with the woman's sad position that he stepped forward and made her a public offer of marriage, which was gratefully accepted.

An amusing story is told of a marriage actually celebrated in the Glasgow Southern Police Court some time ago. A man and woman were being tried on a charge of riotous conduct in Main Street, Glasgow. In the indictment they were described as man and wife, but from the evidence offered to the court it was more than doubtful whether they were actually married. The presiding bailie, evidently suspicious that there was no such relationship between the pair, asked the woman, "Is this man (pointing to the male prisoner) your husband?" "Yes," was the answer. "And," turning to the man, "is this woman your wife?" "Yes." "Well, then," said his honor, who was well versed in the Scots law of marriage, "wherever you were married before or not, you are now."

A few months ago Paris was the scene of a remarkable wedding. M. Blanc, a young bank-clerk, and Mlle. Bompard were on the eve of their wedding, when the former was arrested on a

CHARGE OF EMBEZZLEMENT.

Great was the distress of the young lady, but even greater was her loyalty; for she determined that, guilty or innocent, the man she loved should become her husband on the appointed day. She told her story to the authorities, with the result that her fiancé was liberated from custody for a couple of hours on the wedding day, and made his appearance at the office of the registrar at the appointed time. The wedding formalities were duly gone through, with the warders as witnesses; and the curious wedding party adjourned to a neighboring cafe for a merry meal before the bridegroom was conducted back to his grim honeymoon quarters.

A pathetic wedding was one which took place at Whiteok, in Russia, and of which the following account was given in the local Gazette:—

"The bridegroom is a clockmaker named Obschenski, who, immediately previous to his marriage, was sentenced to ten years in the Siberian mines for coining false money. The bride, a daughter of the local priest, was brought by her father to give up the idea of marriage, but she would not desert

HEALTH

ERYSIPELAS.

Erysipelas is an acute contagious disease caused by a specific germ called the streptococcus of Fehleisen, after the man who first described its nature.

The chief symptoms of this disease is a peculiar spreading inflammation of the skin, which is accompanied by fever, headache, and general ill feeling. The fever is preceded by a chill, sometimes slight, but often very severe. In ordinary simple cases the inflammation attacks only the surface of the skin, but in severe cases the deeper structures are attacked.

Although erysipelas is one of the contagious diseases, it is not one to be much feared by persons in robust health; but anything that tends to weaken the resisting forces of the constitution will help to bring on an attack of erysipelas in those who are susceptible to it. This susceptibility is seen in certain families or individuals, and these persons may suffer an attack on the least exposure to it.

Great care should be taken to shield from this contagion all those who have recently undergone surgical operations, as they are peculiarly susceptible to its poison, and it is one of the most usual causes of blood-poisoning and wound-infection.

Erysipelas is not often found in the very young, and in old age it is still more rare.

An erysipelas patient should be strictly isolated, and all dressings or articles which have come in contact with him should be disinfected or burned. The sick-room should be disinfected and fumigated before it is occupied by others. Any one nursing such a case should be scrupulously careful not to go near a person who has undergone an operation or who has an open wound of any kind. In the treatment everything must be done to maintain perfect hygienic conditions round the patient. There must be an abundance of fresh air and sunshine, pure water and scrupulous cleanliness in every direction. Much relief is afforded locally by compresses dipped in some cooling lotion and applied to the inflamed surface, and there are many other alleviations which can be indicated only by the physician in charge of the individual case, as the symptoms call for them.

After a prolonged attack of erysipelas convalescence is apt to be slow, and an enfeebled condition may persist for a long time. The treatment at this stage should be tonic and supporting, and great care should be taken to avoid undue fatigue.—Youth's Companion.

DON'T FOLD YOUR ARMS.

By folding your arms you pull the shoulders forward, flatten the chest, and impair deep breathing. The position you hold your body in the most of the time soon becomes its natural position. Continuously folding your arms across the chest will develop a flat chest and a rounded back, just as many another bad habit works harm.

Here are a few hints which you would do well to make habits: Keep the back of the neck close to the back of the collar at all possible times. Always carry the chest farther to the front than any other part of the anterior body. Draw the abdomen in and up a hundred times each day. Take a dozen deep slow breaths a dozen times each day. To do these exercises properly dress loosely. You cannot do them properly otherwise.

AT MEAL TIMES.

Doctors have told us over and over again of the beneficial results arising from a meal eaten with a contented frame of mind and with cheerful surroundings, but, sad to say, there are many households where each meal is a constant scene of bickering, nagging and fault-finding. If any trivial thing has been done wrong, or any duty omitted, wait until dinner or tea is over before you scold, blame or reprimand.

the slanderer. When used with the article, as in this case, referring, in the New Testament, only to Satan, the prince of demons, who reveals himself as the malignant enemy of God and of the Messiah. When used without the article the same word is sometimes applied to men, for example, to Judas, John 6, 70. In 1 Tim. 3, 11 the same word in the plural is translated slanderers, and in 2 Tim. 3, 3 and Titus 2, 2, false accusers.

2. When he had fasted—Literally, having fasted. The Greek verb here used signifies throughout the New Testament an abstinence for religious purposes. The forty days seem thus to have been spent by Jesus in devout meditation and prayer, possibly in prayerful contemplation of, and planning for, his lifework so soon to begin.

He afterward hungered—The whole sentence, if taken by itself, would seem to indicate that the temptation came only at the end of the forty days and nights of fasting. Mark, on the contrary, implies that the temptation continued during the forty days—"and he was in the wilderness forty days, tempted of Satan" (Mark 1, 13). Luke also uses the expression "forty days, being tempted" (Luke 4, 2), and thus supports the implication of Mark, which would seem to be borne in harmony with the probable facts in the case. Humanly speaking—and Jesus was as truly human as any of us in the hour of his temptation—it would seem impossible for Jesus to have reached the end of forty days of fasting before the intense craving of hunger manifested itself. The temptation to make bread of stones may well have been present and real during many days.

3. The tempter came—There is nothing in the entire narrative which compels us to think of an appearance of the devil in bodily form. He may have appeared thus, but his assuming human form could not make the temptation any more real to Jesus than would be the spiritual influence which it was possible for him to bring to bear in direct personal attack.

Said unto him—Unless we hold strictly to a bodily appearance of Satan, we must interpret these words to mean "suggested to him the thought." We need only to think of our own past severest temptations to realize in how very real a sense the tempter speaks to us when he presents the enticing suggestion to our mind. No spoken word from human lips could possibly appeal as strongly, and would not appear at all if not accompanied and strengthened by that subtle influence which is the most potent factor in every temptation.

If thou art the Son of God—The voice from heaven had so declared him; a special equipment of power had accompanied the declaration; this power had not yet been tested, the need was real and great, the temptation most subtle.

That these stones become bread—This first temptation is addressed to the physical appetite. The temptation lay not in the suggestion to allay the cravings of hunger but in the suggestion to make use of divine power granted for another and higher purpose in so doing.

1. It is written—In Deut. 8, 3, Israel had been forty years in the wilderness, but God had provided for all the needs of the people, "that he might make them know that man doth not live by bread only, but by everything that proceedeth out of the mouth of Jehovah."

5. Take this—The verb in the original signifies a taking along with, and might be rendered *conduceth*. It thus seems at first sight to support the theory of a bodily appearance of Satan. In that case, however, we must think of both Jesus and the devil actually leaving the solitude of the wilderness, and together going to Jerusalem, many miles distant, and then back to the high mountain top, or vice versa, if we follow Luke, who places the second and third temptations in the reverse order from Matthew. This would occupy some time, possibly a full day, unless we suppose Jesus to have been transported instantaneously in some miraculous way to the city and the temple's pinnacle. To imagine Jesus, fatigued and all but exhausted, making that long journey slowly and in company with Satan, is to

the unity of its interrelations.

Thou shalt not make trial of the Lord thy God—A quotation from Deut. 6, 16, "Ye shall not tempt Jehovah your God, as ye tempted him in Massah."

8. All the kingdoms of the world, and the glory of them—The vision which Jesus had of the glory of the earthly kingdoms must, of course, have been purely mental, and this is the argument usually brought forward in the support of the view that the whole series of temptations transpired in the realm of mind or spirit only. Its cogency is evident. The realism of the narrative, however, adds vividness to the whole and brings us into vital touch with the all-important events which transpired in that lonely Judean wilderness.

9. If thou wilt fall down and worship me—All that the tempter asks of Jesus is an acknowledgment of his authority as king of this world. The term worship in the original does not necessarily mean more, as it signifies simply an act of reverence, whether paid to a creature or to the creator.

10. Get thee hence, Satan—The climax in the temptation has come. A point has been reached where Jesus must either surrender or rise in the power of his manhood and drive the tempter from him.

Thou shalt worship—The quotation is from Deut. 6, 13, which reads, "Thou shalt fear Jehovah thy God; and him shalt thou serve."

11. Loveth him—Luke adds "for a season," indicating thereby plainly that we are not to imagine that throughout the rest of his earthly life Jesus was exempt from further temptations. Indeed, the writer to the Hebrews says definitely that he "hath been in all points tempted like as we are, yet without sin" (Heb. 4, 15).

NEW BATTLESHIP.

The Latest Addition to British Navy of Immense Power.

Some remarkable illustrations of the immense fighting power of the Dreadnaught, the new type of battleship now under construction at Portsmouth, England, are given by the Engineer. Ten years ago the Majestics were the finest ships in the world. To-day there is no question that the Dreadnaught could lie off 10,000 yards and sink the entire fleet of Majestics as easily as the Japanese fleet sunk the Russians at Tsushima. Indeed, the Majestics practically would be unable to reply, their guns not being nearly effective much over 5,000 yards. Later ships, of course, would be better off.

It is probably no exaggeration to say that the Dreadnaught could fight a couple of the latest King Edward VII. type and come out best. Incidentally the Dreadnaught probably could tackle the entire German fleet singlehanded, and so is a guarantee of peace.

It should be remembered, however, that Germany is preparing to build similar ships, that Japan has two in hand, that the United States contemplates a couple, and that France has plans for three. When these ships are afloat, all existing battleships will hardly count.

Naval officers have been instructed by the Admiralty to give their commands in "a loud, distinct, and decisive manner." It has been noticed that the new school of naval officer is not being educated to give orders in the bluff and authoritative tone which in the old days made the sailors skip round in double-quick time to carry out orders. It is feared that the drawing-room manners of the new blend of young executive officers will cause their voices to be inaudible through the din, even of practice, and, in addition, that the effeminate tendency of the word of command causes slowness in men and a weakening of confidence and discipline. Now the young executive sailorman is to practice his voice as if it were the sole means of communicating orders in the din of battle. The disappearance of sails is believed to have caused this vocal defect, as now there is no stentorian calling to men aloft to open the lungs and strengthen the spoken word.

named Otschenki, who, immediately previous to his marriage, was sentenced to ten years in the Siberian mines for coining false money. The bride, a daughter of the local priest, was brought by her father to give up the idea of marriage, but she would not desert the man of her choice in his misfortune. Consequently the wedding was performed in the prison chapel, the bridegroom being in chains and handcuffs, while the bride was dressed in mourning. After the ceremony the newly-married man went back to his cell. His wife will follow him to Siberia."

A SIMILAR WEDDING

was reported recently from Ohio. An Englishman, who was engaged to a rich young woman, was arrested on a charge of embezzlement; but in this case, too, love laughed at prison bars. The girl, in spite of the entreaties of her relatives, insisted on sharing the disgrace of her lover, and in the company of a priest presented herself at the jail in which he was awaiting trial. At her urgent request the prisoner was conducted to the jailer's room, where the marriage ceremony was performed, the prisoner, at the close, being taken back to his cell.

An amusing story is told of the Mayor of Gowrie, Iowa, who issued a decree early last year that every old maid, bachelor, widow, or widower refusing an offer of marriage during Leap Year should be fined from \$5 to \$20, the money to go to the public library fund. Many offers were made to the mayor, who himself was a bachelor, but he refused them all. At the close of the year a deputation of citizens called and demanded payment of \$120 for these refusals. The mayor asked for and was granted a stay of thirty days. Within a week he had joined the Benedicts and was spending the \$120 on his honeymoon.

TO TRAVEL FREE.

An Irish Railway's New Plan to Settle District.

A remarkable scheme for the encouragement of suburban residence has been devised by the Belfast and Northern Counties Railway, an Irish line practically owned by the Midland Railway of England.

It offers free tickets for ten years to proprietors or tenants of new residences erected in the vicinity of the line between Belfast and Larne Harbor, which runs for 24 miles along the shores of Belfast Lough and Lough Larne, a beautiful residential district.

The tickets are issued on the following terms:

"For each new residence within a radius of one mile from any station between Belfast and Larne Harbor of the annual value of £25 and upwards a first-class ticket will be granted to Belfast, and for each residence of the annual value of £15 and under £25 a second-class ticket will be issued."

In all cases the value is to be exclusive of any land attached. A certificate of the poor law valuation must be furnished, or, if this cannot be obtained before the ticket is desired, the company's engineer will value the building.

Plans must be submitted to the directors for approval, and an Ordnance map or tracing, showing the distance from the station. On completion the house will be examined by the engineer.

The tickets are issued solely to encourage residential traffic, none being granted in respect of shops or hotels. They are issued from year to year, so long as the holder remains a tenant of the house, transfer being allowed only from one member of the household to another.

Similar tickets are issued on the branch from Londonderry to Coleraine, another residential line.

A minor concession granted to season ticket holders, and one which might well be imitated by London lines, is that they are entitled to have parcels (except glass or furniture), being their bona fide property for domestic use, and addressed to them, sent free from Belfast to their homes within certain limits of weight.

foundings, but, sad to say, there are many households where each meal is a constant scene of bickering, nagging and fault-finding. If any trivial thing has been done wrong, or any duty omitted, wait until dinner or tea is over before you scold, blame or reprimand. More indigestion, nervousness, and other derangements are caused by the too common fault of uncomfortable meal-times than many people would suppose, and it is our positive duty to make those hours of the day cheerful and agreeable.

A SICKROOM HINT.

If hot applications are required for a person taken suddenly ill when the fire is out, and there is no better convenience for heating at hand, a lamp chimney fills the breach admirably. Light the lamp full head and in a twinkling the chimney is hot and ready for use when wrapped in a woolen cloth. A stove lid answers the same purpose when the fire has been retained.

PALE FACES.

The only really lasting remedy for a pale face is to build up the general health as much as possible by proper wholesome diet and judicious exercise. A course of calisthenics will often do wonders in bringing the roses to a colorless face. Some complexions are naturally pallid, even when there is no reason to complain of ill-health. Nothing can be done in these cases. But if the pallor proceeds, as it frequently does, from anaemia, a remedy can often be found in an iron tonic and change of air.

WHY GIRLS SHOULD RUN.

If girls would turn their attention to running they would find it the most exhilarating pastime in the world, as well as one of the most healthful. Besides adding roses to the cheeks and strength to the lungs, running is the stout girl's best resource. Let her take a brisk run daily, beginning with a few yards and getting up to a mile or thereabouts, and she will not need to resort to a starvation diet.

NERVOUS BREAKDOWN.

Nervous breakdown is oftener due to overworking the digestive organs than to mental strain as such. Abstemious habits in eating, combined with some attention to exercise, make it possible for one to do an immense amount of hard brain work without injury; but to attempt anything out of the ordinary in the way of work while subsisting on the ordinary stimulating diet is to invite disaster.

A COMMON ERROR.

Stout women are apt to imagine that toast in any form is a certain cure for obesity, and should be used freely instead of bread. The efficacy of toast entirely depends, however, on the manner in which it is made. The bread should be cut as thin as possible, so that it is little more than a wafer, and should be very crisp and brown. A good plan is to bake it for a few minutes in the oven after it is made.

IN SUNLESS DUNGEONS.

A victim of Russian severity who was at one time immured in the grim fortress of Peter and Paul, in St. Petersburg, describes it as resembling a house of the dead. "Its dungeons, utterly sunless, are abodes of gloom and silence. Not a word is spoken among the hapless prisoners, intercourse being carried on mainly by gestures. Prisoners communicate with each other by knocking on the walls of their cells, so many times for each letter. But even this is sternly repressed by the authorities, and captives detected in the practice are liable to severe punishment. In short, the prison reproduces all the horrors of the dungeons of romance, with mildewed walls, cold silence and despair. The fortress, indeed, is never spoken of in Russia without a shudder, for imprisonment there is little better than being buried alive."

KINGS COLLECT JEWELS

RULERS WHO SPEND MILLIONS ON PRECIOUS STONES.

The Favorite Hobby of Louis XIV.—The Gaskwar of Baroda's Gorgeous Collar.

The recent sale of the jewels collected by King Ludwig of Bavaria reminds one of this eccentric Sovereign is not the only King who has lavished fortunes on these "glittering baubles."

Louis XIV., the "Grand Monarque," squandered millions on his favorite hobby of collecting gems; indeed, it is said that his stock of diamond buttons alone represented an expenditure of \$5,000,000. In one year, 1685, he spent \$600,000 on this peculiar form of extravagance, and among his purchases were two buttons of the value of \$7,500. and seventy-five others which cost him \$56,000; while for the buttons for a single vest he paid \$20,000. Of the 354 buttons purchased in this year, 162 contained five diamonds each and the remaining 192 were single stones.

In his private cabinet Louis "had two immense pedestals of rosewood. The interior were shuffling shelves, in which he kept the most precious of his jewels. These he was always fond of examining and admiring at his ease, and in this occupation he took great delight, nor did he ever hear of a gem of price, either in Asia or Europe, without making strenuous efforts to secure the prize. The most costly of all his jewelled treasures was the famous crown of Agrippina, with its eight circles of

ENORMOUS BRILLIANTS.

But even this wonderful crown would have suffered eclipse before that gorgeous collar which is the Gaskwar of Baroda's most cherished possession. This collar is composed of five rows of diamonds, 100 in each row, many of them as large as a walnut and of flawless purity; while this "river of liquid fire" runs between two rows of emeralds, any one of which is a fortune in itself; and from the collar blazes as pendant the famous Star of the South, one of the world's largest diamonds. Another of the Gaskwar's treasures is a carpet of 60 square feet, made of pearls, white and colored, with circles of flashing diamonds at each corner and in the centre.

Of equal value and almost more remarkable is the Czar's map of France, which is a mosaic of rare precious stones, in which Paris is represented by an enormous brilliant, Marseilles by an emerald, Bordeaux by an opal, Lyons by a diamond, Lille by a turquoise, and so on, each stone being of an average value of 30,000 roubles; while each department of France is represented by its special stone, the entire map being one close mosaic of flashing gems of every hue. And this map is but one almost insignificant item in the Czar's collection of jewels stored in the Kremlin, which are said to be worth at least \$600,000,000, and a mere catalogue of which reads like a chapter from "The Arabian Nights."

IN THE SULTAN'S VAULTS

at Constantinople are diamonds and rubies, emeralds and pearls, literally by the peck, carelessly heaped up in glittering profusion in bowls of solid gold; divans, swords, and armour thickly encrusted with almost priceless gems; and a cradle of gold studded with rubies and diamonds and pearls. Even more fabulous, perhaps, are the treasures of jewels owned by the Shah of Persia. Among them are a golden globe on which the different countries are mapped out with jewels, 50,000 in number, and of the value of 5,000,000; a glass case two feet long and a foot and a half wide and high, more than half full of pearls of exquisite shape and lustre; shields and helmets, scabbards and sword-hilts, ablaze with almost priceless gems; large bowls heaped up with rubies and diamonds and other precious stones, which the privileged visitor can pass in flashing streams through his hands, and a

Fashion Hints.

WAISTS FOR SPRING WEAR.

The first crop of spring waists is on exhibition in the shops, likewise the advance guard of the spring hats, and these divide attention with fur sales and other clearings, says the fashion authority of the New York Post. The waists first. Most of these displayed are embroidered lingerie waists of the airiest description, lace trimmed, and transparent. Sleeves are nearly all short, and the waists are almost invariably closed in the back. We must look as youthful as we can, for all the fashions are youthful. While many of the comparatively inexpensive machine-made waists are beautifully designed, they usually leave much to be desired in the making. Buyers should carefully examine waists before accepting them, for otherwise one may have the experience of seeing an elaborate waist go to pieces after the first tubing. Not nearly enough care is taken in the matter of overcasting seams, rolling edges, etc. The hand-made waists, on the other hand, are well put together, and aside from their fragile materials, are really durable. So, after all, they may be the better bargain in the end.

COLORS IN THEM.

It has been so long since colored shirt waists were worn that we have almost forgotten what they are like. The faintly tinted linen waists shown are refreshing in their novelty. A few very thin pink and blue batiste waists embroidered in white, have been imported, and should receive the approval of fashion. White waists with a little tinted embroidery are very pretty.

The same idea is seen in lace waists, the color sometimes being embroidery and sometimes painting. The dyes are very clever at tinting lace, and the pattern is beautifully brought out by means of a few touches of color.

There is a great run on simple crepe de chine waists, although one can buy simple ones only at very high prices. The cheaper waists are very much trimmed. A pretty model in a simple waist was of deep cream colored crepe trimmed with inch-wide real Valenciennes. The collar was striped through the centre, with a row of insertion. There was a round yoke of the crepe, quite plain, and edge outlined with another row of insertion. The crepe was laid in the tiniest of tucks. There was two of these arrangements of looped lace, one close to the girdle. The sleeves were trimmed above the lace cuffs with a similar arrangement.

A PLAIN GARMENT.

Another expensive crepe waist was laid in three plaits on the shoulder, leaving the front quite plain. A design of large crysanthemums in raised embroidery crossed the front diagonally. The shallow cuffs are also embroidered. A pale blue crepe waist was a marvel of needlework. It was as nearly plain as possible in its general construction, not a tuck or a plait appearing. The entire front was a mass of embroidery and open-meshed lace motives. There was a square yoke of lace in front and a dozen or more small medallions, and all the rest of the space was thickly embroidered in a white hawthorn design. The faintest green was sparingly used in the stems.

A lovely yellow waist had a round yoke made with alternate rows of narrow Valenciennes edging and folds of the crepe. The points of the lace overlapped the folds, almost hiding them. Four up-and-down rows of narrow insertions striped the waist, and between these was a very slight embroidery in white, of scrolls and leaves. Yellow crepe de chine is a particularly engaging material. The palest shades of canary, or the warmest golden tones are

heard miles away. This appears to be their mode of expressing defiance and challenging a rival to contest.

ANTLERS NO HANDICAP.

It is astonishing to see them go through the woods while bearing their immense branching antlers. They calculate the distance between two trees to a nicety and hardly ever strike a branch. But perhaps the strangest part of this performance is that this does not seem to retard their speed in the slightest.

In the summer they seek the water, where they will not be pestered by flies, and stay there during the most of the warm weather. As they are not built to reach the grass with their jaws, being very high in the forequarters, they feed on lily pods, roots, watercress and moose maple during the summer. The watercress grows chiefly in deep water, and to reach it the moose dive in water from ten to fifteen feet in depth, leaving only their heels visible. They stay under from a minute to a minute and a half, and usually do their diving at night. When they have filled their large jaws they proceed to sort out such parts as they want and eat them leisurely.

When autumn approaches they take to the rocks and high places, where they live on yellow birch and white willow twigs. They stand on their hind legs to reach the top of a birch tree fifteen feet above the ground, snap it off, and then pull off the young shoots. In the winter they sustain themselves on lichens, ground hemlock and white cedar.

When the snow becomes deep and the temperature is far below zero, they herd together in some dense cedar swamp and trample down the snow. Often as many as sixty gather at one time in this way.

FROM ERIN'S GREEN ISLE

NEWS BY MAIL FROM IRELAND'S SHORES.

Happenings in the Emerald Isle of Interest to Irish-Canadians.

The Meade-Denis estate in North Kerry has just been sold to the tenants. The Earl of Wicklow has been appointed a Representative Peer for Ireland.

It is of interest to note that Lord Emly is the only Irish peer who is a Nationalist.

Mr. Maurice Brooks, D.L., in former years one of Dublin's merchant princes, has died, aged 82.

The Deanery of Raphoe has been given by the Bishop of Derry to the Rev. Canon Kennedy, rector of Raymochy.

The death is announced in Belfast of Edward Whittle, said to be the oldest railway engine driver in the United Kingdom.

The death of Lady Ellen Browne, sister of the late Earl of Kenmare, occurred at Malvern recently in the 80th year of her age.

Lord Aberdeen was on the 4th inst sworn in as Lord Lieutenant of Ireland for the second time. The first time was twenty years ago.

Mr. Walter Robinson, farmer, of Mowlin, Middleton County, Armagh, celebrated his 103rd birthday a few days ago. He lives on the farm with his son and is still able to perform some light work.

The funeral took place at Roslea, County Fermanagh, of Mr. Owen Smith, who died at his residence, Derrylea, at the age of 109, having lived in three centuries. Deceased was a tailor by trade.

An Irish town has been sold. The inhabitants of Castlemartyr, in the County Cork, have bought the fee simple interest in the dwellings and premises from the Earl of Shannon on favorable terms.

Notice has been served on the relieving officer of Roslea district of the impending eviction of some thirteen families on the 1st of October next.

YOUNG FOLKS

THE LITTLE GIRL WHO PLAYED.

The visitor and Sue Frances sat on this pleasant shady piazza, eating cookies. Between bites they took long, straggly stitches in Lady Claire's sleeves; they thought they were making Lady Claire a dress. Since the Visitor's arrival they had played croquet and ball, go-a-visiting and school, travel and guess what in my mind.

They were really quite tired out playing.

"Who's that striped little girl crouched there, wheeling a baby carriage without any hat on?" inquired the Visitor, suddenly.

Sue Frances took another bite and answered: "Oh, that's the little girl who never plays. She's always wheeling or sweeping or doing something; she never plays."

"Never plays? Sue Frances Trewor thy?"

"Well, honest, she never does. I guess you'd pity her if you lived on the opposite side of her. It makes me ache!"

The Visitor got up rather suddenly. "I guess I'll take Lady Claire to walk," she said; "she needs a constitution."

But it was not of Lady Claire's health she was thinking; she wanted to go a little nearer to the Girl who Never Played and see how she looked.

Across the street the baby carriage came to a stop as the Visitor approached. The Girl who Never Played was smiling! She looked just like other little girls.

"How'd you do?" she nodded.

"No thank you—I mean I'm pretty well, thank you," murmured the Visitor in some confusion. "You don't look a bit different!" she added, honestly.

"Me?—different?" in wonder.

"I mean because you don't ever play. I s'posed you'd look—"

"Don't ever play—me. Why, I play all the time!"

"Oh," stammered the Visitor. "Oh, I hope you'll beg my pardon. I thought Sue Frances said you swept and worked."

"Why, I do; but I play all the time I'm doing it. I always take the baby out like this; what do you suppose I play then? I was playing it when you came across the street. You can never guess so I'll tell you. I was playing bodyguard."

The Visitor's eyes opened wide.

"Yes," laughed the other, "I'm the bodyguard, you know. The baby's the czar, and he can't go out alone for fear of being bombed and—things. I have to stay right with him every minute to bodyguard him."

"Then, when I feed him I have to taste everything first to be sure it won't poison him; that's the way they do with the regular czar, you know. I take little bites, and, when it doesn't poison me dead, I give it to the ba—the czar, I mean. It's lots of fun to play that!"

"But—but you have to sweep a lot, don't you?" questioned the Visitor, slowly.

"Course; and then I play I'm driving out the hordes."

"The—the what?"

"Hordes—of sin, you know. My don't I sweep 'em out like everything. I make those little hordes fly, I tell you! But they will creep back, so next day I take the broom and drive 'em out again. That plays fun, too."

The Visitor's eyes were getting very wide open indeed. She had never played sweep or bodyguard the baby. Suddenly she remembered a kind of work you couldn't play.

"There's washing the dishes," she said, triumphantly. And as sure as you live the other girl nodded with glee.

"I play that three times a day. Shipwreck, I call it."

"Shipwreck!" the Visitor gasped.

"Yes the dishes tumble into the boiling sea; waves always are sopsudsy on the tips, you know. I play a great ship has been wrecked, and I'm the life-sav-

exquisite shape and lustre; snails and helmets, scabbards and sword-hilts, ablaze with almost priceless gems; large bowls heaped up with rubies and diamonds and other precious stones, which the privileged visitor can pass in flashing streams through his hands, and a mere handful of which would make him a rich and enviable man.

But great kings have no monopoly of these costly treasures. The Countess Castellane, the late Jay Gould's daughter, has a crown containing some of the finest emeralds, rubies, sapphires, and diamonds in the world, once worn by Queen Isabella of Spain. The Countess Henckell wears a necklace of glorious pearls, whose value is estimated at \$250,000. It is made up of three separate necklaces, one of which was formerly the property of the wife of a Spanish grandee, another of a Queen of Naples, while the third was worn by

THE EMPRESS EUGENIE

on state occasions. A necklace of eight rows of 412 pearls, which belonged to the late Duchess of Montrose, was sold not long ago for \$59,100; Lady Ilchester has one of black pearls valued at \$125,000; and the Duchess of Marlborough, on her wedding, received from her mother a necklace containing some of the finest and most historic pearls in the world, valued at \$1,000,000.

Lord Anglesey, we remember, had a single pearl stud which was sold for \$15,000; a pearl scarf-pin which fetched \$20,000; and an unmounted drop-shaped pearl which was knocked down for \$18,500. Mrs. George Vanderbilt has the finest rope of solitary rubies in the country; Mrs. Celia Wallace a necklace of black diamonds of fabulous value; Mrs. John Jacob Astor a diamond crown which an Empress might envy; and Miss Fair's engagement ring contained a diamond an inch in diameter and valued at \$40,000.

RUSSIAN TERRORISM.

How the St. Petersburg Chief of Police Evades the Assassin.

I was chatting the other evening with a Parisian who had just returned from Russia, and who told me that in Western Europe we had as yet no real idea of the state of affairs there, writes the Paris correspondent of the London Express.

"Trepoff, for instance, who has the position once occupied by Plevhe, knows that any moment he may be blown to pieces, as Plevhe himself was, although he spent £20,000 a year to assure his personal safety. Do you know," my friend added, "how Trepoff goes out? A landau leaves the palace surrounded by a squad of Cossacks. A man is in it, but the man is not Trepoff. He drives in an ambulance wagon with the Red Cross of Geneva floating from the driver's seat, and as he passes people cross themselves and murmur, 'Another one of Trepoff's victims.'"

"I went to interview Trepoff a few days before I left St. Petersburg," he added. "I had received a letter promising me an audience. At the palace I was passed on to a secretary, who took me through three empty salons to a small private office, where he left me. A few minutes later he returned and pointed to a telephone upon the table, 'His Excellency is waiting for you,' he said quietly. 'Waiting?' 'Yes, at the other end of the wire. He sees nobody.' 'But I am a personal friend of His Excellency's,' I explained. 'And that is why you are allowed into the palace,' was the answer.

"And so I said good-by by telephone to Trepoff. I could not bring the words 'Au revoir' across my lips somehow, for who knows where Trepoff will be when I am next in Russia?"

Mrs. Flattie: "Norah, will you try to have the steak a little more underdone after this?" The Cook (bristling up): "Is it findin' fault with me cookin', are ye?" Mrs. Flattie: "Oh, no, no! John and I merely thought you might object to remaining over the fire so long."

four up-and-down rows of narrow insertions striped the waist, and between these was a very slight embroidery in white, of scrolls and leaves. Yellow crepe de chene is a particularly engaging material. The palest shades of canary, or the warmest golden tones are best. A cold yellow is exceedingly unbecoming as a rule, and besides, it has a way of killing other colors.

FOR EVENING WEAR.

A white crepe evening waist was much admired. It was a surprise, laid in wide tucks, of course, hand run. The top of the waist, which was slightly low, was outlined by a bertha of lace and needlework in large circles or plaques. Little folds of tulle were laid under the lace to soften its contact with the flesh. The sleeves were elbow puffs, tucked around and finished with lace-trimmed ruffles.

Lace waists are seen a great deal at the theatre. They are very ornate, except in the most expensive Irish crochet and other heavy laces. These do not admit of much elaboration, and are too beautiful in themselves to spoil with trimming.

MOOSE IN NATIVE WILDS

ABOUT IN THE REMOTE NORTH WEST REGIONS.

Senses Developed to Remarkable Degree — How They Feed in Summer.

Few people have any conception of the astuteness of the moose, said a successful hunter who was exceptionally well acquainted with the habits of this splendid game animal, in speaking of a recent trip. They possess a keenness of scent and hearing that is almost beyond belief, and an intelligence that is seldom credited to them by any one except those who have devoted considerable time to studying them and their ways.

In the section of the country where we were the larger of our stay moose were exceedingly plentiful, and we had the finest opportunity to observe their actions. We followed them from one place to another, endeavoring not to frighten them and all the while noticing them very closely.

IN THE MATING SEASON.

which commences around September 20 and ends about the middle of October, the bulls are exceedingly vicious, while the cows are timid and seek the deepest forests, being easily frightened. It is my opinion that the males kill many of their mates at this time.

The cows soon betake themselves to some island, in order that they may not be disturbed by wolves or other wild animals. The moose calves are about as homely and unsightly as anything I have ever seen. Their heads are nearly as large as their bodies, and when they are three or four weeks old they weigh about 100 pounds.

The calf and its mother remain together, of course, providing food and shelter for the younger animal. But after that length of time has elapsed she will try to get away. In order to do this she will often travel miles up stream, so as to leave no scent, and, as a rule, she succeeds in accomplishing her purpose.

The bulls have a peculiar grunting sound by which they call to the cows. A man can imitate the call after long practice, but not so perfectly as to deceive them. The only way in which this ruse can be successfully carried out is to make your call at the same time that the moose make their noise. In this manner I have called them under the branches of the tree in which I have been sitting from distances as great as a mile or more.

The males also have an odd habit of striking their antlers against trees, making a sound that rings clear as a bell, after which they bellow long and loud. On a quiet night they can be

Cork, have bought the fee simple interest in the dwellings and premises from the Earl of Shannon on favorable terms.

Notice has been served on the relieving officer of Roslea district of the impending eviction of some thirteen families on the Trinity College estate, situate in a mountainous district between Roslea and Brokeboro.

The Belfast steamer *Riverside*, while on a voyage from Maryport to Strangford Lough with coals, sprang a leak at Solway Firth during a gale and foundered. The crew of six were rescued by the Isle of Withorn lifeboat.

At a meeting of the Belfast Corporation on the 11th ult. a proposal to confer the freedom of the city upon Mr. Andrew Carnegie found no second, despite the fact that that gentleman has established no fewer than three libraries in that city.

The Royal Irish Fusiliers were granted the privilege of bearing on their button an eagle and the number "8," in commemoration of the capture of the colors (by the 1st Battalion, the old 87th) of the French 8th Regiment at the Battle of Barossa.

Hamilton Livingstone, an ex-rate collector of Newry, was at Belfast sentenced to five years' penal servitude for misappropriating almost £1,000 of trust money and embezzling a considerable amount received for rates. After committing the offences he absconded to Canada.

Under the will of the Rev. Maxwell Coole, of Ross, King's County, perpetual curate of Clonsiey, upwards of £40,000 is left to the representative body of the Church in Ireland, to be held in trust for the benefit of poor parishes in the dioceses of Meath.

A skibbereen telegram announces the death at his residence, Castletownshend of Sir John Goghill, Bart. He was born in 1826, and was father of one of the two lieutenants who defended at the cost of their lives the colors in the attack on the British camp at Isandula in the Zulu War.

The new line of railway between Waterford and Rosslare Harbor, which has been in course of construction for the last three years, is now so far advanced that it is confidently expected to be open for traffic in July next; and at the same time the new line of turbine steamers between Rosslare and Fishguard will commence running.

LIFE RUINED BY LOVE.

Man Turns Hermit and Isolates Himself From the World.

"For twenty-three years he lived the life of a hermit, owing to being crossed in love."

This extraordinary statement was made at the inquest at Chatham, England, the other day, on the body of Walter Tibball, aged 63 years, whose home is an old hut in a meadow adjoining Rochester football ground.

He was formerly a pork butcher at Cambridge, but when the course of his love failed to run smoothly he cut himself off from all his friends, finally taking up his residence in the hut at Rochester. Here, with two cats, two rabbits, a hedge-sparrow and two linnets, he lived the life of a recluse, seldom speaking to a human being.

On Monday morning a woman living near-by, alarmed at seeing no smoke rising from the chimney at Tibball's hut, went across and found the man crouched in a corner. He was dying, and before the woman could obtain the services of a doctor he was dead.

The hut was in an exceptionally dirty condition, the only furniture being an old couch. Tibball's clothing, which included three shirts, two waistcoats and two jackets, was tied up with string. It was, indeed, evident that the man had not undressed himself for years.

Don't be foolish and run yourself down when your neighbors are only too glad to do it for you.

Knicker: "Yes, Johnny, there is only one way to learn, and that is to begin at the bottom." Johnny: "How about swimming?"

play that three times a day. "Supper wreck, I call it."

"Shipwreck!" the Visitor gasped.

"Yes the dishes tumble into the boiling sea; waves always are soapsuds on the tips, you know. I play a great ship has been wrecked, and I'm the life-saving stationer saving the folks. The nice white dishes are the first cabin passengers, and the cracked and nicked ones the second-cabins, and the pans and pots the steerages. The saucers are the boys and the cups the girls, and the butter plates the little babies. It's the greatest play that is!"

The Visitor went back to Sue Frances with a thoughtful face. She had quite forgotten lady Claire, who dangled ignominiously by one leg.

Sue Frances was playing tea party; she had tea all ready. "Well," she said, looking up from the little gold-and-white teapot, "don't you ply her drenchfully?—that poor little girl cross there that you've been a-talking to? Think of never play!"

"She plays all the time," the Visitor said, quietly. "I know, because she said so. She has the splendid times sweeping and taking care of the baby and—you guess what else, Sue Frances Tre-worthly! But you can't, if you keep right on guessing till the tip end of forever. She makes a splendid play out of washing the dishes!"

The cambric tea in the tiny gold-and-white teapot grew cold while they both sat gazing across the street with wonder-struck faces at the Little Girl Who Played all the Time, while she patiently, cheerfully wheeled the ba—the czar, I mean—up and down in the sunshine.

NOTED DIPLOMAT QUILTS OFFICE.

Sir Halliday Macartney Seeks a Much-Needed Rest.

A notable public official has just retired from active life in the person of Sir Halliday Macartney, counselor and English Secretary to the Chinese Legation in London.

Sir Halliday has had a remarkable career. He was present at and assisted in the capture of the Taku forts in 1860, the surrender of Peking, and the destruction of the Summer Palace with its priceless art treasures and beautiful grounds by the order of Lord Elgin as a warning to the Chinese for their perfidious treachery to the English and French forces.

He greatly assisted his friend Gordon in crushing the Taiping Rebellion in 1863 and 1864 by drilling a force of some 3,000 men, who proved most deadly against the rebels.

With extraordinary versatility and energy he established a military arsenal at Nankin, of which he was a director till 1876.

The Chinese Government quickly discovered that Mr. Macartney was not only a first-rate soldier and organizer, but also a most able negotiator.

De facto, Sir Halliday has, one may say, been the Chinese Ambassador.

So thoroughly has he identified himself with his role as the representative of the Celestial Empire that he has sometimes been playfully spoken of as more Chinese than British.

He has represented China on various historic occasions, and since 1876, as counselor and English secretary to the Legation, he has influenced Chinese diplomacy throughout Europe.

The present Emperor has heaped presents and honors upon him as a reward for his well-ried services, and he combines the English K. C. M. G., with the high Chinese Orders of the Double Dragon and the Precious Star.

Haskell: "What's Tommy crying for?" Mrs. Haskell: "Ah, that poor boy caught his finger in the pantry door." Haskell: "H'm! He evidently didn't get the 'am he was looking for that time."

She: "Those flowers are lovely, but I—mamma thinks it is not right for me to accept such gifts, unless—unless we are engaged." He: "Well, I suppose it must be a match, then. Those flowers cost a dollar, and it seems a pity to have the money thrown away."

IN THE BRITISH NAVY

AN AMERICAN SHIP, THE FRIGATE PRESIDENT.

Captured in 1812. Now a Receiving Ship
Near the East India-Docks,
London.

The British have a United States warship tied up at a dock in London, flying the British flag and regularly commissioned in the British navy? What is more she is called the President, and or her bow is the figurehead of President John Adams, carved out of a huge chunk of American wood and handsomely gilt; writes and American correspondent from London.

Few Americans who visit London are aware of the presence there of such an interesting relic of the two Anglo-American wars. Even at the American Embassy officials did not know that a few miles from 123 Victoria street was an American warship in the hands of what we had been accustomed to call "the enemy."

She has been kept in commission as a receiving ship. For a quarter of a century she has been lying at her present berth near the East India Docks, most of the time stuck in the mud. There is some doubt whether she would float, and it is probably true that she would go to pieces if sent as far out to sea as the mouth of the Thames.

was told by the petty officer who took my genial companion and myself about the President, that the deck, wheel, ports and some of the guns were the actual ones captured with the ship, and he probably knew what he was talking about.

The lines of the President are still beautiful. She must have been a very handsome ship under sail. Although one of the largest ships in the world at the time of her launch, she would be a mere pigmy besides one of the great warships of the present day.

The President is now used as a drill ship for the Royal Naval Reserve, having been fitted up for this purpose in 1861 at Chatham. Until 1876 she lay at the City Canal, River Thames, and was then moved to her present berth.

THE ENGAGEMENT.

The action in which the President was captured was in many ways a remarkable one. Stephen Decatur had received command of the frigate, and on the evening of January 14, 1815, he sailed into the lower bay, intending to put to sea that night. The President, however, grounded heavily on a sand-bar, breaking her rudder braces and straining her seams so badly that she commenced to leak rapidly. Part of her false keel had also been carried away.

Owing to a turn of the tide it was impossible to put back, so she shaped her course along the Long Island shore. At daybreak four British ships were discovered, and they gave chase, one on each quarter and two astern. At noon the breeze fell, and though the President had left the bulk of the fleet behind, one of them continued to gain

LORD 'RANDY' CHURCHILL

BIOGRAPHY BY HIS SON, MR. WINSTON CHURCHILL.

Strange Political Career of the
Founder of the English
Unionists.

40 Prince's Gardens, S. W.,
Feb. 2, 1887.

My Dear Churchill.—Why will you insist on being an Ishmael—your hand against every man? Why did you go out of your way to attack me?

You know that I am the mildest of men, but I have a strong inclination to hit out at those who strike me, and my experience teaches me that no private friendship can long resist the effect of public contest.

You and I have plenty of enemies. It is not possible for us each to pursue his own way without coming into personal conflict.

Surely we shall have our hands fully occupied without tearing out each other's eyes.—Yours sincerely,

J. CHAMBERLAIN.

This above letter from Mr. Chamberlain gives the note of the life of Lord Randolph Churchill as told in the biography by Mr. Winston Churchill, writes Sidney Dark, in the London Daily Mail.

POLITICAL ISHMAEL.

He began in the days of the Fourth party, a political Ishmael. He died a political Ishmael—his hand against every man's, friend's and foe's, eager to strike, and regardless whose head was the target. And yet, despite all this, by the force of his political genius, he played a large part in shaping party, and consequently, national destinies.

The fact is that Lord Randolph was a politician, and not a statesman. To him politics were for a while an absorbing amusement, at which he was an extraordinary expert player. Directly, however, he ceased to be able to win every trick the game bored him, and he turned to racing as an alternative. "Tenax sum propositi!" was never his motto.

PARLIAMENTARY BEGINNINGS.

Lord Randolph Churchill was born in 1849. He entered Parliament in 1874, but only turned seriously to politics in 1877, and the Parliament of 1880 saw him leading the Fourth party, his colleagues being Mr. Balfour, Gorst, and Wolff, denouncing the "old gang," and mercilessly attacking Mr. Gladstone and his Government. He invented Tory Democracy, became a great popular favorite, started the Primrose League, and, without doubt, did the spade-work of preparing for the subsequent domination of England by the Unionist party.

CHURCHILL AND GLADSTONE.

Mr. Winston Churchill's singular power of vituperation is an inheritance from his father. Lord Randolph's denunciations of Mr. Gladstone quite equalled his son's diatribes against Mr. Chamberlain. But the father had wit.

He invented the phrase "old man in a hurry"—it occurred, indeed, in an election address—and the following is a specimen of his speeches. He is describing a visit paid by a deputation to Mr. Gladstone at Hawarden Castle:

"They came suddenly on the Prime Minister and Master Herbert, in scanty attire and profuse perspiration, engaged in the destruction of a gigantic oak, just giving his last dying groan. They are permitted to gaze, to worship and adore, and having conducted themselves with exemplary propriety, are each of them presented with a few chips as a memorial of that memorable scene."

BIRTH OF THE UNIONISTS.

In 1885 Lord Randolph became leader of the Opposition in the House of Commons.

"What will happen now?" Lord Randolph was asked by a friend. "I shall lead the Opposition for five years. Then I shall be Prime Minister for five years."

NAVIES OF THE WORLD

THE RECORD OF BUILDING FOR THE PAST YEAR.

Programme of the Powers for Increasing
Armaments—Types of
Vessels.

Great Britain has launched during the year two battleships and four armored cruisers. France has launched one battleship and one armored cruiser, Germany two battleships, Russia one battleship, Italy a battleship and an armored cruiser, Japan two battleships and one armored cruiser, and the United States four battleships and one armored cruiser, says the London Express.

BRITISH VESSELS.

The list of vessels completed and commissioned by the various powers shows that Great Britain has put five battleships and four armored cruisers into service; France one armored cruiser, Germany two battleships and two armored cruisers, Russia no large vessels at all, Italy one armored cruiser, Japan id vessels at all, and the United States five battleships.

The British battleships are of the King Edward VII. class, and are of the same displacement as the vessels launched; the German battleships are Hessen and Preussen, of 13,000 tons, while the United States battleships are the Rhode Island and her sisters, with a displacement of rather more than 14,000 tons each.

How far then does this progress of the past twelve months affect the relative strength of the powers at sea? The following tables show the battleships and armored cruisers, smaller craft being more or less negligible quantities:—

BATTLESHIPS.

Country.	Built.	Bldg. projected.
Great Britain	56	6
France	20	6
Russia	7	5
Germany	18	4
Italy	14	4
United States	5	7
Japan	5	4

ARMORED CRUISERS.

Great Britain	30	9	4
France	19	5	1
Russia	3	2	—
Germany	6	1	1
Italy	6	1	3
United States	11	9	—
Japan	8	4	2

PROGRAMMES FOR YEAR.

The outlook suggests interested activity.

France's new shipbuilding programme, which is now before the Chamber, comprises sixteen battleships, three large armored cruisers, and fifteen smaller armored cruisers, and of these three battleships are to be laid down in 1906.

No definite shipbuilding programme has been announced for Russia, but as soon as internal affairs are more settled it is fairly certain that a reconstruction of the navy will be undertaken.

The German Navy Act of 1900 is still being pushed rapidly forward, and the work of replacing the older ships of the navy will be begun in 1906, when the old Bayern and Sachsen will be removed from the active list, and two new vessels laid down in their stead. A supplementary bill, to allow for the construction of six armored cruisers is before the Reichstag, but in the meantime there is only one more of the 1900 programme to be laid down.

ITALY'S PLANS.

Italy is content for the present to carry on the work she has in hand, which includes the completion of three battleships, the launching of one more, the Roma, with the completion of the armored cruiser, San Giorgio and the launching of the San Marco, which is on the stocks at Castellamare.

The new United States programme is not yet made public, the three vessels in the projected category having been

THE OLD YANKEE FRIGATE—THE PRESIDENT.

Captured by the British During the War of 1812, and now Moored in the Thames and Used as a Receiving Ship by His Majesty's Navy.

The British officer who first called the President to my attention kindly offered to pilot me down to see her one fine day in London.

OLD GUNS ON BOARD.

We finally found the President moored at a quiet dock, her deck roofed over, stove pipes leading up her bulky sides, and a permanent stairway built from the main deck to the floor of the pier.

There, mounted at the stern, was the identical wheel with which the President had been steered on that memorable day, January 15, 1815, when "hogged" and almost water-logged, after putting the Endymion out of action, she was compelled to strike her flag to a vastly superior force.

ORIGINAL FIGUREHEAD.

Yet there is a question in naval circles as to how much of the original President is in this ship. The great gilt figurehead of John Adams is undoubtedly the original one put on the President before her launch, when she was

upon her.

Aboard the President, which was almost waterlogged, the crew was occupied in lightening the ship, cutting away anchors, turning the water loose in the butts, throwing overboard provisions, spare boats and cables, while the men aloft were wetting down the sails.

DECATUR OUT-NUMBERED.

At three o'clock a light breeze having sprung up, the largest vessel in the pursuing fleet began to come up rapidly, opening with her forward battery. Decatur replied with his stern chasers. This running fight continued for two hours, and then the Englishman came up, and the two vessels sailed side by side for an hour, firing occasional guns.

Decatur wished to come to close quarters, and had his boarders ready, but this the Englishman avoided. Meanwhile the ships astern were approaching. It afterwards developed that in the running fight the President had completely disabled her antagonist, the Endymion, and finally left her drifting

ORIGINAL FIGUREHEAD.

Yet there is a question in naval circles as to how much of the original President is in this ship. The great gilt figurehead of John Adams is undoubtedly the original one put on the President before her launch, when she was regarded as the finest fighting ship of the day. I have no doubt, also, that her keel and her main ribs and timbers are the ones built into her when she was constructed. Probably a good deal of her outside planking is English, for the Admiralty admits that she has been renewed several times. At any rate, I

ARE AGES AHEAD OF US A STAGGERING PROBLEM

THE PEOPLE OF MARS ARE MORE HIGHLY DEVELOPED.

Camille Flammarion Says It Is Millions of Years Ahead of Ours.

M. Camille Flammarion, the eminent French astronomer, declared, in an interview in the *Patric*, of Paris, that the inhabitants of the planet Mars are much more highly developed than ourselves. "Naturally," he says, "it is impossible for us to imagine what forms living beings must take there but it is equally impossible for us to assert that the forces of nature, which are there the same as here, and act under almost similar conditions (atmosphere, climate, seasons, aqueous vapor, and so on), have been rendered sterile by a perpetual miracle in annihilation, whereas on the earth the cup of life overflows everywhere and the generating force of beings immensely surpasses their real and durable vitality."

"There are many advantages in favor of the Martians. First of all, it would be difficult for a human species to be less intelligent than ours, seeing that we do not know how to control ourselves. The second reason is that progress is an absolute law which nothing can resist."

THE LUCKY MARTIAN.

"The inhabitants of Mars, older than we are, may represent what we shall be in several million years. A third circumstance in their favor is that they are in a better position than we are to free themselves more quickly from the heaviness of matter."

"Martians weigh less; their years are twice as long as those of the earth. Finally, the climatic conditions on Mars appear to be much more agreeable."

"The hypothesis that Mars is inhabited by an intellectual race much superior to our own is growing stronger every year in proportion as astronomical observations become more and more precise. The geography of our neighbor is better known than was that of the earth three hundred years ago. The same can be said of its meteorology and its climatology."

"No one can tell for certain what the weather will be like on earth to-morrow. Well, we know almost with certitude what the weather will be in such and such a country of Mars next week or next month. Its atmosphere, being constantly pure and transparent, all the geographical configurations of the planet pass with precision into the field of vision of the telescope."

FORGOT TO LOAD GUN.

While the commander-in-chief of the British fleet was superintending battle practice recently on board one of the cruisers of the Mediterranean fleet, one of the guns missed fire. Mindful of recent accidents, the crew preferred to wait half an hour before opening the breech. As an extra precaution Lord Charles Beresford ordered the gun to be well secured and waited an hour. At the end of that time, with great care and numerous orders as to caution, the breech was opened. Then it was discovered that the men had forgotten to put in the ammunition.

side for an hour, firing occasional guns. Decatur wished to come to close quarters, and had his boarders ready, but this the Englishman avoided. Meanwhile the ships astern were approaching. It afterwards developed that in the running fight the President had completely disabled her antagonist, the *Endymion*, and finally left her drifting and turning round helplessly. At eleven o'clock that night two fresh ships of the enemy crawled up within gunshot. They were the *Pomone* and the *Tenedos*, heavy frigates, and both opened fire on the President at close range, compelling Decatur to strike his colors.

ENGLISH SAVANTS FEAR LACK OF WATER IN FUTURE.

Many Watersheds Disappeared—Legislation to Regulate Flow of Rivers Proposed.

Is Great Britain coming face to face with a great water famine?

"Owing to the tremendous industrial activity and the needs of the teeming population, England may find herself one of these days face to face with a problem of staggering magnitude—namely, a scarcity of fresh water," said President Bentley, of the Royal Meteorological Society, at its annual meeting in London the other night.

FEAR A FAMINE.

"So enormous is the drain upon the water supplies, and so much has the growth of the cities caused a disappearance of our forest areas," he continued, "that there is good reason to fear a water famine in the future. The diversion of rivers and lakes and other fresh water reservoirs from their natural function of irrigating distributors of all essential moisture to the land has interfered in England so greatly with Nature's arrangements that the English engineers and meteorologists at no distant date may find a task of almost insuperable difficulty awaiting their endeavors."

Dr. Mill, the rainfall expert, on being consulted regarding this alarming statement, said he was of the opinion that the question would require an early consideration.

"Legislation will be needed in the immediate future for the regulation of rivers," he stated. "The great question is how to store water which at present runs waste on the coasts. The planting of trees on high watersheds is one of the first solutions of the problem, but the chief difficulty lies in the scarcity of suitable land available for building large reservoirs."

REFORM IS NEEDED.

"I believe that at some future date the services of engineers will be required in this reform, as the present arrangement of reservoirs is unsatisfactory. In Austria the Government issues an annual report on the condition of the Danube River, and also detailed statistics of the rainfall with the view of storing all available water supplies. This work done by the Austrian Government I am now doing in regard to the British Isles on my own responsibility, but the rainfall and river conditions are only a portion of the much larger problem."

Friend: "Are you hoping for better things?" Philosopher: "No; I've got my sleeves rolled up, and I'm working for 'em."

Old Bachelor (concluding story): "Thus was I saved by mere presence of mind. Young Friend (gloomily): "Great thing—presence of mind. I might have been a rich man to-day if my presence of mind had not failed me at one time." Old Bachelor: "Indeed! When was that?" Young Friend: "You remember my uncle George—rich old duffer? Well, sir, I was with him one day when he was taken with a fit. I was so frightened that I lost my presence of mind and called in a doctor, and Uncle George is living yet."

BIRTH OF THE UNIONISTS.

In 1885 Lord Randolph became leader of the Opposition in the House of Commons.

"What will happen now?" Lord Randolph was asked by a friend. "I shall lead the Opposition for five years. Then I shall be Prime Minister for five years. Then I shall die." In respect to the span of his life, the words came true almost to the day.

Then came the Home Rule Bill and the Liberal Split. Mr. Gladstone had delivered the country on his opponents for twenty years.

In the delicate negotiations that brought the Unionist party into existence, Lord Randolph played a large part.

It was in April, 1886, that the Unionist party, as we have known it, had its beginnings.

Early in the month Lord Randolph persuaded Mr. Chamberlain and Lord Salisbury to meet. The turf club was the neutral ground selected. Thither Lord Salisbury repaired—not, as it appears, without trepidation and misgivings, and in the little dingy downstairs room where visitors are received, was begun that strange alliance afterwards so powerfully to affect the course of history.

AFTER THE LEADERSHIP.

In the Salisbury Government of 1886 Lord Randolph was Chancellor of the Exchequer. But his reign was a short one. Before the end of the year he had resigned, and at the same time had finished his official career. The excuse for the resignation was the impossibility of making those reductions in expenditure which the Chancellor desired.

But somehow, as one reads the biography, one doubts whether economy was more than a subterfuge. Lord Randolph was playing for the leadership of the party. He felt he was indispensable. He had beaten all the "old gang." The time had come to try a fall with Lord Salisbury, but he had miscalculated the strength of his opponent. Mr. Chamberlain agreed in thinking that, without Churchill, the Government was doomed. "You will have a hard time to go through," he wrote, "your case will be mine almost exactly, and I can tell you it is a bitter pilgrimage which is in prospect. The party tie is the strongest sentiment in this country; stronger than patriotism or even self-interest. But it will all come right in the end for both of us."

The hard time came. For the rest of his political life this Ishmael of the House was, with a few brief intervals, denounced in the House of his friends. He quarreled with every one, even with Mr. Chamberlain, and there is something strangely pathetic in the last scenes.

Months of illness, loss of power, the early death in 1895, complete the story of his life.

SURPRISING THE COLONEL.

The late Sir Robert Menzies used to tell a story of a certain colonel who was noted for his great generosity. He had lost an arm during the Indian Mutiny, and this made him very sympathetic towards people who were similarly afflicted. While walking to the barracks one day he met an old one-legged man, evidently in abject poverty.

"Ah, you have met with a great misfortune like myself, I see," remarked the colonel.

"Aye, sir," replied the old man, with a salute; "and like yersel', colonel, I have spent a great part of my life in Her Majesty's service and seen a great deal of hard work."

"My poor man," said the kind-hearted veteran, as he slipped half a crown into the old man's hand, "I fear you have received but a poor reward for your services."

"Ye may weel say that, colonel," replied the ancient one, as he hobbled away.

"But," said the colonel, "you haven't told me where you served."

"Weel, if it comes to that," chuckled the reprobate, "I have served my time in the Perth Penitentiary, whaur they gied me fourteen years for stealing a horse!"

cludes the completion of three battleships, the launching of one more, the *Roma*, with the completion of the armored cruiser, *San Giorgio* and the launching of the *San Marco*, which is on the stocks at Castellamare.

The new United States programme is not yet made public, the three vessels in the projected category having been authorized by Congress in 1905, but not yet laid down.

Japan has two battleships projected for 1906—one to be built at Kure, and the other at Yokosuka, both of 18,000 tons displacement—and two armored cruisers of 14,000 tons each, both to be built at Kure.

LEVIATHAN BATTLESHIPS.

It will be noted that 18,000 tons is the displacement of the battleships mentioned. This burthen appears to have been tacitly decided upon by the principal sea powers as representing the efficient mean of the northern battleship.

Great Britain is building an experimental 'example in the' Dreadnought. As stated in the *Express* of Friday last, France proposes to lay down three 18-ton battleships next year. Germany has already announced her intention to build a class of six vessels of this same tonnage.

The United States Naval Construction Board is about to submit plans to Congress for a new type of 18,000 ton battleship. Italy alone of the great naval powers adheres to the small, mobile type of battleship.

It has lately been reported that Japan intends to lay down battleships of 22,000 tons, carrying fourteen 12-inch guns. Such a leap forward is regarded by experts as highly improbable.

LONG SERVICE AT END.

Battalion of Rifle Brigade Out of England for Eighteen Years.

Travel worn by tropical marches, thinned by disease, hardened by warfare, the 3rd Battalion of the Rifle Brigade landed at Plymouth January 3rd, on their return from eighteen years' service in Africa and India on behalf of the Empire.

The bare table of the battalion's movements tells a stirring tale:—

Sept. 18, 1887—Embarked at Portsmouth on H. M. S. *Serapis* for Egypt. On arrival employed at Cairo on garrison duty.

Aug. 22, 1888—Left for South Africa for garrison duty at Wynberg.

Feb. 2, 1889—Left for India.

March, 1895—Mobilized to form part of the relief brigade for the Chitral Relief Force.

August, 1895—Demobilized.

June, 1897—Left Rawal Pindi for service with the Toshi Field Force.

October, 1897—Owing to severe sickness, returned from *atta Khel* to India.

January, 1900—Proceeded to Meerut.

January, 1903—Attended Delhi Durbar and grand military Durbar.

July, 1903—Section sent on to active service to Somaliland.

Now these seasoned warriors are returning in the *Assaye*. They bring with them vivid memories of the hardships and the glories of war. They suffered particularly when with the Toshi Force, going through heavy marches in the hottest time of the year, and being attacked with dysentery. On that march they lost by death one officer and forty-eight non-commissioned officers and men. They were at the gorgeous durbar, and then a portion of the battalion went away for fighting in Somaliland. After eighteen years' absence, they put foot once more on their native land.

GOOD HAT FOR FIREMEN.

A new headdress for firemen and divers, which makes air-tubes unnecessary, is being tested by the French Academy of Medicine. The poisonous gases exhaled are absorbed by granulated potash. The oxygen consumed by the wearer is supplied by compressed air. The inventors claim that with their apparatus a man can remain ten hours under water without a fresh supply of air. It has been suggested that the apparatus can be utilized by submarine boats, at least in cases of emergency.

LD THE INDIES ARE BITTER

THE PEOPLE MAY TURN AGAINST GREAT BRITAIN.

Hard Times and Withdrawal of Troops and Ships Have Had Effect.

The bitterest feeling obtains in Jamaica against the Home Government, and be that Government in the future Conservative or be it Liberal, the people of the British possessions in the West Indies would like nothing better than to break away commercially if not politically, and tie themselves up with commercial treaties or any other kind of a proposition with any country which would interest itself in the development of the island, says a Kingston, Jamaica, despatch.

In the first place there has been trouble over the banana plantations. The disastrous hurricane which ravaged the island two years ago resulted in a condition of affairs which has not helped to establish an entire cordiality with the ruling forces in London. Most of the banana growers and the banana shippers were without insurance of any kind against loss. The hurricane must have hit the shippers hard—especially those bound by contract to carry bananas by contract from Jamaica to England in ships provided for the purpose. There were no bananas to be had for more than a year, yet the ships had to run all the same. As it was, the planters were hit very nearly as hard as the shippers, and the enfeebled finance of the island was once more strained and dislocated by the advance of loans to planters to enable them to tide over the interval between the destruction of their crops and the growth of new ones. Instalments of these loans have now been maturing for repayment, and right or wrongly the greatest difficulty exists in getting them repaid. The present governor, who is not responsible for the original loan, got after the planters with a sharp stick, telling them that they seemed to think that it was a gift and not a loan.

EASY WAYS OF FINANCE.

Sir Alexander Sweetenham, who succeeded Sir Augustus Hemming last year, is little versed in the easy-going ways of West Indian finance. He is regarded as being very tight-fisted by the planters. On the other hand, Sir Alexander does not hesitate to remind the planters that they are ready enough to borrow money, especially public money, and not very ready to repay it when the time comes. Indeed, the Governor has even gone so far as to indicate that some of the planters consider it rather bad taste of the Government to assume that when borrowed money becomes due it ought, as a matter of course to be repaid. They would much rather pay it when it happens to be more convenient. It can readily be seen that under these circumstances at the best the Governor of Jamaica would not have an easy task before him.

Still another thing—one which has perhaps caused more bitterness of feeling in Jamaica, though perhaps not so serious as the financial situation, is the military and naval situation. The dockyard at Port Royal has been disestablished, the commodore has been recalled, the North American and West Indian squadron, now the particular service squadron, no longer has its base on the western side of the Atlantic, and naturally Kingston does not like this. Over and over again, everywhere, the talk is that England is leaving the policing of the Western Atlantic to the United States, and that this repudiation of Imperial responsibility must lead to Imperial disruption. The question of the withdrawal of European troops is even more complicated than the question of the withdrawal of the navy. First of all it removes from the colonial town like Kingston a very attractive element of the social fabric. Add to this the fact that the defection of the troops is in

SOME ROYAL SNAPSHOTS

UNIQUE COLLECTION OF PHOTOGRAPHS TAKEN BY PRINCES.

Prince Leopold of Battenberg and the Duke of Orleans Also Contributors.

There is now on view in London a unique collection of enlargements from photographs taken by members of the Royal Family.

For the first time the Kodak Company has been able to arrange at its gallery in Oxford Street an exhibition composed exclusively of the work of Royal photographers, and the general public is afforded a rare opportunity of seeing what artistic pictures Queen Alexandra and other members of the Royal Family secure with their cameras.

Of the sixty-five photographs exhibited, twenty-four are taken by her Majesty, the remainder being the work of Princess Victoria, Princess Henry of Battenberg, Princess Ena of Battenberg, Prince Alexander of Battenberg, Prince Leopold of Battenberg and H. R. H. the Duke of Orleans.

HER MAJESTY'S COLLECTION.

The Queen's photographs, which occupy one wall of the gallery, form an extremely interesting collection, and they are all wonderfully good. It is not only because they represent her Majesty's own work that they are interesting. This little collection of twenty-four, selected almost at random by the manager of the Kodak Company's Oxford Street branch from the various negatives placed at his disposal by the Queen, is for the most part a record of her Majesty's travels, and about seventeen of them were taken during her Scottish cruise on the Royal yacht early last year.

The Queen, who still uses the same kind of camera with which she started photography sixteen years ago, although she has four or five others, is an ardent and skilful photographer, and is constantly using her camera wherever she may be.

All these photographs of hers show very well; she has a wonderful eye for cloud and atmospheric effects, and a keen appreciation of values.

CLOUD EFFECTS.

"Gathering Storm Clouds," a photograph taken from the bow of the Royal yacht—the tail end of the wake just appears in the foreground—is an excellent photo of a dark, lowering mass of cloud over the sea.

"Evening in the Highlands" shows a curious cloud effect on a Scotch loch. "A Royal Fishing Party" may be mentioned among other good effects; in the stern of the boat is Princess Victoria.

The remaining photographs taken by the Queen include one showing Princess Edward and Henry of Wales and Princess Mary of Wales in the grounds of Sandringham, an excellent photograph of a crowd outside the Royal Palace, Copenhagen on the birthday of the King of Denmark, and a most interesting one showing the King talking to Lord Sutherland in the garden of Marlborough House.

The nine photographs by Princess Victoria include some excellent cloud and light effects, a sunrise in the Mediterranean being one of the best.

WHO CANNOT BE AN M. P.

Those Who Are Not Eligible for a Seat in the British House.

The British House of Commons is limited by a statute of 1855 to 670 members, of whom 377 represent counties, 284 represent cities and boroughs, and 9 represent universities. Every male native or fully naturalized subject of the British Empire is eligible for election, provided he is 21 years old.

But there are these exceptions. An English Church clergyman, a minister of the Church of Scotland, or a Roman

THE SUNLIGHT WAY

RUB ON SUNLIGHT SOAP

LEAVE 30 TO 60 MINUTES

RINSE WELL

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way (follow directions).

Hard rubbing and boiling are things of the past in homes where Sunlight Soap is used as directed.

Sunlight Soap will not injure even the daintiest fabric or the hands, and the clothes will be perfectly white, woollens soft and fluffy.

The reason for this is because Sunlight Soap is absolutely pure, contains no injurious chemicals—indeed, nothing but the active, cleansing, dirt-removing properties of soap that is nothing but soap.

Equally good with hard or soft water.

YOUR MONEY REFUNDED by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

LEVER BROTHERS LIMITED, TORONTO

Bank of Hamilton

ANNUAL MEETING HELD 15th JANUARY, 1906

Report of the Directors.

The Directors beg to submit their Annual Report to the Shareholders for the year ended 30th November, 1905.

The Balance at credit of Profit and Loss Account, 30th November, 1904, was	\$ 40,176.21
The profits for the year ended 30th November, 1905, after deducting charges of management and making provisions for bad and doubtful debts, are	357,273.11
Premiums received on new Stock	205,421.04
	\$602,870.44

From which have been declared:	
Dividend 5 per cent., payable 1st June, 1905 ..	\$111,779.29
Dividend 5 per cent., payable 1st Dec. 1905 ..	119,940.28
	\$231,719.57
Carried to Reserve Fund from Profits ..	\$135,319.00
Carried to Reserve Fund from Premiums new stock as above ..	205,421.00
	340,740.00
Allowance to ex-President authorized by the Shareholders ..	5,000.00
	577,459.57

Balance of Profit and Loss carried forward

The Directors have pleasure in pointing out, that, after paying the customary 10 per cent. dividend, they have been able to place to Reserve Fund, out of profits, the substantial sum of \$135,000. The year's earnings are, in the opinion of the Directors, very satisfactory indeed, considering that out of the year's profits, the maximum estimated loss (\$90,000), which the Bank has sustained by the embezzlement and forgeries of T. Hillhouse Brown, has been provided for.

The Directors beg to report that the progress of the Bank still continues in a marked degree, and that, while they had thought it prudent to open during the year a few new branches in Ontario and Manitoba, in recognition of the rapid development of the country, they have mostly confined themselves to the strengthening and building up of the business at the various points at which offices had already been established. It is proposed, however, to ask of the Shareholders, at the Annual Meeting, power to increase the Capital of the Bank by \$500,000, in order that the Directors, in case it become advisable, may be in a position thus to provide for the future growth of the Bank's business.

The Directors have noted the growing tendency, on the part of Banks and other Corporations, to pay dividends quarterly, and, believing that such a practice may become more or less general, have decided to adopt it, and propose hereafter to declare dividends every three months.

Hamilton, 18th December, 1905. WM. GIBSON, President.

GENERAL STATEMENT.

TO THE PUBLIC:	LIABILITIES.
Notes of the Bank in circulation	\$ 2,279,755.00
Deposits bearing interest	\$18,033,608.74
Deposits not bearing interest	3,361,115.72
Amount reserved for interest due depositors ..	69,397.04
	21,464,121.50
Balance due to other Banks in Canada ..	50,262.00
Dividend No. 66, payable 1st December, 1905 ..	119,940.28
Former Dividends unpaid ..	79.00
	120,019.28

of Imperial responsibility must lead to Imperial disruption. The question of the withdrawal of European troops is even more complicated than the question of the withdrawal of the navy. First of all it removes from the colonial town like Kingston a very attractive element of the social fabric. Add to this the fact that the discontinuance of the large local expenditure which their presence involved is a serious loss to a colony where finances are already strained to the bursting point, and it can readily be seen that Kingston is in no pleasant mood when it comes to dealing with the Home Government and its representatives.

FEAR COLORED TROOPS.

The English people in Jamaica say that it is well known that the withdrawal of the European troops from India at the time of the Crimean war led many natives to believe that England had no more white troops to spare, and thereby was not without its effect on the subsequent outbreak of the mutiny. English people in Jamaica say that the negro, though not a Sepoy, is very easily led astray. Recently a negro preacher of self-styled prophet attracted thousands of the colored population to hear him hold forth, winding up his ceremonies with baptisms in the rivers. An unscrupulous preacher with a following probably would not find it difficult to convert the highly strung religious emotions evoked into dangerous race antagonism. The white people in Jamaica have accustomed themselves to regard the European troops rather than the local police as their last resort, a sure guarantee of law and order on the island. It is true that the West Indian troops are to remain, but the white population of Jamaica do not derive much comfort from that. Over and over again the remark is made, "If the European troops were all to go, for heaven's sake let the black troops go too."

GRAFTING IN TURKEY.

Naval Yards Full of Decaying Machinery and Ships.

The present state of the Turkish Government shipyard reveals an almost unbelievable state of chaos, and demonstrates how official sloth and corruption can render an expensively equipped establishment absolutely impotent. Some years ago Englishmen directed affairs, the boiler shop, the tube factory, ship-building yard, and marine engine shop being all under English management. The late minister, Hassan Pasha, altered this, however, and placed the management in Turkish hands, foreigners being able to hold only very subordinate positions.

Results of the policy are now apparent. The whole of the machinery is not only inefficiently managed, but it is a condition of absolute decay. Torpedo boats and submarines are seen, never used, and rapidly rusting away. In the yard is the skeleton of a cruiser, which was commenced twelve years ago and never been finished, and which has since become obsolete.

A forty-ton Siemens steel plant, with rolling mills and fifty-ton crane, is rapidly becoming useless through neglect, and the parts of a 3,000 ton hydraulic forging press delivered twelve years ago, have never even unpacked. The only thriving part of the whole department is the management, consisting of forty-six pashas and innumerable boys.

FOUR CENTURIES TO BUILD.

St. Peter's at Rome is the largest temple of worship in the world. It stands on ground which was formerly the site of Nero's circus in the north-west part of the city, and is built in the form of a Latin cross. The height of the dome from the pavement to the top of the cross is 44 feet, considerably higher than the Capitol at Washington. The great bell alone, without the hammer and clapper, weighs over nine and one-quarter tons. The foundation was laid in 1450 A.D. During the time that work was in progress forty-three popes lived and died. While it was dedicated in the year 1826, it was not entirely finished until 1880. The cost was \$70,000,000.

bers, of whom 377 represent counties, 284 represent cities and boroughs, and 9 represent universities. Every male native or fully naturalized subject of the British Empire is eligible for election, provided he is 21 years old.

But there are these exceptions. An English Church clergyman, a minister of the Church of Scotland, or a Roman Catholic priest cannot be elected an M. P. Neither can a sheriff or returning officer for the district for which he acts. Also debarred are some who have committed felonies, or been declared bankrupts, paupers, or insane.

Judges of the superior courts or of the county courts are ineligible.

Any member, who personally or through being a partner in an unlimited firm holds a Government contract, is liable to very heavy penalties if he sits or votes.

As for Peers of the Realm, they are most of them eligible for seats in the House of Commons. A peer of England is ineligible. A Peer of Scotland gets into the House of Lords if he is one of the sixteen elected by the Scotch Peerage each Parliament, but he cannot get into the House of Commons.

Irish Peers, however, elect twenty-eight of their number as members of the House of Lords for life. The remainder, if not also British Peers, are eligible to represent an English or a Scotch constituency in the House of Commons. That is how a Peer is sometimes also an M. P.

SALT THE CIVILIZER.

The use of salt as a necessary supplement to diet has had much influence in shaping the civilization and exploration of the world. It is most probable that the oldest trade routes were created for the salt traffic, as salt and incense formed the chief necessities of the ancient days. This was certainly the case with the caravan routes in Libya and the Sahara, whilst the mines of North India were the centre of a large trade before the time of Alexander. Another interesting fact is that salt has played a considerable part in the distribution of man. When it became absolutely necessary for him, as it did at an early stage of his development, he was forced to migrate to places where it could be obtained. This brought him to the seashore, where he gained his ideas of maritime commerce. Lastly, the preservative effects of salt on flesh food made long oceanic voyage possible, and thus opened up the world to commerce and civilization.

CURIOUS SEEDS.

Mr. Bennett had an embarrassing habit of bringing unexpected guests home to luncheon, and the family larder was not always equal to the strain. On one such occasion Mrs. Bennett was obliged to re-enforce the rather scanty menu with something from her store of preserves.

Hastily seizing a jar of gooseberry jam, the good woman emptied it into a glass dish and placed it on the table.

A little later the guest, who for some moments had been regarding with puzzled interest his saucer of jam, looked up to propound a question.

"I beg your pardon," said he, "but would you mind telling me what fruit this excellent preserve is made of? The flavor is delicious, but I can't call to mind any fruit with seeds like these."

Mrs. Bennett leaned forward to inspect the seven round objects on the guest's plate.

"For goodness' sake!" she exclaimed. "Those are the marbles I put into the kettle to keep the jam from burning. I forgot to take them out!"

Shortly after marriage a man discovers that he has been courting lots of trouble.

When a barroom loafer tells you that he is a gentleman no other testimony is needed.

"Every housekeeper must realize," said Mrs. Prim, "that cleanliness is next to godliness." "Unless," replied Mrs. Popley, "she happens to have several boys around the house; then she realizes it's next to impossible."

Bank of Hamilton,
Hamilton, November, 30th, 1905.

In moving the adoption of the annual report Hon. Mr. Gibson said:—

Gentlemen,—Your Board of Directors beg to express the pleasure they have in being able to present the report to the shareholders. During the whole history of the bank, covering a period of thirty-four years, this year would have been the best and the most successful that we have ever enjoyed but for the unfortunate incident in connection with our east end branch in this city. Had that not occurred our net earnings would have been 19.30 per cent. on the capital, and notwithstanding that we had to make provision for that loss the net earnings of the year are 15.42. After deducting the loss of \$90,000 already referred to, our earnings for the year are considerably greater than the average for the past ten years. In the period from 1875 to 1885 the rate of earnings was 10.1; 1885 to 1895, 11.03; 1895 to 1905, 13.98. I invite the attention of the shareholders to the fact that every dollar earned by the bank, except what has been carried to rest, has been paid to the shareholders, and that the misfortune of the past year in the east end branch is likely to fall on the employees more heavily than upon the shareholders, for, as you know, though the bank has had under consideration, and it is still its intention, to establish a pension system, such has not yet been begun.

During the year new agencies have been opened at College and Ossington streets, Toronto; Toronto Junction, Carberry, Kenton and Killarney, Man.; Battleford, Sask.; and at Fernie, B. C. While we have been somewhat conservative in opening new branches we have been endeavoring to strengthen those where we already have agencies. It may be said that some of the places where we have opened branches are small in the matter of population, but it must be remembered that they are in growing centres, surrounded by rich country, and that the prospect for increased business in the future is very bright. The directors have great faith in the country. I am very glad to notice that the bank is popular with the investigating public. Last year there were 645 shareholders on our books and this year the number is 713, showing that the stock is going into the hands of investors.

At the same time we have made 18 new friends for the bank.

By the report I have just read you will see that it is proposed to increase the capital stock by \$500,000. During the last six months a quarter of a million dollars was taken up at a premium of 100 per cent. The same care will be

exercised in issuing the new stock only as the business of the bank requires it.

Now in regard to the incident in the east end. Much comment and criticism have been indulged in. I had been away from the country at the time, but I want to say for the members of the board that they acted like men in the best interests of the public and of the bank. The board determined to give the public the result as soon as the result could be ascertained. Our inspection is as rigid as that of other banks. You can do something with the staff of the bank when the agent is honest, but when the agent is not honest, and adds forgery to his stealing, the bank is largely at his mercy. You have to trust the people employed by you, and we have to depend on the fidelity of our agents, and while one man has proven false, the 399 other employees of the bank have not, and we have confidence in them. You may say that the inspection is not rigid enough. I believe that you may have too much inspection. If you let an agent think that he is being spied upon he will probably sit and do nothing and your business is bound to suffer. Now, in regard to quarterly dividends I need not say much—they cannot come too often.

Mr. John Proctor seconded the motion, which was carried unanimously.

On motion of Mr. Samuel Barker, M.P., seconded by John A. Bruce, the following motion was unanimously carried:—

"That the thanks of this meeting be given to the President and Directors for their services during the past half year." Carried and replied to by Hon. Mr. Gibson.

Mr. W. A. Robinson moved, seconded by Dr. Russell:—

"That the thanks of the meeting be given to the General Manager, Assistant General Manager, Inspectors, Agents and other officers of the bank for the efficient performance of their respective duties."

This was carried, and responded to by Mr. Turnbull.

Hon. Mr. Gibson moved the adoption of the by-law to increase the capital stock from \$2,500,000 to \$3,000,000. Mr. John Proctor seconded the resolution, and it was carried unanimously.

The scrutineers reported the following gentlemen unanimously elected Directors for 1906: Hon. William Gibson, John Proctor, Hon. J. S. Hendrie, George Rutherford, Cyrus A. Birge, C. C. Dalton and J. Turnbull.

At a subsequent meeting of the Directors Hon. Wm. Gibson was re-elected President and Mr. J. Turnbull Vice-President.

Sergeant: "Where are you going, Smith?" Smith: "To fetch water." Sergeant: "In those disreputable trousers?" Smith: "No, sergeant; in this 'ere' pair."

Mr. Gragger: "I see they are wearing dresses longer this year." Mrs. Gragger (savagely): "Well, if they wear 'em any longer than I do they will have to make them out of chain-mail."

Does Your Heart Beat

Yes, 100,000 times each day. Does it send out good blood or bad blood? You know, for good blood is good health; bad blood, bad health. And you know precisely what to take for bad blood—Ayer's Sarsaparilla. Doctors have endorsed it for 60 years.

One frequent cause of bad blood is a sluggish liver. This produces constipation. Poisonous substances are then absorbed into the blood. Keep the bowels open with Ayer's Pills.

Dr. Reaume gently insinuated that there were some repairs needed at the public buildings in Kingston, but what that had to do with the election may puzzle the uninitiated. Now just watch how angry The Mail will be over this revival of the "cold justice" principle. It will slap Mr. Reaume on the wrist.

Goderich Signal.

Hon. Mr. Emmerson, the Minister of Railways, is being hauled over the coals in the Maritime Provinces because, in pursuit of his policy of retrenchment on the Intercolonial Railway, he has cut off some trains which were being run at a loss. Mr. Emmerson will have no path of roses to tread in his task of making ends meet on the Government railway system, but if he sticks to the job and accomplishes his purpose there will be a big bouquet coming to him from the whole Canadian people.

A Patient Scot.

Alexander Innes Shand in his "A Medley of Memories" writes of an old Scotchman whom he knew in his boyhood. "He used to drive cattle in a flowing, flowered dressing gown, which had been passed on to him, and he only shaved his gray beard at long intervals. One of my earliest recollections is seeing him biting off the tails of a litter of terrier puppies in the courtyard. He was a philosopher in his own way, and with the free run of the servants' hall and butler's pantry he took life easily.

"He never complained. Once when the landlord paid a morning visit that personage splashed from the drainage outside the door into a puddle within, where some ducklings were sporting themselves, and the wet was dripping over him from the blackened rafters.

"'Why, John,' was the exclamation, 'you are in a terrible state here! We must have your roof overhauled.' 'Aye, it's lettin' in some water,' was the reply, 'but it's gay thick, and they are but little drops, and I do weel enough in the bed under my auld umbrella!'"

Etiquette of Cannibalism.

"Even among the savages of French Africa, who eat human flesh, there are differences," said Paul Pucci, a young Italian traveler. "Some while ago, when exploring in that country, I learned a good bit about the ways of the various tribes. In a majority of them cannibalism is indulged only when the bodies are those of prisoners taken in battle. It is all right to eat persons

when sows would breed for the supplies of the fall just past, and as coarse grains were high and labor scarce at that time many brood sows were sent to the market.

Again it is argued that the majority of packers have not encouraged the production of hogs of the bacon type and weight. For a number of years improvement in the hog stock of the country made satisfactory progress but during the season, at least, the producers of the ideal sort have received no encouragement to continue their good work; a flat rate has been paid for good and bad alike. The hogs fit only to compete with the low priced American stock brought quite as much as the sort that compete with the Irish and Danish bacon for the highest place on the British market.

What may be the extent of the shortage or the real cause of it, the fact remains that unless producers and packers grapple in sympathetic co-operation with the situation, Canada's valuable bacon industry which has cost years of strenuous effort to build up may become seriously demoralized.

In 1890 there were only two packing houses in the export trade with a weekly capacity of some 3,000 hogs, while in 1905 the weekly capacity of the 16 packing houses in operation was some 50,000. While this limit has not been reached within from 10,000 to 15,000 hogs weekly according to the season the output from Canada has reached about \$15,000,000 annually or 20 per cent of the total quantity of bacon imported by Great Britain. To jeopardize so valuable an industry would be nothing less than a national calamity.

If the farmers who have been in the habit of raising hogs will accord the bacon industry a steady persistent support begotten of the knowledge that hog raising pays year in and year out, the future has very large possibilities for the Canadian bacon industry. Canadian bacon having already won a place on the British market commanding respect as it increases in quantity and improves in quality it will undoubtedly become a daily necessity of the British consumer. That it may occupy this enviable position both farmer and packer must cooperate, the farmer by producing the steady supply of the right class of hogs, the packer by paying a fairly uniform price from month to month and from year to year; and he must give value per pound according to the quality of the product he receives. Let each do his part and there will be little trouble about the supply of hogs for keeping the factories going at a normal capacity. What appears to be most needed at the present time is that relations of confidence be restored and maintained between packer and farmer through fair dealing and intelligent co-operation. With these and an appreciation on the part of the producer of the possibilities of the industry, hog raising cannot fail to be one of the most profitable branches of Canadian agriculture.

CATARRH

The true Cause and the true Cure.

How and why "Fruit-a-lives" completely eradicate this disease from the system.

Catarrh means inflammation. Ordinary catarrh is inflammation of the nose cavity opening into the throat. This cavity receives all the air going to and from the lungs. Food and drink passes through it to the stomach. And the prime cause of catarrh is indigestion.

Because indigestion means an irritated stomach. This irritation spreads to the throat and nose. Belching gas keeps up the inflammation. The blood is impure and badly nourished. And nine times in ten, there is Constipation and poor skin action.

The only way to cure Catarrh is to cure the cause of catarrh. Digestion must be improved—inflammation in stomach soothed—blood purified—and the liver strengthened so it will give up enough bile to make the bowels move regularly every day.

Fruit-a-lives

or Fruit Liver Tablets

will always cure Catarrh of the throat and nose because these marvellous fruit tablets cure indigestion—sweeten the stomach—and eradicate all impurities from the blood by its stimulating and invigorating action on liver, bowels, kidneys and skin.

Leave sprays, atomisers, powders and snuffs alone. Take "Fruit-a-lives" regularly—be careful of your diet—and catarrh will soon be a thing of the past.

One 50c. box of "Fruit-a-lives" will prove how effectively these tablets relieve catarrh—and will do you so much good that you will gladly continue the treatment until cured.

50c. a box or 6 boxes for \$2.50 Sent prepaid on receipt of price, if your druggist should not have them.

Specialists in the Treatment of Nervous, Blood, Private and Sexual Diseases of Men and Women. 25 Years in Detroit.

No Names used without Written Consent. Cures Guaranteed.

Thousands of young and middle-aged men are annually swept to a premature grave through early abuse or later excesses. Chas. Anderson was one of the victims, but was rescued in time. He says: "I learned an evil habit. A change soon came over me. I could feel it; my friends noticed it. I became nervous, despondent, gloomy, had no ambition, easily tired, evil forebodings, poor circulation, pimples on face, back weak, dreams and drains at night, tired and weak mornings, burning sensation. To make matters worse, I became reckless and contracted a blood disease. I tried many doctors and medical firms—all failed till Drs. Kennedy & Kergan took my case. In one week I felt better, and in a

The Province at large is to be congratulated on the re-election of Mr. Pense to represent Kingston in the Legislative Assembly. One more vote was not necessary to the Government's existence, and it is just as well to have a reasonably strong Opposition. Mr. Pense is a man of ability, and of more than average capacity for the kind of work devolving on a member of Parliament. His long journalistic experience has been an excellent training for his present position, in which he has done, and will continue to do, credit to his honorable calling. Mr. Pense is not merely a well-informed publicist, but an effective speaker, a fair-minded critic, and a courteous opponent. The calibre of the Assembly would be larger than it is if there were more members in it of the type of Mr. Pense.

WHAT OTHER PAPERS SAY.

Toronto Globe.

While the coal dealers look serious, the consumers are beaming from ear to ear. This is another illustration of the fact that the interests of producers and middlemen are not identical with those of their customers.

For Thin Babies

Fat is of great account to a baby; that is why babies are fat. If your baby is scrawny, Scott's Emulsion is what he wants. The healthy baby stores as fat what it does not need immediately for bone and muscle. Fat babies are happy; they do not cry; they are rich; their fat is laid up for time of need. They are happy because they are comfortable. The fat surrounds their little nerves and cushions them. When they are scrawny those nerves are hurt at every ungentle touch. They delight in Scott's Emulsion. It is as sweet as wholesome to them.

Send for free sample.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

emies are those of prisoners taken in battle. It is all right to eat persons who belong to hostile clans, but it would be a gross violation of tradition and the custom of the land to feast upon the friends or even upon members of the same tribe. This delicacy of sentiment, however, is not universal, and in one tribe in particular, where I noted the absence of any old persons, I learned that it was the proper thing to add the aged inhabitants to the local food supply. This confined the population to the young and hardy, for at the first signs of decrepitude the boiling pot was called into requisition.

"Carat" as Applied to Diamonds.

Although the term "carat" is applied to diamonds as well as to gold, it does not mean the same thing. Used with regard to the metal it expresses quality or fineness, 24 carat being pure gold and 22 carat equal to coined gold. But applied to the diamond carat means actual weight, and by this measure 115½ carats are equal to an ounce troy. The value of a diamond is not merely so much per carat, irrespective of size, but increases in an increasing ratio with the weight of the stone.

Ceremony.

I think there is a great deal of difference between that species of ceremony which exists with acquaintance and that which should always exist with the best of friends—the one prevents the growth of affection, the other preserves in it youth and age.—Letters of Maria Edgeworth.

Belief.

Figg—You'll generally find that people believe what they want to believe. Fogg—Yes, and probably that accounts for the belief in everlasting punishment—for other people, of course—being so popular.

THE CANADIAN HOG RAISING INDUSTRY.

Investigations by the Live Stock Branch of the Dominion Department of Agriculture have shown that for some months past the supply of bacon hogs in Canada has been falling off. Even before the order was issued debarring packers from importing United States hogs to be slaughtered in bond, difficulty was experienced by Canadian packers in procuring sufficient hogs. The amount of the shortage during the summer and fall is indicated by the fact that packers claim to have been able to secure only from 30 to 50 per cent of the capacity of their factories. Hog raisers on the other hand, claim that the production is considerably nearer the normal than would appear from the statement of the packers. It is, they say, partly an increase in the packing house capacity rather than a decrease in hog raising. In some of the dairying sections the supplies are reported to be very little if any below the normal, while in other districts the shortage is placed at about 20 to 25 per cent.

Enquiries as to the cause of the shortage brought from packers and producers a variety of replies. The packers claim that for the past three years or more the competition between buyers of hogs has been so keen that top prices have been paid continuously and that these prices have been high enough to give a profit to the producer. They claim therefore to be at a loss to understand why there is a shortage at this time. Speaking from the standpoint of the producer, well informed authorities claim that the price has not been as uniformly high as it should have been. At times of the year when packers anticipated heavy runs prices dropped to a point where no profit was left to the feeder. This claim, took place last season

matter worse, I became reckless and contracted a blood disease. I tried many doctors and medical firms—all failed till Drs. Kennedy & Kergan took my case. In one week I felt better, and in a few weeks was entirely cured. They are the only reliable and honest Specialists in the country."

A Curious Legend.

There is a curious legend in regard to Deadman's place, Southwark, London. An ingenious old writer says that the name originated as follows: "In Deadman's place, at St. Maryoverus, a man-servant being buried at seven of the clock in the morning, and the grave standing open for more dead Commodities, at four of the clock in the same evening he was got up alive again by a strange miracle, which, to be true and certain, hundreds of people can testify that save him act like a country Ghost in his white peckled sheete." However, a more exact historian explained that the name was merely a corruption of Desmond's place.

Live While You Are Alive.

Enjoy life as it comes to you. Listen to the bird songs and the voices of the children. Linger to watch the sunset or the opening of a flower. Take into your life the goodness, the pleasure and the brightness of every day, for "we shall pass this way but once," and then when you reach the last day that is given you here you will be content and can say, "I have lived."

He Knew.

"You are sure that man cheated?"
"Yes, sir," answered Three Finger Sam. "He held four aces."
"But that is not conclusive evidence."
"It was in this case. I knew where the regular ace was myself."

Sudden.

"Now," said the professor, describing the work of his class to Miss Elderberry, "we are engaged!"

"Oh, are we? How sudden!" was her reply as she snuggled up.

THE GIRL AT THE Y

By SEWARD W. HOPKINS

Copyright, 1905, by E. A. Whithead

The up express was due to pass at 1 o'clock, but it did not stop. Graham would not have been in the office at all, only he had some money in the safe and had received orders by wire to sleep in the station that night.

He did not know how much there was. It had come in a sealed package, locked in a small pouch. He knew it was pay day on the new branch then building on the 1st, and this was the 31st.

"Why can't they send a pay car?" asked Graham of himself.

"Too confounded mean," he muttered.

The hours dragged slowly, but Graham found some solace in thinking of Miss Delaine.

Miss Delaine was from Chicago. She was visiting the daughter of Silas Jones, whom she had met at school.

Miss Jones was tall, big and strong; Miss Delaine was dainty.

Miss Jones, with the advantage of her boarding school years, dressed well; Miss Delaine dressed better.

Graham had suddenly felt a peculiar sensation when Miss Delaine got off the local at Naomi. He knew that Silas was going to have company. He had no idea the company was built more on the fleeting vision plan than any other.

"If Silas don't feed that girl up he will be all out of company," Graham had said. "She's almost gone now."

Graham was a husky fellow and had been at Naomi two months when Miss Delaine appeared. As Graham boarded with Silas he had an opportunity to study her well.

"No more turkey hunts while she's here," he grumbled to himself.

Miss Delaine took the grumble out of him when she proposed a shoot, and the three went to the scrubs, and Miss Delaine brought down five to his three and Miss Jones one.

Miss Delaine proved to have more get up and get in her diminutive body than Graham acknowledged in his five feet ten. She could box big Miss Jones all over the barn floor; she could climb a cherry tree in a light summer frock and come down as neat as she went up; she could swim better than Miss Jones and dive as deep as Graham.

She could play the most charming waltzes and sing the prettiest songs. She had not been at Naomi two weeks before she was singing in the choir, and Graham made the harrowing discovery that he sang bass.

So on this night Graham consoled himself by thinking gloomy thoughts about Miss Delaine.

"I'd be a fool to ask her and a brute to expect her to accept if I did ask." He said this with almost a groan. "Why couldn't it have been Fan?" Fan was Miss Jones. "But, no; she'll marry Larkins, and if Miss Delaine was poor I'd marry her."

He knew she was rich. She had often spoken about "our railroad." James Delaine was president of the Q. and B.

Disconsolate, he smoked his pipe. He wondered how much money there was in the safe. He knew the payroll must be long.

He had read last Sunday's paper a dozen times and gone off to sleep and nearly fallen off the chair which he had tilted back. He had left the door open

door.

A bit of a girl stood there, her face white, a rifle in her hands. She was so small she looked like a child. Graham saw her.

"You—you Miss Delaine—at half past 1? How—how?"

She calmly gazed at the result of her lightning work.

"To tell you the truth, I was afraid and came here to sleep. After you left"—she was examining his wound while she spoke—"Charley Jones came over on horseback and said Mr. Jones' brother was dying. I was out in the orchard, and they could not find me and thought probably I was with you. I returned to the house and could not get in. I had left my key in the house. I managed to get a window open and went in that way, but I was afraid to go to sleep. I could sit up without fear, because I always feel safe with my rifle. But I was dead tired after the dance last night, and I wanted to sleep. I thought I'd risk the talk and come here. It was nearest. I heard the shot and knew you were in trouble. I ran and got here just in time. Can you run the sender?"

"I guess so," he said feebly.

"Wire to order that express to stop here." She even knew the stations.

Graham dragged himself to the table, got his call and clicked off the message.

At 2 the express came roaring and rumbling in.

"What the mischief's the row here?" bawled a heavy voice, and a powerful man in a silk hat and black frock coat stood with mouth agape while a fraction of what would make a fair sized girl slid, unconscious, to the floor.

"Nan, my girl, here?" said the big man. "Here, tell Hawkins to come here." Hawkins was Mr. Delaine's private secretary and an operator.

"Hawkins, get Burns and stay here till relieved by a new man. This man won't come back. He'll either go to jail or the head of a division. Get Nan into the stateroom. Get a doctor. There must be one on the train. Get a woman to take care of Nan. Take this man—his name is Graham—into the coach. Guard that safe as well as I think Graham has. There is a pack of money in there. Evans said he feared a holdup, and I sent the money yesterday with orders for Graham to stay all night. But what I don't understand is what—what Nan—at this time of night?"

It was not many hours before the whole story was told.

"Well," said Mr. Delaine, "you have told a good story, but I know a better one. I'll tell it when I see the result of Graham's injuries."

"Yes, I know one as good as yours, but it won't be time to tell it until yours is told. And, papa, won't you be surprised?"

"Um—not a lot," said the president.

• • • • •

The other two stories were told. Graham is now second vice president, which was Delaine's story, and Nan is his wife, which was Nan's. Now Miss Jones goes to see Mrs. Graham and travels in a private Pullman with the second vice presidential guardianship for her safety.

Plowing With Oxen.

There can be little doubt that the ox was the earliest beast employed for the plow. A white bull and a white cow were yoked together to draw the furrow for making the walls of Rome. Greeks and Romans employed oxen in plowing; asses only for sandy soils. When the plowman had finished his day's labor he turned the instrument upside down, and the oxen went home dragging its tail and handle over the surface of the ground, a scene described by Horace.

Art by the Ton.

An American city once asked MacMonnies, the sculptor, to enter a design for army and navy groups for a soldiers' and sailors' monument. He declined to compete. Then the commission was tendered to him outright. He submitted sketches of his idea for the groups. The committee in charge of the monument wrote him, asking, "How many tons of granite do you intend to use in the base?" His reply was: "If you are in the business of buying granite you may use as much as you want, one ton or 100,000 tons. I am an artist, and I never yet heard

of art being bought by the pound." The question was dropped until the contract for the commission was drawn. When Mr. MacMonnies received it he discovered in it a clause providing that in case the bronzes were ever thrown down from their base, by any cause whatever, and any person or property should be injured, he and his heirs forever should be liable for the damage sustained. He returned the contract without comment, unsigned. When the committee wrote him, asking the reason, his brief reply was, "Your lawyers are too sharp."

MARTYR DAYS ARE NOT YET PASSED!

GREAT ARMIES OF MEN AND WOMEN GO UP AND DOWN THE EARTH IN BONDS MORE IRKSOME, IN SUFFERINGS MORE INTENSE, IN SHACKLES MORE SECURE THAN WERE THE IRON MANACLES OF SLAVERY DAYS, AND YET THE "LINCOLN OF EMANCIPATION" FINDS IN THESE LATER DAYS HIS COUNTERPART IN

Dr. Agnew's Catarrhal Powder

whose mission it is and which mission it fills in freeing thousands from the bondage of dreaded, disgusting, discouraging, distracting catarrh, that cruel, relentless master that is no respecter of persons. How do you know you are in its thrall? Note the symptoms—headache, watery eyes, pains over the eyes, deafness, buzzing in the head, dropping in the throat, offensive breath, dryness in the nostrils—any or all of these symptoms are forerunners of catarrh, and catarrh in the headache stage can be relieved in 10 minutes by Dr. Agnew's Catarrhal Powder and the sufferer may be saved the suffering that comes with the chronic stage and the distress and maybe fatal results when catarrh takes hold on the lung tissues.

Take catarrh in time with this wonderful cure, which, as thousands have said and thousands more could say, "works like magic," and you will have struck the chord that is the keynote to health and happiness.

That Cough

which ordinary remedies have not reached, will quickly yield to

GRAY'S SYRUP OF RED SPRUCE GUM

be long.
He had read last Sunday's paper a dozen times and gone off to sleep and nearly fallen off the chair which he had tilted back. He had left the door open for air. The night was warm.
"Hello there, young feller!" came a voice. He turned toward the door and looked into the barrel of a big revolver.
"Hold up your hands!"
"Er—I am agent here," stammered Graham.

"Oh, we know that. You keep yer mouth shut. We'll do the rest."
"I won't submit to robbery, if that is what you mean," said Graham.
"Robbery, eh? Won't submit, eh? Well, young feller, ye don't look much like a fool. Under the circumstances I wouldn't advise yer to be one even if ye do know how. I've got two partners here, and the first yawp out of ye will mean a game o' shootin' big. Now, Jim."

Another fellow came in and went through Graham's pockets.
"Now, young feller," said the leader after Jim had deposited an express revolver on the table, "just tell us the combination to that safe."
"I refuse."

"What did I say about bein' a fool? Say, I'll give you three minutes to make up your mind. You'll either give us the combination or I'll put a hole through you. Now, one."

Graham was silent.
Jim was working at the safe. The third came in and grinned at the picture Graham made.
"Pretty boy," he said.
"Three."
Graham opened his mouth to speak.
"Ain't no use sayin' anything unless it's the combination."
"Aw, kill him. We can blow open the safe."

Graham knew that these men meant business. They would as soon take a life as eat. He could see his revolver lying where Jim had placed it.

If only he could divert the leader's attention while he grabbed his own revolver he would take a chance. Graham was no coward. He fixed his eyes on the door, nodding to some imaginary person behind the leader. The bandit laughed.

"See that, Bill? He don't know how old that trick is. Young feller, that trick was old before you were born. Give us another."

"It is no trick!" shouted Graham. "I am not afraid of you, but don't let that bear in here."

He looked frightened. The one called Bill looked. Graham had moved a few steps forward.

"Are you goin' to open that safe?"
"I tell you to shoot him," said Bill. "He's tried to fool us twice. No bear outside."

Graham could see the desperado growing blacker. He knew that after he had opened the safe for them they would shoot him to prevent identification. It had been done many times before.

He resolved to sell his life fighting rather than yielding. He suddenly darted toward his revolver, but the leader was too quick. He had been expecting that. The revolver was simply a lure. He fired, and Graham fell with a bullet in his side.

"Now, hang you, if you want a show for your life give us the combination."

Graham was gasping. He was waiting for the next shot that would kill him.

Suddenly there was a sharp crack—the smashing of glass—another—and another. The leader was down, with a bullet in his heart, shot through the back. Jim lay writhing near the safe. Bill had pitched forward and was grasping the side for support. Then an apparition appeared at the

day's labor he turned the instrument upside down, and the oxen went home dragging its tail and handle over the surface of the ground, a scene described by Horace.

The yoking together of ox and ass was expressly forbidden by the law of Moses and is made the ground of a ludicrous comparison by Plautus. Ulysses, when he feigned madness in order to avoid going on the Trojan expedition, plowed with an ox and a horse together.

The North Star.

The north star is exactly in line with the poles of the earth—that is to say, it is exactly north of the earth—which is the reason why its position with reference to us does not change by the revolution of the earth upon its axis. The reason its position does not seem to change by the annual revolution of the earth around the sun is that it is so many billions of miles away that the difference in direction from different points of the earth's orbit is imperceptible.

Hard Lines For Bachelors.

"Korea's the wrong place for bachelors," said a traveler. "Bachelors in Korea are considered as children and have only children's privileges. You, a Korean bachelor, get thirsty. You enter a rest house and call for palm wine. The pretty little amber colored waitress says:

"Married?"
"No," says you.
"Heraus, then," says she. And out you go unslaked.

"You want to vote, but they won't let you if you are not married."

"You apply for a job somewhere. 'How many children have you?' is the first question you're asked."

"And as soon as you say you're unmarried they laugh in your face to think that you should presume to apply for work anywhere."

Where Babies Swim.

"I spend my winters in Samoa," said a traveler. "It is always summer there. There the babies swim. Can you imagine a quainter, a more charming sight than a host of babies, none over two years old, laughing and crowing and swimming like fish in pools of clear sea water? You will see this sight in Samoa. Samoan women believe sea baths benefit babies, and in that equable climate they bathe their little ones daily the year around. The youngsters soon learn to swim. They can swim before they can walk. And to see these pretty brown babies swimming in the sea is well worth a 5,000 mile trip to Samoa."

Extravagant Shoes.

During the reigns of William Rufus, Henry I. and Stephen all sorts of extravagant shoes were worn. The toes were sometimes long and pointed and sometimes made to curl like a ram's horn. Occasionally they were twisted in different directions, as though the feet were deformed. The clergy protested and threatened, but the fashion continued in spite of the maledictions. Several persons were excommunicated for wearing pointed shoes, but they took the risk.

Handling Facts.

The lady witness had become quite picturesque in her testimony, and the attorney had called her down in a way that had made her mad all over. "Confine yourself to facts if you please, madam," he said in conclusion. "Very well," she replied tartly. "You are no gentleman. How does that strike you?"

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

SHE CHANGED HER MIND

By JEANNE O. LOIZEAUX

Copyright, 1907, by Ruby Douglas

Marion rode at an angry gallop. The dust was thick and the heat intense even for July—no weather for riding. The girl wore a neat blue gown, and a wide straw hat shaded her golden hair and clouded blue eyes. As she passed the hayfield, midway between her father's farm and Jim Bradley's, Jim himself stepped to the road and motioned her to stop. She reigned the rough bay colt up with difficulty and pushed her lover's hand away when he laid it on her arm. She gave him no chance to speak.

"Now, don't say anything. I shall ride whatever horse I please. See how quiet he is, anyway. Well, suppose I am killed? Then you will be free to marry Agnes, since you seem to like her so well. You can ride with her every day. You are free now, for that matter!"

She knew it was an unjust remark, but jealousy had the upper hand.

Jim Bradley was every inch a man, tall and good looking. His dark eyes flashed, and his jaw set. He had seen Marion in a temper before. He tried to explain.

"But, dearest, she only overtook me on my way to town. It was not

planned by either of us, and I have always known her, as I have you. Would you have me tell her you did not allow me to ride a mile with a neighbor? Where's the harm? You know whom I love, dear."

"She's always after you. She's in love with you. She!"

"No, she is not, but if she were ought you to be angry with me? And even then should you blame her? You love me yourself, don't you? Come, dear, be reasonable. Let me lead the brute home, and, if you must ride and get a sunstroke, get it on a safe horse." His masterful air of possession irritated her as much as it ordinarily pleased her.

"I don't love you. I hate you! Come on, Prince." She gave the reins a little slap, and the colt danced and snorted wildly. Jim caught him by the bridle. He spoke with repressed anger.

"Well, love me or not, you shall get down! You shan't break your neck just to break my heart. You know plenty of other ways of doing that. Prince has not been saddled half a dozen times, and I know your father does not allow you to ride him, though you are an old hand at horses. And you know perfectly well that Agnes is nothing but a friend. She cares nothing for me. She's a nice girl!"

"That's it—stand up for her, Jim Bradley! She told Sue Field that she would take you from me, and she's done it. Not that I care—much. Let Prince go, I say!"

"I will not. I shall take you down and have your father forbid you to mount him. Sue is only trying to make trouble. Agnes never said or thought a thing like that."

Marion sat quietly a moment, as if to obey his command to dismount. Her eyes were wide, her cheeks glowing. He dropped the bridle and came to reach his arms up for her. Then suddenly the demon of pride seized her again. She gave Prince a cut that sent him out of Jim's reach with one bound. "Goodby," she called. "You are free. I wouldn't marry you if you—I would have to be dead and come to life again before I would say I love you!"

The horse was off at an unruly gallop. Jim was angry, but his heart stood still as he watched the little blue figure riding away so lightly. Untrustworthy as he knew the colt to be, she seemed to have him under fine control. She could tame anything but her own temper; it was a way she had. Perhaps her own unruly spirit made the conquest of others easy. Of all her suitors—and she was much sought—only Jim had ever held his own and refused to bow utterly under the yoke of her will. That was why she loved him and quarreled with him—and had always come back to him. He was the stronger, and, while at times she resented his power over her, she also gloried in it. This was the worst she had ever done—defied him, broken her promise to marry him, risked her life to wring his heart.

He watched horse and girl fly from him over the level road. Then he shouldered his hayfork, walked swiftly to her father's place, entered the deserted barnyard—the men were all in the fields—closed the open barn door and waited with set jaw.

Meantime Marion and the colt were having a grand ride past grain lands and groves and farmhouses, flying past meadow and hayfield. The brisk motion, the wind in her face, cooled the girl's anger a little and made her ashamed. She thought with a pang that she had gone too far this time—that she could never make it up with Jim now she had been a fool.

Then she remembered coming back from shopping with Sue and meeting him riding gayly to town with Agnes Sutherland, with whom she had warred from the A B C's up. Jim had always had a fondness for her. Her wrath rose again, and she twitched the bridle. Prince was tired and beginning to be a bit sulky and nervous. With horse-womanly instinct she humored without yielding to him, let him drink at a roadside trough and turned his head for home.

As they reached Field's farm she noticed preparations for thrashing going on. The great red thrasher stood waiting for the engine, and men and horses were standing all about the conical yellow stacks. Sue came from the house and called to her to stop, which she did, to the colt's disgust. Sue leaned on the fence, and the two girls chatted a moment.

"You better get off till the engine comes, Marion. You might meet it. You're no business on that crazy colt. It isn't safe. I don't see how Jim allows it!" Marion's face flamed.

"What has he to say? I am not engaged to him any more. I!"

Sue gasped, then, with remorse—too late, as usual—remembered what she had told her friend on the way from town that day.

"Marion, you weren't ever fool enough not to know I was joking? What Agnes really said was that Jim was so silly about you he didn't hear what she said half the time. Oh, May, I'm so sorry!"

But Marion did not wait. She rode away.

Prince settled into an ugly, obstinate gallop, swerving and jolting.

They were nearing the crossing when an unearthly shriek made Marion look up to see the thrasher engine approaching. She urged Prince on, trying to reach the corner where the road turned toward home before the machine came closer. Her hands trembled, but she remembered that it is fatal to lose nerve with an unruly horse.

Prince snorted, laid back his ears, but went on well enough. They were almost at the corner when the fiendish shriek came again.

The colt took the bit in his teeth and bolted in utter terror. Marion knew her danger and kept her head as they turned the corner. She let her hat go, and the wind whipped her long hair back like a yellow banner. She spoke to the colt soothingly, patted his neck, tried to get the bit from his teeth—all in vain. They were still a mile from home and going so fast that the motion was as easy as the rocking of a cradle. If they met no teams and he kept to the road all might yet be well, but he might throw her. He swerved at the bridge and nearly dragged her against the railing.

She felt cold perspiration on her face. It seemed like the end of things. She thought of Jim—all he had been, all he was to her, what she had said to him—and now she—might—never be able to say she was sorry, that she loved him—get him to forgive her. She recalled a baby prayer, a little brother long dead, thought of her mother's face when they would take her home. As they neared the house she remembered that she had not weeded the pansy bed. Everything wavered strangely in her mind.

As they passed the windows she saw her little sister's baby face.

As the colt tore around the corner to the gate and into the yard she grew cold with horror. She had left the barn door open. He would make for his stall and crush her. It went suddenly dark before her, and her head swam. Jim—she wanted to call his name, but could not. He would have saved her, she thought.

Billionsness, dyspepsia, loss of appetite, disturbed sleep, nervousness, headache, giddiness and drowsiness, wind and pain or fullness of the stomach after meals, cold chills and flushings of heat, shortness of breath—these are the blank cheques of physical bankruptcy.

The man who suffers from these disorders and neglects them will soon be in the relentless grasp of some fatal disease. If he is naturally narrow chested and shallow lunged, it will probably be consumption; if his father or mother died of paralysis or some nervous trouble, it will probably be nervous exhaustion or prostration, or even insanity; if there is a taint in the family blood, it will be blood or skin disease; if he lives in a new or a low, swampy country, it will be malaria; if he lives a life of exposure, it may be rheumatism. There is one safe course for a man to follow who finds himself "out of sorts" and suffering from the symptoms described. It is to resort to Dr. Pierce's Golden Medical Discovery. This medicine makes the appetite keen, corrects all disorders of the digestion, renders assimilation perfect, invigorates the liver, purifies and enriches the blood and builds firm, healthy flesh and nerve tissue. It cures almost all diseases that result from insufficient or improper nourishment of the brain and nerves. Bronchial, throat, and even lung affections, when not too far advanced, readily yield to it.

A man or woman who neglects constipation suffers from slow poisoning. Dr. Pierce's Pleasant Pellets cure constipation. One little "Pellet" is a gentle laxative, and two a mild cathartic. Don't let a selfish seller over-persuade you to accept a substitute for these Original Little Liver Pills, first put up by Dr. R. V. Pierce over 40 years ago. Much imitated but never equaled.

ago. Much imitated but never equaled.

SIMON MAGI'S.

The Legend From Which Was Born the Story of Faust.

Almost every renowned man of antiquity in the middle ages was believed to be attended by a spiritus familiaris and not a few were suspected of being in direct league with the devil. Probably the oldest legend of which the Faust legend is a continuous thread is that of Simon Magus, mentioned in the history of the apostles.

According to Justin, he was a native of Gitton, a village in Samaria. He was, no doubt, a man of great intellectual powers. He was the father of the school of the Gnostics. It is also reported of him that he could make himself invisible, that he could pass through flames unharmed, could transmute matter, make gold and exorcise demons—in fact, he laid claim to all these powers, and his name lived in the mouths of the people as a sort of demiurge through many centuries until some other miracle working personality took his place at the popular fireside. Unusual accomplishments, great erudition, were attributed to the supernatural influence and the general disposition to superstitious assumption was strengthened on the one hand by dogmatic affirmation on the part of the church of the existence of a personal Satan, with his numerous household, and, on the other hand, by incorporating the magic arts among the practical sciences, of which astrology and alchemy occupied no mean part.

THE ODD LITTLE GECKO.

A Queer Animal That Lives In Africa and Southern Europe.

The gecko is an odd little creature. His name is seldom heard, and his

He Saw the Joke.
 "One day," says an American, "I walked into a bookshop in the Strand and asked for Hare's 'Walks in London.' In America the book is sold in one thick volume. The clerk brought it in two. 'Oh,' I said as I looked at them, 'you part your 'Hare' in the middle, do you?' 'I, sir?' he said, with a bewildered look. 'Oh, no, sir!' I saw he didn't see the joke, so I didn't explain, but bought the books and went away. A week later I went to the same shop. As soon as the clerk saw me he rushed from the back of the shop, laughing vociferously. 'Good!' he shouted. 'Capital! Part your 'Hare' in the middle! That's capital, sir, capital!'"—London Tit-Bits.

Love's Grammar.
 "I wish I dared to ask you something, Miss Helen," said Percy, with trembling voice and wabbling chin.
 "Why don't you dare to ask it?" the maiden said demurely.

"Because I can see 'No' in your eyes."

"In both of them?"
 "Yes."

"Well, don't you—don't you know two negatives are equivalent to an— How dare you, sir? Take your arm from around my waist instantly!"
 But he didn't.

A Question.
 "You'll let me come to your wedding, dear, of course?"

"Well, I can't promise. My people are so enraged at my choice that I hardly know whether I shall be allowed to go myself."

A Dyer.
 He—Do you think blonds have more admirers than brunettes? She—I don't know. You might ask Miss Turner. She has had experience in both capacities.

by the Geyinger (proverb marshal), and all to keep good order and discipline."—London Notes and Queries.

WEDDING SPEECHES.

Some That Were Not in the Usual Conventional Style.

A wedding in New York at which the bridesmaids were representative of six nationalities and each felicitated the bride in the language of her own country was an odd affair, but probably not so well received as the speech of a young Englishman who was called upon to propose the toast, "The Bridesmaids." Apprised of his ordeal in advance, he had devised an escape, and with the single statement that silence was golden he brought from his pocket a set of gold bangles, which he bestowed upon the attendants of the bride.

At a wedding feast at Dol, in Normandy, the demand for a speech resulted in the production of a guitar, upon which the speaker accompanied himself while he chanted the praises of the bride. Had he stopped there all would have been well, but he changed to a praise of his store, and the guests threw him out of the house.

Doubtless a similar fate should have befallen the sharpshooter who wrote the name of the bride upon the wall with pistol bullets, to the serious damage of the wall paper. Almost as odd was the performance of a German music hall performer, who, when called upon for entertainment, mounted the table upon his hands and balanced himself upon glasses, cups and other furnishings.

Foot In It Again.

Mr. Brakes—Who is that s—ur looking dame over there? Mr. Grubbins—Sir, she has the misfortune to be my wife. Mr. Brakes—Oh—ah—er—indeed, sir, the misfortune is—er—all yours, I'm sure!

Possible to All.

She (philosophically)—Do you think it is easy to die? He (commonplace)—Well, a lot of very stupid people have managed to do it.

(dates, and an usual plaier at Tables (backgammon) & Cards in the ale-houses and Taverns."

On Sept. 25, 1621, John Brock of Dundry is presented.

"For usallie playing of the fines and cudgills in the churchyard theare on Sabbath daies and hollie daies, as nam uelle hee, with others, did see upon St. Marke's daie past, and being reproved by the churchwarden for the same, hee gaue him a froward answer, sayinge, 'wee are at exercise to doe the kings service, & you will not suffer us, but the whyles you cutt your neighbors throats.'"

"That on Sonndae, 1 Julij, & on Sonndae 24 Junij ult., hee, Arthur Payton, and Edward Ward, taylor, did daunce in the churchyard thereof," and Richard Hulford "played upon his instrument to those that usallie daunce in the churchyard theare."—London Area lemy.

THE BIRD OF DEATH.

It is the Only Venomous Member of the Feathered Tribe.

Among all the thousands of feathered creatures classified by the trained ornithologists but one, the rpir n'doob, or "bird of death," is known to be venomous. This queer and deadly species of the winged and feathered tribe is a native of the island of Papua, or New Guinea. The bird is described as being about the size of a common tame pigeon, of gray plumage and a tail of extraordinary length, ending in a tip of brilliant scarlet red. It is a marsh bird and is found to inhabit only the immense stagnant pools adjoining the lakes of the interior of the island. The rpir has a hooked beak as sharp as a cock's spur and hollow. The venom with which it inoculates is distilled in a set of organs which nature has provided for that purpose and which lie in the upper mandible, just below the openings of the nostrils. Under this poison secreting laboratory in the roof of the mouth is a small fleshy knob. When the bird sets its beak in the flesh of a victim this knob receives a pressure which liberates the venom and inoculates the wound. No man, native or otherwise, was ever known to recover from a bite inflicted by a rpir n'doob. The suffering in such cases is said to be much more agonizing than in cases of rattlesnake and Gila monster bites.

A Persistent Nest Builder.

One of the most energetic nest builders is the marsh wren. In fact, he has the habit to such a degree that he cannot stop with one nest, but goes on building four or five in rapid succession. And there is nothing slovenly about his work either. Look among the cattails in the nearest marsh, even within the limits of a great city, and you will find his little woven balls of reed stems, with a tiny round hole in one side. There is a certain method even in his madness, for the nest in which his wife is brooding her seven or eight eggs is less likely to be found when there are so many empty ones around. Then, too, he uses the others as roosting places for himself.—London Opinion.

Vinegar.

Vinegar is fatal to many kinds of bacteria. We read that during the great plague in London a couple earned fabulous sums in nursing the wealthy and that their own means of defense was swathing the lower part of the face with cloths dipped in strong vinegar. Some one says, "My grandmother used a gargle of salt and pepper with vinegar for all us children, and she didn't have to go to a sanitary club to learn it." True, no doubt, a timely though utterly empirical use of that gargle has saved many lives.—St. Louis

with combat for the man naturally brave. A western officer of established reputation once said to me while speaking of a personal difficulty into which he had been forced: "I hadn't been in anything of that sort for years, and I wished I was out of it. Then I said to myself, 'Is it true that you are getting old and have lost your nerve?' Then all at once the old feeling came over me, and I was just like I used to be. I felt calm and happy, and I laughed after that. I jerked my gun and shoved it into his stomach. He put up his hands and apologized. 'I will give you a hundred dollars now,' he said, 'if you will tell me where you got that gun.' I suppose I was a trifle quick for him."

Roof Dogs of New York.

There are dogs in New York that never set foot on the street. They belong to the janitors in the downtown buildings, and their runways consist of the roofs of the buildings in which their owners live and adjoining roofs on the same level. That is a rare day when the office worker on looking out of the sixteenth story window does not see half a dozen dogs romping about upon the roofs beneath him. There is one advantage at least in being a roof dog—the dog catcher has no terrors for him.

LIVING TOO HASTILY CANADIAN WOMEN BREAK DOWN

Irregularities and Female Derangements Result—Cured by Lydia E. Pinkham's Vegetable Compound.

Owing to our mode and manner of living, and the nervous haste of every woman to accomplish just so much each day, it is said that there is not

one woman in twenty-five but what suffers with some derangement of the female organism, and this is the secret of so many unhappy homes.

No woman can be amiable, light-hearted and happy, a joy to her husband and children, and perform the duties incumbent upon her, when she is suffering with backache, headache, nervousness, sleeplessness, bearing-down pains, displacement of the womb, spinal weakness or ovarian troubles.

Irritability and snappy retorts take the place of pleasantness, and all sunshine is driven out of the home, and lives are wrecked by woman's great enemy—womb trouble.

Read this letter:

Dear Mrs. Pinkham:—

"I suffered for four years with what the doctors called inflammation of the fallopian tubes, which is a most distressing female disease, undermining the constitution and sapping the life forces. If you had seen me a year ago when I had begun taking Lydia E. Pinkham's Vegetable Compound, and had noticed the sunken eyes, sallow complexion and general emaciated condition, and compared that person with me as I am to-day, robust, hearty and well, you would not wonder that I feel thankful to you and your wonderful medicine which restored me to new life and health in five months. My friends all marvel at the change it has made in me, but none can appreciate it better than I can myself."—Miss Irene Hapgood, 1023 Sandwich St., Windsor, Ont.

At the first indication of ill health, such as painful or irregular menstruation, secure at once a bottle of Lydia E. Pinkham's Vegetable Compound and begin its use.

MR. E. J. B. PENSE CARRIES KINGSTON.

Kingston, Jan. 29.—After one of the most remarkable political campaigns ever waged in Kingston Edward J. B. Pense, the unseated Liberal member in the Ontario House, succeed to-day in again defeating D. M. McIntyre, Conservative, and winning a bye-election against the Whitney Government. The total vote was:—Pense, 2,097; McIntyre, 2,063. This is a total of 4,160, or 300 less than was polled in the general election a year ago. As the registered vote was over 300 less than last time it is an evidence that a pretty full vote was polled, notwithstanding that no vehicles were hired, and that whatever money was in evidence was of decidedly small dimensions. Most of the cabmen drove for Mr. Pense on their own account, but were in nowise connected with his workers. Likewise there were nine livery vehicles in the contest for Mr. McIntyre. The vote by wards follows:—

	McIntyre.	Pense.
Sydenham	153	221
Ontario	138	136
St. Lawrence	82	100
Cataraqui	334	358
Frontenac	428	432
Rideau	544	511
Victoria	295	272
Portsmouth	89	67

Totals 2,063 2,097

Ballots Were Numbered.

Last January Mr. Pense's majority was twenty, so that there is an increase of fourteen. As far as can be determined there were not a great many cases of bribery. None have yet been reported against the Liberals, but there are a few against McIntyre's supporters. Strange to say, the ballots were numbered, despite the declaration of Mr. Whitney's Ministers that the ballot was to be henceforth secret. In the morning the Liberal scrutineers in several booths complained of deputies putting the initials right under the number on the ballot, contrary to instructions from Returning Officer Dawson. The latter made a tour of the booths and had matters righted, threatening to close one place if his orders were not carried out.

Concerning the result, Mr. McIntyre had little to say, except that his side had carried out the purity agreement to the letter. He did not know if the Liberals had or not, but if it was found that they had not there would be another protest and a trial in the courts.

Heating and Sanitary Plumbing.
MADOLE & WILSON.

Funny Blanders.

A famous sculpture group recently exhibited in Glasgow represents Adam and Eve after they had left Eden. Eve, in despair, lies at Adam's feet. Through a mistake an intelligent attendant placarded it with this description: "Motherless." At the same exhibition was a sleeping nymph, by a well known sculptor, which by another mistake appeared in the catalogue as "Mrs. —," greatly to the horror of Glasgow. A Sunday school boy recently gave this account of the prophet Elijah: "Elijah, the prophet, was carried into heaven by a whirlwind, and the children stood up and cried: 'Go up, thou baldhead! Go up, thou baldhead!' And before he went up he divided the Red sea."

He Saw the Joke.

"One day," says an American, "I walked into a bookshop in the Strand and asked for Hare's 'Walks in London.' In America the book is sold in one thick volume. The clerk brought

CENTREVILLE.

Our community was shocked on Tuesday morning to learn of the sudden death of Mr. John Hinch, our esteemed citizen and Township Clerk for so many years.

Mr. John Lyons was in Napanee on Tuesday.

Mr. Edward Lyons, who has been on the sick list for a number of weeks is improving nicely.

Mr. Geo. McFarlane, who is in Kingston General Hospital suffering from blood poisoning in his arm is improving. Mrs. McFarlane spent last week at his bedside in the Hospital.

Nickle plated tea and coffee pots, trays &c. at MADOLE & WILSON.

STELLA.

Was there ever such unseasonable weather? Mud! Mud! Mud! was there too many complaints made about the "old fashioned winter" a year ago? If we are not to have ice, then we must have a boat to come to our rescue. Even though there is no danger of our supplies giving out a change of scenery would be delightful and Kingston would gladly welcome us we know.

An old resident of Emerald passed away last week in the person of Mr. W. Howard. Mr. Edward Fleming, of Chatham, has returned home after spending a few weeks with his mother.

Mr. G. Allen, Winnipeg after an absence of 25 years, is spending the winter with his mother, Mrs. D. Caughey.

Mr. Alfred Willard is kept busy with his boat taking crists over the bay.

Miss Lydia Asselstine of Trenton is engaged in S. S. No. 5, and Mr. F. Scott of Napanee, in S. S. No. 4.

The many friends of Mr. R. McKenzie, of Kingston, are pleased to know that he was able to return home from Pittsfield, Mass., where he has lain ill of typhoid fever for nearly three months.

Fancy Dishes Given Away.

If you buy your groceries from us. We give coupons on dishes free. Call and see them at GREY LION GROCERY.

RUNNING THE GANTLET.

This Punishment Was Once Used For Military Discipline.

The following extracts give information concerning the punishment of "running the gantlet:—"

"In running the gantlope the regiment was formed six deep, and the ranks opened and faced inward. Each man being furnished with a switch, the offender, naked to the waist, was led through the ranks, preceded by a sergeant, the point of whose reversed halbert was presented to his breast to prevent his running too fast. As he thus passed through the ranks every soldier gave him a stroke."—Grose's "Military Antiquities," volume 2, page 108.

But the oldest notice I have seen is given in "Monro—His Expedition With the Worthy Scots Regiment (called Mackeyes Regiment), Levied in August, 1626, Etc. London. Printed by William Jones in Red-Crosse Street, 1637."

"Other slight punishments we enjoyed for slight faults, put in execution by their camarades, as the loupe-garthe (running the gantlet; Swedish gantulopp, to run through a hedge made by soldiers), when a soldier is stripped naked above the waste and is made to runne a furlong betwixt 200 souldiers ranged alike opposite to others, leaving a space in the midst for the souldier to runne through, where his camarades whip him with small rods ordained and cut for the purpose by the Gavilliger (provost marshal), and all to keepe good order and discipline."—London Notes and Queries.

WEDDING SPEECHES.

A VENERABLE PASTOR CURED BY PE-RU-NA.

Old People Are Especially Liable to Catarrh.

Pe-ru-na is a Tonic Especially Adapted to These Cases.

REV. J. N. PARKER.

Rev. J. N. Parker, Utica, N. Y., writes: "In June, 1901, I lost my sense of hearing entirely. My hearing had been somewhat impaired for several years, but not so much affected but that I could hold converse with my friends; but in June, 1901, my sense of hearing left me so that I could hear no sound whatever. I was also troubled with rheumatic pains in my limbs.

"I commenced taking Peruna and now my hearing is restored as good as it was prior to June, 1901. My rheumatic pains are all gone.

I cannot speak too highly of Peruna, and now when eighty-eight years old can say it has invigorated my whole system.

"I cannot but think, dear Doctor, that you must feel very thankful to the All-loving Father that you have been permitted to live, and by your skill be such a blessing as you have been to suffering humanity."—J. N. Parker.

In old age the mucous membranes become thickened and partly lose their function. Peruna corrects all this by its specific operation on all the mucous membranes of the body.

Strong and Vigorous At the Age of Eighty-eight Years.

Rev. Chas. Leander.

A Pleasure to Endorse Pe-ru-na. Rev. Chas. Leander, pastor First Spiritual Society of San Francisco, writes from 311 Turk street, San Francisco, Cal., as follows:

"It is with pleasure that I give my endorsement of Peruna. My experience has been very satisfactory from its use, and I do firmly believe that it is the best known remedy for catarrh in all its different forms."—Chas. Leander.

No other physician in the world has received such a volume of enthusiastic letters of thanks as Dr. Hartman for Peruna.

PARISH REGISTERS.

The Sort of Entries They Kept In the Old Days In England.

A vicar, John Printer of Worle, is accused in 1584 of having got so drunk "at a Taverne in London, being the howse and signe of the Swann in old Pysh Street," that he had to be "caried to his Lodginge, or some other convenient place, (he) being so dronck, not habile hym-self to goo"—that is, walk. He is also charged with being "a common player at Bowles in the churchyard of Worle (his own parish) and a common haunter of Tavernes, alehouses, Bearbeatinge (baiting) and Bul-beatinge, yea, upon the Sabbath daies, and an usual plaier at Tables (backgammon) & Cardes in the alehouses and Tavernes."

On Sept. 25, 1621, John Brock of Dundry is presented.

"For usuallie playing of the fynes

THE CALM BAD MAN.

He Is More Dangerous Than the One Who Blusters.

The bad man of genuine sort rarely looked the part assigned to him in the popular imagination. The long haired blusterer, adorned with a dialect that never was spoken, serves very well in eastern fiction about the west, but that is not the real thing. The most dangerous man was apt to be quiet and smooth spoken. When an antagonist blustered and threatened, the most dangerous bad man only felt rising in his own soul, keen and stern, that strange exultation which often comes with combat for the man naturally brave. A western officer of established reputation once said to me while speaking of a personal difficulty into which he had been forced: "I hadn't been in anything of that sort for years, and I wished I was out of it. Then I said to

THE CALM BAD MAN.

He Is More Dangerous Than the One Who Murders.

The bad man of gentle sort rarely looked the part assigned to him in the popular imagination. The long haired blusterer, adorned with a dialect that never was spoken, serves very well in eastern fiction about the west, but that is not the real thing. The most dangerous man was apt to be quiet and smooth spoken. When an antagonist blustered and threatened, the most dangerous bad man only felt rising in his own soul, keen and stern, that strange exultation which often comes with combat for the man naturally brave. A western officer of established reputation once said to me while speaking of a personal difficulty into which he had been forced: "I hadn't been in anything of that sort for years, and I wished I was out of it. Then I said to

to explain.
"But, dearest, she only overtook me on my way to town." It was not

that she had gone too far this time—that she could never make it up with Jim now she had been a fool.

Ayer's Pills

Keep saying it, over and over again. Ayer's Pills. Ayer's Pills. Ayer's Pills. The best liver pills ever made. They cure constipation, indigestion, biliousness, sick-headache. All vegetable, sugar-coated, mildly laxative. We have no secrets! We publish the formulas of all our medicines. J. C. Ayer & Co., Lowell, Mass.

DR. HENNEQUIN'S INFANT TABLETS

Mrs. R. J. Ego, Ardree, Ont., Says:
"When baby was seven months old she got very ill with indigestion and constipation, and kept getting worse, until doctors had no hopes for her recovery. All medicines failed to have any effect. We received a sample package of Hennequin's Infant Tablets. I had not much faith in them, as I had tried so much, but concluded to try them. We gave her one-half one Tablet, and that day we noticed a change for the better. I at once sent for a box; we used them, and the results are most astonishing. We used five boxes, and baby has been a well child for some months, and is fat, hardy and cheerful. I do not feel safe without them. I cannot speak too highly of what I know has saved my baby's life, and I wish all mother's whose babies suffer as mine was, to try them. Enclosed please find \$1 and for which please mail to my address 5 packages."

DR. HENNEQUIN'S INFANT TABLETS.
Destroy worms, assimilate the food, regulate the bowels, sweeten the stomach, procure healthy and natural sleep, relieve teething trouble, allay feverishness, cure indigestion, diarrhoea, constipation, colic, etc. stop waking in the sleep and frightened awakening from sleep, cure fits, etc. Beyond price for children affected with weak health. Dr. Hennequin's Infant Tablets do not contain morphine, opium, or other narcotic properties. 25c per package—postpaid to any address. Send us \$1 for 5 boxes and if, after using part or all of one box, you wish your dollar back, you can have it by mailing us the remaining four boxes. We cannot be responsible for money unless sent by P. O. Order, Money Order, or Registered Letter.

and crush her. He would make for his stall before her, and her head swam. Jim—she wanted to call his name, but could not. He would have saved her, she thought.

Against the closed door stood a brimming pail of cold water. As Prince stopped with a jerk that threw Marion from her seat Jim Bradley came quietly up. She was hanging by all her skirts, that had caught on the pommel. Only a quick hand and a steady one could have disengaged her as he did. He drew her into the shade and held her close.

She opened her eyes and looked up into his white face. It was like heaven to her.

"Jim!" she said. "Jim!"

"Are you hurt—are you hurt? Marlon, are you all right?" She drew a long breath, stood up and walked a step to show him she was uninjured. Then she went close to him and put her hands on his shoulders. Her face was very serious.

"Jim," she said, "I have changed my mind." He saw a queer little light in her eyes and was wary.

"About what—Prince?"

"About you. Couldn't you—ask me if I—love you? I think that I wouldn't have to lie to say—yes." Jim tried to get hold of her, but she held off.

"I want to tell you what I think of myself. Don't you speak. I am a horrid little—beast. Yes, I did say 'beast.' Will you—take me back?" Jim thought he would.

Thackeray's Disfigured Nose.

That George Venables, Thackeray's schoolmate, was not entirely responsible for the novelist's disfigured nose is to be gathered from the autobiography of Sir Wemyss Reid. On one occasion, when both Venables and Reid were visiting Lord Houghton, Reid bluntly asked his fellow guest who broke Thackeray's nose.

"It was winter, and we were walking in Indian file through the woods. As I put this question to Venables he suddenly stopped and, turning around, glared at me in a manner that instantly revealed the terrible truth to my alarmed intelligence. He continued to glare for several seconds, and then, apparently perceiving nothing but innocent confusion, not unmixed with alarm, on my face, his features became relaxed into a more amiable expression. 'Did anybody tell you,' he said slowly and with solemn emphasis, 'to ask me that question?' I could truthfully say that nobody had done so. My answer seemed to mollify Venables at once. 'Then, if nobody put you up to asking that question, I don't mind answering it. It was I who broke Thackeray's nose. We were only little boys at the time and quarreled over something and had the usual fight. It wasn't my fault that he was disfigured for life. It was all the fault of some wretched doctor. Nowadays a boy's nose can be mended so that nobody can see that it has ever been broken. Let me tell you,' he continued, 'that Thackeray never showed me any ill will for the harm I had done him, and I do not believe he felt any.'"

As to Heroes.

No man who is polite to his family only when company is present can hope to be a hero to his son.—Chicago Record-Herald.

An Awful Stab.

"And you call this chair unique? Why, it isn't any older than I am!" "Well, ma'am, that may be, but it's antique, all right."

Exaggerated.

A publisher advertises: "The Wives of Henry VIII.' Third thousand." Surely there is some exaggeration here.—Punch.

THE ODD LITTLE GECKO.

A Queer Animal That Lives In Africa and Southern Europe.

The gecko is an odd little creature. His name is seldom heard, and his form is seldom seen, for he lives in Africa and the southern countries of Europe.

This little gecko has so many strange ways and there is something so uncanny in his appearance that the people of the countries where he lives are rather afraid of him, believing his bite to be poisonous, although this is denied by naturalists.

He is a little creature, with a broad, flat head, like a snake, and a long body, with a narrow tail, with odd shaped bits of skin arranged like scales along the sides of it. He has short legs and queer, catlike claws, which enable him to easily climb the old walls and rocks upon which he lives, catching the insects of various sorts which make his dinner.

He is a nocturnal animal, walking abroad at night and sleeping in the daytime. He moves with sudden rushes and without any noise whatever. His odd name was given him from the queer noise he makes, which is something like the noise you would make to start a horse with. The male gecko is of a gray color, so near the shade of the old walls and rocks among which he makes his home that he can barely be seen.

Chinese Children.

The education of their children is a matter of no small interest to the affectionate Chinese mothers. They watch the little one from the day he is born, to note superstitious signs. Let him cry lustily, and he will live long, say the old grannies. If he teeths or walks too soon he will grow up unlovable in disposition. At first the little Chinese are not very attractive objects, presenting rather a scaly appearance, due to the custom of not washing them lest they catch cold. A month after his birth the boy's head is shaved. A great feast is prepared and celebrated, the child now receiving his "milk name." When he enters school his name is changed, as it is once more when he receives his degree.—Pilgrim.

A Good Beginning.

Smythe—I intend Harry for the bar. Would you advise his beginning on such old works as Coke and Blackstone? Tompkins—No. I would begin by grounding him even further back Smythe—Indeed! In what? Tompkins—The Ten Commandments.

Division of Profits.

Litigant—You take nine-tenths of the judgment? Outrageous! Lawyer—I furnished all the skill and eloquence and legal learning for your cause. Litigant—But I furnished the cause. Lawyer—Oh, anybody could do that!

A Reflection.

Mother—Well, what is it? Tommy—How lucky pumpkin pie ain't made like doughnuts, with a hole in the middle!

FIT'S CURED

If you, your friends or relatives suffer with Fits, Epilepsy, St. Vitus' Dance, or Falling Sickness, write for a trial bottle and valuable treatise on such diseases to THE LEBIG'S, 179 King Street, W., Toronto, Canada. All druggists sell or can obtain for you.

LEBIG'S FIT CURE

For a **HEALTHFUL** and **DELICIOUS** DRINK

—USE—

"SALADA"

Ceylon NATURAL GREEN Tea. It is the ideal standard of purity.

IN LEAD PACKETS ONLY, 40c, 50c, and 60c per lb AT ALL GROCERS.

HIGHEST AWARD ST. LOUIS, 1904.

FORGETFUL PASSENGERS.

During the past year 52,131 articles were found in public carriages in London. They included 22,602 umbrellas, 3,968 purses, and 3,865 bags. Among the property were many bank notes, cases of jewellery, a rabbit, a pigeon, a cat and a dog.

BABY'S HEALTH.

"When a child is well, give it no medicine," is a wholesome adage. But at the first sign of trouble the careful mother will give Baby's Own Tablets, which promptly cure indigestion, colic, constipation, diarrhoea, simple fevers and teething troubles. They contain no opiate or poisonous "soothing" stuff, yet they give refreshing sleep because they remove the cause of sleeplessness and the child awakens bright and well. Mrs. F. McIntosh, Wabigoon, Ont., says: "Baby's Own Tablets wrought a wonderful change in my little one. When he was two months old he began to fail and cried almost night and day. But after giving him the tablets he grew well and is now a bright, laughing baby, who scarcely ever gives any trouble. The Tablets are surely a blessing to both mother and child." All druggists sell these Tablets or you can get them by mail at 25 cents a box by writing the Dr. Williams' Medicine Co., Brockville, Ont.

AMAZING.

"Just think, children," said the Sunday school teacher, "all this happened more than 3,000 years ago!"

"Gee," exclaimed a small boy in an audible whisper, "but she's got a good memory!"

Comfort by day and sound sleep by night follow the use of Weaver's Cerate, for skin troubles, no matter how tormenting they be. This ointment soothes and cleanses.

Jasper—"I say, old chap, can you lend me a fiver?" Jumpuppe—"What! Are you broke again?" Jasper—"Oh, no; this is the same old fracture!"

Death Comes to All.—But it need not come prematurely if proper precautions are taken. "An ounce of prevention is worth a pound of cure," and to have prevention at hand and allow a disease to work its will is wickedness. Dr. Thomas' Electric Oil not only allays pains when applied externally, but will prevent lung troubles resulting from colds and coughs. Try it and be convinced.

Use not to-day what to-morrow may want; neither leave that to hazard which foresight may provide for or care prevent.

A Naggling Cough drives sleep and comfort away. Allen's Lung Balm relieves hard breathing, pain in the chest and irritation of the throat. Give it freely to the children.

The poorest people on earth are those who make the most of what they have and the least of what they are.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way.

ELEPHANT-HUNTING IN CEYLON.

Every two or three years there is an elephant "kraal" in Ceylon, when 50 or 100 of the huge beasts are made prisoners. In 1902 no less than 104 elephants were captured in a kraal near Kurenegala, the greatest number of captives recorded at any one time since 1846. Another method of capture is by placing in the paths taken by the animals running nooses composed of ropes of antelope hide, having one end fastened to a tree. By raising a sudden alarm, the natives try to scatter a herd of elephants and in their flight some of the animals are sure to get caught by the nooses. The captives are imprisoned behind strong palisades, and held for sale. The hunters are not infrequently killed or terribly hurt, and they enjoy special distinction, under the name of "pannikans." A skilful pannikan is as much admired in Ceylon as a successful matador is in Spain.

GOOD HEALTH.

Requires That the Blood be Kept Rich and Pure.

The secret of health—the secret of life itself—is good blood. Therefore a medicine that makes new blood and supplies the necessary material for rapidly rebuilding wasted nerve tissues, reaches the root of most of the serious diseases. For this purpose there is no medicine can take the place of Dr. Williams' Pink Pills.

They actually make new, rich, red blood, and through this new blood cure such diseases as anaemia, neuralgia, rheumatism, the special ailments of women, indigestion, heart troubles, St. Vitus dance, locomotor ataxia and partial paralysis. You can find evidence of the value of these pills in every part of the country, among others Mr. D. W. Daley, Crystal City, Man., says: "I have used Dr. Williams' Pink Pills with wonderful success. My blood was very poor, I was weak and nervous, suffered much from heart trouble, and was scarcely fit for work. I used nine boxes of the pills, and the result is I am again enjoying the best of health. I do not think there is any medicine can equal Dr. Williams' Pink Pills when the system is run down."

But you must get the genuine pills with the full name, "Dr. Williams' Pink Pills for Pale People," printed on the wrapper around each box. Ask your druggist for these pills or get them by mail from the Dr. Williams' Medicine Co., at 50 cents a box, or six boxes for \$2.50.

MOST INGENIOUS CLOCK

RESULT OF FIVE YEAR'S WORK OF A GERMAN MECHANIC.

Exhibits the Great Gifts and the Wonderful Perseverance of its Maker.

THE HEIR OF SANTLEIGH

OR

THE STEWARD'S SON

CHAPTER XXXI.

A quarter of an hour later Guildford Berton was walking towards his cottage. He was burning hot, as if with fever, and he took off his hat and let the cold evening air blow upon his parched forehead.

The love of a bad man, we are told by one of those philosophers who seem to know everything, is very near akin to hate, and at that moment Guildford Berton was not quite sure whether he loved or hated Norah most.

But he meant to make her his wife as firmly as he had ever meant it.

He could scarcely say that he was surprised or disappointed by her refusal. He had not gone so far as to hope that she would accept him, and it was something that he had, so to speak, broken the ground.

"She knows now that I love her," he muttered, as he walked along with feverish steps and restless eyes. "She will grow accustomed to the knowledge presently, and—in time will discover that it is useless to fight against it. It is a question of will, and mine is stronger than hers. If I had only kept my temper more under control! But that look on her face and that 'Go!' it was worse"—he wiped his forehead and laughed a ghastly laugh—"it was worse than the old man's on the night he was taken ill. I wonder if he heard and understood what we were saying?" and he laughed again. "If he did, I have had my revenge already. But I must be careful. My luck has stood by me up till lately, up to the night I showed the old fool my hand. Is it going to turn?"

As he asked himself the question he reached the gate in the wall, and took out his key.

He had not deemed it necessary to acquaint the old woman of his intended return, and as he opened the door and entered the silent and gloomy house she came out with a lamp in her hand, and eyed him with dull and stolid surprise. "Is it all right?" he motioned on his fingers.

"Yes," she sighed. "And no one has been here?" he asked. "No," she answered; "no one."

He nodded and signed to her that she could go to bed, and then, taking the lamp from her, went into the small sitting-room.

He had no sooner done so than back flashed upon his mind the remembrance of—Becca South!

He had been so engrossed of late by his pursuit of Norah that he had almost forgotten the other awful thing which had haunted him, but now here it was back again in all its potent horror.

He set the lamp upon the table and looked around the room with a shiver. It struck cold and damp, and it was full of the terrible scene of the night of his crime. He buttoned his coat across his chest, and going to the sideboard, got out some brandy and mixed himself a drink, but even the powerful spirit could not dispel the chill which had so swiftly taken the place of the feverish heat in which he had left the Court, and he struck a match and lit the fire ready made in the small and poky grate. But the wood was damp, and the grate would not draw, and presently the tiny, sullen flame died out.

He knew that if he went to bed cold and chilled he should not sleep, and he lit the lantern to light him to the woodshed.

But when he reached the garden he

felt a stifled oath, he moved forward on tip-toe, and softly pushed the door more widely open and peered round it.

Then he fell back and clutched the pistol tightly, for it was not the bent, decrepit figure of the old woman he saw within the room, but that of a man.

Now, Guildford Berton was not altogether a coward, and the shock to his over-strained nerves, weakened by the copious draughts of spirits, could not be set down entirely to fear.

After a moment or two he collected himself, and peered around the door again, and this time the start that followed was one of recognition.

A man was kneeling beside the table prying open a desk with a clasp knife, and by the light which fell from an ordinary candle stuck into a piece of wood Guildford Berton saw that the thief was the man with the rugged face and bushy eyebrows who had lain on the bench outside the inn on the day he had been making inquiries into Becca South's disappearance.

Guildford Berton drew back and pondered, clutching the pistol hard and fast, and holding his breath.

That the man was a thief or an ordinary housebreaker he had no doubt, but he was puzzled to account for his presence there. No burglar worthy of his salt, he thought, would break into so mean and unpromising a place as the cottage, unless he were sure of finding valuables, and it was not likely that any burglar would imagine that a sensible man would trust his money or jewels to a crazy old desk.

Why he had broken into the cottage to-night of all nights—the night of the owner's return—when he might have done so during that owner's absence?

He could find no solution to the enigma. Suddenly the suspicion swept over him like a breath of ice that the man had come to find out something about—about Becca South, and the sweat broke out upon his forehead.

But he thrust the suspicion from him. Even if he had done so he would not have taken the trouble to break open a desk. What was there in it? He tried to think, but could remember nothing but some papers, of no importance, referring to business of the estates, which he had flung in carelessly from time to time. There was absolutely nothing there which could repay any burglar, however hard up, for his trouble.

By this time—a period of only a few minutes had elapsed—the man Furlong, for it was he, had opened the desk, and was turning over the contents. They were, as has been stated, papers of no interest to any one, least of all to a stranger but suddenly Guildford Berton saw the man start, and, catching up something—a piece of cardboard it looked like—hold it near the candle.

Whatever it was he seemed absorbed in it, and Berton seized the auspicious moment, and quietly slid round the door and presented the pistol at the man's head.

"Move a step and I fire," he said.

The man raised his head and did not move, but his hand slid into the pocket of his coat, and remained there as he said, quietly and slowly.

"Don't fire, Mr. Berton. I've got you covered by a revolver in my pocket, and I'm a dead shot."

The next instant he had whipped out a revolver and presented it at Guildford Berton.

"Now," he said, deliberately as before, "we are on all fours, and I fancy my weapon is rather a better one than that

The poorest people on earth are those who make the most of what they have and the least of what they are.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

She—"Mr. Richo says very bitter things about those lazy sons of his, but his wife is always making excuses for them." He—"Yes, she makes excuses, but he has to make allowances for them; that's what angers him."

A Sour Stomach and a Sour Temper travel hand-in-hand and are the precursors of mental and physical wreck. Nine hundred and ninety-nine times in a thousand food ferment (indigestion) is the cause. Dr. Von Stan's Pineapple Tablets keep the stomach sweet—and digestion—keep the nerve centres well balanced—they're nature's panacea—pleasant and harmless. 35 cents.—88

Gracey—"I wouldn't marry him if I were you." Gladys—"Why not?" Gracey—"He has such ugly ways." Gladys—"True. But he also has such handsome means!"

They Drive Pimples Away—face covered with pimples is unsightly. It tells of internal irregularities which should long since have been corrected. The liver and the kidneys are not performing their functions in the healthy way they should, and these pimples are to let you know that the blood protests. Parmelee's Vegetable Pills will drive them all away, and will leave the skin clear and clean. Try them, and there will be another witness to their excellence.

Judge—You are charged with profanity. Prisoner—I am not. Judge—You are, sir. What do you mean? Prisoner—I was, but I got rid of it.

The Wretched Condition of thousands is due to the fact that they neglect the simplest care of their health. When in this condition "Ferroin" will build you up and give you strength.

Bert—"A friend of mine tells me you called me a donkey the other day." Fred—"Yes, I believe I did." "Well, I think you ought to apologize." "So do I." "Then why don't you?" "Oh, don't worry yourself. I'll apologize the first time I meet a donkey."

Eighty Years Old—Catarrh Fifty Years. Dr. Agnew's Catarrhal Powder cures him. Want any stronger evidence of the power of this wonderful remedy over this universal disease? Want the truth of the case confirmed? Write George Lewis, Shamokin, Pa. He says: "I look upon my cure as a miracle. It relieves in ten minutes.—89

"We think they will make a great politician." "Why?" "Well, he crawls out of everything so easily."

Have you tried Holloway's Corn Cure? It has no equal for removing these troublesome excrescences as many have testified who have tried it.

"You've made a mistake in your paper," said an indignant man, entering the editorial sanctum of a daily journal. "I was one of the competitors of that athletic match yesterday, and you have called me 'the well-known light-weight champion.'" "Well, aren't you?" inquired the editor. "No, I'm nothing of the kind, and it's confoundingly awkward because I'm a coal merchant!"

derful Perseverance of Its Maker.

A clock which is in many respects one of the most notable in the world has been constructed, says the Jewelers' Circular Weekly, after five years of hard labor by August Noll, a skilled mechanic of Villingen, one of the old and picturesque cities of the German Schwarzwald and the former capital of the province of Baar, which came into the possession of Baden in 1805. The people of this region are diligent and talented, and the making of clocks has been for 200 years a native industry among them.

These first made were wooden clocks with a sort of balance, and were very simple in construction. Gradually the work grew in perfection and the pendulum took the place of the balance; in still later times came metallic clocks with mainsprings, until now the most elaborate and artistically designed timepieces of every kind are sent all over the world, into the humble dwellings of the middle classes and the palaces of the wealthy.

THE ASTRONOMICAL CLOCK.

finished by August Noll almost surpasses in ingenuity of construction, variety of mechanism and number of figures not only the famous clocks of Prague and Goslar, but even the renowned masterpiece of Isaac Habrecht, the wonder of the Sarsburg Cathedral. It is at present on exhibition in Munich, and it is unlikely that it will ever be permitted to leave that city.

The case, of walnut wood, about 14 feet high, 12 feet wide and 3 feet deep, is fashioned in the form of a church (the early Renaissance style, of harmonious design and pleasing to the aesthetic sense. The calendar mechanism, rollers, chimes, striking works, &c., are arranged to work for 100 years. During the whole century the clock will show not only the seconds, minutes, quarter hours and hours, the days, weeks, months and years, but also the movable festivals of the Christian year. The different days and seasons are introduced by processions of appropriate figures, skillfully carved, accompanied by music, with bugle solos and watchmen's horns, or with cock crow and cuckoo calls.

The centre is occupied by an artistically decorated and illuminated chapel, whose doors open every morning at 9 o'clock, and bring to view a congregation of worshippers, in the Schwarzwald costume, who file past the altar amid the strains of a choral. Once every hour

THE FIGURE OF DEATH

appears at the left side wing, and figures representing the four ages of man pass by him; at the same time the twelve Apostles are seen passing before the figure of Christ in an attitude of blessing. At the right of the portal, above, is an idealized representation of the four seasons, and beneath morning and evening, six Capuchin monks march slowly, to the accompaniment of chimes and the chords of a choral, from their picturesque forest hermitage to the church.

The time is marked on the clock face by the upper part of the central spout, not by ordinary hands, but by figures which spring out at the proper moment and two angels strike the changes on melodious bells. Below, as if in the side aisles of the church, the strong and carefully constructed mechanism is visible in action; at the foot is an astronomical tellurium, and at the gables of the side wings two large faces show the time in Calcutta and New York, as compared with the central European time. The whole structure weighs 5,200 pounds, and is valued at 50,000 marks.

Every time history repeats itself the book agent gets busy.

Peter Wilson, a Falkirk laborer, resorted to a most extraordinary method of revenge upon a Falkirk barman, who refused to give him a penny, which he asked for over the bar. Going outside, he deliberately knocked his head through three large plate-glass windows, and, strange to say, though the windows were completely smashed, the man suffered no injury. He was sent to prison for three months.

ullen flame died out.

He knew that if he went to bed cold and chilled he should not sleep, and he lit the lantern to light him to the woodshed.

But when he reached the garden he turned to the left instead of the right where the shed lay, and slowly went down the path to the heap of leaves.

Holding the lantern near the ground, he peered at the heap keenly and shudderingly.

It was just as he left it, and he seemed to remember the position of every stone and protuberance.

"It is all right," he muttered between his teeth, but he did not go immediately. Instead he stood and stared down as if overcome with a sudden stupor.

Then, with an oath, he pulled himself together, and, resolutely turning his eyes away from the heap, went to the shed and got some wood.

When he got back to the house he felt in his pocket for his matchbox and found it, but suddenly missed his keys.

This staggered him, and he stood staring at the fire vacantly, then he forced a smile.

"I am a fool," he muttered. "I've left them in the gate"

With the lantern in his hand he went down the garden, and found that, as he had thought, he had left the key attached to the bunch, sticking in the keyhole of the wall door.

Cursing himself for his stupidity, he locked the door, and, with the keys in his hand, returned to the parlor.

The fire was burning up, and he drew his chair close and sat huddled up over the blaze, and went over the scene with Norah. But every now and then there came a ghastly pause in his reflections, and in that pause the ghost of his crime stalked across his mind, and made the silence of the cold, damp little room truly hideous.

He got some more brandy at intervals, and at last succeeded in producing the exhaustion which is the ghastly imitation of wholesome sleepiness.

Then he rose, and with a final drink went heavily upstairs.

But, exhausted as he was, he instinctively pulled aside the blind and stared through the window at the heap in the garden, just as he used to do before he left for London; but the night was too dark for him to see anything, and, with an oath, he dropped the blind and began to undress.

"Curse the place and everything in it!" he muttered as he got into bed. "I wish it were burnt down."

Then he succeeded in distracting his mind from the one haunting fear, and forced himself to think of Norah, and so fell into an uneasy, restless doze. He had not been asleep more than an hour when he woke suddenly with the dim consciousness that he had been awakened by some kind of noise.

He sat up and listened, and for a time all was silent, and he was about to throw himself back, when he heard a faint noise, which seemed to come from the room beneath, the room in which Becca had died.

The cold sweat gathered upon his face, and he set shivering and quaking, with his ears strained painfully, trying to persuade himself that it was only fancy. But as he listened with an agonized acuteness he distinctly heard the noise again. It was the sound of footsteps, muffled and cautious of some one moving in the room below.

He got out of bed, and, slipping on some clothes, stole to the door. Then he smiled a ghastly smile of reassurance; the noise no doubt was made by the old woman, who was paying a visit to the sideboard on the chance of his having left the brandy decanter not locked up.

"I'll give the hag a fright," he muttered, and he went to a drawer and took out an old-fashioned pistol, and, loading it with a blank charge, crept, with it in his hand, to the head of the stairs.

All was silent again now, but he knew that he had heard the noise and not merely dreamed that he had done so, and slowly and cautiously he descended the stairs.

Although he was prepared for it, the sight of a thin streak of light coming through the partly open doorway of the sitting-room gave him a start, and, with

in a dead shot. The next instant he had whipped out a revolver and presented it at Guildford Berton.

"Now," he said, deliberately as before, "we are on all fours, and I fancy my weapon is rather a better one than that hore affair of yours. Shake your finger on that trigger, and you are a dead man."

Guildford Berton lowered his pistol, and confronted his adversary with a white face.

"What are you doing here?" Mr. Furlong kept his revolver pointed with deadly precision.

"Put that thing down and keep quiet, and I'll tell you."

Almost mechanically the pistol was laid on the table.

Still keeping the revolver pointed, Furlong took up the pistol and thrust it into his pocket, then he laid his revolver on the table within reach of his hand, and looked at Guildford Berton steadily.

(To be continued.)

The scarcity of good cooks may be due to the overproduction of lady novelists.

Principal—"Well, did you get that money owing by Smith?" Collector—"I'm sorry to say I did not. There were a number of Smiths at that address, all of whom denied being your debtor. One even threw me out." Principal—"That's the one. Call on him again."

Consumption

There is no specific for consumption. Fresh air, exercise, nourishing food and Scott's Emulsion will come pretty near curing it, if there is anything to build on. Millions of people throughout the world are living and in good health on one lung.

From time immemorial the doctors prescribed cod liver oil for consumption. Of course the patient could not take it in its old form, hence it did very little good. They can take

SCOTT'S EMULSION

and tolerate it for a long time. There is no oil, not excepting butter, so easily digested and absorbed by the system as cod liver oil in the form of Scott's Emulsion, and that is the reason it is so helpful in consumption where its use must be continuous.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

FEEDING FACTS

In ordinary feeding the steer consumes about $\frac{3}{4}$ of its ordinary feed; the balance is undigested or wasted.

This undigested balance can be made to give $\frac{1}{2}$ to 1 lb. extra gain per day, and at a profit, by adding the "salt, pepper, and gravy" to its food to make it "tasty."

You like these on your own food; why not the animal.

Like ourselves the animal longs for a "tasty" meal.

It starts the "mouth watering" before eating, and the stomach fills with digestive fluids to thoroughly dissolve the food.

This extra amount of digestive fluid dissolves an extra amount of food. This is where the extra gain comes in.

Clydesdale Stock Food

is the "salt, pepper and gravy" that makes the animal's "mouth water." It is equally good for Horses, Sheep and Hogs.

Nothing injurious in it and can stop feeding it without harmful effects. Human beings can take it with benefit. We take it every day. We know its contents. It is made clean.

If not satisfied your money will be cheerfully refunded by the dealer.

FRESH BREAD FOR JACK TARS.

British Battleships Will Be Furnished With Bakeries.

The various changes in connection with the cooking arrangements of the Royal Navy, announced some months since, are about to materialize.

Not only is the gigantic battleship, the Dreadnought, to be fitted with a bakery in addition to her regular galley, but there is to be an all-round general introduction of "soft tack" into the sea service.

The weevily biscuits of Trafalgar days have long disappeared. Now the khaki-colored, flint-like squares which go by the name of ship's bread are to go also, and Jack is to have hot rolls for breakfast, dinner and supper, whether in harbor or at sea.

Great Britain has lagged considerably behind other sea powers in thus feeding her bluejackets on fresh bread.

As to the quality of the food in the British fleet, the statement in the Blue Book on the health of the navy that 13,000 men were medically treated for indigestion during 1904 awakens certain misgivings. Naval doctors, however, say this is due to the fact that the bluejackets are overfed nowadays.

HE MEANT EVERY WORD HE SAID

EX - REEVE'S RHEUMATISM CURED BY DODD'S KIDNEY PILLS.

Was so Crippled That He Could Hardly Get Around and Could Get no Relief from Doctors or Medicines.

Dresden, Ont., Jan. 22.—(Special).—"Dodd's Kidney Pills cured me of Rheumatism sick and clean." Mr. W. O. Cragg, the well-known merchant and ex-reeve of this place was the speaker and he evidently meant every word he said.

"It was the inflammatory kind of Rheumatism I had, and it crippled me up so that I could hardly get around to do any work in my store. I had the best doctors and everything in the line of medicines I could hear of, but nothing even gave me relief.

"Then I tried Dodd's Kidney Pills and six boxes cured me completely."

Dodd's Kidney Pills cure Rheumatism by curing the Kidneys. Rheumatism is caused by Uric Acid in the blood. If

"Three guineas, madame," said the shop-woman.

Even Sylvia had the grace to look surprised, but only for a moment.

"It's rather a lot," she admitted; "nearly as much as I give for my best ones, but then one has to pay for style."

"That's thirteen pounds, thirteen," I murmured to myself.

Sylvia saw my lips move. "Don't be cross, Stuff, dear," she said, coaxingly; "I'm sure I wasn't long choosing and there's only one more shop I want to go to."

She gathered up her skirts and picked her way daintily through a sea of mud to a huge shop on the other side, which apparently sold every article of apparel a woman could wish for.

When we got inside I was forcibly reminded of the Maze at Hampton Court, and I feel sure that had it not been for the lofty kindness of a passing shopwalker we might have spent many happy hours hunting for the glove counter. Here Sylvia chose huge quantities of gloves, while I gazed around. I noticed a particularly pretty, quiet-looking girl serving a stout old woman, who looked as if she would shortly end her days in apoplexy.

I wondered vaguely what she paid for her Sunday best frock, whether Sylvia, who asked me emphatically by a poke in the back from this point I was brought to

two long triumphed whether she triumphed or not. I reached the glove counter and I would perhaps like to spend the rest of the afternoon in the glove department. I hastily turned and followed her as she sailed with her nose slightly tilted past counters heaped up with silk and chiffon. The sight of some blouses marked nineteen-and-even, however caused her to pause. An eagle-eyed shopwalker hastened up like Mephistopheles to tempt her.

"These are quite a special line, madame," he said in earnest tones. "Straight over from Paris, wonder fully cheap. Or we have another blouse at twenty-seven-and-six, quite unique."

Sylvia hesitated, and was lost, three minutes later she seemed to be surrounded by blouses of every description.

"Of course, madame," said the girl who had been called to serve her, "there's no comparison between this—and she held up the 27-and-six blouse—"and this"—here she held up a blouse with a lot of lace on it.

NORTH-WESTERN FARMS

ON THE Grand Trunk Pacific

I have two sections of land for sale, entire or in part, on line of Grand Trunk Pacific, now under construction just west of Portage la Prairie. Ploughing in the Northwest will begin as early as February. You can sow oats, potatoes and alfalfa on breaking and get big prices from railroad contractors on the spot. Then hire out your teams for railroad grading at \$5 per day. You won't get such a chance for a start another year. Don't waste any time, as there is practically no other land for sale of equal quality in such a situation on such terms and at so low a price. Price \$10.50 per acre, six year terms.

J. L. H. PARSONS,
92 Winchester Street,
Toronto, Ont.

make."

I agreed with her thoroughly and unreservedly; I even went so far as to dissertate upon the speculative-ness of life in general. I think Sylvia was bored, for she suddenly looked at her watch, gave a cry of surprise at the time, and declared that she must hurry home, as they were dining out that night, and the hair-dresser was due at 6.15. I drove her home and then went on to the club. Archie was in the billiard-room playing snooker. I went up to him.

"Don't forget that you are dining out to-night!"

Nurses' Training School

The Lady Stanley Institute, Ottawa

FOUNDED 1890.

Connected with the County of Carleton General Protestant Hospital, the Maternity Hospital, and the Isolation Hospital, Ottawa, offers to women a three years' course of nursing. The work is practical and thorough, and comprises a course in dietetics and massage. The school building is separate from the hospital; it is comfortable and equipped for teaching. This school is registered by the Regents of the University of the State of New York. Correspondence invited.

 "Then I tried Dodd's Kidney Pills and six boxes cured me completely."
 Dodd's Kidney Pills cure Rheumatism by curing the Kidneys. Rheumatism is caused by Uric Acid in the blood. If the Kidneys are right they will strain all the Uric Acid out of the blood and the Rheumatism will go with it.

Contemplating

Not so very long ago it was borne in upon me that man was not made to live alone.

I am a bachelor, my age 32, my income £600 a year. Six hundred a year for a man with simple tastes is comparative affluence.

I cannot recollect what it was that suggested matrimony to me, but I know that the idea was definitely connected in my mind with a very pretty and charming friend of Sylvia. Sylvia is my favorite cousin; she has been married for two years, and I have always considered her husband Archie one of the luckiest men I know.

Work at the office being slack one day lately, I called on her early in the afternoon with some vague idea at the back of my head that her pretty friend might be there; also it was eminently politic to stand in with Sylvia.

The pretty friend was not there, and Sylvia was on the verge of going out. Her face, however, brightened considerably at the sight of me and she exclaimed in benevolent accents:

"I've got some shopping that must be done this afternoon, and you may come and help me, Stuffy, dear."

I may here mention that my real name is Christopher, but Sylvia insists on giving me a nickname—once ridiculous and unpleasant. However, as she uses it only in private, I submit.

"Will it take long?" I asked, meekly.

"Oh, no," was her airy reply as she hailed a passing hansom; "about half an hour or so."

"Half an hour!" I smile hysterically when I think of it.

We got out at a tailor's half way up Bond street; Sylvia explained that she wished to order a coat and skirt.

"And you must help me to choose it, for you have such good taste!" I was once incautious enough to admire a gown that she had designed herself.

The tailor, who possessed the true Napoleonic temperament, combined with a Jewish exterior, had a long discussion with her as to the gown, the cloth, the shape, the trimmings. Once or twice Sylvia appealed to me in the matter of color, but even then my advice was ignored. Altogether we spent an hour and a quarter in the shop; it was a quarter past four when we emerged.

"He's charging me only ten guineas for it," she announced, triumphantly; "and Millicent had to pay twelve for her last gown from him." Millicent is her pretty friend.

"Will it be something very special?" I asked, flatteringly. For five guineas I reflected, I could get a capital lounge suit at my tailor's.

"Oh, no," was her reply. "Quite simple. He charges seventeen and eighteen guineas for a dressy gown."

At this point we entered a hat shop and I commenced a startled speculation as to how many frocks at seventeen guineas Millicent would require a year.

In the matter of the hat, Sylvia declared I was invaluable. I think I may say without undue pride that I am good at spotting pretty hats. It was very simple, but Sylvia looked delicious in it.

"Of course, madame," said the girl who had been called to serve her, "there's no comparison between this"—and she held up the 27-and-six blouse—"and this"—here she held up a blouse with a lot of lace on it marked 42-and-nine.

"That's very much like one Millicent got here the other day," said Sylvia; adding, in mysterious tones, "She paid 45-and-six for hers, though!"

"If you'd care to pay six shillings more," went on the temptress, "I can give you a blouse smart enough for any occasion." Here she brought forth what might be described as a "dreamy creation," and Sylvia gave a gasp of joy.

"That's lovely," she cried, "and just the color I want. I don't think I can resist that," and she appealed to me. "Isn't it too beautiful?"

"You have a good many blouses," I said with an effort at severity. I remembered that only the day before Archie had confided to me that he would have to go in for a cheaper brand of cigar.

Sylvia looked at me coldly. "Their sleeves are all old-fashioned," was her brief reply; and, turning to the girl, "Yes, I'll have that. Will you enter it on my account, please?"

Before we got out of the shop she ordered a silk petticoat and a waist-belt; and by this time it was a quarter past five. I took her firmly by the arm and led her into the Piccadilly tearooms opposite.

"Blouse about £3, that makes £16; petticoat 25 and six, £17 five and six. Let me see, what were the gloves?"

"Oh, Stuffy, how you do mutter!" exclaimed Sylvia irritably, as she ordered a plate of eclairs; "I can't think what is the matter with you to-day. Are you composing poetry or something?"

"Did you get some nice gloves?" I asked carelessly.

"Oh, yes, all right. I always get the same kind, three and six a pair, and a dozen pairs at a time. Millicent put me up to that; it's such a bother if you run short."

"Nineteen pounds seven and six!" I ejaculated.

"I know!" cried Sylvia, accusingly; "you're betting or speculating, or something horrid."

"Not betting," I assured her. "I did think of a little speculation."

"Don't!" said Sylvia firmly. "It's the greatest mistake for a man to

THE LITTLE WIDOW.

A Mighty Good Sort of Neighbor to Have.

"A little widow, a neighbor of mine, persuaded me to try Grape-Nuts when my stomach was so weak that it would not retain food of any other kind," writes a grateful woman, from San Bernardino Co., Cal.

"I had been ill and confined to my bed with fever and nervous prostration for three long months after the birth of my second boy. We were in despair until the little widow's advice brought relief."

"I liked Grape-Nuts food from the beginning, and in an incredibly short time it gave me such strength that I was able to leave my bed and enjoy my three good meals a day. In two months my weight increased from 95 to 113 pounds, my nerves had steadied down and I felt ready for anything. My neighbors were amazed to see me gain so rapidly and still more so when they heard that Grape-Nuts alone had brought the change."

"My four-year-old boy had eczema, very bad, last spring and lost his appetite entirely, which made him cross and peevish. I put him on a diet of Grape-Nuts, which he relished at once. He improved from the beginning, the eczema disappeared and now he is fat and rosy, with a delightfully soft, clear skin. The Grape-Nuts diet did it. I will willingly answer all inquiries." Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the little book, "The Road to Wellville," in pkgs.

her home and then went on to the club. Archie was in the billiard-room playing snooker. I went up to him.

"Don't forget that you are dining out to-night!"

"By jove, I had forgotten," he exclaimed. "Been round to see Sylvia, then?"

"I have spent the entire afternoon shopping with her," was my reply, as I sank into a comfortable chair and lighted a cigar, one of the brand that Archie contemplated renouncing.

He said nothing, but I noticed that a sudden gloom had fallen on him, and a few minutes later he left the club.—London Mail.

COSSACKS AND EX-PRISONERS

Trains Blown Up and Precipitated into the River.

NEARLY 3,000 CASUALTIES.

A despatch from Tokio says: Russians at Nagasaki have received a despatch sent from Vladivostok last Thursday, saying that from 9 o'clock Wednesday night a sanguinary conflict had been waged between Cossacks and ex-prisoners from Japan. The wounded were estimated to number 1,500. One-third of them were taken to the hospitals, but the rest were allowed to remain on the streets, which were covered with snow. The weather was bitterly cold. Fearful scenes were witnessed. A train has been long overdue from Harbin. Some trains have been blown up by the rioters and precipitated into the river. There have been nearly 3,000 casualties in these outrages.

MANY STATIONS BURNED.

A despatch from St. Petersburg says: According to trustworthy messages received here, the mutineers still dominate Vladivostok.

The population along the Siberian Railroad are starving. The riotous returning troops have commandeered all the rolling stock and plundered and burned many stations. Telegrams from many districts show that the gravest fears are entertained of a general uprising of the peasantry in the Spring.

NUNS WITH BOMBS.

A despatch to the London Times from St. Petersburg says that two nuns who were arrested at Tsarkoe-Selo were found to have bombs in their possession.

A despatch from Gomel says the city is burning. For two days there has been continuous firing on the streets. Many persons have been killed and wounded. The inhabitants are fleeing.

Unsuccessful attempts have been made at Minsk to assassinate the Governor and chief of police. Cossacks at Kursk knouted a crowd of worshippers. Wholesale arrests continue throughout the provinces.

SAILORS RAID A STORE.

A despatch from Vladivostok says: The sailors here mutinied again Monday. They raided a rifle store and held an armed meeting, after which they marched to the residence of Gen. Selivanoff, the commandant, and demand-

ed that the prisoners be released. Troops scattered them with quick-firing guns. The artillerymen mutinied Tuesday. Gen. Selivanoff went to pacify them. He addressed them, and they were apparently appeased, but as he quitted the battery mutiniers fired at him, wounding him in the neck and chest. His condition is serious. Cossacks have been sent from Nicholsk to quell the mutiny.

REVOLUTION IN CAUCASUS.

A despatch from St. Petersburg says: A railroad communication with the Caucasus generally has been restored. The revolutionists of Guria and Mingrelia are retreating to the mountains, obstinately resisting the advance of the troops. The revolutionists who were driven from Kvirila rallied on Friday and fought a regular battle, advancing on the troops. Other severe encounters are reported. Several towns besides Kvirila are in flames.

A revolution has broken out in Northern Caucasus. The mountaineers around Ekaterinodar have risen, and are making frequent forays. A large detachment of Cossacks has been sent to restore order.

Advices from Ekaterinodar, South Russia, says that the inhabitants of several villages in that vicinity have been rioting and engaged in various excesses, making it necessary to employ artillery to subdue them.

The Government has been relaxing its repressive measures since Jan. 22. Many of the persons arrested have been released, and the right of assembly will be restored.

ATROCITIES BY SOLDIERS.

The St. Petersburg correspondent of The London Times cables. The newspapers have published columns about atrocities by soldiers at the St. Nicholas Lunatic Asylum of 1,000 inmates, where 700 perfectly sane persons have been interned by the police on account of revolutionary tendencies. The police have a right under the provisions of a minor stage of siege prevailing in all the large cities of the empire to send anyone to a lunatic asylum for an indefinite period. Soldiers brutally maltreated not only the hapless inmates, but many members of the asylum staff for reasons unexplained.

HOG RAISING INDUSTRY

BOTH FARMER AND PACKER MUST CO-OPERATE.

It Would Be a Calamity to Jeopardize So Valuable an Industry.

Investigations by the Live Stock Branch of the Dominion Department of Agriculture have shown that for some months past the supply of bacon hogs in Canada has been falling off. Even before the order was issued debarring packers from importing United States hogs to be slaughtered in bond, difficulty was experienced by Canadian packers in procuring sufficient hogs. The amount of the shortage during the summer and fall is indicated by the fact that packers claim to have been able to secure only from 30 to 50 per cent. of the capacity of their factories.

Hog raisers, on the other hand, claim that the production is considerably

ation on the part of the producer of the possibilities of the industry, hog raising cannot fail to be one of the most profitable branches of Canadian agriculture. Live Stock Branch, Dominion Dept. of Agriculture.

SAVED FROM PRISON.

Story of How a Young Fellow of Seventeen Was Saved From Crime.

About a year ago a county magistrate wrote to J. J. Kelso that he had a young fellow about seventeen years of age who had been guilty of house-breaking. He did not like to send him to the Central Prison as his mother was dead, his father was a drunkard, and for ten years past he had not known a decent home or kind treatment. "I know you have all you can do helping younger people," he wrote, "but if it is at all possible take an interest in this young fellow." The appeal, although meaning much trouble and worry, was hard to resist. Word was sent to suspend sentence, get the young man a ticket to Toronto, and give him a letter of introduction. He presented himself in due time, and a

A LONG-BOUGHT ROGUE.

Liverpool Bank Robber Nabbed in New York.

A despatch from New York says: Central office detectives of this city arrested on Friday night a man for whom they declare the police of the world have been searching for more than four years. The prisoner, who was picked up on the street by mere chance, is declared to be James Mances, formerly an American bookmaker, who is wanted in connection with the famous Bank of Liverpool robbery of November 22, 1901, in which the English institution, through forgery and conspiracy, was defrauded of more than \$800,000. Subsequently \$380,000 of this amount was recovered from the conspirators, the bank having sustained a net loss of more than \$400,000. While admitting his name to be James Mances, the man under arrest asserts that he had no part in the affair. After being taken to headquarters and being examined Mances was locked up. He will probably be held to await word from the British authorities, who have been apprised by cable of the arrest.

A GREAT RECORD.

C. P. R. Handled Western Grain Crop Successfully.

A Winnipeg despatch says: Considerably over 62,000,000 bushels of grain of this year's crop is already marketed, and of this amount 46,163,000 bushels were received at C. P. R. points, and yet so excellent has been the transportation facilities at this end of the lakes that in spite of the great increase in marketing no semblance of a blockade exists at the lakefront. Indeed, only 4,600,000 bushels are in store there, where there is a capacity for 18,000,000, including both C. P. R. and C. N. R. elevators. This heavy marketing would have paralyzed the railways in any previous year, and severely taxed the elevator capacity. However, the increase in storage and transportation facilities has saved the country.

WILL CHECK USURY.

Government May Pass Bill Framed on the Imperial Act.

An Ottawa despatch says: It is stated that the Minister of Justice contemplates the introduction of a bill into Parliament next session, framed on the Imperial Money Lenders' Act, and designed to put a stop to usury. Under the Imperial statute, where a money lender seeks to recover money lent, and the court is satisfied that the interest or other demand in respect of the money actually loaned is excessive, it may relieve the person sued for payment of the amount in excess of such sum as the judge may hold to be reasonable. The court may, moreover, order a refund of the excess charges if paid, and may order the lender to indemnify the borrower for any securities with which he may have parted in the transaction.

THE PLOT TO KILL WITTE.

Many of the Conspirators Arrested Throughout Russia.

A despatch from London says: The Vlna correspondent of the London Telegraph says a member of the Terrorist group has been arrested there. This is the group that has undertaken to kill Prime Minister Witte. The police say that several other conspirators have been arrested in other places. Documents that the authorities seized show that not only Count Witte, but Minister of the Interior Durnovo and Vice-Admiral Doubasoff, Governor-General of Moscow, were originally doomed by the Terrorists. It was ultimately decided to concentrate the attack upon Count Witte, because it was believed his death would lead to a spread of the disorders, and a new and successful insurrection.

THREE KILLED, FOUR DYING.

LEADING MARKETS

Toronto, Jan. 30.—Wheat—Ontario—No. 2 white, 79c; red, 78c to 79c; mixed, 78c; goose, 75c; spring, 74c to 75c at outside points.

Manitoba—No. 1 hard, 89c on track at lake ports; No. 1 northern, 87c; No. 2 northern, 84½c; No. 3 82½c; all-rail quotations, North Bay, at 3½c above these prices.

Flour—Ontario, \$3.10 to \$3.15 bid for export for 90 per cent. patents, at outside points, in buyers' bags; high patents, bags included, at Toronto, \$4; 90 per cent. patents, \$3.60; Manitoba first patents, \$4.30; second patents, \$4.10.

Millfeed—Bran, in bags, outside, \$17; shorts, \$18.

Oats—Firm, 35½c to 36c outside.

Barley—No. 2, 48c to 49c; No. 3 extra, 45c to 46c; No. 3, 42c, all outside.

Peas—79c outside.

Rye—70c, outside.

Buckwheat—52½c to 53c, outside.

Corn—Canadian, 44½c. Chatham freights; American, No. 3 yellow, 50½c; mixed, 50c, Toronto freights.

COUNTRY PRODUCE.

Butter—Prices are quoted unchanged.

Creamery 24c to 25c

do solids 23c to 24c

Dairy lb. rolls, good to choice 21c to 22c

do large cmlwypm

do large rolls 19c to 20c

do tubs 21c to 22c

do medium 19c to 20c

do inferior 15c to 20c

Cheese—Steady to firm at 13c for large and 13½c for twins.

Eggs—22c to 23c for new-laid, 17c for storage and 15c for limed.

Poultry—Fat chickens, 10c to 11c, thin 7c to 8c; fat hens 7½c to 8½c, thin 6c to 7c; ducks 12c to 13c, thin 6c to 8c; geese 10c to 11c; turkeys, 14c to 15c for choice small lots.

Potatoes—Ontario, 65c to 75c per bag on track here, 75c to 85c out of store; eastern, 70c to 80c on track and 80c to 90c out of store.

Baled Hay—\$8 per ton for No. 1 timothy, in car lots here, and \$6 for No. 2.

Baled Straw—Car lots on track are quoted unchanged at \$6 per ton.

Montreal, Jan. 30.—Grain—A period of inactivity seems to have arrived in the local grain market. Oats continue very strong. Sales were made this morning at 40½c for No. 2 white. The local flour market was steady. Bran continues firm. There is a fair trade passing in shorts and mouille at steady prices. Baled hay is somewhat weak in tone and prices are unchanged. The demand is only fair, and the supply is said to be very large.

Peas—79c f.o.b. per bushel.

Barley—Manitoba No. 3, 47½c; No. 4 45½c to 46c.

Corn—American mixed, 53c; No. 3 yellow 53½c ex track.

Flour—Manitoba spring wheat patents, \$4.60 to \$4.70; strong bakers', \$4.20; winter wheat patents, \$4.25 to \$4.50; straight rollers, \$4 to \$4.10; do., in bags, \$1.85 to \$1.95; extra, \$1.65 to \$1.75.

Millfeed—Manitoba bran, in bags, \$18; shorts, \$20 per ton; Ontario bran, in bulk, \$14.50 to \$15; shorts, \$20, milled mouille, \$21 to \$24; straight grain mouille, \$25 to \$27 per ton.

Rolls Oats—Per bag, \$2.10 to \$2.35.

Cornmeal—\$1.30 to \$1.40 per bag.

Hay—No. 1, \$8.50 to \$9; No. 2, \$7.25 to \$7.50; clover mixed, \$6 to \$6.50, and pure clover, \$6 per ton in car lots.

Cheese—The receipts of cheese this morning were nil. The market is quiet and steady. Prices are unchanged at 13c to 13½c.

Butter—The receipts of butter this morning were 352 packages. The market is easier in tone and prices have declined to 22½c to 23c for choice creamery. There is no export business passing through and the local demand is only fair. Dairy butter is in good demand. Prices are steady at 20c to 21½c for rolls and 19½c to 20½c in tubs.

Eggs—The receipts of eggs this morning were four cases. The market continues steady with a somewhat weak

mer and fall is indicated by the fact that packers claim to have been able to secure only from 30 to 50 per cent. of the capacity of their factories.

Hog raisers, on the other hand, claim that the production is considerably nearer the normal than would appear from the statements of the packers. It is, they say, partly an increase in the packing house capacity, rather than a decrease in hog raising. In some of the dairying sections the supplies are reported to be very little, if any, below the normal, while in other districts the shortage is placed at about 20 to 25 per cent.

Enquiries as to the cause of the shortage brought from the packers and producers a variety of replies. The packers claim that for the past three years or more the competition between buyers of hogs has been so keen that top prices have been paid continuously and that these prices have been high enough to give a profit to the producer. They claim, therefore, to be at a loss to understand why there is

A SHORTAGE AT THIS TIME.

Speaking from the standpoint of the producer, well-informed authorities claim that the price has been as uniformly high as it should have been. At times of the year when packers anticipated heavy runs prices dropped to a price where no profit was left for the feeder. This, they complain, took place last season when sows would be bred for the supplies of the fall just past, and as coarse grains were high and labor scarce at that time, many brood sows were sent to the market.

Again it is argued that the majority of packers have not encouraged the production of hogs of the bacon type and weight. For a number of years improvement in the hog stock of the country made satisfactory progress, but during the past season, at least, the producers of the ideal sort have received no encouragement to continue their work; a flat rate has been paid for good and bad alike. The hogs fit only to compete with the low price American stock brought quite as much as the sort that competes with the Irish and Danish bacon for the highest place on the British market.

Whatever may be the extent of the shortage or the real cause of it, the fact remains that unless producers and packers grapple in sympathetic co-operation with the situation, Canada's valuable bacon industry which has cost years of strenuous effort to build up, may become seriously demoralized.

In 1899 there were only two packing houses in the export trade with a weekly capacity of some 3,000 hogs, while in 1915 the weekly capacity of the 16 packing houses in operation was some 50,000. While this limit has not been reached within from 10,000 to 15,000 hogs weekly according to the season, the output from Canada has reached about \$15,000,000 annually, or 20 per cent. of the total quantity of bacon imported by Great Britain. To jeopardize a valuable industry would be nothing less than

A NATIONAL CALAMITY.

If the farmers who have been in the habit of raising hogs will accord the bacon industry a steady, persistent support, begotten of the knowledge that hog raising pays year in and year out, the future has very large possibilities for the Canadian bacon industry. Canadian bacon having already won a place on the British market commanding respect, as it increases in quantity and improves in quality it will undoubtedly become a daily necessity of the British consumer. That it may occupy this enviable position both farmer and packer must co-operate, the farmer by producing the steady supply of the right class of hogs, the packer by paying a fairly uniform price from month to month and from year to year; and he must give value per pound according to the quality of the product he received. Let each do his part, and there will be little trouble about the supply of hogs for keeping the factories going at a normal capacity. What appears to be most needed at the present time is that relations of confidence be restored and maintained between packer and farmer through fair dealing and intelligent co-operation. With these and the appreci-

the appeal, although meaning much trouble and worry, was hard to resist. Word was sent to suspend sentence, get the young man a ticket to Toronto, and give him a letter of introduction. He presented himself in due time, and a situation was obtained for him. After working for a month he called to say that he did not like the city, and that if he could only return to the country again he would give no more trouble. He was allowed to go back again with a letter of protection and has been working steadily since that time. In a letter received by Mr. Kelso recently he says: "I like to be here better than in the city, but I wish I could see you sometimes to thank you for all you did for me. I think about you when I am at my work and think how glad I might be for I am sure that you were a friend of mine. I feel that I can do nothing but show you my respectableness for you have stood by me. I hope to hear from you soon."

This is the work the Children's Aid Societies all over the Province are trying to do—save the youth of the country before they become hardened in wrongdoing. Many lads take up with crime because they have no real friends, no love or sympathy shown them, and no one to grieve should they go astray. There is a great field for usefulness right here, and almost any good man or woman inspired by the proper motives can be a friend in need to some neglected youth.

PAINLESS DEATH.

Ohio Assembly Asked to Legalize Chloroforming.

A Columbus, Ohio, despatch says: Painless death for pain-racked sufferers who have no chance for recovery and who desire to live no longer will be possible if the bill introduced on Tuesday in the General Assembly is passed. Under its provisions persons suffering from incurable diseases or from injuries from which there is no hope of recovery may be legally chloroformed to death or killed in any other painless way which physicians may design. The measure was introduced by Representative Hunt, of Cincinnati, at the request of Miss Anna Hall, who has for years been a student of the subject. Her interest was aroused first by the illness preceding the death of her mother from cancer of the liver. Miss Hall sat in the gallery of the House and witnessed the voting down of a motion to reject her bill. The vote was 78 to 22. She went when she saw her measure was to be received and sent to a committee. Miss Hall is a woman of wealth, and is a member of a highly respectable Cincinnati family. Her father, who was an Arctic explorer, died a few years ago.

HANGED HIMSELF IN HIS CELL.

Deliberate Suicide of a Prisoner in Kingston Penitentiary.

A despatch from Kingston says: Locksley Carter, a Niagara Falls convict at the penitentiary, who had served two years of a five-year sentence for larceny, hung himself at the hospital on Thursday night. Carter had been ill for some time with high fever, and there is a probability that his mind had become slightly deranged. The deed was done with apparently careful deliberation. His feet were tied together, and he was caught in a noose made from his bed clothes, attached to the bar of the cell door. He had put the noose about his neck, standing on a stool in preparation for the deed, and when all was in readiness he kicked the stool from under him.

THE NEW PARLIAMENT.

Will be Assembled by King and Queen on Feb. 13.

A despatch from London says: It was officially announced on Wednesday that King Edward and Queen Alexandra will formally assemble Parliament on Feb. 12th, when a Speaker will be selected. The remainder of the week will be occupied with preliminaries and in the administration of the oath to the members of the House.

to concentrate the attack upon Count Witte, because it was believed his death would lead to a spread of the disorders, and a new and successful insurrection.

THREE KILLED, FOUR DYING.

Accidental Discharge of Dynamite Near Keewatin.

A despatch from Keewatin, Ont., says: On Saturday afternoon, about 4 o'clock a horrible accident happened at Ostersund, Ont., 12 miles west of here. At that point an immense number of men are working on the big contract double-tracking the C. P. R. between Winnipeg and the lakes, a distance of 430 miles. It appears that about 30 men were working in a rock cutting, and that a charge had been put in. This failing to explode, the men returned to work, when it suddenly discharged, killing three men and mortally wounding four others. The bodies of the killed and injured were conveyed to Kenora, Ont., where there is a hospital. The men are all Swedes, though their names have so far been unascertained. A man named Peterson had the contract.

PRAYED FOR HIS PARENTS.

Little Boy's Last Words Before He Passed Away.

A Toronto despatch says: At the conclusion of the inquest into the death of Arthur Rainer, held by Coroner Noble on Wednesday evening, the jury returned a verdict that the boy's death was due to accident, and was entirely unavoidable. Dr. P. J. Brown gave evidence which had a marked effect on the jurors. The boy, who was only 7 years old, was struck by a street car, and was carried into Dr. Brown's surgery. Dr. Brown knew the little fellow, who said he was going to die. The doctor tried to cheer the little lad, but the boy said, "Please, God, have mercy on my mamma and papa, please do," and expired. Dr. Brown said that the incident had remained in his mind continually ever since.

PRESERVATION OF THE FALLS.

Waterways Commission Advises Co-operation With United States.

A despatch from Ottawa says: The International Waterways Commission has submitted an interim report to the Minister of Public Works. One of the principal points in it is the preservation of Niagara Falls. Although the report has not yet been considered by the Cabinet, there is no doubt that the Government will agree to the view of the commission, which is that Canada should co-operate with the United States so as to save the Falls from destruction by power companies.

SMALLPOX RAMPANT.

A Locality in Quebec Absolutely Indifferent.

A despatch from Drummondville, Que., says: For the last month or so an epidemic of smallpox has been raging at St. Cyrille and the surrounding country, entirely unknown to the outside world, although the Provincial Board of Health have known of it for some time. A hundred and fifty cases have been reported in the village of St. Cyrille, and it is stated that in almost every farmhouse for miles around the disease prevails. Fortunately it is in a mild form, and so far as can be ascertained here no deaths have taken place.

JAPAN'S OUTLAY FOR WAR.

Sum of \$495,000,000 Expended on Army and \$90,000,000 on Navy.

A despatch from Tokio says: An official report submitted to the Diet shows that the actual outlay for the war from the beginning of hostilities to their end in September last was for the army \$495,000,000 and for the navy \$90,000,000.

ing through and the local demand is only fair. Dairy butter is in good demand. Prices are steady at 20c to 21½c for rolls and 19½c to 20½c in tubs.

Eggs—The receipts of eggs this morning were four cases. The market continues steady, with a somewhat weak undertone. Prices are unchanged at 26c to 27c for "strictly fresh" and 23c for selects. Limes are selling at from 17c to 19c.

Provisions—Heavy Canadian short cut pork, \$21; light short cut, \$20; American cut clear fat back, \$19 to \$20; compound lard, 6½c to 7½c; Canadian pure lard, 10½c to 11c; kettle rendered, 11½c to 12c; hams, 12c to 13½c according to size; bacon, 14½c; fresh-killed abattoir dressed hogs, \$10 to \$10.25, country dressed, \$8.75 to \$9.50 alive; \$7.75 for mixed lots.

Eggs—New laid, 26c to 27c; selects, 23c; No. 1 candled, 17c to 18c per dozen.

Butter—Choicest creamery, 22½c to 23c; undergrades, 22c to 22½c; dairy, 20½c to 21½c.

Cheese—Ontario, 13c to 13½c; Quebec, 12½c.

BUFFALO MARKETS.

Buffalo, Jan. 30. — Flour — Quiet and steady. Wheat — Spring lower; No. 1 northern, 90½c; winter, No. 2, nothing doing. Corn — Unsettled; No. 2 yellow, 47½c to 48c; No. 2 corn, 47½c nominal. Oats—Dull but steady; No. 2 white, 35½c No. 2 mixed, 34½c. Barley—Steady; Western, 45 to 55c. Rye—No. 2, 71c.

NEW YORK WHEAT MARKET.

New York, Jan. 30. — Wheat — Spot weak; No. 2 red, 85½c f.o.b. elevator; No. 2 red, 90½c f.o.b. afloat; No. 1 northern, 95½c f.o.b. afloat.

CATTLE MARKET.

Toronto, Jan. 30. — There was perhaps no marked advance in prices, unless it was for something very choice in the butcher line. There was very keen demand for the choicest butcher cattle, and as there was so few of the right class offering, some better prices were paid to-day than yesterday.

Butcher — Picked lots in twos and threes sold at from \$4.25 to \$4.40, and one very choice lot of half a dozen butcher heifers, ranging from 1,050 to 1,050 lbs., was sold at \$4.60.

Export — One lot was sold at \$5, but these were well-finished heavy cattle, and the best on the market. Several sales are reported at around \$4.50.

Stockers — Prices are steady for choice quality.

Sheep and Lambs — The market was firm and prices unchanged.

Hogs — The market was strong and 25c higher than the highest market last week. Selects, \$7; lights and fats, \$6.25.

EXECUTING REVOLUTIONISTS.

Protests Against Summary Punishment of Accused Men.

A despatch from St. Petersburg says: A lively storm of protest is flowing in against the summary execution of revolutionists even if caught with arms in their hands; such executions being declared contrary to all forms of Russian laws. A despatch just received reports the execution of 45 revolutionists in one village in Livonia Sunday last under what the despatch calls the convenient fiction that they were shot while trying to escape.

JAPAN'S BUDGET.

Expenditure for Withdrawal From Manchuria is \$225,000,000.

A Tokio despatch says: The Budget for the fiscal year of 1906-7 was informally submitted to the Lower House of the Diet on Wednesday. The extraordinary expenditure for the withdrawal of the troops from Manchuria and for other military arrangements exceeds 450,000,000 yen (\$225,000,000).

NEW CANCER CURE.

Experiments in Edinburgh Show Gratifying Results.

A London despatch says: The efficacy of the treatment of cancer by inoculations of trypsin has just received a striking demonstration in a series of experiments conducted in the research laboratory of the Edinburgh University under a grant from the Carnegie trust.

Among seven or eight cancerous mice, two, for the purpose of the experiment, were injected with a trypsin solution. Twenty-two days from the date of the experiment the "control," that is, the uninoculated mouse, died of cancer. The tumor was found to be as large as the last joint of a man's thumb. One of the mice inoculated with trypsin has died apparently from some injury caused by an accident in the cage, after being ten days under observation, when the tumor was found to be already in an advanced state of degeneration.

On the 22nd day, when the "control" mouse died of the disease, the tumor of cancerous growth in the other trypsin mouse was found to be only as big as a lentil, which is but an apology for a tumor. The growth was in an advanced state of degeneration, shrinking away to nothingness, and quite harmless.

The report of the distinguished scientists concludes that the mouse's cure from cancer was not far distant, and a microscopical examination confirmed this opinion. Even without further treatment the tumor in all probability would have been absorbed shortly or its remains cast out.

GEN. "JOE" WHEELER DEAD

Famous United States Soldier Succumbs to Pneumonia.

A New York despatch says: Gen. Joe Wheeler's last fight has terminated fatally, the famous old soldier succumbing at 5.35 o'clock on Thursday evening at the home of his sister, Mrs. Sterling Smith, 173 Columbia Heights, Brooklyn, to the attack of pneumonia, following a severe cold. Around his bedside were grouped his son, Major Joseph Wheeler, jr., his four daughters, his sister, and his nephew, Sterling Smith.

The late Gen. Wheeler was born at Augusta, Georgia, in 1836. He entered the Confederate army as lieutenant and emerged a lieutenant-general. After the war he took up law and planting. In 1898 he was appointed Major-General of Volunteers, and held a command in the Spanish war, being senior officer in the field at the Battle of San Juan. He fought in a number of engagements in the campaign in the Philippines, and in 1900 was appointed brigadier-general in the United States army.

A CONCESSION TO VOTERS.

Czar Gives Them Further Chance to Register.

The St. Petersburg correspondent of the London Times cables.—The Czar has given another evidence of his desire that the Duma should meet by reopening the electoral lists in order that voters shall have a further opportunity of registering. But unless the present attitude of the Government undergoes a remarkable change, is doubtful whether the profound scepticism and apathy which are once again permeating all classes will lead his Majesty's subjects to take advantage of the additional term.

I find even among moderate parties a growing conviction that the Czar's desire to give his subjects constitutional government encounters the determined opposition of his advisers.

I hear the Government is discussing means for initiating vast public works to give employment to the starving peasants. The old scheme of the Baltic-Black Sea canal from Riga to Kherson has been revived. An American firm undertakes to carry out this gigantic task for forty million pounds.

COLD WEATHER YET.

Mr. R. F. Stupart Gives Facts About Previous Mild Winters.

A Toronto despatch says: The following facts regarding the weather of some past winters have been furnished by Mr. R. F. Stupart, director of the Dominion Meteorological Service: In the past 73 years there have been 14 winters of a decidedly mild type. Of these that of 1841-2 was the mildest, with an average temperature of 30.5 for the four months—December to March, inclusive—and those of 1881-2 and 1889-90 were not much colder, with a mean temperature in each instance of 29.9. It is of interest to note that in eight of the 14 years the mild weather of December and January continued during February, while in three of the other years the temperature was very slightly below average, and in three it was considerably below. In only two of the fourteen years was March much below the average, and in six of these decidedly above.

While these facts are suggestive of the probable character of the next two months, the meteorologist would be quite unjustified in making a seasonal forecast, as he is as yet ignorant of the causes which lead to such vast differences as occur in the character of corresponding seasons in different years. He believes, however, that a wide departure from the average weather conditions over any particular portion of the globe is caused, not by local conditions, but by variations in the atmospheric circulation over the whole earth, and these variations are probably due to a varying output of solar energy.

AN IMMENSE SNOWSLIDE.

The Great Northern Railway at Swinton, B. C., Tied Up.

A despatch from Fernie, B.C., says: A snowslide of immense proportions took place on the G. N. R. at Swinton, seven miles north of here on Wednesday morning. The track is buried for a distance of 2,000 feet under thirty feet of solid snow, packed too hard for the snow plough to operate. The company are using every means to open it up quickly, and it is expected to be tunneled in three days. In the meantime transfers will be made from the C. P. R. to the G. N. R. at Elko. A serious consideration is the coal transportation, which will be held up for that time. An immense slide occurred at this place a year ago. The company will probably relieve the danger of another slide before another winter comes around.

GUELPH GIRL'S PLUCKY ACT.

Saved Fourteen-year-old Boy From Drowning Through the Ice.

A despatch from Guelph says: A brave act was performed by a 15-year-old girl on Thursday, when Donald Adams, the four-year-old son of Mr. and Mrs. Adams, Arthur Street, was saved from drowning by the heroic efforts of Miss Ellis Crook, daughter of Mr. and Mrs. Charles Crook. The little fellow had ventured out on to the ice on the river just a little above the foot bridge. It gave way, and he was precipitated into the icy waters and sank. Miss Crook saw his plight, and, crawling out on the ice on her hands and knees, seized him by the arm just as he was sinking for the third time. Both reached the shore in safety.

CANADA-JAPAN TREATY.

Forwarded to Tokio — In Effect About March 1st.

A despatch from Ottawa says: It is over a month since his Majesty signed the treaty between Canada and Japan. It has now gone forward to Tokio to be signed by his Imperial Majesty the Mikado. The treaty is expected to go into effect about the 1st of March, when Canada will immediately secure the benefit of the minimum tariff of Japan.

FLASHES FROM THE WIRE

The Very Latest Items From All Parts of the Globe.

CANADA.

Calgary has now ten chartered banks. Canada imported 47,000 Mexican cattle last year.

Hall County Council will erect a house of refuge in Milton.

The Legislature has been summoned to meet on Thursday, February 15.

A copper vein at Cloud Bay, near Port Arthur, has assayed 26 per cent. metal.

Lack of snow is causing the lumbermen of the Ottawa valley to pay off their men.

The National Trust Company has been appointed permanent liquidator of the York County Loan Company.

Fernie, B. C., coal miners are attempting to head off a law in the Legislature which will prohibit hunting on Sunday.

It is now reported that the C. P. R. and the Allan Line will make Quebec a summer terminus for their steamship lines.

The prosecution of the trade conspiracy charges against several firms of wholesale grocers will begin at Hamilton on February 6.

Alexander Cummings, under arrest on a charge of attempted fraud, has been identified as Ned Lyons, a notorious United States crook.

Westinghouse engineers are at Sarnia making preliminary steps for the installation of electrical equipment of the St. Clair tunnel.

Galt Board of Health will apply to the Government for assistance in maintaining a Swiss cottage for incurable consumptives.

Two thousand three hundred and six homestead entries have been granted in the Dominion Lands office, Red Deer, during the past nine months.

Port Arthur corporation has made an agreement with a firm of Boston capitalists for the erection of a \$750,000 plant to manufacture steel tubes and to employ 250 men.

The C. P. R. have decided to abolish the stores department in the west, and in future to buy direct from merchants in Winnipeg and other places, according to requirements.

Rev. Wm. Blazowski, priest of the Independent Polish Catholic Church at Winnipeg, was committed for trial on the charge of stealing \$213 from the congregational funds.

The plans and profiles of the Touchwood Hills and Edmonton section of the G. T. P., 450 miles, are open for inspection at Montreal, and Manager Morse invites tenders.

The authorities have decided to let the Doukhobors out of jail at Prince Albert on their good behavior, and are releasing one every three days and sending them home to Yorkton.

The Canadian Pacific Railway Company are considering the advisability of substituting electricity for steam as a motive power, and will make the experiment on some of their eastern lines.

A snowslide occurred at Coal Creek colliery, near Fernie, B. C., burying four houses occupied by A. Berridge, J. Hunt, D. Martin and J. Sneddon. No one was hurt but several narrow escapes are reported.

John McNeal, a Nanaimo, B. C., livery stable employe, has just come into a fortune by the death of his father, Capt. Hector McNeal, a retired British Army officer, at Argyllshire.

A counter petition to that of the Lord's Day Alliance is being circulated in Hamilton asking Parliament not to pass any Sabbath observance laws which would "interfere with the rights or religious freedom" of the citizens.

It is reported that Messrs. Elder, Dempster & Co. propose taking up the West India-Canadian steamship service, including Jamaica, with a well-equipped fleet of steamers, to run from Halifax and St. John in winter and from Montreal in summer.

GREAT BRITAIN.

Graeme Hunter is on trial in Edinburgh charged with obtaining money from emigrants to Canada.

ON THE FARM

POULTRY.

In deciding how much to feed the poultryman has in the fowl itself three guides, three things that should furnish indications whether he is feeding right. These in the order in which it is most natural to use them are: (1) Appetite, (2) results, (3) conditions.

The fowls should be ready and eager for each feed, even the light noon feed. If they are not there should be either a change of time of feeding or a reduction of the quantity given at the preceding feed. Frequently, poultrymen who feed the mash very early in the morning find that the hens do not seem to care for it at that time, though an hour, or even a half hour later, they will eat it readily. If the mash must be fed early, the night feed should be reduced until they will eat the mash, but it will generally work better to give the full feed of grain at night, and delay feeding the mash until the sun is well up.

Throughout northerly latitudes the general provision for giving fowls exercise is by littering the floors of the house with straw, hay, leaves, cut corn stalks, or any material in which the grain will bury itself, or which it can be covered, so that the fowls must scratch for it. The proper use of litter calls for the same exercise of judgment as the adjustment of the meals or the determination of the proportions of the ingredients of the ration. Though errors both ways are numerous, the prevailing tendency is to use too much litter and compel too much exercise—to make it so hard for the fowls to get feed that they will work only for what is necessary to sustain life. One reason why some people get better results from evening mash is because the fowls get a full feed before going to roost, when if fed in litter (as they use it) they cannot get a good meal, or cannot get it in the time allowed them. Generally speaking, the depth of any loose and easily worked litter should not be less than three or four, and not more than six inches.

A practice handed down since before the days when scratching litter was generally provided, is to hang a cabbage or fasten a root or a piece of meat just out of reach of the fowls so that to get at it they must jump at every mouthful. I think this form of exercise of questionable value. A heavy hen carrying a lot of partly developed eggs is likely to be averse to taking exercise that way, or, if she does try it, to hurt herself, and it appears that something jumping for exercise is responsible for the prevalence in a flock of corns and bumble foot, particularly when that is the only exercise provided, and the floors are not littered.

Exercise also serves another purpose which indirectly has quite an important relation to the matter of feeding as well as to production. The fowl with something to do keeps busy much of the time and is contented. With moderate exercise fowls probably more completely digest and assimilate their food, and are productive and keep in good condition on less food either than when not taking exercise or when taking too much exercise. Contentment aids digestion and economizes food. But we need not depend solely on exercise dependent upon eating. Fowls given the opportunity to do so will take vigorous exercise dusting themselves. In fact, when the sun shines in on the earth floor they will work and wallow there by the hour, and this exercise does them just as much good as scratching. So occasionally on bright days rake the litter clean from a space on the floor where the sun shines, and give the fowls a chance to put variety into their existence.

Hens will not eat too much beef scrap if it is left before them all the time.

When fowls and ducks are allowed to drink from the same vessel look out for disease.

Ducks should never be permitted to run with fowl. They both do beat in pens by themselves.

means for initiating vast public works to give employment to the starving peasants. The old scheme of the Baltic-Black Sea canal from Riga to Kherson has been revived. An American firm undertakes to carry out this gigantic task for forty million pounds.

BANISHED THE BIBLE.

Justice Tierney Thinks It Desecration to Use It There.

A New York despatch says: Justice Tierney of a Municipal Court in the Bronx has abolished the use of the Bible in his court. Explaining his action, he says:

"I have removed the Bible from use in my court. It was a desecration to use it there. The lying words from the mouths of witnesses made its use a mockery, a travesty. I was brought up to regard it with veneration and reverence as the Word of God. It is shocking to find men calling upon the Deity to witness the truth of what they say—'so help me God,'—with a lie in their hearts and upon the lips by which they profane the Good Book.

"I now swear or affirm a witness with uplifted hands, but it really has no significance to my mind. I would prefer to let every person tell his or her story with oath or affirmation, and then do the best I can toward ascertaining the truth."

AN IMPOSING SPECTACLE.

The Funeral of the Late Hon. Raymond Prefontaine.

A Montreal despatch says: Probably the most imposing state funeral ever witnessed in Montreal, was accorded the remains of Hon. Raymond Prefontaine here on Thursday morning. The heads of the state and the church, the representatives of many foreign countries, the Ottawa and Provincial Governments, Parliaments, and, in short, every branch of public life in the Dominion and Provincial fields, were thoroughly represented.

Despite the cold wave, that rendered great coats necessary, the procession was a very imposing one, while the requiem mass sung by Mgr. Bruchesi was a gorgeous ceremony, the church being fairly ablaze with military uniforms, robed officials of state and the superb vestments of the clergy.

The cortege left the City Hall about 9.30 and a salute of 17 guns was fired by a detachment of the Mounted Field Battery. The 65th Regiment provided the military guard of honor. The streets along which the cortege proceeded were black with people. Long before the procession arrived every point of vantage was seized and occupied. All traffic was stopped. It was as if the whole city joined in a spontaneous tribute of sympathy and sorrow.

The service in St. James' lasted until 11 o'clock, and at noon the last chapter was enacted on the snow-covered hillside in Cote des Neiges.

A BIG MAJORITY.

British Liberals Take Power With Great Advantage.

A London despatch says: Sir Henry Bannerman will enter the new Parliament on Feb. 13 with the greatest majority ever given to an English Premier. The composition of the new Parliament, as near as it is now possible to tell, follows:

Liberals	376
Unionists	160
Nationalists	84
Laborites	59

Thus it will be seen that the Liberals have a majority over all of 83 votes, but such a thing as a combination of the entire force of Laborites and Nationalists against the Government is hardly conceivable. To the contrary, the Labor party members and Nationalist members may safely be counted on the Government side on the main issues in Parliament for some time to come.

A despatch from Ottawa says: It is over a month since his Majesty signed the treaty between Canada and Japan. It has now gone forward to Tokio to be signed by his Imperial Majesty the Mikado. The treaty is expected to go into effect about the 1st of March, when Canada will immediately secure the benefit of the minimum tariff of Japan.

CRAZY MAN WITH GUN.

Went on Rampage at Victoria—Shot Marine Guard.

A despatch from Victoria, B.C., says: A man named Jamieson, a smuggler, went crazy on Tuesday afternoon, and securing a gun, visited the naval yard at Esquimault, and shot the marine guard. The guard closed with the man, when the latter bit his hand, and breaking loose, made his escape. The alarm was given and soldiers started in pursuit. The fugitive next appeared at Gorge, the terminus of the tramway, and took a shot at the conductor, but missed and broke a window. He then took to the woods. The police are in chase.

GOD'S LAND FOR POOR.

Commissioner Coombs Message on His Visit to England.

A despatch from London says: "Canada is God's place for poor people," said Commissioner Coombs, who has just arrived. In regard to the Salvation Army emigration scheme he predicted that 1906 would be a record year in the number of emigrants leaving England for Canada. The first party would leave in March.

A NEW BACILLUS.

Paralysis and Allied Diseases are Traceable to It.

A despatch from Edinburgh says: Lecturing before the College of Physicians here, on Wednesday, Dr. W. E. Robertson announced that experiments made by himself and two colleagues since 1902 tended to show that paralysis and its allied disease, tabes dorsalis, are as specific in their causation as tuberculosis and diphtheria. They are apparently traceable to a micro-organism resembling the diphtheria bacillus, which is constantly present in the alimentary or respiratory regions. It was also found in the blood and cerebro-spinal fluid.

FIRST THROUGH SIMPLON.

Train Passes Through Tunnel, Amid Artillery Salutes.

A despatch from Isella, Northern Italy, says: The first passenger train, carrying notabilities and officials, passed through the Simplon tunnel on Thursday amidst artillery salutes. There were no other noteworthy incidents.

A MILLION-DOLLAR SCHEME.

Grand Trunk to Spend Large Sums in Improvements at London.

A London, Ont., despatch says: Manager McGuigan, of the Grand Trunk Railway, informed Mayor Judd on Tuesday that the company will spend one million dollars here the coming season. A new station, the raising of tracks, widening of yards and building of subways are included in the scheme. Plans are to be completed in three weeks.

CONFIRMED AT CAPE TOWN.

Representative Governments for South African Colonies.

A despatch from Cape Town says: Dr. Jameson, the Prime Minister, in a speech on Thursday, confirmed the recent report that the Transvaal and Orange River Colony would be simultaneously granted representative Governments, an official announcement to that effect being expected in a few days.

vice, including Jamaica, with a well-equipped fleet of steamers, to run from Halifax and St. John in winter and from Montreal in summer.

GREAT BRITAIN.

Graeme Hunter is on trial in Edinburgh charged with obtaining money from emigrants to Canada.

Mr. J. J. Duven, sen., has presented to the British nation Sargent's portrait of Ellen Terry as Lady Macbeth.

British Liberals have now the comfortable working majority of eighty over all, while the Conservatives have the smallest number in the history of the House.

UNITED STATES.

Warrants have been issued for the arrest on an Anarchist band of thirty-one foreigners in Pennsylvania.

Miss Rose Weiler of Constableville, N. Y., aged 18, has for over a week lain in a trance at the home of her sister. Grief over the death of a sister which occurred about a month ago, has broken her nervous system.

Two boy burglars, Joseph Kowalsky and Joseph Werbusky, who robbed a store, taking a small sum of money, candy and wine, were flogged in a New York city court by the Rev. Charles Galuska, pastor of the Roman Catholic church of St. Joseph, of that city.

GENERAL.

Two new States, Oklahoma and Arizona, will be admitted into the American Union.

Voters in all parts of Russia have manifested a profound disinclination to register, owing to the obstacles placed by the Government in the way of an electoral campaign.

A Spanish aeronaut named Duro has crossed the Pyrenees in a balloon. He ascended at Pau, and descended at Gaudin, in Granada, covering the 560 miles in fourteen hours.

The exploding of a soda water siphon in the cellar of a confectionery store in Williamsburg, N. Y., killed Joseph Metzvel and wounded the owner, Wm. Adricks.

"Take my baby for the rent; it's all I have," said Rachel Over, a young widow, to her landlord, Louis Devine, of Meriden, Conn., and then he told her that she could stay another month.

SAFETY FOR THE JEWS.

Russia Provides Districts Where They May Live in Peace.

A despatch from St. Petersburg says: Further concessions have been granted to the Jews in the Governments of Russia where they enjoy the right of domicile, by the addition of one hundred and thirty-three places, in the country districts, where they will be permitted to reside without hindrance.

ONLY CHURCHES STANDING.

Eruption on Pacific Island Destroys Buildings and Plantations.

A Berlin despatch says: The Governor of Samoa reports that a volcanic eruption on the Island of Savaii has destroyed all the plantations and buildings except two churches.

BLIGHT DUE TO DROUGHT.

The Rot on Trees is Not Likely to Spread.

A despatch from Toronto says: It has been stated by Prof. Judson F. Clark, the Provincial Forester, that the blight which is said to exist on trees in Ontario is not a serious or permanent plague. Last summer the existence of rot of trees in the neighborhood of Lake Obabaki, in the Temagami District, was reported to Mr. Southworth, Director of the Forestry Department, by Dr. Barlow. Samples were obtained and it was found that the disease was a physiological one, arising from the fact that the season had been one of drought. There is no danger of the blight spreading, and a moist season will end the trouble.

and give the fowls a chance to put variety into their existence.

Hens will not eat too much beef scrap if it is left before them all the time.

When fowls and ducks are allowed to drink from the same vessel look out for disease.

Ducks should never be permitted to run with fowl. They both do best in pens by themselves.

In feeding stock for profit an important requirement is to secure the most perfect digestion and assimilation of food.

CAPABLE HOG MANAGEMENT.

Describing the methods employed in managing sows about farrowing time, among the swine of the Purdue University, Prof. H. Skinner, instructor in animal husbandry, writes:

"We feed sows liberally up to within a few days of farrowing time, then cut the feed down, bringing them back gradually, so that by the time the pigs are ten days to two weeks old, the sow is giving a full flow of milk.

"While the pigs are on milk is a very important period in their lives, and much may be gained by giving careful attention to the feeding of the dam. Young pigs are tender, helpless things, consequently they need warm, dry quarters and a comfortable bed which is not exposed to wind. The more sunlight they get the better.

"One of the greatest leaks we have in the hog business in Indiana—and I presume the same is true elsewhere, is the loss of pigs at farrowing time. Much of this loss or leak can be stopped by giving attention to feed, shelter and bedding. As stated above, it is absolutely necessary that the young pigs' bed be dry, if the best results are to be attained.

"In cases where the sow is a heavy milker and the pigs scour, we feed the dam blood-meal. This has been efficient in checking the trouble. After the pigs are old enough, we scatter cracked grain over the floor and thus encourage them to eat as early as possible. Green feeds such as clover, alfalfa, oats, peas and rye, make the dam and litter thrifty and supplement the grain ration. The aim should be to keep the sows in good flesh while suckling, as it is profitable both from the standpoint of the litter and the effect on the mother.

"After ten or twelve weeks, the pigs should be weaned. At this time milk, if available, will be valuable along with the grain and other feed, and while it may not be possible with some to do it, grading or sorting the pigs will be profitable where one is handling a considerable number. We ordinarily make three grades, putting the heaviest in one, the medium in the second, and the small ones in another. This prevents the larger pigs from cheating and crowding the weaker ones, and it is to be commended. A suitable ration for growing pigs is made of two parts shorts and three parts corn, where these feeds are available. It may be found profitable to substitute tankage for the shorts in some cases. Tankage is a packing-house product of high feeding value. It produces very desirable results when fed in connection with corn. As the pigs get older, the proportion of corn may be increased. The growing pigs should have sufficient protein in their food for the production of good bone and strong frames and it is essential that they be pushed to maturity as rapidly as possible."

FARM NOTES.

The gypsy moth and brown-tailed moth are in New England, and reported as working west slowly but surely. If these insects are permitted to spread all through the country the result will be fearful loss. The national government should come to the rescue at once, and help the New England States to destroy these insects.

The man who might try to build a house without first preparing plans and counting up the cost would be quite likely to come out at the little end of the horn. But he would not be more unwise than the farmer who goes at his work haphazard, without any definite plan of action. First comes the thought, then the successful action.

All quick maturing crops require much richer soil and better cultivation than those that are longer in maturing.

The steamer Mowhawk Queen, made the trip from Forester's Island to Deseronto on Wednesday of last week. Capt. Geo. Brant claims the usual silk hat.

Belleville, Ont., Jan. 31—A good deal of excitement was stirred up in this city, last evening, when the police notified the banks and merchants that a band of thieves was supposed to be heading this way, and that it behooved all business men to make their places as safe as possible. The police claimed to have been notified of this from Toronto. This morning when people came down to business it was found that the gang had arrived, the wholesale grocery house of John Sloane & Co., midway between the city and station having been broken into and completely ransacked during the night. The robbers got only about \$4 or \$5 in money as owing to the police warning the firm had removed its surplus wealth to a safer place. The police are now looking for three suspicious looking strangers who were in the city yesterday, but so far none of them have been captured.

The Horticultural Society.

The membership of the Horticultural Society is not yet complete. Those wishing to avail themselves of its privileges, should hand in their names and subscriptions at once to Miss J. E. Ham, at the office of Messrs. Herrington, Warner & Grange. The Society is at present in correspondence with the Department, arranging for a lecturer in March. Among the distributions this spring, will probably be a strong healthy crimson rambler rose to each member. It is felt by many that no one plant will do as much to beautify the Town. Each member will be made a subscriber to the "Canadian Horticulturist" which alone would cost \$1.00. This Magazine has been enlarged and contains a great deal of valuable reading matter. It is to be hoped that all public spirited citizens will enter enthusiastically in this work, and make the Horticultural Society, the means of adding more to the beauty and attractiveness of our town. It affords an excellent opportunity for working in unison for the good of the town. The ladies especially should lend their aid towards this project. We all pride ourselves in the appearance of our streets and lawns, and here is the machinery provided to improve them still more. It should not be necessary to canvass for subscriptions, as the Society returns to each member at least four times the value of the amount subscribed.

A Young Life Gone.

Another life, which was full of promise, was called away on Sunday, January 14th, when Adi Cranston passed to her reward. Three years last August deceased was taken ill, and lingered for several months, loving care and God, in His wisdom saw fit to raise her from her affliction. Shortly after she began to recover, her father died, and six months later her twin sister was taken to her long home. Since then Adi has languished and pined for her half, as she called her twin sister. She lingered until the day after Christmas, and was taken to her bed, and despite all that loving friends and doctors could do she succumbed, and her last words were that she was with Adi. Her life was like a beautiful flower, which blooms and gladdens our hearts for a time, and then the tender branch is broken, and the flower gone forever, leaving the delicate perfume to remind us of its beauty. Adi leaves behind her tender remembrances wherever she was known. She attended Newburgh High School, where she has hosts of friends who remember her young life as one full of love and innocence. Her sister, Frances M. Cranston, trained nurse, of Chicago, was called to her bedside the last two weeks, to help other loving hands attend her, but God had thought wiser to call her from this world to a higher home. The funeral was held at the home of her mother, on Wednesday, and thence she was taken to Newburgh vault, to be buried in the family plot there.

FINAL OPPORTUNITY.

The most beautiful picture ever offered in this country is without doubt the one entitled "Queen Alexandra, Her Grandchildren and Dogs," given with the Family Herald and Weekly Star of Montreal this season. We learn that the supply is fast being exhausted, and further supplies cannot be obtained. The publishers guarantee it to all who subscribe to the Family Herald and Weekly Star during February, but no longer. The picture, although well worth two dollars, is free to all who send one dollar for that great family and farm paper, the Family Herald and Weekly Star of Montreal.

Police Magistrate on Tuesday on the charge of robbing the Kingston stage of a parcel of goods. He was sentenced to three years in the industrial school at Mimico.

A quiet wedding was solemnized at eight o'clock Wednesday morning in the Roman Catholic church, when Miss Beatrice Koubert, only daughter of V. Koubert, Napanee, was married to Joseph McMullen, of Duluth. The ceremony was performed by Rev. Father Hartigan. The bride was attired in white silk, with point d'esprit trimmings, and carried a bouquet of white carnation. Her going-away gown was of brown ladies cloth with becoming hat to match. The bride, who is a very popular young lady, received many handsome presents. After a honeymoon in Toronto, Hamilton and other places west, they will proceed to Duluth, where the groom, civil who is an engineer, has a good position.

OLD BOYS ASSOCIATION.

A movement has been started for the formation of an Old Boys' Association for the County of Lennox and Addington looking to the holding of a Reunion of the old boys in the summer of 1906 if possible. Communications have been sent to the different municipal councils in the county and to different secret societies, to the boards of education and to the ministers of the different denominations &c for the purpose of getting a committee appointed to consider the matter. If any organization has been overlooked it is hoped the members will form a committee of three to consider what encouragement can be given to the movement. All communications until further organization should be sent to U. M. Wilson, Solicitor, Napanee. Notes of the progress of the movement should be looked for every week.

Coughs, colds, hoarseness, and other throat ailments are quickly relieved by Cresolene tablets, ten cents per box. All druggists.

President. Sec. Treas.

A T

S. S. Convention.

Your correspondent regrets having omitted in his report last week of the annual County Convention, two numbers of the excellent programme given, that were both well worthy of mention. The one, a beautiful solo, well rendered and so freely given, by Mrs. Rev. J. R. Real. The other a splendid paper given by Mrs. Thos. Symington at the afternoon session entitled, "Echoes of the last Provincial S. S. Convention." So much of the very best that was given at that memorable Convention was condensed into that twenty minute address, and as Mrs. Symington repeatedly said, interested S. School workers could not do better than secure a copy of the report of that Convention for themselves. She quoted the great Marion Lawrence as saying that no delegate did his duty who simply absorbed. He should take in, to go home, and give out again and so take some of the Convention with him to his School and Community.

He would also to correct the printers error in reporting that Mrs. M. S. Madole gave the address of welcome and was the President-Elect. It should have been Mr. M. S. Madole.

M H

OBITUARY.

JOHN HINCH.

One of Camden's well known and highly respected residents passed away on Tuesday morning, at an advanced age. Deceased has been for a number of years Clerk of Camden Tp. and Clerk of the Division Court.

WILDER JOY.

One of Napanee's most respected residents and a business man of our town for half a century, passed away on Wednesday, in the person of Mr. Wilder Joy. Deceased had been in declining health for a few years past, had retired from active business life, and was living with his son, Mr. G. B. Joy, when he died.

About fifty years ago deceased first conducted a blacksmith shop in Salem on the place where his residence now stands, afterwards removing down town he carried on a blacksmith shop, carriage shop, later the saw mill business, and in recent years carried on the grocery business now conducted by Mr. Frank H. Perry, first alone and then with Mr. Perry as partner, which firm was dissolved a couple of years ago when Mr. Joy retired from business.

Mr. Joy served in the town council for twenty-three years, two terms as Mayor of Napanee and was always an active participant in the affairs of the town. Deceased was also a member of the Napanee Fire Co'y for a number of years, a past grand of Argyll Lodge No. 212, I.O.O.F., and the oldest member of the local Masonic Lodge of which he was treasurer for twenty-three years and has been an honorary member of the Masonic Lodge for four years.

In politics Mr. Joy was a staunch Conservative.

The surviving children of Deceased are Garret Joy, Napanee; Joseph Joy, Hamilton, and Mrs. F. H. Perry, Napanee, who have the sympathy of all in their bereavement.

The funeral will take place on Sunday to the Western Methodist church at 2 p. m. followed by the service conducted by the Masons.

Mr. Storrer lost a valuable cow last week.

Mr. Wm. Fairbairn has been on the sick list but is recovering.

Mr. Joel Schermerhorn of Indian Head, Manitoba, called on Mr. G. W. Fox last Wednesday.

Mr. and Mr. Manson Fox spent a short time visiting friends in this place.

Mr. and Mrs. Lewis Fox spent a few days last week visiting friends at Hay Bay and Macdonald.

Mr. and Mrs. L. A. Scott Napanee spent a few days last week the guests of Mrs. Geo. Richmond.

Royal Hotel Block.

F. S. Scott's shop strictly up-to-date in every respect. A call solicited.

SHARBOT LAKE

From shore to shore the beautiful lake is a sheet of glistening ice, and around the gleaming bonfire many jolly skaters pass away the evening hours. All lumber business is at a standstill and those who have logs to haul are patiently waiting for the necessary snow. Adam Hartman, who has been confined to his home for a few days by illness, is able to be out again. Dr. and Mrs. Kilborn are at Merrickville visiting her aunt who is ill. The doctor has returned. W. Y. Cannon spent Sunday, the 21st, at Finch, visiting his sister, Mrs. Edward Suse. Miss Ada who has been visiting Mrs. Sue for a month, returned with him. Visitors: Ross Butterill, of Kaladar, at his father's; William Hartman, of Kingston, at his brother's, Adam Hartman's; W. Jones, Harper, at William Kimberly's; Mr. Dewal, of Bishop's Mills, at his uncle's, Dr. Kilborn's; Miss M. Thompson has gone on an extended visit to Winnipeg. Rev. A. Lawson, accompanied by Miss Ila Hetherington, has gone to spend a couple of weeks in the Queen City.

STRATHCONA.

Mr. Wilson's sale was held on Wednesday, and was very successful.

An operation was performed on Cecil Boyer and the patient is doing well.

Mrs. Elliot of Belleville is visiting her cousin, Mrs. Robert Shetter. They visited friends at Westbrook.

The death of Mr. John Hinch seems to cause universal regret. He had many friends.

Mrs. Haycock visited friends at Morven last week.

Mr. A. Jack of Kingston passed through here on a business trip.

The Methodist Sunday School social was a decided success.

Terence Brady fell from the upper part of his barn, injuring his thumb and wrist.

Mrs. McCoy also met with a bad accident. In raising a heavy window sash she accidentally let it drop, cutting a deep gash in the arm just above the wrist. It is a miracle her arm was not broken.

Miss Walker visited at Mrs. Lot's.

Formal Showing of the New Spring Goods.

The New Spring Goods are here in great profusion; the most fashionable fabrics and the choicest selections are now being shown. Everything new in Dress for the fashionably dressed woman. This season we excel in qualities, quantities and prices; this season places us far in advance in regard to distinctiveness of designs and colorings; this season's early shipments enable us to place before you the choicest from the European markets. Our immense stocks consist of only the most fashionable tints and tones predicted for this season.

SEE OUR WINDOWS FOR DISPLAY.

The New Dress Fabrics and Silks are here.

Silk and Wool Homespun, in neat check effects, shades of navy, black and green.

Homespuns in plain and check effects, neat and dressy, colorings of greys, brown and fawn. Very appropriate for separate skirts and shirt waist suits.

Invisible Plaid Mohairs, very stylish, in different shadings—the proper thing for the summer shirt-waist suit.

Corella and Tesella, the new check suiting, in shades of navy, brown and green.

Coverts and Broadcloths, for Spring Jackets, in shades of medium and light fawn.

Delaines, all wool, plain and spot and scroll effects, just the thing for separate waists, children's dresses and ladies' suits.

A stock of the newest and latest Dress Goods is not complete without the Famous Priestly Fabrics. Being agents for these goods, our new stock consists of new Tricot, Wool Taffeta, Wool Sateens, Amerlin, Brescella, etc., in all the leading shades, including Black.

WRITE FOR SAMPLES.

The New Silks are here.

Our new Silk Stock has arrived and is simply grand. This season's selections are certainly exquisite, all the leading colorings and designs are here represented, Persian and Dresden effects, are shown in exclusive designs, one length only each, exclusive dress patterns in check and floral designs, invisible stripe effects, etc. All new and staple shades in Chiffons, Taffeta, Messaline, Louisenne, Tamoline, Jap, Habitna, Crystalline, Kaki, etc.

The New Dress Trimmings and All-over Laces are here.

Dress Trimmings to suit all the leading shades in Dress Goods, eyelet embroidered mull and insertion, eyelet embroidered chiffon and lace. New allover laces in white, cream, paris and black, neat and very effective designs.

The New Prints, Muslins and Gingham are here.

Get the Genuine.

Pratt's Astral Oil at WALLACE'S RED CROSS DRUG STORE. The highest quality of American Coal Oil possible to buy.

TOWN COUNCIL.

Council Chamber.
Feb. 5th. 1906.

The Council met at the usual hour, 7.30, the Mayor in the chair. The following members were present: Messrs. Graham, Kimmerly, Meng, Normile, Simpson, and Williams.

The Clerk read the minutes of the last regular meeting, which on motion were confirmed.

COMMUNICATIONS.

A Communication was received from the Old Boys' Reunion asking that a Committee be appointed to further their object. Laid on table.

A committee from the Ontario Municipal Association asking the support of Council to aid in removing responsibilities respecting the repair of highways. Laid on table.

A letter was received from Mr. J. J. Kenny, respecting an amount paid twice on taxes on land. Referred to Court of Revision.

A Communication from Chas Stevens regarding dog tax to which he made objection. The motion was referred to the Court of Revision.

The Auditors report was laid on table.

PETITIONS.

From the Napanee Band for a grant of \$425 for open air concerts during summer. Laid on table.

The consideration of various tenders was deferred until 19th inst.

An offer of \$310 was made for fees of the market by Frank Bowen and one of \$340 from J. Storms.

The offer of Mr. Storms was accepted, to go into effect from February 5th.

REPORT OF COMMITTEES.

A House of Refuge was proposed by the Poor and Sanitary Committee and a petition was recommended to be circulated and signed by the ratepayers asking the Provincial authorities authorize the erection of such an institution. An approximate grant of \$20,000 from the whole county—\$4000 of this amount being contributed by the Provincial Government. Carried.

The Police Committee reported the completion of the lockup in a most satisfactory manner.

The Printing Committee reported the account of U. M. Wilson for arranging the voters' list.

The Finance Committee reported that an amount of nearly \$9000 was overdrawn in Bank. It was explained that by the re-payment of Electric Light and other items due, the town would be in a better position than it had been during the previous year.

The blank in the by-law was filled in \$10,000, date 5th of May. The By-law was signed and sealed.

The Fire, Water and Light Committee were instructed to procure the rubber coats and boots recommended previous meeting.

The collectors time was extended until next regular meeting.

A discussion took place regarding the communication of the Old Boys' Reunion and it was moved and seconded that Councillors Meng, Williams and Kimmerly be a Committee to make inquiries to report.

white, cream, pinks and black, neat and very effective designs.

The New Prints, Muslins and Gingham are here.

Our Wash Goods Department being known far and wide for excellence of qualities, colorings and designs, this season, our stock is one to be envied. The stock consists of many exclusive patterns. See our new B. B. B. and Crums' prints, the new Dress Muslins, Swiss Muslins, Dress Gingham, Chambrays, Dress Linens, Mersildas, Organdies, Batiste, Fancy Piques, Vestings, Duck Prints, Black Grenadines, Galateas, Etc.

The New Carpets and Draperies are here.

Everything new for Spring, 1906, the new Carpets and Draperies are beautiful. A visit to our well equipped ground floor Carpet Department will convince you of our enormity. See the Stripe and Floral Madras Muslins.

AN ITEM OF SPECIAL INTEREST FOR SATURDAY,

COMMENCING AT 10 A.M.,

For a RUSH SALE OF 15 DOZEN Embroidered Linen Collar Tabs and Turnovers. Sell in the regular way at 10c. each; sell on Saturday at.....5c. each. These goods being now in great demand make this a hummer on Saturday morning.

The Cheapside Sale, the greatest bargain-giving event, is now an item of the past, everything being sold and a general clean-up being accomplished. We thank the public generally for their kind appreciation throughout this, the greatest and most successful sale ever carried on in Napanee. Everything sold on its merits, backed by truthful advertising and business ability, which enabled the management to accomplish success in such an undertaking, your appreciation now being solicited at the Rennie Block Store.

EXECUTOR'S NOTICE TO CREDITORS.

In the Matter of the Estate of John Craig late of the Township of Camden, in the County of Lennox & Addington, Farmer deceased.

Notice is hereby given, pursuant to chapter 120, section 38, of the Revised Statutes of Ontario, 1897, and amending Acts, that all creditors and others having claims against the said John Craig, deceased, who died 11th January, A. D. 1906, are requested to send by post, prepaid, or deliver to the undersigned solicitors for the executors of the last will and testament of the said deceased, on or before the

15TH MARCH, A. D., 1906

full particulars and proofs of all claims (if any) which they have against the said estate and effects of the said deceased, together with their Christian and surnames, addresses and descriptions, and the nature of the security (if any) held by them.

And notice is hereby further given that after the said 15th day of March, 1906, the said executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which notice has been received as above required, and the executors will not be liable for the assets so distributed or any part thereof whose names shall not have been received prior to the time of such distribution.

Executors.

Dated February 1st, A. D. 1906.

Goethe,

Goethe was pronounced "the hand-jonest man of Europe." He was a little over six feet in height, but so well proportioned that he did not seem tall. His features were of the Roman type, his hair rather light than dark, his whole appearance commanding. Even to extreme old age he retained a large share of the personal good looks that earlier in life had made him so attractive.

Women Must Weep.

"You look discouraged," "I am," answered the newly married man. "I have done all in my power to make my wife happy. She can't find anything at home to cry about, so she goes downtown and weeps over the heroine at the matinee."

A discussion took place regarding the communication of the Old Boys' Reunion and it was moved and seconded that Councillors Meng, Williams and Kimmerly be a Committee to make inquiries to report.

The Ontario Municipal Association Communication was filed.

Re disputed account of C. A. Anderson for conveying hose for one year for \$50, it was recommended that his services be discontinued at the end of his term, the 5th April. It was eventually decided to refer the matter to the Fire, Water and Light Committee to consult the Town Solicitor to report.

The auditors report was referred to Finance Committee to report at next Committee meeting.

ACCOUNTS.

The following accounts were ordered to be paid: Seels, \$4, Dominion Bridge Co. \$3; Geo. W. Reid and Co. \$71; Chas. Stevens \$37.35; T. B. Wallace \$1.95; J. L. Boyes, \$1.25; Canadian Express Co. 45c; John Fennell, 50c; Napanee Gas Co. \$111.80; E. B. Perry (night watch) \$0; Carscallen Bros. account funeral of Jessie Preston \$10; Madole \$95; J. J. Graham \$1.25; Comm. Kimmerly, expenses \$31.21; Municipal World \$5.

The accounts of C. W. Mack that of the Auditors and the Police Magistrate's were referred to the Finance Committee to report thereon; Vanalstine & Ham, \$3, referred to Printing Committee; two accounts of R. Pringle, \$5.16 and \$31.70 were referred to Light Committee; Carscallen Bros. a balance of \$2.98, was referred to Town Property Committee; Madole, \$18.58, referred to Police Committee.

Always in the Lead.

The Extended Popularity Of

Diamond Dyes

Induces Speculators To Introduce Weak And Worthless Imitations.

DIAMOND DYES, true home helpers and money-savers for mothers and wives, are dear to every woman's heart.

Recently, speculators have gone into the package dye trade with the view of gaining a share of the immense and ever-increasing trade held by the manufacturers of the DIAMOND DYES, but all such efforts will, as in the past, result in failures.

The crude and worthless dyes brought out in opposition to the DIAMOND DYES, can never become popular, for the simple reason that they have not one good quality to boast of. The merchants of Canada who were induced to buy these adulterated dyes now find them dead and worthless stock.

The progressive and busy druggists and dealers of Canada sell only the DIAMOND DYES, which have an established reputation of over twenty-five years. The modern merchant has not the time or inclination to encourage the sale of worthless and deceptive goods.

If our Canadian women desire full, brilliant and fast colors, they should at all times ask for the DIAMOND DYES, the only guaranteed package dyes in the world. When buying package dyes see that the words DIAMOND PACKAGE DYES are on each packet handed out by your dealer. WELLS & RICHARDSON CO., LIMITED, MONTREAL P.Q., will send free to any address their New Dye Book, Card of Dyed Samples, and new book in verse entitled "The Longjohns' Trip to the Klondike." This little book is interesting thousands.

NEE EXPRESS.

Business has started afresh here since the snowfall on Sunday.

B. Revell is putting in a supply of wood, for the school.

Mrs. W. Cassell, of Elkhorn, Man., is visiting her sister, Mrs. James Meeks. Mr. Neily Yorke and Miss Maggie entertained several of their young friends, last Tuesday evening.

Mrs. John Timmons is quite ill with La grippe.

W. F. Pomeroy is still on the sick list, but a little better this week.

Visitors—Mrs. H. A. Martin, at W. Brook's; Miss Wheeler, of Tweed, at I. B. Wheeler's; John Moir, of Dain's Muir, at Mrs. Geo. Moir's.

Why he is pleased.

When you tell the doctor that you got the prescription filled at The Medical Hall, he will be pleased, because he knows that you got just what he ordered and that it was properly dispensed.—Fred L. Hooper.

We are offering heating stoves, blankets and mitts at greatly reduced prices.

MADOLE & WILSON.

In 1772 It Was That the Courts Declared It to Be Illegal.

In 1772 slavery was declared by the judges to be contrary to the law of England. But during the years immediately preceding this date slaves were commonly sold in England. In the previous year a Birmingham paper advertised for sale "a negro boy, sound, healthy and of mild disposition," while in the same year another paper records (and condemns) the sale a short time previously at Richmond of a negro boy for £32. This is believed to have been the last actual sale of a slave that took place in England. White slavery was very common in the English colonies in the seventeenth

IN THE HIGH COURT OF JUSTICE

Judicial Sale.

Pursuant to the Judgment made in the action of McKeown vs. McKeown on the 19th day of January, A. D. 1906, there will be sold by Public Auction with the approbation of the Local Master at Napanee at his Chambers in the Court House, Napanee, on

FRIDAY THE 9TH DAY OF MARCH, A. D. 1906,

at 2 p.m., the following valuable farm lands, Parcel No. 1. The Northwest 14 of Lot No. 11 in the 5th Concession of the Township of Camden, in the County of Lennox and Addington, containing 10 acres more or less. Parcel No. 2.—The Northwest 14 of Lot No. 11 in the 6th concession of the said Township of Camden in the County of Lennox and Addington containing 10 acres more or less. Parcel No. 3.—2 is pasture land without any buildings and well fenced with a patent fence. The 2 parcels will be sold separate or en bloc at the option of the Master, and subject to an annuity of \$80 a year against the 2 parcels payable to Eleanor McKeown, and subject also to a reserve bid fixed by the Master.

The purchaser shall pay down a deposit in the proportion of \$10 for every \$100 of the purchase money, and the balance in one month thereafter without interest. In all other respects the terms and conditions of sale will be the same as in the conditions of sale of this Court.

For further particulars, apply at the law offices of Messrs. Herrington Warner & Grange and Morlen & Ruttan, Napanee.

Dated the 6th day of February, A. D. 1906.

tion, while in the same year another paper records (and condemns) the sale of a short time previously at Richmond of a negro boy for \$32. This is believed to have been the last actual sale of a slave that took place in England.

White slavery was very common in the English colonies in the seventeenth century. Cromwell seized Irish boys, girls and women "by the thousand" and "sold them in the slave markets of Barbados," as may be seen in numberless places in the state papers of the period. He treated some of his royalist opponents in England and Scotland in the same way. A similar fate befell many of the supporters of Monmouth's rebellion in the west of England. In the latter case, as Macaulay tells us, the ladies of the court, including the queen, made large profits on the sales.

At the coming manoeuvres of the combined British fleets next June the complete co-operation of all British ships-owners will be requested with a view to determining a practical scheme of defence of British commerce in time of war.

The resignation of Dr. Beattie Nesbitt as member of the Legislature for North Toronto, and his appointment as Registrar for West Toronto, to succeed Mr. Charles Lindsey, resigned, is the talk in political circles.

At a meeting of the Canadian Pacific Railway directors a dividend of two per cent. on the preferred stock and three per cent. on the common stock was declared for the half year ended last December.

It is reported carcasses of horses which were shot because of glanders were discovered on the surface of the Ottawa river at a point where in mild weather the sewage would have entered the intake for the city's water supply.

The steamer Hodgson has solved the problem of winter navigation of the Georgian Bay, having made the trip from Wiarton to Lion's Head with a freight cargo and return, though she had to get through four inches of ice to reach her dock.

London, Feb. 6.—The St Petersburg correspondent of The Times writes: The universal outcry against the delay in assembling the Duma apparently has had some effect. It is announced semi-officially that the elections will be held on April 7, and the Duma assemble on April 28, but The Slovo claims the Duma will be forthwith prorogued till the autumn. The Slovo's allegations would appear to indicate an increasing mistrust towards the Government on the part of its erstwhile supporters.

BANK MANAGER'S DEATH.

Kingston, Feb. 3.—The body of Mr. Roderick Mackenzie, Manager of the local branch of the Bank of Montreal found beside the G. T. R. tracks three miles east of here at 8.30 o'clock this morning, was not identified until noon. Brooding over some troubles in connection with bank matters, Mr. Mackenzie had left his home early in the morning, walked to the junction, then turned east, and when in a lonely spot swallowed carbolic acid. He had lain down in the ditch beside the tracks, when found the body was quite warm life was extinct not more than twenty minutes. Mr. Mackenzie's absence during the morning caused anxiety at the bank, and in his home, and search was being made for him when the body was identified at Corbett's undertaking rooms. Dr. Sands, Coroner decided that no inquest was necessary.

From Mr. Mackenzie's friends it was learned that whatever troubles existed in the bank were as to management, and that everything would have come out satisfactory in the end. It is understood that the deceased Manager had acted contrary to instructions in some matters. Nothing happened, however, that would lead to arrest. Mr. Mackenzie evidently took his trouble greatly to heart and brooded over them till his mind became affected.

Marmalade.

Just received a new lot of fruits such as the bitter marmalade oranges, Valencia, Navel and lemons for making genuine marmalade also a fresh line of French Plums, table and cooking figs, dates and table raisins. A nice line of nuts, filberts, walnuts, almonds and brazils. A genuine line of Maple syrup, sealed in glass bottles, a nice lot of breakfast foods, such as rolled wheat, cracked wheat, rolled oats and buckwheat flour for pancakes, all nice and fresh.

THE COXALL CO.

Canadian and American Coal Oil.
MADOLE & WILSON.

The world is full of people who are in constant misery from the racking pains of rheumatism, neuralgia, lumbago and kindred diseases. They would give any money to get relief, but having tried various remedies and been disappointed they have become discouraged and sceptical of all remedies. Does this describe your case? If it does, let us tell you that there is a cure for your trouble, a remedy that will not disappoint you. It is Tuck's Rheumatic Bone Oil. It never disappoints. As its name implies it goes straight to the bone, or joint, the seat of the disease, scatters the poisonous acid, relaxes the stiffened joints, allays the inflammation and effects a sure and speedy cure. It gives comfort where there was misery, a fact for which we have hundreds of letters from those who have been sufferers. This oil is for internal and external use and while it is a great and never-failing remedy for rheumatism lame back, etc., it is also good for other kinds of inflammation such as croup, bronchitis and quinsy. It is the most remarkable remedy of the age and should be in every home. Sold by all medicine dealers at 50c a bottle or sent by mail prepaid by The Tuck Bone Oil Co., Limited Smith's Falls. Money refunded if not satisfied.

CIVIL WAR MAY RESULT LEADING MARKETS

Agents of Russian Government Daily Harass Villagers With Impunity.

PEASANTS WILL ANNEX LANDS.

The St. Petersburg correspondent of the London Times cables:— Prince Troubetzkoi states that his colleagues attending the recent congress of marshals concurred in predicting a terrible agrarian crisis in the spring. The peasants will certainly annex lands and civil war may result over a division of the spoils. The only hope of averting a catastrophe lies in the immediate convocation of the Duma. Prince Troubetzkoi reported in this sense to the Emperor.

The sickening tale of oppression, however, continues. I learn from an absolutely trustworthy source that 200 peasants of Tver, chosen by the villagers to represent them in the primary electoral colleges, have been arrested. It would be impossible to enumerate the wrongs perpetuated daily throughout the empire by agents of the Government, now convinced of absolute impunity.

The Government, after forbidding a Mussulman congress at St. Petersburg, has issued a similar interdict against a Jewish congress.

VANITY THAT WAS FATAL.

A despatch from St. Petersburg says: Vanity proved the undoing of scores of Lettish revolutionary leaders. Desirous of immortalizing their connection with the armed rebellion, the leaders were photographed in groups, wearing their uniforms. These pictures fell into the hands of the authorities, who thus easily traced the originals and tried them by court-martial.

RUSSIAN STRIKERS SLAIN.

A despatch from St. Petersburg says: Lieut.-Col. Sergueief, writing from Colonna, near Moscow, furnishes details of the ruthless slaughter by Government troops along the railways recently. He cites the case of a battalion of the Semenovskiy Regiment, under Col. Riemann, which was sent along the Moscow-Kazan Railway, to deal with ex-strikers. He says that when the troops reached the station of Golutin Col. Riemann with two officers, named Sievers and Stietz, left the train with a company of men.

The Col. ordered the station staff to quit the platform and assemble in the waiting-room, where they were searched. A revolver was found in the pocket of an engine-driver, named Kharlamoff, whereupon he was immediately shot by Riemann himself.

A local reservist non-commissioned officer, attempting to leave the waiting-room, was shot dead by Riemann's hand. Among the others in the waiting-room was a man named Patapoff, who had with him his son, 10 years of age, who was found to be carrying a book that contained a forbidden song. Riemann personally flogged the father fiercely. He then seized the chief railway employe and demanded of him the names of all members of the Strike Committee. The man was given 20 minutes in which to obey, and was told that if he then refused to give the names he would be shot immediately. He protested there had been no local Strike Committee. An order came from Moscow condemning him to be shot. He was taken out for execution, but as the man evidently was speaking the truth, eventually he was let go.

In the police list of 18 villagers, only two were found to be armed with revolvers, but all were arrested. Nine others were collected in a similar way from the neighborhood. No charge was made against them, nor was any enquiry held, but all 27 were shot the same day.

Sergueief, whose letter, the Russ states, has been confirmed by inquiries in the

but were simply the murder of quiet, defenceless people.

From other provinces came personal narratives, which go to show that the kind of peace that has been restored, as a precedent to the promised reforms, is the kind that Col. Riemann established along the Moscow-Kazan Railway.

WITH MILITARY HONORS.

A despatch from Vladivostok says: The funeral of the 37 men who were killed by machine guns on Jan. 23 near the commandant's house were held in solemn state on Wednesday. The interments were made with full military honors. The cannon on Tiger Hill thundered a salute, while choirs, composed of soldiers, chanted dirges.

Two immense processions, in which there were thousands of soldiers, sailors, and civilians carrying red flags and singing revolutionary songs, and headed by the regimental bands, escorted the bodies to the cemetery. The service was conducted by both Catholic and Orthodox priests, and the coffins were covered with wreaths bearing such inscriptions as, "To the eternal memory of the martyrs," and "To the eternal shame of their assassins."

The funeral of Col. Uremnoff, one of the three officers killed by the mutineers Jan. 23, was held on Thursday.

The condition of Commandant-Gen. Selivanoff, who was wounded, is improving. The city is quiet.

A great popular petition for the pardon of the mutineers who return voluntarily to their allegiance has been signed. It is endorsed by the members of the city administration. This petition will be forwarded by Gen. Mischenko to the Emperor.

In addition to 37 men killed in the demonstration of Jan. 23rd, 400 were wounded. The machine guns were operated by officers. Fighting in the town continued for the following two days between the Cossacks and the revolutionists and mutineers, in which the Cossacks were unable to hold their own. Col. Uremnoff was shot by the men in his own regiment. Gen. Mode, who succeeded to the command, agreed on Jan. 26th to withdraw the Cossacks and release the prisoners.

On Jan. 27th the soldiers issued this proclamation:—

"Comrades and Citizens:—The city is now guarded by our volunteers instead of by the Cossacks, who have been removed. Let the fighting cease and order prevail."

The city then calmed down.

MANY BOMBS DISCOVERED.

A despatch from St. Petersburg says: The Government is finding ample justification for its severe policy against the revolutionists in the constant discoveries of bombs, bomb factories and depots of arms and munitions in all parts of the Empire. The Novoe Vremya to-day prints half a column of statistics of last week's captures, showing the seizure of bombs in a score of cities and the discoveries of numerous bomb laboratories, explosives, and filled and unfilled bombs. Though not included in the Novoe Vremya's list bomb factories have also been discovered here and at Moscow.

To curb revolutionary outbreaks and enable estate owners to defend their property against further peasant uprisings the Government is distributing the arms captured on the British steamer John Grafton, sunk in the Gulf of Bothnia, Finland, in September last, and rifles and revolvers captured elsewhere to responsible applicants, and is also permitting the organization of armed estate guards, which are often composed

Eggs—Easy in tone at 22c to 23c for new laid, 17c for storage, and 15c for limed.

Poultry—Fat chickens, 10c to 11c, thin 7c to 8c; fat hens 7½c to 8½c, thin 6c to 7c; ducks 12c to 13c, thin 6c to 8c; geese 10c to 11c; turkeys, 14c to 15c for choice small lots.

Potatoes—Ontario, 65c to 75c per bag on track here, 75c to 85c out of store; eastern, 70c to 80c on track, and 80c to 90c out of store.

Dressed Hogs—None are offering here, but at outside points car loads are selling at \$6.75.

Baled Hay—No. 1 is quoted at \$8 per ton in car lots on track here; No. 2 dull at \$6.

Baled Straw—Quotations unchanged at \$6 per ton for car lots on track here.

MONTREAL MARKETS.

Montreal, Feb. 6.—Grain—Bids for Manitoba wheat by cable were out of line, except for those who have wheat in Georgian Bay ports.

Oats—No. 2, 40c to 40½c; No. 3, 39c to 39½c; No. 4, 38c to 38½c.

Peas—79c f.o.b. per bushel.

Barley—Manitoba No. 3, 47½c; No. 4, 45½c to 46c.

Corn—American mixed, No. 3 yellow, 53½c ex-track.

Flour—Manitoba spring wheat patents, \$4.60 to \$4.70; strong bakers' \$4.20; winter wheat patents, \$4.25 to \$4.50; straight rollers, \$4 to \$4.10; do., in bags, \$1.55 to \$1.95; extras, \$1.65 to \$1.75.

Millfeed—Manitoba bran in bags, \$18.50 to \$19; shorts \$20 per ton. Ontario bran, in bulk, \$14.50 to \$15; shorts, \$20; mouille, \$21 to \$24; straight grain mouille, \$25 to \$27 per ton.

Rolls Oats—Per bag, \$2.10 to \$2.20. Cornmeal—\$1.30 to \$1.40 per bag.

Hay—No. 1, \$8.50 to \$9; No. 2, \$7.25 to \$7.50; clover mixed, \$6 to \$6.50, and pure clover, \$6.75 per ton in car lots.

Provisions—Heavy Canadian short cut pork, \$21; light short cut, \$20; American short cut, \$20; American cut clear fat back, \$19 to \$20; compound lard 6½c to 7½c; Canadian pure lard, 11½c to 12c; kettle rendered, 12½c to 13c; hams, 12c to 13½c, according to size; bacon 14½c; fresh killed abattoir dressed hogs \$10 to \$10.25; country dressed, \$8.75 to \$9.50; alive, \$7.25, mixed lots.

Eggs—New laid, 26c to 27c; selects, 28c; No. 1 candled, 17c to 18c per dozen.

Butter—Choicest creamery, 22½c to 23c; undergrades, 21½c to 22½c; dairy, 20½c to 21½c.

BELGIANS BUY 50,000 ACRES.

A Big Land Deal Consummated in the North-West.

A Winnipeg despatch says: An important transaction in the way of Western land purchased has just been completed whereby a Belgian company has secured 50,000 acres of the finest land in the Vermillion Country, which will be disposed of to actual settlers and the vast tract of country brought under rapid cultivation.

Of the area 20,000 acres have been bought from the Canadian Pacific Railway and 30,000 acres from W. A. Campbell and Hugh Sutherland. The lands are to be placed on the market immediately, and active campaign work instituted to bring in settlers till the whole area has been taken up.

The Belgian company is composed of the shrewdest and most conservative capitalists of Europe and are represented by Joseph Branner, of Brussels; Edward Jacobs, of Antwerp; P. G. West, of Paris; R. A. Demme, of London and Paris, and Andre Gouzes, secretary of the company. The price of the land was \$7 an acre. It was bought three years ago for \$4 an acre, which shows the increase that has occurred in values in that time.

WRECKED MEN LEFT HELPLESS.

No Rescue Steamers Near When Valencia Broke Up.

A despatch from Victoria, B. C., says: Frank F. Bunker, assistant superintendent of schools of Seattle, a survivor of the Valencia disaster, who lost his wife and two children, arrived here on Wednesday by the steamer Salvor from the wreck, being the last survivor to leave the scene. He had intended going to Seattle, but has been subpoenaed to give evidence at a Government enquiry into the wreck to commence Thursday. He is extremely anxious to fix the blame of the fact that when the wreck broke up between 12 and 1 p.m. Wednesday there was no steamer off the scene to pick up those who floated out to sea, and Lineman Logan told him there were at least fifty persons who drifted seaward when the wreck broke up, some of whom might have been saved if the steamers had not all left the scene. On Wednesday morning there were three steamers off the wreck, one at least should have been near.

AERONAUTS CROSS CHANNEL.

Balloon Started From London Landed in France.

A despatch from London says: The balloon of the Aero Club which left London Saturday afternoon for France successfully crossed the English Channel and descended in safety at Bermouville, 20 miles inland in France. The entire time consumed from London to the place of descent was four hours and ten minutes. The occupants of the balloon were Messrs. Pollock and Dale, who are members of the Aero Club of the United Kingdom. The name of the balloon is Vivieneyvi. A strong northwest gale was blowing during the passage across the channel, which was made in an hour and three-quarters. Once the balloon ascended to 10,000 feet, where a snow-storm was encountered, and the airship was encrusted with frost.

LARGE CATCHES OF SEALS.

Canadian Fleet Has Done Well Off Cape Horn.

A despatch from Victoria, B.C., says: Advice received from the sealing fleet hunting off Cape Horn and in the Antarctic say the catches are larger up to the present than last season. The schooner Edith R. Balcom took 908 skins up to Dec. 2nd, when she left the grounds, and arrived in Sandpoint on the 8th, leaving again Dec. 16th for a cruise to new grounds located by Capt. Balcom in the Antarctic Ocean. The Baden Powell, Capt. Henderson, took 400 skins; Beatrice L. Corkum, 485; E. B. Marvin, of Victoria, 120; and the Merkland, 22 skins. It was expected that large catches would be made this season

others were collected in a similar way from the neighborhood. No charge was made against them, nor was any enquiry held, but all 27 were shot the same day.

Serguieff, whose letter, the Russ states, has been confirmed by inquiries in the district, concludes with the observation that Col. Riemann's actions were in no way a victory over the internal enemy.

BANK MANAGER SUICIDES

Roderick Mackenzie, of Kingston, Found Dead Near Road.

A Kingston despatch says: Roderick Mackenzie, manager of the Bank of Montreal, was found dead near the Grand Trunk railway tracks, two and one-half miles east of the lower station, about 8.30 o'clock on Saturday morning. When the body was found it had not become cold, so that death had occurred more than half an hour previous. It was found that death had resulted from a drug which Mr. Mackenzie had taken. The bottle, together with a small bottle of glycerine, was found in his pocket.

ABERDEEN ENTERS LONDON

New Viceroy and Countess Accorded a Hearty Reception.

A Dublin despatch says: The Earl of Aberdeen, the new Lord Lieutenant of Ireland, made his State entry into the Irish capital on Saturday afternoon, almost exactly 20 years after he entered Dublin to begin his first term as Lord Lieutenant. The streets were thronged with holiday-makers, and there was a profuse display of bunting. The State procession was of the usual character. The Earl and Countess met with a hearty reception from the sightseers, the Countess, who is keenly interested in the Irish Industries Association, being a particular favorite with the people.

SHOT AT MANAGER.

Attempt to Murder James Crease at Unlace, N. S.

A Halifax despatch says: James Crease, manager of the gold mine at Mount Unlace, narrowly escaped death on Tuesday morning. He was proceeding along an isolated road to the crusher, when a shot was fired from behind a barricade of rock. The bullet missed Crease, but killed his dog. He was unarmed, and did not dare investigate. It is believed to have been a deliberate attempt at murder, as the owners of the mine have suffered much persecution from parties unknown. A few months ago their crusher and several buildings were destroyed by fire, which was believed to be of incendiary origin.

FIRE ON TRANSPORT.

Three Dead, Four Missing on Vessel at San Francisco.

A San Francisco despatch says: Fire broke out late on Wednesday night in the hold of the transport Meade, lying at Folsom Street wharf, and raged for several hours, despite the efforts of the fire department. Fully 20 men were overcome, of whom three are dead. Four others are missing. Third Officer Wallace, one of the dead, was a native of Sydney, N.S.W., and was 25 years of age.

AIDS LONDON POOR.

Lady Strathcona Gives \$52,500 to Queen's Fund for Unemployed.

A London despatch says: Lady Strathcona and Mount Royal, wife of the Canadian High Commissioner, has donated \$52,500 to Queen Alexandra's fund for the assistance of the unemployed. In accordance with the stipulation of the donor, \$47,500 of the amount will be expended in providing for the emigration to Canada of deserving ~~and their families.~~

arms captured on the British steamer John Grafton, sunk in the Gulf of Bothnia, Finland, in September last, and rifles and revolvers captured elsewhere to responsible applicants, and is also permitting the organization of armed estate guards, which are often composed of veterans and commanded by former non-commissioned officers of the regular army.

IMMIGRATION RETURNS.

Arrivals in Ontario Nearly Thirty-five Thousand, Mostly English.

A despatch from Toronto says: The following returns were given on Wednesday by Mr. Thomas Southworth, Director of the Colonization Bureau, to the Minister of Agriculture, and made public:

Immigrants to Ontario during 1905, by nationalities: South African, 10; Australian, 29; Austrian, not otherwise specified, 87; Bohemian, 2; Buckowinian, 97; Croatian and Slavonian, 26; Gallician, 312; Hungarian, not otherwise stated, 61; Slovak, 23; Syrian, 4; Belgian, 30; Brazilian, 1; Dutch, 15; French, 73; German, not otherwise stated, 150; Alsace-Lorraine, 1; Bavarian, Prussian, Saxon, 8; England, 23,316; Welsh, 233; Scotch, 1,193; Irish, 1,763; West Indian, 10; American, 4; Greek, 38; Hebrews, not otherwise stated, 80; Hebrews, Russian, 1,155; Hebrews, Polish, 16; Hebrews, Austrian, 62; Hebrews, German, 13; Italians, 605; Japanese, 5; Newfoundland, 6; New Zealand, 8; Portuguese, 2; Polish, 82; Persian, 2; Roumanian, 29; Russian, including 368 Finns, 1,300; Swiss, 31; Danish, 84; Icelandic, 2; Swedish, 320; Norwegian, 355; Turks, 10; Armenians, 38; Syrians, 23; Arabians, 7; United States citizens, 21; negro, mulatto, quadroons, 4; India, 5. Total, 34,958.

English-speaking	20,913
Central European	992
German	150
Hebrews	1,332
Scandinavians	761
Italian	665
Japanese	5
Russians, including 938 Finns	1,150
Brazilian	1

The English immigrants to the Dominion numbered 49,000, of which 29,913 came to Ontario.

NEW PROHIBITION COUNTY.

Repeal of Scott Act Carries in Prince County, P. E. I.

A Halifax, N. S., despatch says: A vote was taken in Prince County, Prince Edward Island, on Thursday for the repeal of the Scott Act, so that provincial prohibition might be put in force. The repeal carried, and prohibition automatically becomes law. The City of Charlottetown was already under a prohibitory law, the only part of the province where this was so. In Prince the vote stood two to one for Scott Act repeal. It is now the intention to bring on an election for the repeal of the Scott Act in the Counties of Queen's and King's, and when this done, if it carries, which seems certain, the whole island will be under a prohibitory liquor law.

COOL TEACHERS AVERTED PANIC.

Five Hundred School Children Marched Out of Burning Building.

A despatch from Berlin, N. H., says: Fifteen minutes after 500 school children had marched into the Marston Intermediate School on Willard street on Friday, they were quietly assembled and marched out into the street again by a score of cool teachers, a dangerous fire having been discovered in the building. The schoolhouse was a wooden structure, three stories high, and a short time after the exit of the pupils and teachers the flames burst out, and in an hour the entire building was in ruins. Burning brands, carried by a strong wind started small fires in nearby residences, but the firemen quickly extinguished them. The loss on the schoolhouse is about \$20,000.

alive, \$7.25, mixed lots.

Eggs—New laid, 26c to 27c; select, 23c; No. 1 candled, 17c to 18c per dozen.

Butter—Choice creamery, 22½c to 23c; undergrades, 21½c to 22½c; dairy, 20½c to 21½c.

Cheese—Ontario, 13½c to 13c; Quebec, 12½c.

BUFFALO MARKET.

Buffalo, Feb. 6. — Flour — Steady. Wheat — Spring dull; No. 1 northern, 89½c; winter, No. 2 hard in store, 83c. Corn—Dull and lower; No. 2 yellow, 47c; No. 2 corn, 46½c. Oats—Dull and easier; No. 2 white, 34½c No. 2 mixed, 33½c. Barley—Strong; malting, 49 to 56c.

NEW YORK MARKET.

New York, Feb. 6. — Wheat — Spot easy; No. 2 red, 89½c, elevator; No. 2 red, 91½c, f.o.b. afloat; No. 1 northern Duluth, 94½c f.o.b. afloat.

LIVE STOCK MARKET.

Toronto, Feb. 6.—There was a good run at the City Cattle Market to-day, but choice butcher cattle are scarce. There is a good proportion of fair quality medium weight butcher cattle, from 900 to 950 lbs., and for lack of the real choice, about 1,100 lbs., the lighter ones find a ready market at good prices, from \$4 to \$4.25. Choice picked butchers, from 1,100 to 1,500 lbs., fetch from \$4.30 to \$4.40. The commoner butcher cattle are almost too plentiful, and with a rather heavier run to-day the market for these was a little easier. Mixed loads of cow and steers sold at \$3.65 to \$3.80. Butcher cows sold at \$2.50 to \$3.55; choice cows up to \$3.75.

Export.—The market for good export cattle is steady, but the offerings are very limited. Several good lots sold at \$4.50 to \$4.65, and a few picked small lots fetched higher prices.

Stockers.—The market is steady for good stockers, with a good demand for heavy feeders and short-keep.

There is a good market for choice springers.

Sheep and Lambs.—The market is firm. There was a fair run of about 1,800 hogs to-day, and the market is a little lower at \$6.75 for select and \$6.50 for lights and fats.

FIRE DOOR BLOWN OUT.

Fatal Explosion on Passenger Train Near Montreal.

A despatch from Montreal says: One man killed, one badly injured, and an engine wrecked are the results of the explosion of a boiler on a Grand Trunk locomotive (207) near Turcot Village, a few miles from this city, on Saturday evening. Engine No. 207, pulling a Saturday suburban train between Montreal and Vaudeuil, left Vaudeuil at 4.45 p.m. on the return trip. The engineer in charge was E. F. Brown and the fireman W. L. Sharp, both of Montreal. The train was about a mile from Turcot Village when a terrific explosion was heard, and the passengers, of whom there was not a large number, became very nervous. The train stopped down after running a short distance, as the grade was downward slightly at that point. It was then discovered that both the engineer and fireman had disappeared from the cab and that the boiler had exploded. The boiler was empty, the injector having failed to work, and neither the engineer nor fireman had noticed anything wrong until the expansion caused by the heat had caused the explosion. Fireman Sharp was scalded to death, while Brown, the engineer, was blown through the cab window and badly injured. Brown was taken to the General Hospital in this city, and it is expected he will recover. None of the passengers were injured.

STEEL BOUNTIES.

Amount Paid During Last Year Was \$1,900,206.

An Ottawa despatch says: The amount of bounty paid on iron and steel for the past calendar year was \$1,900,206.

the ship, leaving again Dec. 10th for a cruise to new grounds located by Capt. Balcorn in the Antarctic Ocean. The Baden Powell, Capt. Henderson, took 400 skins; Beatrice L. Corkum, 485; E. B. Marvin, of Victoria, 120; and the Merland, 22 skins. It was expected that large catches would be made this season off Cape Horn.

TO BLOW UP THE STATION.

Several Dynamite Cartridges Distributed About.

A despatch from St. Hyacinthe, Que., says: Mr. P. Blanchard, baggageman at the Grand Trunk railway station here, was startled some time during Wednesday night to find a small package containing several dynamite cartridges lying under the seats in the waiting-room. Suspecting something wrong, he made a thorough search throughout the station and found two more cartridges. Evidently some miscreants had in view the blowing-up of the station. The police are now making a diligent search.

KILLED BY SON SHE SPANKED.

Boy of Seven After Threatening Revenge Shoots His Mother Dead.

A despatch from Louisville, Ky., says: At Rogers on Tuesday night Mrs. John Hutton was shot and killed by her seven-year-old son. She had spanked the child for misbehaving. The child in anger said: "I'll kill you for that, mamma." Going to the next room the boy took his father's pistol from a table, pointed it at his mother and saying, "Now," pulled the trigger. The 45 calibre bullet went clear through her heart.

LOW WAGES STIR EMPRESS.

Kaiserin Astounded at Small Sums Paid to Toy Makers.

A despatch from Berlin says: The Empress on Tuesday visited the exhibition of home-made work. Her Majesty expressed amazement at the low wages paid to makers of children's dresses, seven pfennigs an hour, and for 140 tin toy soldiers, sixpence. The Empress asked: "What can be done to stop this misery?"

ANNUAL DEFICIT \$5,000,000.

Sinking Fund Plan Encountering Opposition in Japan.

A despatch from Tokio says: The sinking fund plan is encountering hot opposition in committee. The Jiji estimates that the annual deficit will be \$5,000,000.

Gen. Nodzu has been made a field-marshal, and Admiral Viscount Suke-nori Ito, Chief of the Naval Staff, has been made admiral of the fleet.

Viscount Aoki, formerly Minister of Foreign Affairs, who is to be Japan's first Ambassador to the United States, will leave for America at the end of March.

HOME FOR AGED BURNED.

Nine Bodies Found Among Ruins of Paris Institution.

A despatch from Rennes, France, says: All the buildings of the Home for the Aged, in the Faubourg de Paris, kept by the Little Sisters of the Poor, were destroyed by fire on Sunday night. Nine bodies have been found in the ruins. Three women died from fright. Chaplain Stenou, while attempting to save the inmates of the home, fell and was seriously injured.

WAS A CHARITABLE KING.

King Christian Left Only a Small Fortune.

A despatch from Copenhagen says: It is stated that King Christian left only a small fortune amounting to probably less than \$250,000. The King was exceedingly charitable and gave large sums of money for the relief of the poor and to deserving institutions.

The Volunteer Firemen's Association of Ontario will have a bill submitted at the coming session of the Legislature to require all the fire insurance companies to pay two per cent. of premiums collected to the municipal Treasurer, he amount to be expended in extending the efficiency of volunteer fire companies and in providing a home for disabled and infirm volunteer firemen.

GREAT BRITAIN.

A party of British Labor M. P.'s, including Mr. Keir Hardie, will visit Canada in August.

Lord Roberts has urged the increase

UNDER RAILWAY AGE.

Mother and Nine Children Pay a Fare and a Half.

A Montreal despatch says: What must be very near the cheapest travelling on record in Canada, except by walking, was accomplished on Friday, to the credit of the C. P. R., by a little French-Canadian woman who passed through here from a place called Paul Smith, in the Adirondacks, to Mechanic Falls, Me. The woman was accompanied by nine children, all so young that the company collected only one fare and a half. The eldest child had not yet reached seven, and from that down there was a regular series of twins. The mother moved about freely with her following brood and did not seem to feel as if the burden of her offspring pressed heavily upon her. Constable Richards contemplated the curious assortment of little wayfarers kindly and took delight in providing them with certain comforts during the long wait for the eastbound train.

VESSEL FIRED ON.

Unknown Schooner Assailed a German Steamer.

A Leith, Scotland, despatch says: The German steamer Gemma, which arrived here on Thursday in ballast, reports that she was fired on by the crew of a schooner of unknown nationality in the Cattegat (a large arm of the North Sea) at 9 o'clock on the night of Jan. 27th. Rifle shots were fired at a distance of a ship's length, and the first mate of the Gemma, who was on the bridge, was wounded. The mate says that he could distinctly hear the crew of the schooner shouting, and that he believes the language used was Finnish, Swedish or Russian. Altogether half a dozen shots were fired, after which the schooner sailed to the southward. The steamer made no attempt to stop her. The wounded mate received surgical attendance here and the bullet was extracted.

DETROIT RIVER TUNNEL.

Report That Grand Trunk Railway Will Use it for Through Traffic.

A Detroit despatch says: The Free Press says it is the intention of the Grand Trunk to divert all through traffic between the east and west by way of Detroit, and that the Detroit & Grand Haven division will be double-tracked to Durand, the junction with the main line between Chicago and Port Huron, to be completed by the time the Michigan Central tunnel is finished, when passenger trains between Chicago and the east and the bulk of the through freight trains will be handled via Detroit. The St. Clair tunnel is a single-track tunnel. Even with electrification completed and the elimination of the through traffic, the St. Clair tunnel route will have about all that it can take care of in local point business, as the business of the road is growing so rapidly.

QUEBEC HAS A SURPLUS.

Budget Speech Delivered—\$101,118 More Revenue Than Expenditure.

A Quebec despatch says: The Hon. Mr. McCorkill, Treasurer of the province, delivered his budget speech in the Local Legislature on Wednesday afternoon. The financial statement for the year showed that notwithstanding an increased expenditure, there is a surplus of \$49,005.12 for the fiscal year ending June 30th, 1905, instead of \$13,541.05, as published. The ordinary revenue of the year from all sources amounted to the sum of \$5,039,001.07. The ordinary expenditure amounted to \$4,937,820.77, leaving an excess of receipts over ordinary expenditure of \$101,118.30.

MUCH FREIGHT BURNED.

BATTLE IN PARIS CHURCH

Storm of Protest Against Church Property Inventories.

A despatch from Paris says: Everywhere in France the actual putting into operation of the clause of the Church and State separation bill which provides for the making of inventories of the property of the churches has aroused a storm of protest. In several provincial parishes Catholics have gathered in the churches and made such strong resistance that the Government commissioners were unable to enter.

In Paris on Thursday violent scenes occurred in several churches, notably those of St. Roch and St. Clothilde. An inventory of the property of the Church of St. Roch has not been made, owing to the opposition of the congregation, but the defenders of the latter church succumbed before the energetic assault of an armed force.

GOVERNMENT IS UNYIELDING.

In the Chamber of Deputies on Thursday afternoon Premier Rouvier's reply to an interpellation on the subject of a Socialist deputy, M. Allard, was given amid great uproar. The Government, however, secured a vote of confidence by 384 against 166, after the Premier had assured the Chamber that the Government was desirous of using tact and moderation in carrying out the law, but that it was fully determined to perform its duty.

PRIESTS AMONG THE ARRESTED.

Scenes of extreme violence were transpiring in the meanwhile at the Church of St. Clothilde, near the Chamber of Deputies. The church had been filled since early morning, the congregation including many prominent members of the nobility, Senators and deputies. Before the Government commissioner appeared, a police official who attempted to induce the clergy to permit the inventory to be taken, received severe maltreatment, while outside the policemen and mounted municipal guards were compelled to adopt the sternest measures in order to disperse the turbulent crowd. Many arrests were made, among them being two priests. Many persons, including some policemen, were injured during the fighting.

FIRE ENGINES CALLED IN.

Eventually two fire engines were ordered to take up a position near the church so as to be able if necessary to drench the crowd, which obstinately refused to move, the women showing the greatest determination, opening umbrellas for their protection and in the meantime chanting psalms.

CROWD BELABORED POLICEMAN.

M. Lepine, the Prefect of Police, finally ordered the municipal guards and police to enter the church. Under a shower of broken chairs the officers broke down the railings in front of the entrance, while the crowd rained heavy blows upon them. Then the firemen burst in the doors, and the police and municipal guards entered the building. One of the principal officers was severely wounded. Inside the church the congregation had erected barricades which had to be taken by assault, while men and women fainted.

The energetic measures taken by the police had the effect of almost completely clearing the church, except at the altar, where a few of the congregation and some young priests stood defiantly brandishing sticks. These were allowed to remain.

MANY BELLIGERENTS INJURED.

The eviction of the remainder of the crowd resulted in the injuring of many persons on both sides, including fifty policemen and guards, and a still higher number of militant Catholics. One hundred and fifty members of the congregation were arrested. During the struggle some of the guards had their rifles snatched from them, and they fought with their hands against the people, some of whom were armed with sword sticks.

One of the barricades erected before the church was thirty feet high.

COMMISSIONER PROCEEDS BEHIND A GUARD.

After the people had been driven out Prefect Lepine, to prevent further interruption of the inventory, placed a triple rank of guards armed with rifles around the choir. The commissioner thus was enabled to proceed with his work, which he had about completed by night.

The Prefect of the Department of the Seine has issued an order to the clergy instructing them to give up the keys of their churches, and adding that in case of refusal the commissioners are instructed to call on the armed forces for assistance.

POPE GIVES ADVICE.

His Holiness the Pope has telegraphed to the French Episcopate, advising Catholics to submit to the taking of inventories of the church property by the Government, deploring the scenes of violence that have occurred, and exhorting trust in God. It is rumored that the action is due to a hint on the part of the Government.

ON THE FARM

HATCHING WITH INCUBATORS.

Those who desire to begin hatching early should not fail to employ incubators. The incubator is always ready for use, and of the various makes it may be claimed that they are highly improved. It is cheaper to use incubators for hatching than to rely upon hens. It is a fortunate occurrence if several hens become broody at the same time, but such is seldom the case, hence the early chicks must be hatched with the aid of incubators; in fact, there is no other way of getting out chicks in large numbers except with their aid.

It is not necessary to give directions for hatching with incubators, as all details are provided by the manufacturers, but it is safe to claim that incubators have been so perfected and are sold at

in our possession the old farm home. We shall not always remain at the bottom of the wheel. In time, matters will adjust themselves. Then let us have a firmer determination than ever to know the details of our business, and make the coming year conspicuous for having made progress in reducing the cost of production, the curtailment of unnecessary expenses, and, above all, let us never forget that ours is one of the

RELICS OF BOER WAR.

Militia Department Receives Field Guns and Mausers.

An Ottawa despatch says: The Militia Department has received three Boer field guns and 500 Mauser rifles. As there are not enough field guns to go around, they will be kept at present at headquarters. The Mauser rifles will be distributed among the educational institutions of the country.

and in providing a name for disabled and infirm volunteer firemen.

GREAT BRITAIN.

A party of British Labor M. P.'s, including Mr. Keir Hardie, will visit Canada in August.

Lord Roberts has urged the increase of the British army to a million men, supplementing the regulars with the auxiliary forces.

UNITED STATES.

It is probable that 550,000 men throughout the United States, controlled by the United Mine Workers, will go on strike on April 1.

The Social Democrats of Milwaukee make bathtubs a plank in their platform. They demand a bathtub in every home, also free text books, medical advice and free hospitals.

Miss Clara Smith, who lives in Thomaston, Conn., has invented an auger that will bore a square hole. She is of an ingenious mind, but the auger is her best production, and carpenters say there is a fortune in it for her.

GENERAL.

A German scientist claims to have discovered a specific cure for cancer by vaccination.

A British policeman at Pekin has been disgraced for making an outsider of the Chinese Viceroy keep to the left.

Fears of an anti-foreign rising exist in China. Riots in Cheking have been indifferently opposed by the authorities. The Marquis Ito has outlined the policy of Japan in Korea, which includes the entire national defence of the country by Japan.

All China is at a white heat of political dissension. Discontent with the Government is outspoken as an outgrowth of opposition to foreign encroachment.

According to a statement of a life insurance company the number of deaths caused by the recent Russian repression was six per cent. of the total policies paid.

CHILDREN IN FOSTER HOMES.

The Great Majority are Doing Well and Have Fine Homes.

"There are now over three thousand children placed in foster homes throughout Ontario" reports J. J. Elks, superintendent of the Children's Department. "Many of these boys and girls would have been in orphanages or reformatories or leading idle and vicious lives had they not been helped in this way. They have not been adopted entirely for their work, for over three hundred were babies and five to six hundred others were under ten years of age. It would be a mistake to suppose that all these children grow up simply to become domestic servants and laborers. Many of them receive a first-class education and are able to compare with any class of children in the community in education and ability. Picking up at random some of the visitors' reports, one reads as follows:

"Ida has now grown to be a young woman. Her chief gift is in music, and she plays the piano very beautifully; she is also a great help to her foster parent in the general management of the house."

Regarding another girl the report reads: "This girl is now finished at the Collegiate Institute, and is taking a special business course at the College. Her foster parents have certainly done remarkably well by her, and she has fully met their expectations."

Regarding a boy who was very dull when sent to a foster home, the report states: "The boy attends regularly at school and is in the third book. The teacher boards in his home and helps him a great deal. He is a regular attendant at both church and Sunday-school, and has taken a decided stand for a Christian life."

ports might be given a step ETEE. "Many other extracts from visitors' reports might be given," concluded Mr. Kelso, "all going to show that the foster home plan is far more beneficial than the crowded institution, both to the child and to the country."

sum of \$5,039,001.07. The ordinary expenditure amounted to \$4,937,820.77, leaving an excess of receipts over ordinary expenditure of \$101,118.30.

MUCH FREIGHT BURNED.

Destructive Fire in the C. P. R. Sheds at Winnipeg.

A Winnipeg despatch says: A disastrous fire broke out in the receiving shed and bonded warehouse in the C. P. R. yards on Wednesday evening, where a vast amount of valuable merchandise, consigned mainly to Winnipeg merchants. The section destroyed was 400 feet long by 60 wide. The contents were of a highly inflammable nature, including silks, liquors, several carloads of tea, etc., and burned furiously, defying the efforts of the firemen until the fire walls which intersected the building were reached. Besides the building and its contents, five empty box cars were also burned. The blaze was caused by a live wire.

SHOT DOWN A CANADIAN.

Dr. Donaldson, of Brockville, Killed by German Soldier.

A despatch to the Central News of London, from Cape Town published here says: "Canadians are enraged at an alleged outrage by German soldiers at Swakopmund, German South-west Africa, who are said to have shot and killed Dr. Anson Donaldson, of Brockville, Ontario. According to the story, Dr. Donaldson was walking peacefully in the street when a soldier fired at him, and while he was lying wounded on the ground other soldiers riddled his body with bullets."

FAMINE IN NORTH JAPAN.

Awful Conditions—Thousands Suffering From Starvation.

A Victoria, B.C., despatch says: Advice from Japan by the Empress of China on Wednesday say that famine conditions in North Japan are becoming awful, thousands suffering from starvation. Large numbers of deaths have occurred, and many are dying. The Government is organizing relief, and foreign committees are distributing rice in the famine districts. One-third of the population of 2,820,000 in the three stricken provinces are in distress.

DECIDED ON QUEBEC.

Important Announcement by Sir Thomas Shaughnessy.

A Montreal despatch says: Sir Thomas Shaughnessy, President of the Canadian Pacific Railway Company, announced on Wednesday that the company had decided to make Quebec the western terminus for their new Atlantic steamers, Empress of Britain and Empress of Ireland, until such time as the St. Lawrence route between the ancient capital and Montreal should be deemed by them safe for vessels of this type.

STILL INCREASING.

Customs Returns for January Show a Bigger Revenue.

An Ottawa despatch says: The customs revenue for January amounted to \$3,561,721, an increase of \$556,872. For the seven months the customs revenue increased over \$2,000,000.

LADY GREY DEAD.

Wife of British Foreign Secretary Succumbs to Injuries.

A despatch from London says: Lady Grey, wife of Sir Edward Grey, the Foreign Minister, who sustained concussion of the brain by being thrown from her trap at Eillingham, Northumberland, last Thursday, died on Sunday without having regained consciousness.

chicks must be hatched with the aid of incubators; in fact, there is no other way of getting out chicks in large numbers except with their aid.

It is not necessary to give directions for hatching with incubators, as all details are provided by the manufacturers, but it is safe to claim that incubators have been so perfected, and are sold at so low a price, as to render them a very useful adjunct to poultry keeping, as well as to place them within reach of all.

The selling of a few early chicks that hens may bring off is but a small affair compared with the hatching of several hundred at one operation, and which may be marketed with advantage. The great obstacle to hatching chicks in winter, with hens, is that the hens may not become broody at all during the time when it is important that they do so, and it is also difficult to rear chicks with hens during severely cold weather unless the conditions are very favorable.

Brooders have also been greatly improved, and one is not now compelled to build large and continuous houses, as brooders can be obtained for the management of only one hundred chicks each. It is probably better to have but fifty chicks in a brooder, as two brooders will entail but little more labor than one, but as the operator must be a person of judgment, and give close and personal attention to the advantages of incubators and brooders. They afford opportunities of employment in winter, and good profits are obtained by those who are determined to succeed. Now is the time to produce an incubator, and if early chicks are desired there is no time to lose. It may be claimed in favor of an incubator that, in proportion to its cost, no implements or appliance gives surer results for the investment made.

CURING MEATS.

There are many methods of curing farm meats, some very much better than others. According to the directions of the bureau of animal industry when the meat is cooled rub each piece with salt and allow it to drain over night. Then pack it in a barrel with the hams and shoulders in the bottom, using the strips of bacon to fill in between or to put on top. Weigh out for each 100 pounds of meat 8 pounds of salt, 2 pounds of brown sugar and 2 ounces of saltpetre. Dissolve all in four gallons of water and cover the meat with the brine. For summing win keep right through the summer after they are smoked. The meat will be sweet and the flavor will be good. Pickled and cured meats are smoked to aid in their preservation and to give flavor and palatability. The creosote formed by the combustion of the wood closes the pores, to some extent excluding the air and is objectionable to insects.

Meat that is to be smoked should be removed from the brine two or three days before being put in the smoke-house. If it has been cured in a strong brine it will be best to soak the pieces in cold water over night to prevent a crust of salt from forming on the outside when drained. Washing the meat in tepid water and scrubbing clean with a brush is a good practice. The pieces should then be hung up to drain for a day or two. When drained they may be hung in the house. All should be suspended below the ventilators and should hang so that no two pieces come in contact, as this would prevent uniform smoking.

A slow fire may then be started, warming up the meat gradually. During the winter months in cold climates it is best to keep the fire going continually until the smokeing is complete, holding the temperature at about the same point. If the fire is allowed to die down the meat becomes cold and the smoke does not penetrate readily. This results in heavy smoke on the outside and very little on the inner portion of the meat.

LET US STICK TO THE FARM.

History proves that prosperity has always followed times of great depression, and history will repeat itself. No matter what comes, let us stick to the farm. We may work a few years for nothing, but what matters it so long as we retain

field guns and 500 Mauser rifles. At there are not enough field guns to go around, they will be kept at present at headquarters. The Mauser rifles will be distributed among the educational institutions of the country.

INCREASE IN JAP NAVY.

Expected to be 400,000 Tons by End of Next Fiscal Year.

A despatch from Tokio says: At a meeting of the Sectional Budget Committee on Saturday, a delegate representing the Government said that Japan expected to increase her navy to 400,000 tons by the end of the fiscal year of 1907-8.

PARLIAMENT MEETS MARCH 8.

Date Was Settled at Friday's Meeting of the Cabinet.

A despatch from Ottawa says: A proclamation appeared in the Canadian Gazette on Saturday calling Parliament to meet for the despatch of business on March 8th. The date was settled at Friday's meeting of the Cabinet. As Mr. Brodeur has not yet arrived in town nothing was done about the shuffle of portfolios.

HOUSEHOLD HINTS.

To keep lemons lay on a flat surface and turn a tumbler over each.

Tinned fruits should be opened and taken out of the tin several hours before they are to be eaten.

To clean linoleum without washing remove all the dust, then take a bit of flannel sprinkled with paraffin and rub the linoleum. It will not only make it appear like new, but will preserve it.

Ebony-backed Brushes.—The bristles of these should be washed in a hot, soapy lather, and rinsed first in hot and then in cold water. The backs should be rubbed with a very little linseed oil and then polished with a soft cloth. Dry the bristles as quickly as possible after washing, or they are likely to get soft and flabby. After washing with soap in this way, dry very thoroughly before using.

Polishing Steel.—One of the best methods for cleaning a steel fender or the steel parts of the kitchen range is to dip a piece of damp flannel in the coal ashes and thoroughly rub with this, when a brilliant polish will be obtained.

Laundry Hint.—To prevent the blue spotting the clothes put some out on a piece of white cloth, gather up the corners and tie together. Dip this bag in the water, then squeeze it until the water is blue enough.

Loose Wall-paper.—When paper cannot be retained on the wall by reason of dampness make a coating of the following ingredients: Quarter of a pound of shellac and one quart of naphtha. brush the wall thoroughly with the mixture and allow it to dry perfectly, and you will find this process will render the wall impervious to moisture and the paper in no danger of being loosened.

Keeping Milk.—If a can of milk is placed near an open vessel containing turpentine the smell of turpentine is soon communicated to the milk. The same occurs as regards tobacco, paraffin, asphalt, camphor and many other strong-smelling substances. Milk should be kept at a distance from every volatile substance; milk which has stood in sick chambers should never be used.

Cleaning brass.—For polishing brass beds there is no more reliable medium than the old-fashioned whitening wet with household ammonia, which is less apt to scratch than most other preparations.

To Renovate Silk.—Black silks can be best renovated by sponging with alcohol, and afterward with a little potato water, and winding them round a roller without ironing. To prepare the potato water pare and slice a good-sized potato, and pour about a pint of warm water upon it. Let it stand in a warm place (not hot) for half an hour, when it will be fit for use. This is one of the best methods that can be adopted.

THE PRISON DARK CELL | WINDFALLS FOR CHARITY | END OF AN AGE--TOLSTOI | SOME AMUSING STORIES

THE AWFUL TERRORS OF SOLITARY CONFINEMENT.

The Prisoners Save Their Reasons by Looking for Pins and Buttons.

Solitary confinement, said an ex-warrior to the writer recently, is a system of punishment which I should very much like to see abolished. In nine cases out of ten it fails in its object, and the unfortunate man or woman who has suffered the horrors of the dark cell becomes more callous and unmanageable than before. A prisoner may be utterly dead to all feeling, possess nerves of bronze, be utterly indifferent to life and death, yet a fortnight's solitary confinement will break him all to pieces and leave its mark on him for life. For forty odd years I have been associated with the prisons of America, and I cannot recall one instance in which it could be said with truthfulness that the dark cell ever influenced a prisoner for good.

In the States solitary confinement is a favorite method of punishment, and the dark cell in Sing Sing is a terror. It is a fairly large room, built of stone, and contains one object only—a granite bench in which the occupant, if he pleases, can stretch his limbs. The single door is a foot thick and closes with the nicety of a burglar-proof safe. When once inside and the lock turned it is

IMPOSSIBLE TO HEAR A SOUND I don't believe if a bomb were exploded at the door the prisoner would hear anything. There have been many prisoners placed in that cell, and I would wager all I possess that in no single instance has the punishment failed to morally and physically weaken the unfortunate convict. I have many times questioned those prisoners who have served various terms in the dark cell, and with few exceptions they have declared that the most painful thing in connection with the punishment is the difficulty that they have in sleeping. The blackness is so intense, the silence so unutterable, that the senses are in a constant state of agitation and dispel the very suggestion of sleep.

If a prisoner who has been condemned to a course of solitary confinement in the dark cell can manage beforehand to possess himself of a pin or button, or some other trifle, he is comparatively happy, for he knows that he will not be entirely without something to occupy his mind. What does he do with a pin or button? Why, when he cannot bear the awful silence and blackness any longer he stands in the middle of the cell, casts the pin or button from him, and then quickly claps his hands over his ears, lest he should hear the object drop, for that would give him a clue as to where it had fallen and

SPOIL THE "SPORT."

Then he commences to look for it, and the mere fact of doing this occupies his mind, and many a man's reason has been saved by this means. He will go down on his hands and knees, crawling over the floor, knocking his head against the wall, and barking his shins on the granite bench. Every inch of the cold flag stones is carefully felt in the search for the pin or button, and prisoners have told me that they dread finding the object too soon, for that makes a short "hunt" and spoils the excitement of the chase. One prisoner who had been sentenced to three weeks' "solitary" told me that he had managed to take with him a pin which he had "lost" so successfully that it took him three days to find it.

In one prison in America I have known cases in which men have been sentenced to 100 days' imprisonment in the dark cell and have taken over two years to serve their term, owing to their reason having temporarily left them. They would be taken out, placed in the hospital until they had sufficiently recovered

SOME HANDSOME GIFTS FROM UNKNOWN GIVERS.

Many Instances Occur Every Year of Generous Donations for Some Charity.

The British and Foreign Bible Society has been the recipient of some handsome gifts presented by individuals, many of whom have called at the office in London, given their donation, and gone away without disclosing their identity. One afternoon, not long ago, the secretary was informed that a snabbly-dressed old man had called and wished to see him. Supposing, from his description, that it was someone in search of assistance, the secretary, who was very busy at the time, directed a subordinate to see him. Imagine the surprise of the latter when the seedy stranger drew from his pocket a bank-note for \$5,000 and placed it upon the desk with the request that it might be credited to the funds of the society.

Under no condition would he reveal his name, and the only explanation that he gave was that, having heard much good of the society, and noticing its name upon the door as he passed, it had occurred to him to drop in and

MAKE THEM A PRESENT

of the amount named, which he happened to have in his pocket.

This is only one of many similar incidents within the experience of the society, but they have received many much larger sums from time to time. For instance, a gentleman residing in Bengal, who had seen and appreciated their work abroad, sent them one day a nice little present of \$5,000. Sometimes a donation is received which is accompanied by information as to why it is given.

As long ago as 1849 a steamer from a German port bound for America, and having on board a number of emigrants, put into Ramsgate for repairs, or some similar reason. While there Bibles were taken on board and distributed to the emigrants. Fifty-five years later—that is to say, during last year—a letter was received from a man recalling this distribution of Bibles. The writer said that his father and mother, while in the backwoods, had found great comfort in the possession of the Bible that had been given them on that occasion, and he made the society a handsome donation for that reason. He also stipulated that a small sum should be presented to the lady who had distributed the books on board that ship, if she was still alive.

ONE HUNDRED FARTHINGS

does not sound a very large amount, yet in certain circumstances it may be as much to one individual as \$500 would be to another. At any rate such a sum was saved up and presented to the society not long ago by a crippled seamstress.

In other parts of the world many curious things are given in place of money. In Mongolia silk is a recognized medium of exchange, and lengths of this material are sometimes presented to charity. Candles are given in San Salvador, elaborate dolls in Shanghai, and many more quaint things in other districts. During a collection for the Bible Society's Century Fund \$1,000 was subscribed by the natives of Basutoland, and a further sum was contributed by the Dyakse, or Head-Hunters, of Borneo.

The Society for the Prevention of Cruelty to Animals has been the recipient of many handsome gifts: \$50,000 and \$40,000 are among the items that have been handed over to them, but the largest donation they have ever received from an individual was one of \$66,925. On several occasions gentlemen have called at the office and presented sums of money anonymously. In one case, when handing over banknotes to the value of \$700, the donor said that he did so because he had been disgusted

RUSSIA'S TROUBLES MARK THE DOOM OF EMPIRE, HE SAYS.

The Return of the Land to the Peasants Is the Cure for Present Disturbances.

I have had a talk with Tolstoi regarding his views on the return of the land to the peasants as the only possible cure for Russia's misery, writes a correspondent from Touma, Russia.

He would support any form of nationalization which would give the peasants a true hold on the land which they work. With improved methods of agriculture there is plenty of land to maintain an immensely increased population.

As it is, less than a third of the cultivated land is held by peasants or communities, and less than a quarter of the cultivable land is used at all. The Czar should at once return the land to the peasants, and they, with their long experience of a commercial system, could do very well without a further state, as they have successfully proved in their Siberian colonies.

When I suggested that there was also a town question he put it rather easily aside. "Towns are the places where mankind has begun to rot, and unhappily the rottenness spreads. The mistake of the Liberal politicians in the towns is that they are always aiming at some English or American constitution. But those constitutions are things of the past, and an ideal is never of the past, but always of the future. For the Russians of our time we should aim at something quite different."

Among the many plans of work which as he says, he cannot live to get through is a book he is writing now to be called

"THE END OF AN AGE."

"As you grow older," he said, "day follows day and there does not seem much change, till suddenly you find people speak of you as an old man."

"It is the same with an age in history; suddenly it becomes old and out of date; it is finished. This movement in Russia is not a disturbance, it is not even a revolution, it is the end of an age."

"The age that is ending is the age of the collection of similar States under one large State—the age of Empires. There is no true community between Russia, Finland, Poland, the Caucasus and the rest of them. Or what have Hungary or Syria or Bohemia to do with Austria? No more than Canada, Australia, India and Ireland have to do with England."

"People are beginning to see the absurdity of these things, and in the end people are reasonable. They tell me that if the Russian Empire ceased to exist the Japanese would overrun us. But the Japanese are reasonable people, and seeing how much better we were without an empire they would imitate our example."

The whole argument was magnificent, not so much in its daring as in its quiet confidence.

I remembered how for the last twenty years the cry of empire had been shouted at us as one great object of existence; and here was this rugged old man calmly telling me that we were just at the end of an age—the age of empires. There he sat in the familiar gray shirt and high boots—the greatest personality in the world, and still its greatest rebel—quietly following out the logic of his principles, no matter where it might lead him.

He is 77, and in terms of years one is forced to call him old. The spirit has retired more deeply into the shrunken and wrinkled form; but under the shaggy brows it looks out still with the clearness and high interest of youth.

NOTHING ESCAPES HIM.

He knew all about the intellectual revival in Ireland, and was only sorry it was producing so many poets, for poets are very little good. He had been close

ABOUT PEOPLE WHO OFFERED GRATUITIES TO ROYALTIES.

The Man Who Tipped a Sultan — The Kaiser Tells an Amusing Story.

There is probably only one man living who can boast that he has had a Sultan for boatman and has offered his Majesty a tip, which was gratefully accepted and pocketed; his name is Mr. Walter Harris.

Some time ago when this gentleman was visiting the Sultan of Morocco, he accompanied his Royal host and his favorite Minister on several rowing excursions on a large reservoir, in which the Sultan invariably took an oar. On one occasion his Majesty and the War Minister Mehdi el Menebbi, were rowing, while Mr. Harris steered, and it was difficult to say which of the oarsmen distinguished himself the most. The Sultan, who took the bow-oar, was rowing a steady ten strokes a minute,

CATCHING PERIODICAL CRABS

and drenching his fellow-rower with water, while the latter was pulling at least five strokes to his master's one. "But both," says Mr. Harris, "were hugely delighted with the performance, and our spirits were of the highest."

"There are no Sultans and Viziers here," said his Majesty to me; "we are both boatmen, and you are the passenger. We are crossing a Moorish ferry."

"Entering into the Sultan's little joke, I replied that they were the worst ferry-men I had ever seen, and that on landing I should complain to the authorities of their incapacity."

"Oh, you will, will you?" replied the Mulai Abdul Aziz. "Then all I can say is, we won't put you ashore until you pay us."

"Then I'll stop here," "All right," replied the Sultan, and he promptly began to splash me with all his might and main, though poor Menebbi was getting as wet as I was.

"Will you pay?" asked his Majesty.

"Willing," I laughed. "How much?" "Half a peseta each" (about eight cents), answered the Sultan—and they duly pocketed their fee. It was the first time in my life I had tipped a Sultan and a Minister of War."

Archduke Joseph of Austria used to tell, with great enjoyment, a story of how he received a tip one day. His Royal Highness was walking in the park surrounding his castle near Fiume, when he was accosted by a tourist, who asked him if he might go through the castle. The Archduke not only gave the required permission, but

ACTED AS CICERONE

to the stranger, conducting him through the various apartments and describing everything of interest. The tourist was so pleased with his amiable and interesting guide, whom he took to be one of the castle gardeners, that on parting he gave him a friendly pat on the back and thrust a couple of florins in his hand. The Archduke pocketed the coins with a "thank you," and later had them mounted and framed with this inscription underneath: "This is the only money that I have ever really earned in my life."

When the Emperor of Austria was taking a stroll recently near Monte Carlo he had a little adventure which pleased him hugely. His attention was attracted by an unruly horse, who was doing his best to smash the dashboard of the carriage to which he was attached, and who was quite beyond his driver's control. Franz Joseph at once went to the rescue, seized the reins, and, after a struggle, reduced the horse to a proper state of submission. The driver was naturally grateful for such timely assistance, and, turning to the stranger, said, "I don't know who you are, but I'd like to pay you in some way for your kindness; and so if you step in-

In one prison in America I have known cases in which men have been sentenced to 100 days' imprisonment in the dark cell and have taken over two years to serve their term, owing to their reason having temporarily left them. They would be taken out, placed in the hospital until they had sufficiently recovered, and then thrust back again into the silence and darkness.

I remember once when I was attached to the famous Donmore Prison, we had a man in the condemned cell whose conduct was fairly good until a few days before his execution was to take place. Then to use a vulgarism,

HE "DAN AMUCK"

His cell was well lighted and cheerful, he was provided with quite a library, while his food was of the best. One day he developed the fatal habit of thinking. The full horror of his position burst upon him with the suddenness of an avalanche. He shouted and raved, broke everything he could lay his hands on, and screamed incessantly through one entire night. He was threatened with the dark cell, but he was past reasoning with, and his cries could be heard all over the prison.

Then the Governor, who was a humane man, and looked upon the dark cell with as great disfavor as myself, determined to try another remedy, which he had before found very effective. This was called the "cold-water cure," which you may perhaps have heard of. Well, the cell was cleared of everything portable and the door and windows were securely barred and locked, only one small ventilator, about 8 inches square and close to the ceiling, remaining open. A hydrant was fixed to the water-main outside, after which I mounted a ladder, the nozzle of the hose under my left arm and out my head through the ventilator. The prisoner was roaring round the cell like a madman, raising every now and then to emit the most ear-piercing screams. I called to the poor wretch and informed him that I would give him exactly five minutes in which to stop his bellowing, after which if he still declined to be quiet, I should proceed with—

THE "COLD-WATER CURE."

He took not the slightest notice, but continued his scurrying and screaming until the allotted time was up. Then I gave a signal with my foot to the man outside, motioning him to turn on the water from the main. He staggered as the water struck him, but by a remarkable exertion of strength he recovered himself and still raved on.

This went on for half an hour, and all the time he kept up his incessant shouting, until I thought his throat would have cracked. Then he suddenly collapsed, threw up his hands, and fell forward on his face. We were in the room in a twinkling, for there was a foot of water in the cell and he might have been drowned. We soon had him on his feet, and found him utterly exhausted. For days he never spoke a word. The treatment was thoroughly effective, and, according to the doctor's report, no injury had been done to the man, which would hardly have been the case had we placed him in a dark cell. Curiously enough, he was afterward relieved, and still occupies a place in the prison where I administered to him the "cold-water cure."—London Tit-Bits.

OLDEST OF PREMIERS.

With the exception of Lord Palmerston who was over 70 when called to the position of Premier of Great Britain, Sir Henry Campbell-Bannerman takes office later in life than any other of his predecessors. Sir Henry is 69. Mr. Balfour was 54 when he took up the reins of power from the hands of the late Lord Salisbury. Sir Henry, who is a son of the late Sir James Campbell and added the name of Bannerman under the will of a maternal uncle, is one of the oldest members of Parliament. He entered the House as long ago as 1863.

Meek: "I saw, old chap, I'm in shocking bad luck. I want money badly, and I haven't the least idea where I can get it." Peck: "Well, I'm glad to hear that. I thought perhaps you had an idea you could borrow from me."

most important they have ever known from an individual was one of \$86,925. On several occasions gentlemen have called at the office and presented sums of money anonymously. In one case, when handing over bank-notes to the value of \$700, the donor said that he did so because he had been disgusted to witness

A HORSE BEING ILL-TREATED

by a cab-driver. He had gone straight off to the offices of the society there and then to make his donation. \$2,500 was given on another occasion under similar conditions.

Not infrequently they receive legacies or donations from people who make a stipulation that certain animals of theirs shall be looked after so long as they live. A gentleman in Jamaica recently left such a legacy, bargaining that all the animals upon his estate over there should be kept and looked after until they died.

The Hospital Sunday Fund has received generous support from many individuals. One gentleman recently contributed \$32,500, while another gives every year \$125 for every \$5 that is collected in any place of worship for the fund.—London Tit-Bits.

RINGS WITH SECRET LOCKET.

Pebbles Mounted for Sleeve Links and Other Jewelry Novelties.

Some men's gold snail rings have secret locket tops, and the same idea is applied to gold sleeve links, with oval tops opening in like manner, to hold a tiny photograph.

All sorts of odd links and knots are seen on fancy bracelets.

A hair-jar of crystal, of octagon form, has a cherub design on the silver top.

For unique effects that of wearing ancient jewels, mounted as pendants or charms, is gaining favor.

Toothbrush stands have the frame fitted at the top with glass caps, made to slide over the brushes they accommodate, as a means of protecting them from dust.

There is a fancy just now of having pebbles mounted, not as heirlooms, but for their beauty! Mounted in silver or gold, being duly polished, they may be made useful as sleeve links.

The narcissus is one of the prettiest designs seen on silver toilet sets, being a conventional arrangement in filling the space assigned with the natural form of flower and leaf.

For the debutante is an engagement book of pompadour design, or hand painted with rosebuds or forget-me-nots and finished with gold clasps and a pretty gold pencil attached by a slender chain.

Among the taking frivolities of the moment are the useful little trinkets in miniature form which, if not indispensable, are, as a whim of fashion, still worth while possessing for their beauty and grace.

A charming cross displays two emeralds alternating with a beautiful gold leaf in dull yellow, while another cross composed of pearls is finished with a group of light colored sapphires at each end of the cross.

The popularity of the old-fashioned locket, which is suspended from a necklace, is the occasion for the introduction of something new in this line, which has been seen in the shape of a golden ball locket worn as a charm on a jewel set bangle.

Dog collars are fashionable for evening wear in jet, pearls, precious or semi-precious stones. Rose quartz, pink lacincth cut crystals and mother of pearl are appropriate for young girls in collars, necklaces or beads. Also pale blue and pink bead crisscross collarettes.

Women who wear other than lace cuffs, as a combination of linen and lace have an interest in the revival of cuff links, which are of course of a variety of styles of the plain or decorative order, as conventional flowers with a pearl or diamond at the heart, or fancy knots of dull gold.

Sufferer: "Do you extract teeth without pain?" Dentist: "Not always. I sprained my wrist on one a couple of days ago, and it still hurts!"

my brows it looks out still with the clearness and high interest of youth.

NOTHING ESCAPES HIM.

He knew all about the intellectual revival in Ireland, and was only sorry it was producing so many poets, for poets are very little good. He had been pleased to find that his fellow Puritan, Mr. Bernard Shaw, thought rather highly of Shakespeare, in whom he himself had never discovered any satisfaction.

But besides all this interest in the affairs of the world, there seemed to hang over him that serene and distinguishing grace which the Middle Ages called sanctity and considered a thing to be worshipped. It was the grace of a long and absterious life, consistently devoted to one high aim.

For I see no reason to agree with the superficial critics who drew a sharp dividing line in his career and in the course of his thought. All the principles of his later teaching are to be seen illustrated in the two great imaginative works of his earlier manhood, and if there is any fault to be found with life so conspicuous and inspiring, I should seek it only in a rather remorseless consistency of reason.

But I should much rather leave it to others to point out weakness in so gracious and noble a personality.

FACTS ABOUT WORDS.

How Certain Terms Have Obtained Their Meanings.

"Expire" in its literal sense is breathing out. Inspiration and expiration together constitute respiration. Isaac Walton observed that "if the inspiring or expiring organ of any animal be stopped, it suddenly dies." The Romans spoke of "breathing out" the breath of life in stead of "dying," by way of euphemism, just as they said "Vixit" (he has lived), instead of "He is dead." In all languages the reluctance frankly to say "dead" or "die" appears. Hence such words or phrases as "pass away," "decease," "demise," "the departed," "defunct," "the late," "no more," "if anything should happen to me."

"Row" is one of the many words which are rising to respectability with advancing age. Todd's edition of Johnson's dictionary (1877) denounced it "as a very low expression." Since it appears to have been occasionally written "roue" about a century ago, some have wished to find its origin in the French "roue." Todd identifies it with the older "rouse," a drunken bout, big drinking glass, or big drink, in which sense that word several times occurs in Shakespeare. Hamlet observes that "the king doth wake to-night, and takes his rouse." "Row" is supposed to be a false singular formed from "rouse," mistaken for a plural, as "pea" for "pease," "sherry" from "sherris," "cherry" from "cherries." But it seems simpler to explain "row" as short for "row-de-do," an excellent word for noise.

CHINESE AND FOREIGNERS.

The Chinese began by despising Europeans and ended by hating and fearing them, says an exchange. Their hatred has not been lessened by the Japanese victories over Russia, but their fear has been. It is manifest to them that the "foreign devils" are not invincible, and, therefore, are not so much to be dreaded. The Chinese do not love the Japanese, who have driven the Russians out of Manchuria only to take their place, to a certain extent. But unquestionably the Russian mishaps by sea and land have strengthened the anti-foreign sentiment. That sentiment finds expression in many ways. The boycott of American goods may be taken as a protest against harsh enforcement of the law for the exclusion of coolies. The recent murder of the American missionaries, the disturbances at Shanghai and the unfriendly attitude toward foreigners of different nationalities in all parts of the Empire are more serious and significant than the boycott. Europe and America do not seem so formidable as they did two years ago. The yellow man has a better opinion of himself and a poorer opinion of the Caucasian.

In the rescue, seized the reins, and, after a struggle, reduced the horse to a proper state of submission. The driver was naturally grateful for such timely assistance, and, turning to the stranger, said, "I don't know who you are, but I'd like to pay you in some way for your kindness; and so if you step into the carriage, I'll drive you home for nothing." The Emperor thanked the man graciously for his kind offer, but

DECLINED THE FREE DRIVE.

The Kaiser feels an amusing story of an experience of this kind some years ago, just before his accession to the throne. As a young man he loved to wander about Berlin incognito and get into conversation with some of his future subjects. On this particular occasion he was rambling after dark along the Konigsgratzer Strasse when he was overtaken by a stranger, who accosted him thus:

"Say, young man, I don't know your lingo but can you direct me to the Potsdam station?"

"With pleasure," was the unexpected answer, in English; and the Crown Prince took the man in tow, and, chatting gaily with him, escorted him to the entrance of the station.

"Well, stranger," said the American, at parting, "I guess you're the right sort, and," putting a mark in his hand, "I shall be proud if you'll drink my health."

The Emperor still treasures that coin and produces it proudly whenever he tells the story.

It was another tourist, an Englishman, who was walking one day last summer along the Regering's Gatan, Stockholm, when he overlook a tall, spectacled man.

RATHER SHABBILY ATTIRED.

and asked his way to the National Museum. The stranger, who, to the tourist's surprise, spoke English fairly well, offered himself as guide, and proved a most interesting companion. When the museum was reached, the tourist put his hand in his pocket and producing a coin was about to present it to his cicerone, when the latter, with a smile and a demure wave of the hand, said: "Thank you very much. It has been a great pleasure. I am the Crown Prince."

TOILETS OF ANCIENT TIMES.

Women Were Assiduous Devotees at Beauty's Shrine.

Women of ancient, luxurious Rome used to eat parsley as a mouth cleanser. Honey boiled in wine and aniseed was also a sweetener of the breath and pestile of myrtle were employed for the same purpose. Silver tongs and knives were employed in caring for the nails. No woman of social eminence cut her own finger-nails; those who had not skilled slaves employed barbers. Perfection in these respects was one of the thirty beauties attributed to Helen of Troy. Great pains were bestowed on the feet, for it was considered that the breeding was betrayed by them as easily as by the hands. They were always much in evidence, the sandals worn not hiding them. Long, tapering fingers were highly prized. Various kinds of herb decorations were employed to beautify the fingers. Pliny gives recipes for removing any undesired substance from the nails.

Asses' milk contributed to the whiteness of the woman's skin. It was sometimes poured into the bath and the whole body layed in it, and sometimes the hands and face were sponged with it from a silver basin, the soft linen towel completing the process. The hair was delicately scented and all kinds of washes and burnishes were applied to it. It took many slaves to bring the tresses into the classic hands or high pyramids which were the fashion at various times. Perfumes were not only applied to hair, hands, clothes, and the person generally, but pervaded the rooms, which were hung with garlands and decorated with blooms of many kinds. The dresses of Roman matrons were made brilliant with various processes of pressing and smoothing, machines being employed for the purpose.

ASTOR WILL IMPROVE IT

WILL SPEND \$1,000,000 ON HIS ESTATE OF HEVER CASTLE.

Henry VIII. Slept in Building—Said to Have Gone There to Visit Anne Boleyn.

Wm. Waldorf Astor has decided upon a plan for the restoration of the historic castle of Hever, which will have a tendency to restore to this property many of its traditional glories, says a London letter. Mr. Astor has kept his plans in connection with the improvements of the castle of Hever a profound secret, and it was not until he actually commenced the operations looking towards the improvement of the property that any of his ideas in this connection leaked out. Mr. Astor is best known as a large landed property owner in England by his estate at Cliveden. But if his plans for the revival of the castle of Hever do not make this estate begin to compare with that of Cliveden it is certain that the property will be improved until in its magnificence it surpasses even what it was back in the days of Anne Boleyn and King Henry VIII.

This new Astor estate is located in Kent, on the banks of the River Eden. Already the old bridge across the river has been removed preparatory to the building of a strong bridge with wide spans, broad-roadway, and steel frames. Among the other plans for the improvement may be mentioned the following:

Restoration of the castle to its ancient battlemented glories.

Building in ancient style a series of castle villages.

A model farm.

An Italian garden.

A lake of 45 acres.

An artesian well and a capacious reservoir.

Widening and changing the course of the River Eden.

A new public road three-quarters of a mile long.

A large power house for electric light, etc.

An extensive deer park.

USE HUNDREDS OF HORSES.

Some idea of the magnitude of the operations undertaken by Mr. Astor may be gathered from the carting operations alone. The contract for these was given to a local man. This contractor had a score of horses of his own. They were all needed. He looked around for more, and secured the help and co-operation of local farmers. Altogether some hundred horses have been constantly engaged for two years past, and it is anticipated that as many more will be required for three years to come.

Historians will be most interested in the changes which Mr. Astor is making in the castle itself. One room called after Henry VIII.—in which the bluff old English King is declared to have slept while on a visit to Anne Boleyn—will be set apart for Mr. Astor himself, and the historic long gallery will be made the resting place of the masterpieces of many famous artists. Anne Boleyn's rooms will remain untenanted, Mr. Astor preferring to have them stand as they were when he came into possession of the property.

WILL BE A MODEL FARM.

Originally there were three farms on the estate. Two of these have disappeared. The remaining one has been so transformed and perfected that it is probably without an equal in the United Kingdom as a model farm. No money has been spared in the laying out and decorations of the property. Expensive oak has been introduced into the various cowsheds and piggeries. More than \$1,500 was expended in woodwork for a single outbuilding. The walls of the piggeries were treated with a mixture of new milk and cement, while chocolate and white tiles decorate the cowsheds. The dairy is exquisite. The floor of one of the departments is panelled with mosaic work that was made by Italian workmen, while a richly-carved fountain flows in the centre. A large tract of

SUNLIGHT SOAP

\$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemical or any form of adulteration.

is equally good with hard or soft water.

If you use Sunlight Soap in the Sunlight way (follow directions) you need not boil nor rub your clothes, and yet you will get better results than with boiling and hard rubbing in the old-fashioned way.

As Sunlight Soap contains no injurious chemicals and is perfectly pure, the most delicate fabrics and dainty silks and laces may be washed without the slightest injury.

Your money refunded

by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

"LABBY" IN THE COMMONS

HIS RECOLLECTIONS OF FORTY YEARS AGO.

Obstruction Not Known Then — Old Unwritten Rules Now Out of Use.

Henry Labouchere, who recently retired from the British House of Commons, gives interesting recollections as he first knew it.

When I was first returned to Parliament forty years ago, the rules of the House afforded ample opportunity for obstruction; but there was very little of it. We met at four o'clock. Questions were comparatively few, but if anyone wished to make himself particularly disagreeable, he put down a very long one, and insisted upon reading it out. If he was not satisfied with the reply he could make a speech and put himself in order by concluding with a motion of adjournment. But he seldom did. Anyone might move a motion on "going into Committee of Supply," and one motion did not preclude another. But although there was no closure, the debates on these motions rarely lasted beyond the dinner hour. On a dress debate it was agreed by the whips of the two parties when it was to end.

"OVERTIME" NOT GIVEN.

If anyone got up after the fixed hour, he was howled down impartially by both sides of the House. Occasionally a member persevered for a long time, but it was a point of honor not to allow a word to be heard and no speaker ever beat the House. If a member on any occasion greatly exceeded his welcome, he, too, was howled down, unless he were a man of great importance. But even the latter were often shouted down, if they abused the license accorded to them without reasonable cause. In great debates, unless there was any difficulty in reaching the time settled for the division, a humble and obscure member had not the faintest chance of catching the speaker's eye. That dignity was given a list of speakers by the whips of each party, and he hardly ever traveled out of it.

GROWTH OF OBSTRUCTION.

Obstruction became an habitual parliamentary weapon so soon as a few Irish under Mr. Parnell determined to ignore these unwritten laws. I by no means blame them, nor can anybody else, for when they had set the lead, both Liberals and Conservatives impartially followed it, when they were in opposition. Of course, many grounds were put forward for so doing. But the real reason has been that each party, when in opposition, has thought that it would benefit by the Ministry being unable to legislate, for at the end of a session the

LOST 'ON GRAND BANKS

DANGERS AND SUFFERINGS OF THE FISHERMEN.

The American Boats Suffer Through the Newfoundland Trouble.

Newfoundland's crusade against the American herring vessels engaged in that fishery on its western coast has hampered and delayed them greatly. Few of them this year will escape the terrible mid-winter storms which imperil their safety when running from that coast to their home ports, heavily laden as they are, in the height of this rigorous season. There are 50 or 60 sailing vessels in the herring trade this year, and each carries from six to ten men. When a craft is filled below hatches with frozen or salted herring she takes a deck load of barrels containing these fish in pickle, and thus laden makes for Boston or Gloucester. No other form of marine enterprise at this period of the year equals that voyage.

MANY FACILITIES.

The vessels have to negotiate a part of the ocean which is literally scourged by storms, and the facilities among the herring fleet are shocking. None of the vessels exceeds 100 tons, and, laden as they are, they float but a foot or two above the water, so that every sea when a storm arises, sweeps their decks from end to end. The water then freezes and coats each vessel thickly with crystal, especially about the bows. This added weight sags her down and thus increases her peril, so that long-handled wooden mallets have to be yielded industriously by the crew to beat off this coating. Often the men have to cover their heads with flannel cloths to prevent their faces from being cut by the freezing spindrift from above the bows, this precaution alone making it possible for them to look ahead.

LOADED WITH ICE.

In such weather not only are the decks and bulwarks coated, but the sails become as solid as iron plates and the ropes and halyards as stiff as rods. Very often the craft becomes unmanageable and a dire disaster ensues, the boat being engulfed with all hands. Or if an accident befalls her, like the breaking of a boom or spar, her plight is scarcely better, though she may contrive to make port, like a broken-winged bird. Frequently men are washed overboard from the decks of these tiny trawlers, whose hulls are scarcely better than platforms level with the waves. During the long and dreary nights the tired lookouts keeping watch on one of these vessels may doze for a moment and then a big sea boards her and sweeps the men off into the sea, never to rise again.

ACROBAT A CENTURY OLD

ENGLISH VETERAN NOW IN HIS HUNDREDTH YEAR.

Performed Before Three Sovereigns — Still Active in Spite of His Age.

Henry Johnson, of Grantham, who boasts that he is the oldest acrobat in England, entered on his hundredth year December 26th. In spite of his years he is as lithe and active as many a man 60 years his junior.

Johnson has lived in the reigns of five British sovereigns, and prides himself on the fact that he has performed before three of them—King William IV., Queen Victoria, and King Edward VII., when he was Prince of Wales. He is now quietly enjoying the evening of his life at Grantham, and he hopes to live for many years to come.

Johnson was born on Christmas day, 1816, at Norwich, but his recollection of his childhood is very hazy. He remembers that he was left an orphan at a very early age, and had a hard struggle to maintain himself. His elder brother wanted him to become a hostler, but his ambition had been fired by seeing a troupe of travelling acrobats, and he rejected the suggestion with scorn. He attained his ambition when still in his teens by becoming a tight-rope walker and an equestrian acrobat with a small travelling troupe.

BEFORE KING WILLIAM.

Johnson's first appearance with royalty was when he and Mullaba performed before King William IV. at Aylesbury, and the King was so pleased with them that he commanded them to appear before him at Buckingham Palace.

They travelled to London by coach, and the King rewarded them with fifty guineas each, and gave them a royal license to perform in any town, city or village in the United Kingdom. Later he performed before Queen Victoria at Windsor, and before King Edward VII. (then Prince of Wales) at Sandringham.

REMARKABLE ACTIVITY.

Johnson, in spite of his great age, is still in possession of all his faculties. He can walk about with the activity of a much younger man, and some time ago he made a bet that he would dance a hornpipe on a table. A few weeks ago he challenged a local horse dealer to a walking match, but although the horse dealer is twenty years his junior, he declined the match.

SOME QUAIN ANNIVERSARIES.

How Some People Celebrate Important Events in Their Lives.

A police-court is a strange place wherein to keep the anniversary of a

lous cowsheds and piggeries. More than \$1,500 was expended in woodwork for a single outbuilding. The walls of the pigsties were treated with a mixture of new milk and cement, while chocolate and white tiles decorated the cowsheds. The dairy is exquisite. The floor of one of the departments is panelled with mosaic work that was laid by Italian workmen, while a richly-carved fountain plays in the centre. A large tract of country is to be fashioned into a park for a deer run, and several of these animals are to be imported as soon as everything is ready for their reception. This park is to be enclosed by a wall of timber nine feet high, and will be well wooded.

TO SPEND A MILLION.

Some idea of the expense and the magnitude of the plans of Mr. Astor may be gathered from the fact that even the course of the Eden has been changed to suit him. Originally the castle site was somewhat low and the estate suffered severely from floods. In the future, however, the land will be safe from the sudden rising of the water.

It is not known how much Mr. Astor contemplates spending on this property, but judging from appearances the cost of the improvements alone will reach at least \$1,000,000.

ROOT OF THE VIOLET.

May be Useful as a Domestic Remedy in Country Practice.

Although this favorite little flower has given its name to one of the primitive colors, we must not imagine that the violet is always of a violet hue. It is often blue, purple, lilac or white.

The violet tricolor, indeed, is partly yellow, but then in common life this is called a heartsease. Botanically speaking, however, it is a violet. The flowers are formerly considered pectoral, useful in diseases of the chest, but the supposed virtues of the whole class of pectoral medicines have vanished before the severe medical criticism of the last fifty years, and at the present day the petals of the violet are never prescribed by educated practitioners.

The root of the violet, however, is an emetic, and may be useful as a domestic remedy in country practice. The dose is forty grains. The infusion of violets is one of the most delicate tests of the presence of acids and alkalies. The former changes its color to red, the latter to green. According to Lighthfoot, the Highland ladies of former times used the violet as a cosmetic, the old Gaelic receipt being:—"Anoint thy face with goat's milk, in which violets have been infused, and there is not a young prince on earth who will not be charmed with thy beauty."

PREMATURE BURIAL.

Its Horrors Painted by Archdeacon Colley.

A gruesome story was narrated by Archdeacon Colley at the meeting of the London (England) Association for the Prevention of Premature Burial.

He was himself, he said, an instance of an escape from premature burial. In his childish recollection, he remembered having leeches applied to his chest, and as a reward for his endurance was given two peals of bells, and playing with these one day he remembered them dropping from his hands and a pain shooting from the right ear to the left. He was laid in a coffin, and for two and a half days he was regarded as dead, till his nurse noticed a movement of his hand, and the doctor being called, he was restored to consciousness.

Only two years ago, the Archdeacon continued, a grave in his own parish was opened and proof was found of a body having been buried alive from the position of the bones. It was seen that the person had wrenched up the lid of the coffin and turned over on his left side.

"I am prepared to say," remarked Mr. Moulton, "that my wife is not what could be called a quarrelsome woman." "Indeed!" "I never knew her to quarrel in my life. She merely announces what she wants, and that's an end of the matter."

these unwritten laws. I by no means blame them, nor can anybody else, for when they had set the lead, both Liberals and Conservatives impartially followed it, when they were in opposition. Of course, many grounds were put forward for so doing. But the real reason has been that each party, when in opposition, has thought that it would benefit by the Ministry being unable to legislate, for, at the end of a session the Opposition M.P.'s could explain to their constituents that it had been a barren one, through the fault of the Ministry. By successive alterations of the rules obstruction of the old type has been rendered impossible.

Why is it, then, that less is done during a session, and that very few issues that are dealt with are fairly discussed? This is largely the consequence of the change that has taken place in the composition of the House itself. There are more members who are—I mean it in no invidious sense—professional politicians, and who talk, not only on some special subject that they have taken up, but upon all subjects. Their speeches are also often exceedingly long. When they rise to deliver them they treat the matter under discussion as though they were delivering a lecture to an assembly that knew nothing about it.

TALKING AGAINST TIME.

Mr. Labouchere deprecates the increase in the power of the executive, and the decrease in the control of Parliament over it, and expresses no surprise that people no longer regard the House of Commons as the great Council of the nation, but despise it.

Some twenty years ago there was a rule framed that no fresh business should be entered into after half-past twelve. What was the consequence? Almost inevitably the business on hand before that hour was continued over it to prevent new business being taken. I remember, one night that the next business was, for some reason or other, objected to by Lord Randolph Churenill and by me, and about half-past ten the debate then on seemed likely to last for two hours. We therefore agreed to talk for these two hours. Neither of us had the slightest interest in the bill then being discussed, or knew anything about it. We tossed up which should speak first, and then both went to the bill-office to get the bill. Lord Randolph lost the toss, and had to begin. He honestly did his hour and then I did mine. But I am sure that the House knew as little as to the real merits and demerits of the bill after we both had spoken as before.

SHORT-LIVED DOCTORS.

Insufficient Rest and Defective Nutrition.

The diseases which claim the most victims among physicians relatively to all males are gout and diabetes, and there is a high relative mortality from diseases of the nervous system, circulatory system and kidneys.

From the nature of his habits the physician is not subject to accidents, and, though he is brought into contact with infection to a greater extent than other men, his preventive means are successful and his mortality from infection is very low. Freedom from prolonged muscular strains and high blood tension apparently saves him from arteriosclerosis, but suicide claims many, and so do the drug habits acquired by the nervously exhausted. It has been said that three-fourths of French morphine users are physicians.

The cause of the physician's early death is evidently the excessive nervous expenditure, insufficient rest and defective nutrition, inseparable from his calling, with its broken and restricted sleep, irregular hours of work, rest and meals, the worry when lives depend upon his judgment and the lack of a day of complete relaxation in each week. The physician who sees his patients every day in the week, month after month, and cannot learn to forget them when he goes home, merely burns the candle at both ends. He violates the law obeyed by every other animal, that there shall be short periods of moderate exertion interrupted by longer periods of rest when repairs are made. It is not too much work as a rule, but scattered work, which prevents rest.

scarcely better, though she may contrive to make port, like a broken-winged bird. Frequently men are washed overboard from the decks of these tiny trawlers, whose hulls are scarcely better than platforms level with the waves. During the long and dreary nights the tired lookouts keeping watch on one of these vessels may doze for a moment and then a big sea boards her and sweeps the men off into the sea, never to rise again. For clad as they are for such weather, it is impossible to keep aloft, and rescue is never thought of. They are a dark-devil class of men, these herring-fishers, and no neri! daunts them. About the Newfoundland coast great ice floes are usually forming and to get past these is no easy matter in frail wooden vessels, for a single stroke from one of these masses would destroy a modern warship as speedily as an enemy's ram. This is one of the greatest hazards of the voyage, and it has proved the ruin of more than one of the fleet.

BOATS LOST YEARLY.

In December, 1901, the Parkhurst vanished with eight hands, her whole crew, and the belief that she was struck by a floe and sunk at once. The Harvester met a similar fate the next season under like circumstances, it is believed. The Gloriana was wrecked on Red Island in February, 1902, and eight out of her ten men were victims with her, but the others told how she came to be driven on a lee shore when some of her gear gave way at a critical moment. So the list goes.

THE PERSISTENT GIPSIES.

Great Britain Cannot Get Rid of This Strange People.

"Such as wake on the night and sleep on the day, and haunt taverns and ale-houses, and no man wot from whence they come nor whither they go." So quaintly describes an old English statute against the Gipsies. Ever since the year 1530, says a writer in the London Standard, Great Britain has tried to get rid of this strange people without appreciable success. Every year or so some county is up in arms against them, yet they persist in returning, and apparently thrive under persecution.

The Gipsies are popularly supposed to come from Egypt, as their name indicates, but their origin is traced farther east than the land of the Nile. Wherever they come from, they are separate people a tribe quite by themselves.

They appeared in England about 1505, and twenty-six years later Henry VIII. ordered them to leave the country in sixteen days, taking all their goods with them. "An outlandish people," he called them. The act was ineffectual, and in 1562 Elizabeth framed a still more stringent law, and many were hanged.

"But what numbers were executed," says one old writer, "yet notwithstanding, all would not prevail, but they wandered as before, uppe and downe." They got into Scotland and became an intolerable nuisance. Both in that country and in England legislation proved quite ineffectual. The acts gradually fell into desuetude. Under George IV. all that was left of the ban against the Gipsies was the mild law that any person "telling fortunes shall be deemed a rogue and a vagabond."

"Gipsies are no longer a proscribed class," says a recent writer. "Probably the modern Gipsy does little evil beyond begging and petty theft, but his determination not to work is as strong as ever, and it seems curious that an industrial people like ours continues to tolerate a horde of professional idlers." How numerous the horde is may be gathered from the fact that the number who wintered in Surrey one year was estimated at ten thousand.

The language as well as the life of the Gipsy tribe has a tenacity of its own. Many of their words have taken firm hold in a half-slang, half-permissible way. Shaver is the Gipsy word for child. Pal is pure Gipsy. Coder means a man. Cutting up is Gipsy for quarrelling, and cove stands for "that fellow."

Mr. Youngblood: "What's Dotted those eggs eighteen minutes? Why, they needed only three!" Mrs. Youngblood: "Yes, dear, but the clock was fifteen minutes slow!"

he challenged a local horse dealer to a walking match, but although the horse dealer is twenty years his junior, he declined the match.

SOME QUAIN ANNIVERSARIES.

How Some People Celebrate Important Events in Their Lives.

A police-court is a strange place wherein to keep the anniversary of a golden wedding, yet it was chosen a week or so since by an elderly Irish-woman named Mann, who, on the anniversary of her fiftieth wedding-day, summoned her husband to appear at the Belfast Police-court on a charge of assault. The prisoner, whose fifty years' record of married life had up till then been blameless, was bound over.

"It was the anniversary of my losing an eye thirty-six years ago and when this comes round I generally get a drop too much," was the explanation vouchsafed by an elderly man when charged a few months since, at the Mansion House, London, with being drunk and incapable. The magistrate's sense of the ridiculous was obviously tickled, for he discharged the prisoner, advising him for the future to celebrate the anniversary of his ocular deprivation in a somewhat less Bacchic manner.

Brought to dire straits by the collapse of a company in which she had invested all her money, a poor woman, as a last resource, applied for help to a wealthy relative, from whose house in London she was, without his knowledge, turned away by an unfeeling servant, who soon afterwards died, literally from starvation, and this coming to the ears of her relation, together with a knowledge of her abortive appeal—conveyed to him in a letter discovered in her garret—he was so stricken with remorse that until the day of his death, some four years since, he never failed, on the anniversary of the poor woman's sad end, to dress himself in rags and, from sunrise to sunset, beg his bread.

From tragedy to comedy. One wet morning, twenty years back, a young fellow hurriedly crossing the King's Road, Brighton, England, slipped and fell in the mud. A gentleman who chanced to be on the spot ran to his assistance. A hearty exchange of sympathy and thanks led to better acquaintance, which resulted in the young man's ultimately marrying the other's daughter, since which auspicious event the happy husband, to mark a reward of his good fortune, has always, on the anniversary of his fortunate fall, given a dinner to a dozen bachelor friends, who are only allowed to table if invited in clothes debauched with mud.

A Parisian gentleman, when on a visit to England some years back, would have been drowned while bathing but for the prompt action of a young clerk, who happened to be on hand and effected his rescue. Gratitude prompted the Frenchman to take the young man into his business, where he rapidly rose until he is now in a post of trust and importance. Every year, however, on the anniversary of the day and hour of his master's narrow escape, he has to accompany that gentleman to the Seine, where the couple re-enact the episode of the rescue after which they adjourn to one of the leading restaurants and spend the remainder of the day in convivial friendship.

SEVEN GOOD RULES.

Here are the rules of conduct that Marshall Field adopted for his business. Never give a note. Never buy a share of stock on margin. Never borrow. Never heavily mortgage real or personal property.

Work always on a cash basis. Buy for cash and sell on short time. Hold customers to strict enforcement of their contracts.

The merchant who makes these rules his own and follows them conscientiously will never fail.

"Ah, sweetest," sighed a young man, kneeling at the feet of his dearest own, "dost thou know what of all things is nearest my heart?" "Really, I can't say," she sweetly replied; "but in this cold weather I should think it was a flannel shirt." She was too practical, and it broke the engagement.

The Taking Cold Habit

The old cold goes; a new one quickly comes. It's the story of a weak throat, weak lungs, a tendency to consumption. Ayer's Cherry Pectoral breaks up the taking-cold habit. It strengthens, soothes, heals. Ask your doctor about it.

The best kind of a testimonial—

Lady Strathcona has shown good sense as well as liberality in stipulating that all \$5,000 of the \$52,500 she has donated to Queen Alexandra's fund for the assistance of the unemployed shall be spent in providing for the emigration to the Canadian Northwest of farmers and agricultural laborers.

That Canada has the greatest railway system in the world is an achievement of which we may well be proud, and while the distances that build up the system may for the moment be a

per cent. in the gross and net receipts, of 30 per cent in the mileage, and 55 per cent in the capital employed.

WHAT OTHER PAPERS SAY.

Goderich Signal.

The true Imperial policy would be free trade within the empire, allowing the mother country and the colonies each to fix its own tariff with relation to foreign countries. If we are truly of one blood and kin, why should we penalize imports from England, Scotland or Ireland, from Australia or South Africa any more than Ontario would put a tariff on goods from Nova Scotia or Quebec?

Oshawa Vindicator.

The Globe says that when the vacancies in the Senate are filled there will be a Liberal majority of 23, and that it is no wonder the Tories want it abolished. The very idea that a legislative body should be made up of political partisans of either side appointed for life ought to cause a rebellion by both sides to put it out of business. The thing is the very opposite of representative Government. It is an eyesore.

Kingston Whig.

See what wondrous things the Whitney Government is doing! What? Did it not prosecute the plumbers, those wicked men who, in Toronto, entered into a vile conspiracy, to rob the people? No. The County Attorney did that splendid service without any aid from the Government.

Toronto Star.

Chairs, knives, and other missiles were hurled at officials who endeavored to take an inventory of a Paris church. This proceeding is evidently regarded in Paris with as much aversion as the practice of taking up a collection is regarded here.

Toronto Globe.

Here is a good specimen of the grim humor of the Russian revolutionists. Some of them recently apologized to the public for having assassinated a man by mistake, but they promised at the same time rectify the error by killing the right one.

Ottawa Citizen.

When we hear of the Americans proposing to approach Great Britain on the question of "stopping the desecration of Niagara Falls," a lurking suspicion regarding the bona fide aesthetic basis of the protest springs up in the Canadian mind. Visions of Alverstonian decisions are evoked by the knowledge that when United States people have a gold brick proposition ripe for favorable consideration they turn with a beautiful affectation of childlike confidence to Downing street.

Catarrh Cannot be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free.

ONLY 1-50 OF A GRAIN

Fruit is good for you. Ripe figs are a splendid laxative to regulate the bowels. Prunes are good for stomach and liver. Orange juice is splendid for the nerves and sleeplessness. Apples heal the kidneys and increase the flow of urine. If apple juice be evaporated to a gray powder, 1-50 of a grain of this powder has the same action on the kidneys as half a pint of fresh apple juice. Two "Fruit-a-tives" tablets contain more than 1-50 of the medicinal part of apple juice, besides the healing, curative virtues of oranges, figs and prunes. More than that, "Fruit-a-tives" are concentrated and combined with tonics and antiseptics by a secret process which increases their powers over disease many times.

50c. a box.

At all druggists.

To Cure Scars.

Scars are often very ugly things and disagreeable marks when they exist in a prominent place on the skin. Probably nothing can remove a big scar the tissue of which has become fibrous and unyielding, but the following recipe, to be applied on lint and allowed to remain on the part for a little time daily, will effect an improvement in small scars and blemishes: Borax, one and a half ounces; salicylic acid, twelve grains; glycerin, three drams; rosewater, six ounces. Mix.

Dissembling.

"That man in there is a hypocrite," said Jackson as he left the drug store. "You mean the druggist?" "Yes. When I went in I interrupted him in the midst of compounding a prescription. I told him I wanted a two cent stamp, and he smiled as sweetly as if he was glad to see me."

A Girl and Her Money.

"Do you believe in marrying a girl for her money?" "Not as a general thing, but sometimes that's the only way you can get it away from her."

She Knew His Secret.

"Tell me honestly, now, Clara, did Harold confess his love last night?" "Confess! What do you think I am, a chief of police?"

New Holland scars made carefully

SINFUL HABITS IN YOUTH

MAKE NERVOUS, WEAK, DISEASED MEN.

THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some face and wither at an early age, at the blossom of manhood, while others are forced to drag out a weary, fruitless and melancholy existence. Others reach matrimony but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk 25 years in Detroit. Bank security.

CURED WHEN ALL ELSE FAILED. No names used without written consent. "I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skillful and responsible financially, so why patronize Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Belton.

HAND GRENADES.

It Requires Nerve to Use Them as the
Bulgarians Do.

Reginald Wyon in his book on "The Balkans From Within" writes from the interior of a blockhouse on the Turko-Bulgarian frontier: "We are shown captured bombs, heavy cylinders used for blowing up buildings and the dreaded hand grenade, whose short fuse is calmly lighted by a burning cigarette and hurled among the attacking Turks. A man must indeed have nerves of iron to do this deed. Picture a devoted handful of men surrounded by an overwhelming force of Turks, slowly but surely drawing nearer. Now they are a hundred yards away, fifty yards—luckily they shoot abominably—but it is too far to put the weight with effect.

"They must wait, though here and there a bullet fired at random thins out the little band. A rush—now. See! One coolly lights the fuse and quickly hurls it at the foe. He must make no mistake, his aim must be correct and his arm strong. A slip at the moment

Albert College Belleville, ONT.

Business School founded 1877. Practical and thorough. Five complete courses. Many graduates occupying important places as book-keepers and shorthand reporters. \$37.00 pays board, room and tuition, electric light, use of gymnasium and baths, all but books laundry, etc., for 10 weeks—longer time at same rate. Special reduction for two or more entering at same time from same place. A specialist in book-keeping, who is also an expert penman, and a specialist in shorthand in constant attendance. The teachers in the literary department all assist in the work. The high character of the College is a guarantee of thoroughness. New Commercial Hall one of the finest in Ontario. way system in the world is an achievement of which we may well be proud, and while the distances that build up the system may for the moment be regarded as a general disadvantage, their aspect changes when they are seen as the raw material for a growing nation of wealth-producers. The London Bullionist has an appreciative sketch of the Canadian Pacific Railway which shows a growing regard for Canadian enterprise by British financial journals. Some of the figures quoted may be familiar in Canada, but the record is so satisfactory that it will bear repetition. Incorporated in February, 1881, the gross earnings of the road for the year ended for the year ended December 31, 1891 amounted to \$20,241,095, with net earnings of \$8,009,659 the mileage included in the tariff returns being then 5,776, and the capital \$65,000,000 ordinary stock and \$86,153,178 in bonds. Ten years later, the financial year having been changed to the end of June 30 the gross receipts were \$30,855,203, and the net profits \$12,109,375, on a mileage of 7,563, the capital being \$65,000,000 ordinary and \$31,171,000 4 per cent reference stock, with a bond issue of \$125,438,000—a growth of 50

All Run Down

THIS is a common expression we hear on every side. Unless there is some organic trouble, the condition can doubtless be remedied. Your doctor is the best adviser. Do not dose yourself with all kinds of advertised remedies—get his opinion. More than likely you need a concentrated fat food to enrich your blood and tone up the system.

Scott's Emulsion of Cod Liver Oil

Is just such a food in its best form. It will build up the weakened and wasted body when all other foods fail to nourish. If you are run down or emaciated, give it a trial: it cannot hurt you. It is essentially the best possible nourishment for delicate children and pale, anaemic girls. We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

Small Animals Often Travel on the Backs of Large Ones.

It has often been asked how small and weak birds manage to fly such enormous distances when migrating. As a rule, however, small birds that have come very far across the sea have not flown, but have been blown over during violent gales, and many of them arrive on land in a half dead condition.

In fair weather small birds make long journeys successfully over considerable tracts of ocean, but the reason is that they are carried on the backs of the larger ones. When passing an autumn in Crete a writer asserts that he distinctly heard the twittering of small birds when flocks of sand cranes were passing overhead on their way to southern shores. On another occasion, when firing a gun, he saw three small birds rise from the dock and disappear again among the cranes. A native priest assured him that they came over from Europe with them, while it has been found that small birds, never before seen in certain parts, have been brought thither at times of migration.

Another cause is that small birds do not make their journeys in one flight. They generally rest during the day, searching for food, and thus proceed to their destination by easy stages.

THE PEARL WORKERS.

A Bethlehem Industry Which Is Five Hundred Years Old.

The chief industry of Bethlehem of Judaea is that of the mother-of-pearl workers.

The shells are brought from the Red sea and in the hands of native artisans are polished and carved, the larger into elaborate designs. The smaller are cut up for rosaries and crosses. The work is all done by hand, and the methods are amazingly primitive to a spectator from the home of steam and electric power. But the results are extraordinary. The largest shell we saw was carved in scenes from the birth of Christ, the agony in the garden and the crucifixion, and had the general effect of delicate frostwork. Under the magnifying glass every detail was seen to be perfect in outline and in finish. It was executed to order for a wealthy American and was to cost \$160.

About 150 people make a living by this industry, which is 500 years old. In the shops the workmen sit upon the floor, their benches in front of them. The air is full of whitish dust, and the light admitted by the single window and the open door is so dim that the exquisite tracery of the wrought shells is a mystery even before the visitor notes how few, simple and crude are the instruments employed.—Marion Harland in Lippincott's.

Needed Watching.
"Yes, I left the baby in charge of its grandparents."
"But who's watching the grandparents?"

Carried It Too Far.
"Are you satisfied, dear?" asked hubby, And wife replied: "No; I ain't. True, I married you to reform you— Now I've got to put up with a saint."

Thinking of His Mother.
Teacher—Why is a ship called "she?"
Bright Boy—Because it has a spanking.

Polite.
Though time and tide no man wait,
At least 'tis true of these
They don't insult him at the gate
And yell, "Step lively, please!"
—Puck.

One coolly lights the fuse and quickly hurls it at the foe. He must make no mistake, his aim must be correct and his arm strong. A slip at the moment of throwing means his and his comrades' lives instead of the Turks', for the fuse is very short. But he has thrown it well. The Turks see it coming and halt in blind fear.

"A deafening crash, screams and yells of anguish, and the Turks break and run, shot down by the triumphant insurgents. Down into the valleys they fly to the nearest village, where their officers, anxious to save themselves, a semblance of authority, order its massacre and pillage. And the next day we read of the extermination of another band."

CROWS HELP FOX HUNTERS

They Follow the Alert Birds When Reynard is Roaming.

For some reason crows have seated and mortal antipathy to foxes. As crows build their nests in trees, where no fox can climb, and as an adult crow can escape from any fox by flying, we cannot understand why all crows seek to harass and destroy every fox they see. But we know this to be a fact, as we have watched the performances of crows when foxes were near many times.

We have seen crows watch for running foxes on such occasions for hours at a time, and as soon as a fox emerged from the thick woods and let a crow get a glimpse of its body every bird would hover over the running beast

"Run Down System"

—The solid parts of our bodies are continually wasting away, and require to be repaired by medical substances, that restore the lost vitality. There are only two methods of building up the run down system. You can consult the physician, or commence treatment with Dr. Slocum's famous remedy, "PSYCHINE." In all probability "PSYCHINE" will be the best doctor, and the cheapest in the end. Scores of medical men advise its use in the worst cases of decline and weakness. It is an invaluable tonic, pleasant to the stomach, builds up the run down system, strengthens the nerves, sets the liver right, cures dizziness and headache, creates appetite, and is an all round family medicine, used by thousands of men, women and children in every part of the Dominion. Ask your druggist about it.

and peck at it and scold it and show marked evidence of a bitter hatred. Several fox hunters whom we know make a practice of following the alert crows when the foxes are roaming across back lots, claiming that the birds are fully as reliable as hounds and less trouble to maintain.

THE AMBER HARVEST.

Work of the Waders and the Divers of the Baltic Sea.

The poor people who earn a precarious livelihood by gathering amber on the shores of the Baltic sea work only in the roughest weather. When the wind blows in from the sea, as it often does with terrific violence, the bowlders are tossed and tumbled at the bottom and great quantities of sea wrack are washed up on the beach. This is the harvest of the waders, for hidden in the roots and branches of the seaweed lumps of the precious gum may be found.

In other parts of the coast divers go crawling on the bottom of the sea for the lumps of amber hidden in seaweed and under rocks. It is believed that once a great pine forest flourished here where the great billows roll and that amber is the gum exuded from the trees, of which not a vestige remains.

The finds are very variable. The largest piece known, weighing eighteen pounds, is in the Royal museum in Berlin. The usual finds range from lumps as big as a man's head to particles like grains of sand. The larger pieces are found jammed in rocks or in tangles of marine vegetation. Divers work from four to five hours a day in all seasons, except when the sea is blocked with ice. The work is so arduous that they are bathed in perspiration even in the coldest weather. For all their grinding toil the Samland natives are happy in their way and increase and multiply as in more favored regions of the earth.

A SPECIAL SENSE.

That Which Unerringly Directs a Shark to Carrion.

It is a curious thing and, so far as present knowledge goes, quite inexplicable how a shark seems to have an unerring perception of the presence of carrion. By virtue of what sense does he know that at a distance of perhaps a couple of miles there is food to be had for the picking up? It can hardly be sight, and to say that it is the sense of smell presupposes an olfactory apparatus of such marvelous delicacy that one good whiff from an average "harness cask" would surely burst the machinery for good and all. And yet our shark will bolt a goodly lump of the gamiest salt pork without so much as a wink. No, it cannot be his nose which leads him.

Now a theory has been put forward by naturalists that the shark possesses, in common with the Andes condor, a special sense, or instinct, which is denied to cleaner feeding animals. The naturalist cannot explain this sense. He confesses, in fact, that he knows nothing about it. But he can give it a name. He calls it the "carrion sense," and with that name, which, of course, explains nothing at all, expects us to be satisfied.

BACON HOG PRODUCTION.

If the bacon trade of Canada is to continue to improve it is necessary that hog raisers adhere to the class of animals most suited to the requirements of the British market.

In the production of hogs of the lard type Canada cannot compete successfully with the United States. A visit to the Chicago Stock Yards and to western cattle feeding centers afford ample evidence of this. A large proportion of the cattle are fed on snapped or shelled corn. Herded with these are hogs that thrive and fatten on the undigested corn left by steers. These hogs constituting a by-product of cattle feeding are produced at a cost much lower than pork can be raised in Canada. All United States hogs are not fed in this way but a large proportion of them have at least advantage of cheap corn, than which, there is no better feed for producing fat hogs of the lard type. Let the Canadian farmer go back to the thick, fat type of hogs, as some talk of doing, because they feel they have a grievance with the packer, and it will not be long before the price of Canadian bacon will have fallen to a level with the United States product which is usually from ten to fifteen shillings per hundred and twelve pounds lower than the quotations for Canadian "Wiltshire" sides.

It seems to be very generally supposed that pork is more cheaply and easily produced from hogs of the thick, short American breeds than from the three English breeds which are favored for bacon production. Why such a belief should be so general is difficult to understand as repeated tests conducted at various experiment stations have shown that hogs of the Yorkshire, Berkshire and Tamworth breeds produce pork as cheaply as those of the Poland China, the Chester White or the Duroc Jersey breeds. In the opinion of Prof. Day of the Ontario Agricultural College, who is foremost among authorities on bacon production, the lumpy growthy pig of the bacon type is the most economical pork-maker we have, especially when reared, as bacon hogs should be, largely on such foods as roots, soiling crops and dairy offal.

There is much difference of opinion regarding the cost which hogs fit for market can be produced, and there is probably as much difference between the cost to one feeder and the cost to another as between these opinions. Under general condition the production costs in the neighborhood of five dollars per hundred pounds on an average. In summer under favorable conditions the cost may be somewhat lessened but in winter pork can hardly be produced at the figure mentioned. As in all other lines of production the cost will vary according to the character of the animals fed and the amount of intelligence exercised by the feeder.

Taking one year with another the Canadian farmer on good land who understands crop growing and hog raising, can undoubtedly raise hogs as cheaply as the figures quoted, and probably for less. He will keep only such sows as produce large litters of the right type. He will grow such pasture and soiling crops as clover, alfalfa, rape, vetches, man gels, sugar beets and such coarse grains as yield the greatest number of pounds of hog feed per acre. In other words he will manage his operations in such a way that will return him the greatest return in hogs per acre of land, and in so doing will learn to reduce the cost of raising hogs of the best type to a minimum.

Hates to Go Home.

The lover can't help showing
The old boy's nature.

The Tramp.

The curse of the man who will not work has always been with us. In Henry VIII's reign he was not allowed to beg the bread that belonged to honest folk, for a statute was made by which the old and impotent were granted licenses to beg, and any one found begging without one was soundly flogged and sent home to his own parish. In this way as many as a hundred in one day in Elizabeth's time were sent "back to the land." The begging license seems to work well enough abroad, where the row of authorized beggars is a familiar sight outside every church and where the halt and maimed are seldom seen anywhere else. The rise of the vagrant in England no doubt took place after the destruction of the monasteries and before any other relief giving body took their place.—London Chronicle.

No Harm Done.

The customer at the five cent lunch counter, with some exertion, had dug a spoonful from the contents of the side dish.

"Waiter," he said, "this tastes different somehow from the mashed potatoes I usually get here."

"It is different," said the waiter, inspecting it. "It's the chunk of putty for a broken window pane that the old man has been making a fuss about for the last ten minutes. He'll be glad to get it back. Thanks."

The Origin of a Familiar Saying.

When Aurelius Paulus, the Roman consul, desired a divorce from his wife some friends reasoning with him asked: "Is she not beautiful and virtuous and of noble family and great wealth? What fault, then, can you find with her?"

And the consul stooped down, unfasting his shoe, and, showing it to them, answered: "Is it not of fine material? Is it not well made? Does it not appear to fit excellently? Yet none of you knows where it pinches me."

Milton's Works.

Milton regarded his "Paradise Regained" as infinitely superior to the "Paradise Lost" and once expressed great surprise that any one should entertain a contrary opinion. He said that of all his works the poem "On the Morning of Christ's Nativity" was his best. It was his earliest, being written in 1629, when he was twenty-one years of age.

Indisputable.

Mabel—But, papa, I know that he must have money. He doesn't attempt to conceal it. Papa—That settles it. He hasn't any.

Trouble.

The fellow who "borrows trouble" always has on hand enough to start a gloom factory. Try lending it for awhile.

Patience is the support of weakness; impatience is the ruin of strength.—Colton.

A SELFISH MAN.

The Prayer He Addressed to the Throne of Mercy.

The following example of a quaint and selfish prayer does not come from the liturgy; it is from "Glimpses of Ancient Hackney." "O Lord, thou knowest that I have nine estates in the city of London and likewise that I have lately purchased an estate in fee simple in the county of Essex. I beseech thee to preserve the two coun-

Hates to Go Home.

The lover can't help showing
The girl he's calling on
That when he's slow in going
He's positively "gone."

Swindle.

"What kind of a business does he run?"

"Oh, some sort of a get tainted quick scheme."

So Many.

"'Tis system," says the millionaire,
"That always brings success."
But just which system he prefers
He leaves us all to guess.

Toughness of the Ant.

Ants are really very long lived, considering their minuteness. Janet had two queens under observation for ten years, and one of Sir John Lubbock's ant pets lived into her fifteenth year. Ants are very tenacious of life after severe injury. Following loss of the entire abdomen, they sometimes live two weeks, and in one case a headless ant, carefully decapitated by aseptic surgery, lived for forty-one days. A carpenter ant after being submerged eight days in distilled water came to life upon being dried, so that ants are practically proof against drowning. They can live for long periods without food. In one case the last lasted nearly nine months before the ant starved to death.

Dice From Billiard Balls.

"What becomes of the wornout billiard balls?" said an idler in a billiard room.

"Well," the man at the desk replied, "when a ball is only a little off it is sent to the factory to be trued up. We get our balls trued up until they become too small for use. Then we sell them at so much per ounce."

"After their sale they are carved into various small trinkets, but in the main they are made into dice. Of the forty or fifty balls rolling and clicking busily here this evening it is safe to say that 90 per cent of them a few years hence will be working just as hard in the form of dice."

Curious Astronomical Calculation.

A European astronomer has recently made some remarkable calculations. He figures that if all the living representatives of the human race were strung out in space and separated from each other by intervals of a mile the line would only reach one-third of the distance to the planet Neptune. If separated by distances as great as that between London and Constantinople the line would only reach halfway to the nearest star.

His First Intimation.

"How did you find out you could draw?" inquired the admirer of the celebrated illustrator.

"By the marks I received in school for the excellence and fidelity of my work," replied the eminent one. "My work was a caricature of my beloved teacher on the blackboard, and the marks came from the teacher's cane."

In Blossom.

Clara—Fred's mother called on me shortly after our engagement. She says he is the flower of the family. Maude—I guess that's right. His Uncle John says he is a blooming idiot.

The Angel.

Miss Budd (to famous pianist)—That music was truly divine, monsieur.

"Ah, mamseuil, zat is indeed praise, for who but an angel would know divine music?"

have lately purchased an estate in fee simple in the county of Essex. I beseech thee to preserve the two counties of Middlesex and Essex from fire and earthquake, and, as I have a mortgage in Hertfordshire, I beg of thee likewise to have an eye of compassion on that county, and for the rest of the counties thou mayest deal with them as thou art pleased. O Lord, enable the bank to answer all their bills and make all my debtors good men. Give prosperous voyage and return to the Mermaid sloop, because I have insured it, and, as thou hast said the days of the wicked are but short, I trust in thee that thou wilt not forget thy promise, as I have purchased an estate in reversion which will be mine on the death of that profligate young man, Sir J. L. Keep my friends from sinking and preserve me from thieves and housebreakers and make all my servants so honest and faithful that they may attend to my interest and never cheat me out of my property night or day."

THE CHINESE MOTHER.

She is Steadfast in Affection For Her Children.

The Chinese mother is very fond of her children. She is happy in their company and spends much time caring for them. In a Chinese family the birth of a child is a greater event than with other orientals. Long before the child is born the mother performs rites and ceremonies to propitiate the gods that her child may be a boy. After birth the little fellow is wrapped in old rags and in winter is sometimes put in a bag of sand sewed close around its neck to keep the little one warm. Great rejoicing follows the birth if the child is a boy; otherwise there is an air of chastened disappointment. But good Chinese parents make the best of their little lassies, becoming very fond and even proud of them. I have known more than one Chinese father to exhibit his toddling wee girl for approval, though always with the customary national verbal deprecation of what belongs to one. Indeed, this evidence of excessive courtesy may be found everywhere in this strange land. It is good form to vilify what is mine and laud what is thine. "My good for nothing family are all still troubling the earth with their presence. How is your honorable family?"—Pilgrim.

MUMMIES.

Some That Do Not Come From the Tombs of the East.

Many persons who have an interest in archaeology will be surprised to know that all the mummies to be seen in museums have not been taken from faraway tombs in Egypt or other eastern lands. Well preserved mummies have occasionally been taken from the ruins of the cliff dwellers in the mountain canyons of Arizona and in New Mexico and southern California. These mummies, though very poor specimens of the mummifying art, are considered great treasures by scientists, because they give the anthropologist a vague idea of the strange people who had the earliest civilization on the American continent. The best of them are almost entirely ignorant of who the Aztecs and Toltecs were, how they looked and lived and why they have been so entirely obliterated from the face of the earth.

The reason for this ignorance is found in the fact that no satisfactory remains of the dead Aztecs have been found. These people were cremationists, and they probably buried household effects with the dead, leaving little or nothing for the scientist to build a theory upon.

chronic Bronchitis, Pneumonia and even dreaded Consumption itself, may be traced directly to "only a cough." When the first cold comes, start in on

GRAY'S SYRUP OF RED SPRUCE GUM

IT CURES COUGHS — heals the inflamed surfaces — strengthens weak throats — puts the lungs in the strongest possible condition to resist the trying effects of a Canadian winter.

25c. bottle

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

SOUVENIR RANGES

are famous for

their superior cooking qualities and simple construction

A **SOUVENIR RANGE** is all that a first class range should be:

Duplex Grates, Aerated oven, Locked tops, Direct Draft Damper, and special Fire Box all combine in making

SOUVENIR RANGES

A TIME AND COAL SAVER · USED IN THOUSANDS OF CANADIAN HOMES

The Gurney, Tilden Company
Manufacturers Limited
Hamilton Toronto Montreal Winnipeg Vancouver

Our personal guarantee as well as that of the makers goes with every stove. We have Souvenir Ranges on view.

BOYLE & SON, Agents.

We Will Buy

You a Bottle of Ligozone, and Give It to You to Try.

We make few claims of what Ligozone will do. And no testimonials are published to show what it has done. We prefer that each sick one should learn its power by a test. That is the quickest way to convince you.

So we offer to buy the first bottle and give it to you to try. Compare it with common remedies; see how much more it does. Don't cling to the old treatments blindly. The scores of diseases which are due to germs call for a germicide. Please learn what Ligozone can do.

What Ligozone Is.

The virtues of Ligozone are derived solely from gases. The formula is sent to each user. The process of making requires large apparatus, and from 8 to 14 days' time. It is directed by chemists of the highest class. The object is to so fix and combine the gases as to carry into the system a powerful tonic-germicide.

Contact with Ligozone kills any form of disease germ, because germs are of vegetable origin. Yet to the body Ligozone is not only harmless, but helpful in the extreme. That is its main distinction. Common germicides are poison when taken internally. That is why medicine has been so helpless in a germ disease. Ligozone is exhilarating, vitalizing, purifying; yet no disease germ can exist in it.

We purchased the American rights to Ligozone after thousands of tests had

been made with it. Its power had been proved, again and again, in the most difficult germ diseases. Then we offered to supply the first bottle free in every disease that required it. And over one million dollars have been spent to announce and fulfill this offer.

The result is that 11,000,000 bottles have been used, mostly in the past two years. Today there are countless cured ones, scattered everywhere, to tell what Ligozone has done.

But so many others need it that this offer is published still. In late years, science has traced scores of diseases to germ attacks. Old remedies do not apply to them. We wish to show those sick ones—at our cost—what Ligozone can do.

Where It Applies.

These are the diseases in which Ligozone has been most employed. In these it has earned its widest reputation. In all of these troubles we supply the first bottle free. And in all—no matter how difficult—we offer each user a two months' further test without the risk of a penny.

Asthma	Croup	Gout
Abcesses—Anemia	Diarrhea	Gonorrhea—Gleet
Bronchitis	Dyspepsia	Hay Fever—Influenza
Blood Poison	Eczema	Leucorrhea
Bowel Troubles	Fever	Malaria—Neuralgia
Coughs—Colds	Flu	Piles—Quincy
Consumption	Headache	Rheumatism
Contagious Diseases	Hemiplegia	Scurvy—Syphilis
Cancer—Catarrh	Hysteria	Skin Diseases
Dysentery—Diarrhea	Indigestion	Tuberculosis
Dyspepsia—Dandruff	Insomnia	Tumors—Ulcers
Eczema—Erysipelas	Jaundice	Throat Troubles
Fever—Gall Stones		

Also most forms of the following:
Kidney Troubles Liver Troubles
Stomach Troubles Women's Diseases
Pleurisy, inflammation or abscess—lung or pelvis
Scorbutic blood—usually indicate a germ attack
In nervous debility Ligozone acts as a vitalizer, accomplishing remarkable results.

50c. Bottle Free.

If you need Ligozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and will pay the druggist ourselves for it. This is our free gift, made to convince you; to let the product itself show you what it can do. In justice to yourself, please accept it today, for it places you under no obligations whatever.

Ligozone costs 50c. and \$1.

Note that this offer applies to new users only.
Any physician or hospital not yet using Ligozone will be gladly supplied for a test.

THE DANDELION.

It Adapts Itself to All Soils and Climates of the Earth.

The dandelion belongs to the largest, oldest and most widely diffused order of plants. While other orders of plants have died out and become mere fossil remains in the rocks, this order has survived the geological changes of many different periods on account of its power of adapting itself to those changes. And these changes in their turn have only made it better suited for all the varied soils and climates of the earth at the present day.

We find members of this order in every part of the globe, in places as far apart from each other as they can be. It is the prevailing and dominant order of vegetable life, the most highly finished and the most successful family of plants. And the dandelion is one of the most perfect forms belonging to it.

It is the head and crown of the vegetable kingdom, as man is the head and crown of the animal creation, and it is curious how this highest type of plant is always found only where man, the highest type of animal life, is found and where he dwells and cultivates the soil. It is never found apart from him. It follows him wherever he goes—to America, Australia and New Zealand—and there in the new home it becomes a silent but eloquent reminder of the dear old land he may never see again.—Exchange.

THE TWO NEPHEWS.

A Fable That Points a Moral With a Large Grain of Truth.

There was once a Rich and Stingy old Bachelor who had Two Nephews. And one, being a Hypocrite, said in his Heart: "All men are Mortal, and this One must Die some time, although un-

fortunately his Doctor understands his Case. So I will Pretend to Love my Uncle and Bear with him and Tend him with Great Care and Tender Assiduity." But the Other Nephew, who was blunt and Honest in his Feelings, said to All Whom it Did not Concern: "Why should I pretend to Care for My Uncle when I Don't and Play the Hypocrite? He cannot but Respect my Independence the More then than if I Fawned upon him."

One day the Uncle died when it Suddenly occurred to him that he was Spending too much Breath. To the Nephew who Was a Hypocrite he left his Fortune, and to the One who Did not Conceal his Real feeling he Left his Regards.

Moral.—Most people like to be Flattered, because Human Nature is Built that Way, and the People who give Real Money to Folks who say Right out what they Think about them are only to be Found in Highly Moral Story Books.

Most Costly Carriage.

Originally costing something more than \$5,000, the lord mayor's coach, still used in the annual procession, has probably had more money expended upon it than any horse drawn vehicle in the world. It is something like 150 years old, and in that time more than \$100,000 has been spent in refurbishing it for the sole occasion when it is made use of each year. A more modern coach could be had for the sum of five years' repairs, but a new coach would never seem the same to the London public who line the Strand on the occasion of the November parade. It is probable that the lord mayor of a century hence will ride in the same equipage, though, like the Irishman's knife, it has been repaired so often that practically nothing of the original coach remains.

Justice to Come.

COUNTY COUNCIL.

WEDNESDAY—SECOND DAY.

Council met at 9:30 a.m., all the members present; Warden presiding. Minutes of yesterday's session were read and approved.

COMMUNICATIONS.

From E. O. Clark, Odessa, asking for a hearing before the Council, re road machinery, was filed.

From County Registrar, asking for further orders respecting the abstract indexes for the Villages of Camden East, Enterprise and Centreville.

On motion consent was given to the Registrar to go on with the work in the Villages of Centreville and Enterprise.

From U. M. Wilson, asking the Council to appoint a committee to work with a committee to be formed to organize an "old boys' re-union for this county. Filed.

ACCOUNTS.

Wm. Templeton, \$50.00, paid. Moved by Mr. Martin, seconded by Mr. Hall, that Mr. W. S. Herrington, K.C., be appointed Trustee for the Town of Napanea.

Moved by Mr. Creighton, seconded by Mr. Paul, that Mr. J. R. Fraser be appointed Trustee for the Town of Napanea.

On motion the above motions were laid on the table for later consideration.

Moved by Mr. Creighton, seconded by Mr. Miller, that Mr. Allan Oliver be appointed a member of the Board of Audit for 1906. Lost.

Moved by Mr. Clyde, seconded by Mr. Paul, that Mr. E. O. Clark be appointed a member of the Board of Audit for 1906. Carried.

Mr. Creighton asked for the yeas and nays.

Yeas—Messrs. Bogart, Creighton, Miller, 3.

Nays—Messrs. Baker, Bryden, Clyde, Hall, Martin, Woods, Paul, 7.

Moved by Mr. Clyde, seconded by Mr. Woods, that Mr. J. W. Hall be appointed a member of the Board of Audit for 1906. Carried.

A representative was heard in the interests of the Sawyer-Massey road making machinery.

Mr. E. Bruce Smith, Inspector of Prisons, addressed the Council respecting a house of refuge. He stated that the statute made it obligatory that each county should provide such an institution. Nearly all the counties of Ontario have fallen into line, and have either erected such houses of refuge, or have taken steps to proceed as once. Lennox and Addington is now the only county that has not conformed to the provisions of the act. The Government grant for the erection of a house of refuge is \$4,000, which is given without any restrictions, excepting that the site and some minor particulars, including 25 acres of land, are subject to the approval of the department.

Mr. Smith put the case clearly and kindly, but reminded the Council that the act was obligatory, and that it would be unfair should the Government make an exception in the case of this county. Every county that had built a house for the poor, was well pleased with the results.

Mr. Martin stated that the Minister, Mr. Hanna, had promised the deputation from this county that waited on him, that this County would not be asked to erect a house of refuge, so long as our poor were well cared for. This was corroborated by the other members of the delegation.

Council adjourned till 2 p.m.

Council resumed at 2 p.m.

Mr. Hartman, Odessa, was heard. He offered to sell his stone crusher to the County, or rent and operate it. He would furnish the outfit for \$20.00 a week up to threshing time, or for the whole season, \$18.00 per week, the County to furnish the fuel.

ACCOUNTS.

Irvine Parks, County treasurer, \$5.75, paid. W. G. Wilson, Commissioner, \$14.25, paid. J. R. Dafoe, \$7.00, paid.

Moved by Mr. Martin, seconded by Mr. Hall, that the resolution appointing a school trustee be laid over until to-morrow morning. Carried.

Judge Madden addressed the Council on behalf of a renewal of the annual grant to Kingston General Hospital.

Moved by Mr. Miller, seconded by Mr. Martin, that a grant of \$500 be made to Kingston General Hospital. Carried.

The Auditors' report was presented and referred to the Finance Committee. Mr. Paul gave notice that he would to-morrow introduce a by-law to

Moved by Mr. Paul, seconded by Mr. Clyde, that the following grants be made to the Farmers' Institutes of the

Vapo-Cresolene

Established 1879.

Whooping Cough, Croup, Bronchitis
Cough, Grip, Asthma, Diphtheria

Cresolene is a boon to Asthmatics

Vapo-Cresolene is a long established and standard remedy for chest diseases indicated. It cures because the air rendered strongly antiseptic is carried over the diseased surfaces of the bronchial tubes with every breath, giving prolonged and constant treatment. Those of a consumptive tendency, or suffering from chronic bronchitis, find immediate relief from coughs or inflamed conditions of the throat.

Vapo-Cresolene is sold by druggists and sent by mail on receipt of price.

A Vapo-Cresolene bottle contains a bottle of Cresolene \$1.00. Sent for free illustrated booklet. LUNN & CO. 361 Broadway, New York. Agents, 111 St. Washington, L.

The Best Hair Tonic

Hall's Vegetable Sicilian Hair Renewer. It tones up, invigorates, strengthens the hair-bulbs. The hair grows faster, thicker; stops falling out; does not split at the ends. Tested and tried for half a century. For the whiter and smoother, make BUCKINGHAM'S DYE. It colors a rich brown or a soft black. R.P. HALL & CO. NASHUA, N.H.

DR. HENNEQUIN'S INFANT TABLETS

Mrs. R. J. Ego, Ardree, Ont., Says: "When baby was seven months old she got very ill with indigestion and constipation, and kept getting worse, until doctors had no hopes for her recovery; all medicines failed to do any good. I received a sample package of Dr. Hennequin's Infant Tablets. I had not much faith in them, as I had tried so much, but concluded to try them. We gave her one-half one Tablet, and that day we noticed a change for the better. I at once sent for a box; we used them, and the result was most astonishing. We used five boxes, and baby has been a well child for some months, and is fat, hardy and cheerful. I do not feel safe without them. I cannot speak too highly of what I know has saved my baby's life, and I wish all mothers whose babies suffer as mine was, to try them. Enclosed please find \$1 and for which please mail to my address 5 packages."

DR. HENNEQUIN'S INFANT TABLETS. Destroy worms, assimilate the food, regulate the bowels, sweeten the stomach, procure healthy and natural sleep, relieve teething trouble, allay feverishness, cure indigestion, diarrhoea, constipation, colic, etc. stop walking in the sleep and frightened awakening, from sleep, cure fits, etc. Beyond price for children affected with weak health. Dr. Hennequin's Infant Tablets do not contain morphine, opium, or other narcotic properties. 25c per package—postpaid to any address. Send us \$1 for 5 boxes and if, after using part or all of one box, you wish our dollar back, you can have it by mailing us the remaining four boxes. We cannot be responsible for money unless sent by P. O. Order, Money Order, or Registered Letter. DOUGLAS & CO., Napanee, Ont., Can. Wholesale Agents for Canada.

Justice to Come.

Lord Cockburn, though a successful defender of prisoners, failed on one occasion to get an acquittal for a murderer. "The culprit," Mr. Croak James tells us in his "Curiosities of Law and Lawyers," "after the sentence fixing his execution for the 20th day of the month had not been removed from the dock when his counsel passed him and was then seized by the gown. The prisoner said, 'I have not got justice, Mr. Cockburn,' to which the counsel gravely replied, 'Perhaps not, but you'll get it on the 20th.'"

A SATISFYING STORY.

It Worked Both Ways in Behalf of the Congressman.

Some years ago there came to Washington a representative in congress from Iowa who was an ardent champion of the cause of prohibition. One day a friend from home dropped in to see the congressman. During the course of his stay he had occasion to use his pocketknife, which the representative much admired. This knife had in it a hook, "designed," so the friend said, "to remove stones that might become fastened in a horse's hoof on a rocky road." Finally, seeing the intense admiration of the congressman for the knife, the friend gave it to him. When the statesman had reached home and had shown the gift to his wife she laughed.

"John," said she, "any man who has served three terms in the state senate, been lieutenant governor and had two terms in congress must be a pretty good man if he doesn't know a champagne opener from a hoof cleaner."

Somehow the story got out and was copied by nearly every newspaper in Iowa. One day the congressman met the newspaper man whom he understood to be the author of the first squib in the matter.

"You did me a great service," smilingly said the representative to the correspondent. "All the prohibitionists are taking my wife's view of my ignorance, and all the 'antis' are insisting that I'm a devil of a good fellow for imposing so successfully on my wife. It works in my behalf whichever way you take it."

A DYED BEARD.

It Probably Changed the History of the Whole Human Race.

The most striking case in history of the importance of trifles is furnished by the story of Musa, the leader of the Moslem host which won from Christendom in three and a half years dominions which it took the soldiers of the cross twenty generations to win back. He had a red beard. This was a trifle.

Musa, though a very great general, was a very vain man, and he dyed his beard black. This was another trifle. One of his captains chaffed him on the subject, and Musa forthwith had him stripped and scourged. For this, at the very height of his conquering career, Musa was recalled by the caliph and disgraced. This made it impossible for him to command the Moslem army at the battle of Tours, on the issue of which, as all historians agree, the destinies of Europe and perhaps of the whole human race depended.

It is almost certain that if the genius of Musa had replaced the incompetence of the half dozen tribal leaders whose dissensions made victory impossible the forces of Islam would have joined hands from the west to the east and enclosed Europe in their grasp.—London Standard.

Mr. Paul gave notice that he would tomorrow introduce a by-law to be moved by Mr. Paul, seconded by Mr. Clyde, that the following grants be made to the Farmers' Institutes of the county.

Lennox, \$25.00; Addington, \$25.00; Amherst Island, \$25.00. Carried.

Moved by Mr. Creighton, seconded by Mr. Hall, that the grants be, Lennox, \$25.00; Addington, \$20.00; Amherst Island, \$15.00.

Mr. Miller asked for yeas and nays on the Paul-Clyde resolution.

Yeas—Baker, Bryden, Clyde, Bogart, Martin, Paul, Woods—7.

Nays—Creighton, Hall, Miller—3.

Mr. Woods presented the report of the committee, re Baird's bridge.

Moved by Mr. Clyde, seconded by Mr. Paul, that the Poor Schools of the County be granted \$400.00, to be paid to the order of the Inspector of Public Schools.

On motion Council adjourned until 10 o'clock to-morrow morning, for the benefit of committees.

(Continued on page 8.)

The First Knitting Machine.

Historic mention of hand knitting is first found in the books of the time of Queen Elizabeth, though it is known that it was one of the arts of the Pompeians. The first machine for knitting was the invention of one William Lee, who made application for a patent in England in 1589. On being refused a patent by the English authorities he forthwith departed for France and soon afterward set up a large factory at Rouen. The Lee machine, which remained the same as it was 200 years before, was introduced in the colonies during the Revolutionary war. A sharp Yankee improved on it and set up the first United States stocking factory at Cohoes, N. Y., in 1832.

The American Chameleon.

The American chameleon, a small lizard (Anolis carolinensis), inhabits various parts of the southern United States. The little animal has the remarkable habit of quickly and completely changing its colors, varying from brown to yellow or pale green. Its food consists of insects. The little animal is perfectly harmless to higher forms of life, is often kept as a pet and has been worn attached to a chain as an ornament.

The toes are provided with adhesive pads, which enable the lizard to run upon smooth vertical surfaces.—St. Nicholas.

Romance of a Song.

"Yes, the Die Is Cast," has a romantic history. It was written by Colonel Paul Pestel of the Russian army, who, with others, conspired against the Russian government in 1826. The plot was discovered, he was arrested, imprisoned, tried and on July 11, 1826, was hanged. During the interval between his trial and execution he composed the words and music of this song and with a bit of iron scratched them on the wall of his cell, where the song was found some years after his death.

Heart and Lungs.

The action of the heart, lungs and digestive system is involuntary, for the reason that it is indispensable to life and must be carried on under all circumstances. If a man had to think of his heart or had to remember that he

FIT'S CURED

If you, your friends or relatives suffer with Fits, Epilepsy, St. Vitus' Dance, or Falling Sickness, write for a trial bottle and valuable treatise on such diseases to THE LEIBIG CO., 179 King Street, W., Toronto, Canada. All druggists sell or can obtain for you

LEIBIG'S FIT CURE

must breathe or that his food must digest he would have no time to do anything else, and if by chance he should forget to keep his heart going or his lungs in operation he would fall dead on the spot.

Doomed.

"Emily, if William today asks you to marry him you must tell him to speak to me."

"Yes, mamma. But if he does not?"

"Then tell him I want to speak to him."

Can it be true, as is so constantly affirmed, that there is no sex in souls? I doubt it exceedingly.—Coleridge.

General Hamilton's Orders.

In the Boer war one of the columns, half Canadian and half regular, under General Ian Hamilton, became so notorious for looting that the soldiers were nicknamed "the Thousand Thieves." Consequently General Hamilton reviewed them one day in a small village near Bloemfontein, says the writer of "Some South African Reminiscences," for the purpose of warning them against any future depredations.

The column had just drawn up and was waiting for the general to begin the review when a ragged rooster ran out from a hut and across the front of the line. Suddenly a private left the line and ran after the rooster.

"Halt!" shouted Hamilton.

The soldier ran on. He soon overtook the rooster and turned back, wringing the neck of the fowl. As he passed the general he noted the fierce scowl on his face. The soldier, an Irish Canadian, was not easily daunted, but this time he temporized. Throwing the defunct rooster at the feet of the general, he said, "There, now; I'll tache ye t' halt whin the general says so!"

At which the column roared with laughter, and even the general smiled, and the soldier got only two days' imprisonment for one of the most barefaced breaches of discipline in the records of the army.

Freezing Food Before Eating.

In nearly all parts of the arctic regions food is frozen not only for purposes of preservation, but also to increase, as the natives believe, its nutritive properties. Their fish and seal flesh are frozen and eaten in thin slices, cut off by ax or knife. Seal flesh, half decomposed and then frozen, is one of the Eskimos' greatest delicacies. Walrus liver, too, when frozen is held to possess great sustaining power, and it is considered that cooking deprives it of its delicacy of flavor. The natives of the Titticaca basin, in Peru, who inhabit a district 12,000 feet above the sea, prepare their potatoes by soaking them in water, then freezing them, then steeping them in water and mashing them to remove the soluble matter. After this they are dried and become an article of food. They will then keep any length of time and are extremely convenient for carrying on long journeys. The oka, another vegetable of the district, is prepared in the same way.

JINGLES AND JESTS.

The Tale of Johnnie.

Johnnie lit a cigarette,
Up near old Nantucket;
Johnnie dropped his burning match
In a powder bucket.
This is all I have to tell
Of this little story;
Johnnie took the alrship route—

A Heartless Parent.

CAMDEN EAST.

The funeral of the late Mr. John H. not took place at St. Luke's church, Camden East, Thursday, February 1st. The Rev. C. E. S. Radcliffe conducted the service and preached a sermon based on Rev. XXI verse 16 setting forth man's duty to himself, his neighbor and his God. The organist and choir rendered the musical portion of the service well. The congregation was a very large one. The Masses took charge of the body acting as pall bearers. Mr. Hinch's sudden death has created great sympathy for his widow and children and filling a prominent position his loss will be felt and regretted by the public at large.

EAGLE HILL PUBLIC SCHOOL

Report for January.

Names in order of merit.

IV Reader—Pearl Ready, Katie Marquardt.

III Reader—Leslie Fox, Norris Ready, Arthur Ready and Stanley Fox (equal) Hazel Irvine.

II Reader—Henry Armstrong, Paul Villinoff, Gordon Petterfer, Jimmy Marquardt, Lorne Ready, Dolphus Villinoff, Andrew Armstrong, Russell Petterfer, Frieda Mieski.

IST. Reader, PT. II—Charlotte Armstrong.

IST. Reader P. I.—Kaspar Irvine, Andrew Ready, Oris Villinoff.

On roll—20

Average attendance—13

FRANCES STEWART,
Teacher.

EAGLE HILL

It becomes our sad duty to record the death on Saturday, January 6th, of Thomas Ferguson, Eagle Hill at the age of fifty-six years. Deceased had been suffering for years from heart disease, and since last May had been unable to do any work, though not confined to his bed until about two months ago. Though his death was hourly expected it came as a great shock to his family and friends. The funeral, conducted by Rev. Mr. Snider, on Monday 8th, was largely attended. A short but impressive service was held at his residence after which the procession proceeded to the Methodist church, Denbigh, where the funeral sermon was preached from Psalms 73 and 24. The remains interred in the Methodist cemetery. Deceased came to Eagle Hill from Lanark County twenty-seven years ago in the employ of B. Caldwell & Son, Lanark. He was a Presbyterian and a Reformer and was deservedly held in high esteem in the community. He leaves to mourn his loss, his sorrowing widow, one son Robert and one daughter Mrs. M. Ready, Eagle Hill, and a host of sympathizing friends and neighbors.

Nickle plated tea and coffee sets, trays &c. at MADOLE & WILSON.

COLLINS BAY

An evening of much enjoyment was spent at the home of Mr. and Mrs. G. Clark, on Friday evening, when over sixty invited guests gathered to do them honor, it being their twentieth anniversary of their marriage. Mr. Clark's large and beautiful home is well adapted for such a gathering, and everyone was made by their host and hostess, to enjoy themselves. At eleven o'clock tea was served at small tables. Many beautiful presents were received, testifying to the esteem in which Mr. and Mrs. Clark are held. Guests were present from Belleville, Gananoque, and other places.

MEDICAL EXAMINER

Of the United States Treasury Recommends
Pe-ru-na.

Prominent Physicians

Endorse Pe-ru-na.

D. R. LLEWELLYN JORDAN, Medical Examiner of the U. S. Treasury Department, graduate of Columbia College, and who served three years at West Point, has the following to say of Peruna:

"Allow me to express my gratitude to you for the benefit derived from your wonderful remedy. One short month has brought forth a vast change and I now consider myself a well man after months of suffering."

"Fellow sufferers, Peruna will cure you."—Llewellyn Jordan.

Doctors have been loathe to endorse a catarrh remedy because catarrh and catarrhal diseases have puzzled the medical fraternity for many decades.

The popular endorsements that Peruna has received at the hands of the people have induced a great many doctors to try the remedy.

More prominent physicians use and endorse Peruna each year.

Dr. A. Morgan, 214 Gater street, Indianapolis, Ind., writes:

"Regular physicians do not, as a rule, endorse patent medicines. I have, however, found in my practice that Peruna is a notable exception and not at all like any other medicine generally sold as 'patent medicine.'"

"In examining it I find that it is a scientifically prepared medicine, composed of herbal remedies of high medicinal value."

"It is a specific for catarrh of the head, lungs or stomach, a fine remedy for female troubles, and invaluable to mothers and children."

"After fevers or other protracted illness, it is one of the best tonics I know of to restore the system to normal condition and I recommend it to convalescents."

"It is a high class family remedy, good for young and old."—A. Morgan.

Peruna occupies a unique position in medical science. It is the only internal systemic catarrh remedy known to the medical profession to-day.

Robert R. Roberts, M. D., Washington, D. C., writes:

"Through my own experience as well as that of many of my friends and acquaintances who have been cured or relieved of catarrh by the use of Hartman's Peruna, I can confidently recommend it to those suffering from such disorders, and have no hesitation in prescribing it to my patients."—Robert R. Roberts.

P. Gratten is building a gasoline yacht for W. G. Beaubien to carry the mail.

The C. O. C. F. gave a dance in Victoria hall on Friday, February 2nd. F. Henderson and Miss Jennie Blech were quietly married, in Kingston January 16th.

Mrs. A. Howard is suffering from rheumatism.

Miss Jessie Forward, Kingston, at HFMorshall's; Mrs. Alex. Reid, at John Wemp's, Jr.; Thos. Tagwell, visiting friends.

Henry Fleming has returned to Kingston, after spending a few days with his friends.

Notice.

We are getting a lot of new dishes to be given away for coupons to customers that buy here. Why not get some by dealing at R. J. Wales GREY LION GROCERY.

Either because the Grand Trunk Pacific promoters have found that they had underestimated the amount of railway

DR. LLEWELLYN JORDAN,
Medical Examiner United States
Treasury.

Catarrh is a systemic disease curable only by systemic treatment. A remedy that cures catarrh must aim directly at the depressed nerve centers. This is what Peruna does.

Peruna immediately invigorates the nerve centers which give vitality to the mucous membranes. Then catarrh disappears. Then catarrh is permanently cured.

Pe-ru-na Contains No Narcotics.

One reason why Peruna has found permanent use in so many homes is that it contains no narcotic of any kind. Peruna is perfectly harmless. It can be used any length of time without acquiring a drug habit. Peruna does not produce temporary results. It is permanent in its effect.

It has no bad effect upon the system, and gradually eliminates catarrh by removing the cause of catarrh. There are a multitude of homes where Peruna has been used off and on for twenty years. Such a thing could not be possible if Peruna contained any drugs of a narcotic nature.

Minister Wu once talked at a mothers' congress in Washington. He told how mothers-in-law were revered in China. Then he said that all the mothers before him would be mothers-in-law some day, and therefore he would tell them something that they might remember and profit by. "A parlor maid," he began, "answered a ring at the doorbell one morning and a few moments later ascended to her mistress. 'If you please, ma'am,' she said, 'the strangest lady is downstairs. She won't give her name, and she has taken off her coat and hat, and she opened the two closets and rummaged through them, and then she looked at the windows and shook her head, and she rubbed her finger over the mantel and the piano, and then she held it up to see the dust on it, and now she is—' But the mistress interrupted calmly. 'Dear me!' she said. 'My husband's mother wasn't expected back from Texas till December.'"

Sailed

A Heartless Parent.

Miss Bullion—Papa says we can't be married until you are able to support me.

Adorer—Great Scott! Does he want his only daughter to die an old maid?

The Way With Them.

"He's what I call a 'budding genius.'"

"Who—Bragg?"

"Yes; like all budding things, he's inclined to blow."

Southey Up to Date.

"You are old, Father William," the young man said.

"And your hair has become very white. You were sixty last birthday, and yet you're not dead."

Do you think at your age it's quite right?"

As to Kissing.

Dyer—Kissing a girl on the cheek is a sign of friendship.

Ryer—And kissing her on the mouth is a sign of nerve.

Where the Idea Originated.

"The man who invented the talking machine," remarked the observer of events and things, "no doubt got the idea from his wife."

The Worst.

Of all the scores

Of beastly bores

With which the world's afflicted

The worst today

Are those who say,

"That's just what I expected."

Natural Deduction.

Mifkins—My oldest boy has acquired the sleep walking habit.

Bifkins—Training himself for a position on the police force, eh?

testifying to the esteem in which Mr. and Mrs. Clarke are held. Guests were present from Belleville, Gananoque, Kingston, Odessa, and Bath. Games and music were indulged in throughout the evening till the hour for departure came, when all wished Mr. and Mrs. Clarke, many more years of happiness and prosperity.

Mr. and Mrs. G. Saunderson, entertained their many friends on Thursday evening.

Mr. Smellie, of British Columbia, spent Sunday here with his old friend, J. J. Lossee.

W. Cousins, of Dorland, is spending a few days here renewing old acquaintance.

Dorland Clement and daughter, Bertha, and Miss Laura Gilbert, of Hawley, were guests at A. Clement's a few days this week.

R. J. McDonald made a trip to Glenvale on Friday.

Miss Demill, of Belleville, has returned home after spending a few days at H. Rankin's.

Heating and Sanitary Plumbing.

MADOLE & WILSON.

STELLA.

The oldest inhabitants of the island do not remember navigation being open so late as it has been this year. On January 31st the steamer Wolfe Islander made a trip to Stella; there was about seventy passengers, besides a lot of freight. All who took in the trip to Kingston were pleased, and many thanks to the officers of the steamers, and also the Wolfe Island council, for sending their steamer here. We expected that the Lake Ontario and Bay of Quinte Steamboat company would send a boat, but they failed to do so.

Our mail came over on the ice on Saturday.

R. Instant has rented W. G. McGinnis' store at Emerald, and has taken possession.

Either because the Grand Trunk Pacific promoters have found that they had underrated the amount of railway accommodation they could profitably provide in the northwest, or for some other reason not publicly avowed, they are now asking to be organized into a new corporation for the purpose of constructing branch lines, of which many have already been projected. This is one more indication of the rapidly growing importance of the new Province, Alberta and Saskatchewan. With the main lines and branch lines of the Grand Trunk Pacific Canadian Pacific, and Canadian Northern Companies, the whole northwest will soon be gridironed with railway lines that will all, owing to ease of construction, be immediately profitable.

The Economy of Burning Small Coal.

It is a common delusion that a small fuel must necessarily be of low calorific value, and accordingly of doubtful economic value even if it can be burned. As a matter of fact, many small fuels are of excellent calorific value, and when burned with suitable appliances will show a phenomenal saving. Again and again have I seen an evaporation of ten pounds of water per pound of fuel obtained with slack from Welsh steam coal costing from 5 to 6 shillings per ton less than the large coal. Slack from a good Welsh steam coal is really remarkable value for money as compared with the large coal from which it is separated. Generally speaking, twenty tons of such slack will evaporate fully as much water as nineteen tons of the large coal, and assuming their respective costs per ton to be 15 shillings and 20 shillings the saving to the steam user will be the difference in cost between twenty tons at 15 shillings per ton and nineteen tons at 20 shillings per ton, say £4.—W. F. Goodrich in Engineering Magazine.

Making Old Potatoes New.

This is the way new potatoes are manufactured in Paris: Old potatoes, the cheapest and smallest that can be purchased, are bought by the raffistoleurs de pommes de terre, as they are called, who carry their property to the banks of the Seine, a good supply of water being necessary. The potatoes are put into tubs half filled with water; then they are vigorously stirred about by the feet and legs of the manufacturers, who roll up their trousers and stamp on the raw potatoes until they have not only completely rubbed off their dark skins, but have also given them that smooth and satin-like appearance which is so much appreciated by gormands. They are then dried, neatly wrapped in paper and arranged in small baskets, which are sold at the marchands des comestibles for 5 francs apiece. The oddest part of the whole business is that the raffistoleurs make to secret of their trade.

A Chinaman's Bath.

Speaking of cleanliness in China Rev. E. J. Hardy says in his "John Chinaman at Home": "Before the Chinese were prohibited from emigrating to the Philippine Islands the fare from Amoy to Manila was for them \$75 first class, \$15 second. Those in the latter class had to take a bath before landing, so in order to escape this terror many used to travel first class who would otherwise have gone second. A whole family of Chinese will make their ablutions one after another in about a pint of unchanged water in the same basin."

Mr. Hardy tells of a conscientious servant: "The principal dish at breakfast was to be deviled turkey. 'Devil very bad word,' he said to himself. 'How can write?' The dish appeared as 'd-d turkey.'"

But the mistress interrupted calmly. 'Dear me!' she said. 'My husband's mother wasn't expected back from Texas till December.'"

Worldly Wisdom.

There is a certain young minister who has been remarkably successful in paying off the debts of the various churches to which he has been assigned from time to time. A brother minister who was laboring earnestly by means of bazaars, fairs and other affairs to accomplish a like happy result at his own church went to him and inquired the secret of his success.

"And I observe that you never have to resort to my present methods," he concluded.

The successful one smiled.

"No," he replied. "You see, when we need money some good sister suggests a bazaar. Then I call on the husbands of the married ladies of the membership and explain to them that in order to raise a certain sum we are finding it necessary to hold a bazaar. We have never had to actually bring the affair off."—Harper's Weekly.

Mozart's Memory.

Mozart had a memory for music and for nothing else. On attending the papal mass at the Sistine chapel he was greatly impressed with the musical service and asked for a copy, but was told none could be given him, as the music was not allowed to go out. He went to the next service, listened attentively, went away and wrote down the whole from memory. When "Don Giovanni" was first performed, there was not time to copy a part for the harpsichord, so Mozart conducted the entire opera, about three hours long, and played harpsichord accompaniment to the songs and choruses without a note of music to assist his memory.

MAKES WEAK WOMEN STRONG AND SICK WOMEN WELL.

Forty years ago, Dr. Pierce searched Nature's laboratory for a remedy with which to supplant the ignorant and vicious method of treatment, with alcoholic stimulants, then in vogue, and still too commonly prescribed and advised for woman's peculiar ailments.

Nature abounds with most efficient remedies, and in Lady's Slipper root, Black Cohosh root, Unicorn root, Blue Cohosh root and Golden Seal root, Dr. Pierce found medicinal properties, which when extracted and preserved by the use of chemically pure glycerine, have proven most potent in making weak women strong and sick women well. It contains no alcohol; is not a "patent medicine," nor a secret one either.

"I was suffering with nervous headache, pains in the back and the stomach, so that I had to lie down for hours before I could raise my head," writes Mrs. Mary M. Thomas, of 337 Winston Street, Los Angeles, Cal. "After taking the first bottle of Dr. Pierce's Favorite Prescription, however, I was so pleased with the results that I kept on taking it until I was restored to health and strength. I shall never be without this great medicine, and shall take a few doses when I do not feel strong."

One of the principal uses of Dr. Pierce's Favorite Prescription is the preparation of prospective mothers for the time of trial and danger that comes when a child is born. The "Prescription" is strengthening and invigorating and lessens pain and danger. It insures the perfect well-being and the perfect health of both mother and child. Every woman should know these things before she really needs to know them. There are many things in Dr. Pierce's Common Sense Medical Adviser, that every woman ought to know. This celebrated work reached a sale of 600,000 copies at \$1.50 each. The expense of production having thus been covered, it is now being given away. A copy will be sent to any address on receipt of 31 one-cent stamps to cover cost of mailing only, or, in cloth binding for 50 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

Don't Be Hoodwinked, hoodwinked, over-persuaded into accepting a substitute for the Original Little Liver Pills, first put up by old Dr. R. V. Pierce, over 40 years ago, and called Doctor Pierce's Pleasant Pellets. They've been much imitated but never equaled. One or two are laxative, three or four cathartic.

"Let the GOLD DUST TWINS do your work"

The Dog and The Shadow

You remember the fable of the dog who dropped a real bone for its shadow which he saw in the water. "Bear in mind that all is not Gold Dust that glitters under the name of washing powder. Don't accept a shadowy substitute; get the real

QUEER VOICE COLLECTIONS.

Collections of voices are being made for various purposes. The phonograms of the British Museum are designed to preserve for future generations the voices of famous people of our time; but the Vienna Academy of Sciences is going further, and seeks phonograms of languages and dialects for the comparative study of languages. Already its collection includes popular songs of gipsies and Arabians, favorite airs of Red Indian tribes, the idioms of Negroes and Malays, and so on. It is sending out special voice-hunting expeditions every year, and its agents are now scouring Australia, Roumania, Austria, and other localities. Its latest plan is to phonograph the voices of animals for scientific study.

SICK KIDNEYS.

Mean Aching Backs and Sharp Stabbing Pains That Make Life Almost Unendurable.

An aching, breaking back, sharp stabs of pain—that is kidney trouble. The kidneys are really a spongy filter—a human filter to take poison from the blood. But sick, weak kidneys cannot filter the blood properly. The delicate human filters get clogged with impurities, and the poison is left in the system to cause backaches, headaches, rheumatism, dropsy and fatal inflammation. Dr. Williams' Pink Pills are the one sure cure for sick kidneys. They make new, rich blood, which flushes them clean and gives them strength for their work. Dr. Williams' Pink Pills set the kidneys right, and make lame, aching backs strong and well. Mr. George Johnson, of the village of Ohio, N. S., says: "My son, now eighteen years old, suffered from kidney trouble and severe pains in the back, which caused him many a sleepless night. We tried several medicines, but they did not help him, and he grew so weak that he could not do the work that falls to the lot of a young boy on a farm. We were advised to try Dr. Williams' Pink Pills, and this was the first medicine that reached the cause of the trouble. He took the pills for a couple of months, when every symptom of the trouble was gone, and he was as healthy as any boy of his age. I am satisfied Dr. Williams' Pink Pills will cure kidney trouble in its most severe forms."

Dr. Williams' Pink Pills actually make new rich blood. In that way they strike at the root of anaemia, indigestion, kidney trouble, liver complaint, erysipelas, skin disease, neuralgia, St. Vitus dance, and the special ailments of growing girls and women whose health depends upon the richness and regularity of their blood. The genuine pills have the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box, and may be had from all dealers or by mail at 50 cents a box or six boxes for \$2.50 by writing the Dr. Williams' Medicine Co., Brockville, Ont.

"You used to tell me I was bird-like," complained the fond wife. The husband continued to bury his nose in the paper. "You used to tell me I was bird-like," repeated the fond wife; "but now you never act as if you thought so." "You're
